INTRODUCTORY SECTION

SCOTT WALKER GOVERNOR SCOTT A. NEITZEL SECRETARY Division of Executive Budget and Finance State Controller's Office Post Office Box 7932 Madison, WI 53707-7932 Voice (608) 266-1694 Fax (608) 266-1734 www.doa.state.wi.us/debf/

December 17, 2015

The Honorable Scott Walker The Honorable Members of the Legislature Citizens of the State of Wisconsin

We are pleased to submit the Comprehensive Annual Financial Report (CAFR) for the State of Wisconsin for the fiscal year ended June 30, 2015.

The State's CAFR is prepared by the Department of Administration, Division of Executive Budget and Finance, State Controller's Office, which is responsible for the completeness and reliability of the information contained in this report, based upon a comprehensive framework of internal controls that it has established for this purpose. Because the cost of internal controls should not exceed anticipated benefits, the objective is to provide reasonable, rather than absolute, assurance that the financial statements are free of any material misstatements.

This report has been prepared in accordance with generally accepted accounting principles (GAAP) for governments as promulgated by the Governmental Accounting Standards Board (GASB). To report the State's financial activity, the State's budgetary funds are grouped into the fund types required by GAAP. As a result, the State's 68 budgetary funds have been analyzed, restructured and are currently reported in 58 GAAP funds. The most significant change has been to reclassify certain activities from the budgetary General Fund and present them in proprietary and fiduciary fund types more appropriate for the financial reporting of transactions related to commercial and trust activities. Notes 1-C and 1-D to the financial statements include a more detailed discussion of the GAAP fund types.

Independent Audit

In compliance with Wis. Stat. Sec. 13.94 (1)(c), the State Legislative Audit Bureau has performed an examination of and has issued an unmodified opinion on the State's primary government basic financial statements included in this report. The independent auditor's report is located at the front of the financial section of this report.

Management Discussion and Analysis

GAAP requires that management provide a narrative introduction, overview, and analysis to accompany the basic financial statements in the form of Management's Discussion and Analysis (MD&A). This letter of transmittal is designed to complement MD&A and should be read in conjunction with it. The State's MD&A can be found immediately following the auditor's report.

PROFILE OF THE STATE

The State of Wisconsin was admitted to the Union as the 30^{th} state in 1848. Wisconsin, situated between Lake Michigan to the east and the Mississippi River to the west, covers 54,310 square miles and serves a population of 5.7 million.

Wisconsin government is divided into three branches. The executive branch, headed by the governor, includes five other elected constitutional officers, as shown on the organization chart on Page 12. The legislative branch includes the Wisconsin Legislature, which is composed of a 33-member senate and a 99-member assembly. The judicial branch includes the Wisconsin Supreme Court, the Court of Appeals, and circuit courts.

The State provides a full range of services that include commerce, education, transportation, environmental resources, human relations and resources, judicial, legislative and general administrative services. The financial statements present information on the financial position and operations of State government as a single comprehensive reporting entity. The various agencies, departments, boards, commissions and accounts of the State that constitute the State reporting entity are included in this report.

Component Units

In accordance with criteria established by the GASB, this report also includes component units which are legally separate organizations for which the State is financially accountable or receives a substantial benefit.

Despite ties with the State, discretely presented component units function independently. These are, therefore, presented separately from the data of the State. Discretely presented component units include the Wisconsin Housing and Economic Development Authority, Wisconsin Health Care Liability Insurance Plan, University of Wisconsin Hospitals and Clinics Authority, Wisconsin Economic Development Corporation, and the University of Wisconsin Foundation.

Although legally separate, a blended component unit is, in substance, part of the State's operations. The Wisconsin Public Broadcasting Foundation, Inc., is the State's only blended component unit.

Budgetary Process

The State's biennial budget is prepared on a mixture of cash and modified accrual bases of accounting and represents departmental appropriations based on agency requests reviewed by the Department of Administration and recommended by the Governor. The Governor's budget is submitted to the State Legislature for approval. Following debate, amendment and approval by the Senate and Assembly, the budget bill is returned to the Governor for his signature or veto in entirety or in part.

The State Constitution provides that no money shall be paid out of the Treasury except as appropriated by law. The Statutes require that the Secretary of Administration must approve all payments. The Department of Administration exercises detail allotment control over all agency appropriations and approval authority over all encumbrances.

The budgetary basis of accounting required by State law differs materially from the basis used to report revenues and expenditures in accordance with GAAP. The State's biennial budget is developed according to the statutorily required fund structure that, as previously noted, differs extensively from the fund structure used in the financial statements.

Wisconsin Retirement System and Accumulated Sick Leave Conversion Credits Program

The Wisconsin Retirement System (WRS) is a pension plan administered by the Department of Employee Trust Funds (DETF). The WRS provides coverage to all eligible employees of the State of Wisconsin and other participating local units of government. The most current actuarial valuations of this pension plan indicated that the WRS was funded at 100.0 percent of liabilities for the 603,983 participants of the WRS. The State's contribution to WRS represents approximately 31.8 percent of total contributions required of all participating entities.

