

Virtual Private Network (VPN)

SERVICE DESCRIPTION

The Virtual Private Network (VPN) service offers remote users access to the state's network using Active Directory for authentication. This service provides the following:

- Allows for a secure, encrypted tunnel to the state's network and data center
- Allows remote users to authenticate to their agency Local Area Networks (LANs)
- Allows access to e-mail, applications, and user/group shared resources

DET has two encrypted VPN service offerings:

- VPN Remote appliance to DET
- VPN Client to DET

The type of VPN solution implemented at each location is determined jointly between DET staff and the requesting agency.

Detailed Service Offering Description and Roles and Responsibility documents are available upon request.

PRICE

Please see the IT Services Rate Sheet for complete rate information.

HOW TO REQUEST

For more information please contact the Wisconsin Enterprise Service Desk (ESD) at 608-264-9383 or ESDhelp@wisconsin.gov.