The Accumulated Sick Leave Conversion Credits (ASLCC) benefit program, reported in a fiduciary fund and also administered by DETF, allows employees at the time of their retirement to convert the value of their accumulated unused sick leave into an account to be used to pay for post-retirement health insurance. The actuarial value-based funded ratio of this program was 99.2 percent as of December 31, 2014 (the date of the most recent valuation).

ECONOMIC CONDITION AND OUTLOOK

In 2015, Wisconsin continued its economic rebound from the Great Recession of 2007-09. While some components of our economy are linked to national trends, we have outperformed both the Great Lakes region and the nation on important indicators:

- Wisconsin's unemployment rate remains lower than the national rate and is below the rates of other states in the Great Lakes region.
- Wisconsin's labor force participation rate of 68.2 percent was the ninth highest nationally in 2014 and well above the national average of 62.9 percent.
- Wisconsin's growth in gross domestic product since 2007 exceeds the region's growth over the same period.
- Wisconsin's per capita income growth since 2007 has exceeded the nation's and the region's growth.
- Wisconsin's median household income, \$58,080, is 8.2 percent above the national average, which is the largest margin by which Wisconsin has exceeded the national average in almost 15 years.

Strong economic growth bolstered tax collections across the major tax categories. Total general fund tax collections increased 4.3 percent in Fiscal Year 2015 from Fiscal Year 2014. Individual income tax collections rose 3.7 percent, sales and use taxes rose 5.7 percent, and corporate income taxes increased 3.9 percent. Collections modestly exceeded revised estimates, mostly due to stronger growth in corporate tax receipts. This revenue growth was possible even while providing meaningful tax reductions including a reduction in the lowest individual income tax rate and the continued phase-in of the Manufacturing and Agriculture Credit.

Looking ahead, Wisconsin's economic recovery is expected to maintain consistent growth. According to the most recently released outlook by the Wisconsin Department of Revenue, Wisconsin's gross domestic product is projected to rise 4.0 percent in 2015 and 4.1 percent in 2016, in line with the projected national rate of increase of 4.2 percent and 4.5 percent in those years, respectively. Total nonfarm employment in Wisconsin is expected to increase 1.5 percent in 2015 and 1.4 percent in 2016. Nationally, nonfarm employment is expected to increase 2.3 percent in 2015 and 1.8 percent in 2016. Wisconsin personal income growth is projected to increase 3.0 percent in 2015 and 3.6 percent in 2016. While this is slightly below the expected personal income growth nationally of an increase of 3.9 percent in 2015 and 4.6 percent in 2016, it is similar on a per capita basis.

The State of Wisconsin continues to maintain its commitment to solid financial responsibility. The State's Budget Stabilization Fund ended Fiscal Year 2015 with a balance of \$280 million, the highest balance ever in this "rainy day" fund. Overall cash balances reached \$1.37 billion. The State's fully funded pension system and minimal other postemployment benefit (OPEB) liabilities set Wisconsin apart from the vast majority of states. Improvements in the State's finances led Moody's Investors Services, Inc., to change the State's outlook on Wisconsin's general obligations from "stable" to "positive" in November 2014. The State's generally accepted accounting principles (GAAP) deficit, measured as a percent of general fund expenditures, declined from 20.3 percent in Fiscal Year 2003 to 9.4 percent in Fiscal Year 2014. The 2015-17 biennial budget (2015 Wisconsin Act 55) included the lowest amount of new bonding in 20 years.

Wisconsin continued to build its economic recovery through economic development and infrastructure investment, reconciling government spending with revenues without raising taxes and providing \$751.1 million more to provide coverage to the Medicaid population over the 2013-15 biennium. Since Fiscal Year 2011, state funding for the Medicaid program has grown from \$1.45 billion to \$2.52 billion in Fiscal Year 2015. No other state program has received an increase approaching this level of magnitude.

Continued property tax controls and rising support for general school aids, technical college aids and property tax credits have kept property taxes down in Wisconsin for the typical homeowner. As a result, the property taxes on the median value home in Wisconsin have declined in each of the last four years. In addition, tuition at the University of Wisconsin for state residents was kept affordable through a tuition freeze for both the 2013-14 and 2014-15 academic years.

MAJOR INITIATIVES

Economic Development. Wisconsin enacted a major individual income tax cut in 2013 Wisconsin Act 20, effective beginning with tax year 2013. A further tax rate reduction was enacted for tax year 2014 by 2013 Wisconsin Act 145. Together, the tax cuts reduced marginal rates in all income tax brackets, taking the rate structure from rates of 4.6 percent, 6.15 percent, 6.5 percent, 6.75 percent and 7.75 percent to 4.0 percent, 5.84 percent, 6.27 percent and 7.65 percent. The former 6.75 percent bracket was eliminated so that the range of taxable income previously subject to this bracket is now subject to the 6.27 percent rate. Over the 2013-15 biennium, these cuts saved Wisconsin taxpayers approximately \$750 million and will save taxpayers about \$420 million annually in future years.

In addition to providing tax relief to individuals, Wisconsin has continued its commitment to improve the State's tax climate for manufacturing and agriculture. For taxable years beginning in 2013, the Manufacturing and Agriculture Tax Credit is available for income derived from manufacturing or agricultural property located in Wisconsin. The credit will be phased in over a four-year period and will offer significant income tax relief for eligible claimants. Starting in tax year 2016, the credit will equal 7.5 percent of manufacturing and agriculture income sourced to Wisconsin production.

To further spur economic growth, 2015 Wisconsin Act 55, the 2015-17 Biennial Budget, provided an increase in the number of eligible zones under the Enterprise Zones Jobs Credit from 20 to 30 to allow more businesses to become eligible for this powerful incentive. The budget also consolidated two existing incentives, the nonrefundable Economic Development Tax Credit and the refundable Jobs Tax Credit, into a single streamlined refundable tax credit called the Business Development Tax Credit. This credit provides a single set of criteria for awards related to job creation and retention, workforce training, capital investment, and headquarters retention and relocation. Up to \$17 million in the new credits may be awarded in 2016 and \$22 million may be awarded annually beginning in 2017.

In addition, the State offers a variety of programs that target minority and rural business development, dairy manufacturing, and agricultural production. Through the end of Fiscal Year 2015, over 650 businesses had been certified as minority-owned to increase the opportunity for these firms to sell their products and services to the State of Wisconsin. In addition, a variety of sales tax exemptions for fuel, electricity, farm machinery, veterinary services, and other personal property and supplies have reduced farming costs in the State by over \$200 million annually.

The Farmland Preservation Credit programs provide credits to approximately 14,000 farmers and 250 corporate claimants who qualify through exclusive agricultural or farmland preservation zoning or individual farmland preservation agreements. Two separate calculations of, and qualifications for, the credit were available in Fiscal Year 2015 – one based on income and the other based on the number of acres and other criteria. Combined expenditures under the Farmland Preservation Credit programs totaled \$19.1 million in Fiscal Year 2015, a decrease of \$0.2 million compared with Fiscal Year 2014. Wisconsin's Farmland Preservation Credit is one of only two similar state programs in the country.

In 2015, Wisconsin was home to more than 9,800 dairy farms with more than 1.27 million cows. Wisconsin's milk production continues to grow as the dairy farms in the state yielded 27.8 billion pounds of milk in 2014, an increase of 0.8 percent over the all-time record of 27.6 billion set in 2014. Wisconsin accounts for almost 14 percent of the nation's milk production. Milk production per cow in Wisconsin continues to grow and was at 21,869 pounds per year in 2014. Dairy production and processing accounts for almost half of all the economic activity associated with agriculture: \$43.4 billion in economic activity, accounting for nearly 79,000 jobs. In 2014, Wisconsin was the nation's top cheese producing state with 2.9 billion pounds of cheese or more than 25 percent of the nation's cheese production. Wisconsin's specialty cheese production continues to increase, producing 660 million pounds in 2014. Begun in 2012, the Grow Wisconsin Dairy 30x20 grant program is designed to sustain the long-term viability of Wisconsin's dairy industry by helping farmers improve efficiencies and enhance profitability, which in turn can help in achieving an annual milk production of 30 billion pounds by 2020. In 2015, the program awarded grants to 39 recipients to meet the growing demands of the marketplace.

In 2014, Wisconsin's \$3.6 billion in agricultural exports ranked 13th among U.S. states. Top export markets were Canada, Mexico, China, Korea and Japan; and top product categories included dairy products, miscellaneous food, ethanol and raw furskins. Exports of raw furskins rose 52 percent from 2013, reaching \$268 million in 2014. Wisconsin led the nation in 2014 in exports of bovine genetics, whey, cranberries, sweet corn and ginseng roots.

In order to focus directly on private sector job creation, the Wisconsin Economic Development Corporation was created in 2011 Wisconsin Act 7 to serve as the State's economic development entity. A public-private partnership, this authority replaced the Department of Commerce, and focuses exclusively on developing and implementing economic programs to assist companies that are investing and creating jobs in Wisconsin, and supporting new business start-ups and business expansion and growth in the State.

The State continued to encourage private investment in entrepreneurial activities with the Angel Investment and Early Stage Seed Investment tax credit programs, which initially became effective for tax years beginning after January 1, 2005. Through the programs, individuals and businesses are eligible for tax credits equal to a portion of the investment made in qualified new business ventures. In Fiscal Year 2015, 25 new companies were certified as qualified new business ventures – raising the total number of qualified new business ventures to 167.

During the recession, similar to much of the nation, Wisconsin experienced record claims for unemployment benefits. In June 2010, Wisconsin administered roughly 108,000 weekly continued claims. The number of continued claims had fallen to approximately 75,000 by the last week of June 2012 and continued to decrease as the economy improved and certain benefit extensions expired. As of late June 2015, weekly continued claims were approximately 41,800, a 24 percent decrease from Fiscal Year 2014.

As the economy improved, the Governor addressed the state's need for an increasingly skilled workforce by creating the Wisconsin Fast Forward program in Fiscal Year 2014, administered by a new Office of Skills Development in the Department of Workforce Development. The program provides funding for employer-led customized training for new or current employees. In Fiscal Year 2015, Wisconsin Fast Forward awarded over \$6.5 million in worker training grants across a number of industry segments including information technology, financial services, health care, agriculture, manufacturing, transportation, construction and small business. These grants augmented the skills of an estimated 6,800 Wisconsin workers. Additionally, the Department of Workforce Development continued in Fiscal Year 2015 to utilize funding provided for the Blueprint for Prosperity initiative to train workers with disabilities.

Transportation. The State continued to make significant investments in transportation infrastructure through reconstruction of existing highways and bridges and through aid to local governments.

In Fiscal Year 2015, 441 miles of State Trunk Highway and local highways were improved and 266 deficient state and local bridges were rehabilitated or replaced. Also in Fiscal Year 2015, the State contributed over \$270.6 million to continue work on the Zoo Interchange and \$103.4 million for work on USH 41. In all, more than \$1.53 billion in construction projects on State and local road systems were contracted through the Department of Transportation.

The State has also committed general fund revenue to support investments in transportation infrastructure. In Fiscal Year 2015, 0.25 percent of total annual general fund tax revenue, amounting to \$36.3 million, was dedicated to the transportation fund. In addition, the transportation fund received a \$133.3 million one-time transfer from the general fund. The 2013-15 Biennial Budget also authorized \$200 million of general fund supported general obligation bonds for transportation projects.

As part of the State's continuing commitment to efficiency, the Department of Transportation utilizes innovations in technology and construction methods that can save customers time and reduce long-term costs. Examples include:

- Continued implementation of "e-Construction" the collection, review, approval and distribution of highway construction contract documents in a paperless environment. In 2015, progress included implementing electronic consultant invoicing, expanding the use of mobile devices and piloting an electronic signature/approval system.
- Implementation of Civil 3D design software, which produces a three-dimensional model that can be used by contractors to employ global positioning system machine-controlled construction equipment. By saving time and improving accuracy, this technology has the potential to reduce costs and improve quality.
- Hot Mix Asphalt specification changes were implemented to improve the quality of asphalt and increase the service life of Wisconsin's roadways.
- A streamlined replacement process for traffic, directional and informational signs is reducing costs. Replacements are now planned on a corridor basis and signs are shipped directly to the county for installation, resulting in a 30 percent cost savings. This savings will be reinvested to replace additional worn-out signs to improve visibility and enhance safety on more roadway segments.
- The use of innovative bridge design and construction techniques are improving safety and reducing costs.
 - The Department of Transportation received \$676,000 from the Federal Highway Administration Accelerated Innovation Deployment program to replace two structurally deficient bridges in Dodge County using Geosynthetic Reinforced Soil Integrated Bridge System technology. This system can be constructed by smaller, nonbridge construction contractors and has the potential to lower costs, cut construction time, improve durability and provide a smooth transition from the roadway to the bridge.
 - The department also received a \$350,000 federal grant to use prefabricated bridge elements and systems for five structures along the I-39/90 corridor. Because the prefabricated elements are built under controlled environmental conditions, weather-related impacts are eliminated, resulting in improved product quality and durability.
- Enhancements to the Division of Motor Vehicles (DMV) systems now allow the electronic transmission and update of medical information from providers. This new service allows physicians to certify a patient's eligibility for disabled parking privileges and eliminates a trip to a DMV Customer Service Center, as the electronic submittal generates the mailing of the required placard to the customer.
- An on-line driver license guide may now be accessed that provides DMV customers information on their eligibility status, a checklist of the documents to take to a DMV Customer Service Center and a prefilled application form.

The department also continued its emphasis on transportation safety. The Bureau of Transportation Safety within the Division of State Patrol organized and funded 23 multijurisdictional operating while intoxicated enforcement task forces, 12 seat belt task forces, 23 speed enforcement task forces and three pedestrian task forces. Officers from 198 law enforcement agencies participated in these efforts. Significant media attention helped reduce traffic fatalities and change roadway behavior related to drinking, speeding and seatbelt use.

Wisconsin also distributes state transportation user fee revenues to local governments for transportation infrastructure improvements and transit operating assistance, targeting economic and infrastructure development. In Fiscal Year 2015, \$615.7 million was provided to local governments for these purposes. For example, the Transportation Economic Assistance program provides up to 50 percent State grant funding to governing bodies, private businesses and consortia for road, rail, harbor and airport projects that help attract employers to Wisconsin, or encourage business and industry to remain and expand within the State. In Fiscal Year 2015, this program leveraged \$5.27 in capital investments for every \$1 in grants.

Environment. Wisconsin's Warren Knowles-Gaylord Nelson Stewardship Program and its successor, the Warren Knowles-Gaylord Nelson Stewardship 2000 Program, are available for land acquisition, easements and nature-based outdoor recreational property development activities. The original Stewardship Program committed \$250 million through the sale of general obligation bonds and the use of federal grant monies for various resource development and land protection activities, including acquisition of State park lands, protection of urban rivers and assistance to local parks. The program was reauthorized in 2007 Wisconsin Act 20 through Fiscal Year 2020 with an annual bonding authority of \$86 million beginning in Fiscal Year 2011. The 2011-13 Biennial Budget subsequently reduced the annual bonding authority to \$60 million beginning in Fiscal Under 2013 Wisconsin Act 20, the annual bonding authorization was reduced further to Year 2012. \$47.5 million in Fiscal Year 2014 and \$54.5 million in Fiscal Year 2015. Finally, under 2015 Wisconsin Act 55, the annual authorization was reduced to \$33.3 million in Fiscal Years 2016 through Fiscal Year 2020. During the 2013-15 biennium, the State used \$56.7 million in Stewardship Program financing to acquire over 50,964 acres of public recreational land through acquisition and recreational easements. This total includes Stewardship grants totaling \$28.1 million to local governments and nonprofit conservation organizations for the acquisition of easements and title in fee, and \$28.6 million for Department of Natural Resources acquisitions and easement purchases.

In addition to land acquisition through the Stewardship Program, Wisconsin's efforts to protect and enhance its natural resources include partnerships with individual landowners. In November 2001, the State entered into an agreement with the U.S. Department of Agriculture for the authority to enroll up to 100,000 acres of Wisconsin farmland in the Conservation Reserve Enhancement Program. The federal government will provide up to \$200 million for the program, which will be matched by the State with up to \$28 million from the sale of general obligation bonds. As of October 1, 2015, approximately 46,600 acres had been enrolled in the program, and total State payments to landowners amounted to just over \$13.1 million. The state's payments to date will leverage an anticipated \$132.1 million in federal payments to program participants over the course of the program contracts.

Wisconsin's Environmental Improvement Fund program provides financial assistance to municipalities for the planning, design and construction of wastewater collection and treatment, and drinking water treatment and distribution facilities. Most communities applying for assistance receive subsidized loans, although some wastewater projects are eligible for partial grants through a hardship component of the program. Funding is provided from a State-matched federal capitalization grant and through State revenue and general obligation bonds and repayments from loans previously made. In Fiscal Year 2015, the Environmental Improvement Fund awarded \$210.3 million to municipalities, bringing the total amount of loans and grants awarded by the program to \$4.7 billion since its inception in 1991. The funding has financed high priority infrastructure projects to ensure clean water and safe drinking water across the state.

The Petroleum Environmental Cleanup Fund Award program assists owners of leaking petroleum storage tanks with environmental remediation costs and has provided \$1.536 billion for cleanups at 13,340 locations (12,602 now closed) since 1988. Efforts to minimize claim payment backlogs and improve site closure methodologies have streamlined the program while protecting the environment and public health.

Human Resources. In Fiscal Year 2015, Medical Assistance program expenditures continued to grow, as did total program enrollment for the first time in three years. Fiscal Year 2015 expenditures for the Medical Assistance program increased 6.2 percent over the prior year, compared to the 6.0 percent growth in Fiscal Year 2014 and 3.0 percent growth in Fiscal Year 2013. Medical Assistance expenditures from all funds totaled \$8,736.3 million. Enrollment in the Medical Assistance programs increased by 2.6 percent between Fiscal Years 2014 and 2015, compared to a decrease of 0.4 percent between Fiscal Years 2013 and 2014.

Enrollment trends varied within eligibility groups due to programmatic changes implemented on April 1, 2014. On that date, the enrollment cap for childless adults was removed and full Medicaid coverage under BadgerCare Plus was extended to all adults without dependent children at or below 100 percent of the federal poverty level. Additionally, BadgerCare Plus eligibility for parents and caretakers was reduced from 200 percent to 100 percent of the federal poverty level; and households above 100 percent of the federal poverty level were transitioned from Medicaid to the federal health exchange. These initiatives have combined to provide 100 percent access to coverage for Wisconsinites, according to the Kaiser Family Foundation.

Average monthly enrollment of low-income adults and children in the BadgerCare Plus program increased by 6.2 percent, while the average monthly enrollment of elderly individuals and people with disabilities increased by 2.4 percent, approximately 4,900 individuals per month.

Expenditures for the SeniorCare pharmacy assistance program totaled \$88.9 million all funds, an increase of \$2.9 million from Fiscal Year 2014. This increase is due to several factors including an increase in drug utilization and benefits paid to each enrollee in Fiscal Year 2015, as well as an increase in overall SeniorCare enrollment of 1.6 percent.

The Department of Children and Families continued the State's commitment to seek permanent placements for children referred to the State's child welfare system in Fiscal Year 2015. This included finalizing 592 adoptions for children with special needs in Fiscal Year 2015. In other program areas, the department continued to reduce fraud in the Wisconsin Shares program, which provides subsidized child care to low-income working families. These efforts helped hold Wisconsin Shares program expenditures in Fiscal Year 2015 to \$251.4 million, which was approximately \$3.8 million below Fiscal Year 2014 expenditures and \$23.3 million below the amount originally budgeted for Fiscal Year 2015. Under Wisconsin Shares, a monthly average of 46,131 children received subsidies in Fiscal Year 2015. Benefit payments under the Wisconsin Works (W-2) program for Fiscal Year 2015 totaled \$80.6 million, a decrease of \$17.6 million from the Fiscal Year 2014 amount. An average of 13,231 families received cash benefits each month in Fiscal Year 2015 under the W-2 program. During Federal Fiscal Year 2015, state and county child support partnership efforts provided full case management services to 384,025 cases and provided financial management services to an additional 143,697 cases.

Education. School aids and property tax credits, which supported school districts' 2014-15 costs for elementary and secondary education, totaled \$6.15 billion.

In Fiscal Year 2015, the Governor provided school districts with augmented funding by increasing state support for schools by \$162.5 million, or 2.7 percent. This amount included additional funding for general aid and per pupil aid, with the payment in the latter program increasing from \$75 per student to \$150 per student. The Governor also provided schools with a \$75 per pupil adjustment to revenue limits to give districts additional budgeting flexibility. The low revenue threshold, below which school districts are exempt from revenue limit controls, remained frozen at \$9,000 per pupil. While per pupil amounts for parental choice program students increased after being frozen since the 2009-10 school year, the Governor continued to shrink the school aid reductions that comprise the local share of Milwaukee parental choice program funding. This modification reduces the portion of the property tax levy used to backfill the district's aid reductions. These measures helped keep the increase in the statewide school property tax levy at 1.3 percent compared to an average of 3.0 percent over the previous 10 years.

State support for the University of Wisconsin System totaled \$889.3 million in Fiscal Year 2015; a \$22.1 million, or 2.4 percent, decrease from Fiscal Year 2014 funding that reflects decreased debt service costs. To maintain a reasonable cost of higher education for state residents, the Governor continued a freeze on in-state undergraduate tuition rates and maintained steady support for state financial aid programs. As a measure of affordability, the University of Wisconsin-Madison ranked ninth among public colleges and universities in Kiplinger's "Best Value Colleges" in 2015.

AWARDS AND ACKNOWLEDGEMENTS

Award

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a "Certificate of Achievement for Excellence in Financial Reporting" to the State of Wisconsin for its Comprehensive Annual Financial Report for the fiscal year ended June 30, 2014. The Certificate of Achievement is a prestigious national award recognizing conformance with the highest standards for preparation of state and local government financial reports.

In order to be awarded a Certificate of Achievement, a government unit must publish an easily readable and efficiently organized comprehensive annual financial report whose contents conform to program standards. Such reports must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. This is the 19th year the State has received this award. We believe our current report continues to conform to the Certificate of Achievement Program requirements, and we are submitting it to the GFOA.

Acknowledgements

We wish to express our appreciation to the many individuals whose dedicated efforts have made this report possible. The preparation of this report could not have been accomplished without the professionalism and dedication demonstrated by the financial managers and accountants of the State agencies and component units, along with staff within the State Controller's Office.

Sincerely,

Seath. A- tal

Joe Chrisman State Auditor

Independent Auditor's Report on the Financial Statements and Other Reporting Required by Government Auditing Standards

Honorable Members of the Legislature

The Honorable Scott Walker, Governor

Report on the Financial Statements

We have audited the accompanying financial statements and the related notes of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Wisconsin, which collectively comprise the State's basic financial statements, as of and for the year ended June 30, 2015, as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management of the State of Wisconsin is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America. This includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements for the following: the Environmental Improvement Fund, which is a major fund and represents 18 percent of the assets and 17 percent of the liabilities of the business-type activities; and the College Savings Program Trust, which represents 4 percent of the assets of the aggregate remaining fund information. Those financial statements were audited by other auditors whose reports have been furnished to us, and our opinions, insofar as they relate to the amounts included for these programs, are based solely on the reports of the other auditors. In addition, we did not audit the financial statements of the discretely presented component units. Our opinion on the aggregate discretely presented component units is based solely upon audit reports, prepared by other auditors and furnished to us, of the Wisconsin Housing and Economic Development Authority, the University of Wisconsin Hospitals and Clinics Authority, and the University of Wisconsin Foundation.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government* Auditing Standards, which is issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about

whether the financial statements are free from material misstatement. The financial statements for the following were audited by other auditors in accordance with these standards: the Environmental Improvement Fund, the College Savings Program Trust, the Wisconsin Housing and Economic Development Authority, and the University of Wisconsin Hospitals and Clinics Authority. The financial statements of the University of Wisconsin Foundation were audited by other auditors in accordance with auditing standards generally accepted in the United States of America, but not in accordance with *Government Auditing Standards*.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the State's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the State's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinions on these financial statements.

Opinions

In our opinion, based on our audit and the reports of other auditors, the financial statements referred to in the first paragraph present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Wisconsin as of June 30, 2015, and the respective changes in financial position and, where applicable, cash flows for the fiscal year then ended in accordance with accounting principles generally accepted in the United States of America.

Emphases of Matter

As discussed in Note 1C to the basic financial statements, the State implemented Governmental Accounting Standards Board (GASB) Statement Number 68, *Accounting and Financial Reporting for Pensions—an amendment of GASB Statement No.* 27, and GASB Statement Number 71, *Pension Transition for Contributions Made Subsequent to the Measurement Date—an amendment of GASB Statement No.* 68. These statements revise accounting and financial reporting for pensions by state and local government employers. Our opinions are not modified with respect to this matter.

As discussed in Note 20C to the basic financial statements, the Injured Patients and Families Compensation Fund's loss liabilities related to medical malpractice claims are estimates based on recommendations of a consulting actuary. The Fund's Board of Governors and management believe the estimated loss liabilities are reasonable and represent the most probable estimate of the losses the Fund will pay for the claims incurred to date. However, there are inherent uncertainties in estimating the medical malpractice loss liabilities because of the Fund's unlimited liability coverage for economic damages, as well as the extended reporting and settlement periods. These uncertainties make it likely that amounts paid will ultimately differ from the reported estimated loss liabilities. These differences cannot be quantified. Our opinion for this Fund is not modified with respect to this matter.

Other Matters

Required Supplementary Information—Accounting principles generally accepted in the United States of America require that the Management's Discussion and Analysis, the schedule of funding progress for the state retiree health insurance postemployment benefit plan, the schedule of the State's proportionate share of the net pension liability or asset, the schedule of the State's pension contributions, the infrastructure narrative, and the budgetary comparison schedule with related notes, as listed in the table of contents, be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by GASB, which considers this information to be essential for placing the basic financial statements in an appropriate operational, economic, or historical context. In accordance with auditing standards generally accepted in the United States of America, we have applied certain limited procedures to the required supplementary information that included inquiries of management about the methods of preparing the information. We further compared the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to do so.

Accompanying Information—Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the State's basic financial statements. The combining statements and schedule in the supplementary information section, as listed in the table of contents, are presented for purposes of additional analysis and are not a required part of the basic financial statements. Such information is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. The combining statements and schedule have been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the combining statements and schedule are fairly stated in all material respects in relation to the basic financial statements as a whole.

The introductory and statistical sections, as listed in the table of contents, are presented for purposes of additional analysis and are not a required part of the basic financial statements. The introductory and statistical sections have not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we do not express an opinion or provide any assurance on them.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we will also issue a report dated December 17, 2015, on our consideration of the State's internal control over financial reporting; our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements; and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be used when considering the State's internal control over financial reporting and compliance.

LEGISLATIVE AUDIT BUREAU

Joe Chrisman State Auditor

December 17, 2015

MANAGEMENT'S DISCUSSION AND ANALYSIS

The *Management's Discussion and Analysis* of the State of Wisconsin's Comprehensive Annual Financial Report (CAFR) presents a discussion and analysis of the State's financial performance during the fiscal year that ended June 30, 2015. It should be read in conjunction with the transmittal letter located at the front of this CAFR, and the State's financial statements, including the note disclosures which are an integral part of the statements, that follow this part of the CAFR.

FINANCIAL HIGHLIGHTS -- PRIMARY GOVERNMENT

Government-wide (Tables 2 and 3 on Pages 24 and 25)

- Net Position. The assets plus deferred outflows of resources of the State of Wisconsin exceeded its liabilities plus deferred inflows of resources at the close of Fiscal Year 2015 by \$22.0 billion (reported as "net position"). Of this amount, \$(8.6) billion was reported as "unrestricted net position". A positive balance in unrestricted net position would represent the amount available to be used to meet a government's ongoing obligations to citizens and creditors.
- Changes in Net Position. The State's total net position increased by \$1.3 billion in Fiscal Year 2015. Net position of governmental activities increased by \$589.1 million or 11.7 percent, while net position of the business-type activities showed an increase of \$721.0 million or 13.8 percent.
- Excess of Revenues over (under) Expenses -- Governmental Activities. During Fiscal Year 2015, the State's total revenues for governmental activities of \$28.2 billion were \$1.7 billion more than total expenses (excluding transfers) for governmental activities of \$26.5 billion. Of these expenses, \$11.9 billion were covered by program revenues. General revenues, generated primarily from various taxes, totaled \$16.3 billion.

Fund

- Governmental Funds -- Fund Balances. As of the close of Fiscal Year 2015, the State's governmental funds reported combined ending fund balances of \$(438.0) million, a decrease of \$527.3 million in comparison with the prior year. Of this total amount, \$(3.3) billion represents the unassigned fund balances.
- General Fund -- Fund Balance. At the end of the current fiscal year, total fund balance was \$(1.8) billion, a change of \$(413.7) million from a deficit of \$(1.4) billion reported in the prior year. The unassigned fund deficit for the General Fund was \$(2.4) billion, or (10.5) percent of total General Fund expenditures.

Additional information regarding individual funds begins on Page 29.

Long-term Debt

The State's total long-term debt obligations (bonds and notes payable) increased by \$3.6 million during the current fiscal year which represents the net difference between new issuances, payments and refundings of outstanding debt. Increases in debt resulted from new borrowings in excess of repayments of existing debt. During the year issuances of new general obligations exceeded repayments and refundings of debt by \$188.6 million. Offsetting that increase, revenue bond repayments exceeded new issuances by \$121.3 million and annual appropriation bonds totaling \$63.6 million were repaid. Additional detail regarding these activities begins on Page 34.

OVERVIEW OF THE FINANCIAL STATEMENTS

The Financial Section of this CAFR consists of four parts: (1) **management's discussion and analysis** (this section), (2) **basic financial statements**, (3) additional **required supplementary information**, and (4) optional **other supplementary information**. Parts (2), (3), and (4) are briefly described on the following pages:

Basic Financial Statements

The basic financial statements include two sets of statements that present different views of the State -- the **government-wide** *financial statements* and the *fund financial statements*. These financial statements also include notes that explain some of the information in the financial statements and provide more detail.

- The government-wide financial statements provide a broad view of the State's operations. The statements provide both short-term and long-term information about the State's financial status, which assists in assessing the State's financial condition at the end of the fiscal year.
- The *fund financial statements* focus on individual parts of the State government, reporting the State's operations in greater detail than the government-wide statements. The basic fund financial statements provide more detailed information on the State's most significant funds.

	Major Features of State o	Table 1 f Wisconsin's Government-w	vide and Fund Financial State	ements					
	GOVERNMENT-WIDE STATEMENTS	FUND STATEMENTS							
		Governmental Funds	Proprietary Funds	Fiduciary Funds					
Scope	 Entire State government (except fiduciary funds) and the State's component units, reported as follows: Governmental Activities – Most services generally associated with State government fall into this category, including commerce, education, transportation, environmental resources, human relations and resources, general executive, judicial and legislative. Business-Type Activities – Those operations for which a fee is charged to external users for goods and services are reported in this category. Discretely Presented Component Units – These are operations for which the State has financial accountability but that have certain independent qualities. The State's discretely presented component units are discussed in Note 1-B to the financial statements. 	These funds report activities of the State that are not proprietary or fiduciary in nature. Most of the basic services provided by the State, which are primarily financed through taxes, intergovernmental revenues, and other nonexchange revenues, are reported as governmental funds. Examples of the State's governmental funds (including the State's three major governmental funds), as reported within their respective fund types, follow: • General Fund (major fund) • Special Revenue: • Transportation (major fund) • Debt Service: • Bond Security and Redemption • Capital Projects: • Capital Improvement (major fund) • Permanent: • Common School	The activities the State operates similar to private business. These funds are used to show activities that operate more like those of commercial enterprises. Fees are charged for services provided, both to outside customers and to other units of the State. Examples of the State's proprietary funds, including the State's four major enterprise funds, follow: • Enterprise: - Injured Patients and Families Compensation (major fund) - Environmental Improvement (major fund) - University of Wisconsin System (major fund) - Lottery • Internal services: - Technology Services - Facilities Operations and Maintenance	 These funds are used to show assets held by the State as trustee or agent 1 others and cannot be used to support the State's own programs. Examples of the State's fiduciary fund as reported within their respective fun types, follow: <i>Pension and Other Employee</i> Benefit Trust Funds: Wisconsin Retirement System Investment Trust: Local Government Pooled Investment Private Purpose Trust: College Savings Program Trust Agency: Support Collection Trust 					
Required financial statements	 Statement of net position – Presents all of the government's assets and deferred outflows of resources, and liabilities and deferred inflows of resources, with the difference between the two reported as "net position". Over time, increases or decreases in the state's net position is an indicator of whether its financial health is improving or weakening, respectively. Statement of activities – Presents a comparison between direct expenses and program revenues for each function of the State's governmental activities and for different identifiable business-type activities of the State. 	 Balance sheet Statement of revenues, expenditures, and changes in fund balances 	 Statement of net position Statement of revenues, expenses and changes in fund net position Statement of cash flows 	 Statement of fiduciary net position Statement of changes in fiduciary net position Because the State cannot use these assets to finance its operations, fiduciary funds are not included in the government-wide financial statements discussed in the left column. 					

Table 1, below, summarizes the major features of the financial statements.

	Major Features of State of	Table 1 (Continued) Wisconsin's Government-wie	de and Fund Financial State	ments
	GOVERNMENT-WIDE STATEMENTS		FUND STATEMENTS	
		Governmental Funds	Proprietary Funds	Fiduciary Funds
Accounting basis and measurement focus	Accrual accounting and economic resource focus	Modified accrual accounting and current financial resource focus	Accrual accounting and economic resources focus	Accrual accounting and economic resources focus
locus	The accrual basis of accounting, which is similar to the methods used by most businesses, takes into account all revenues and expenses associated with the fiscal year even if cash involved has not been received or paid.	These statements provide a detailed short-term view of the State's finances that assists in determining whether there will be adequate financial resources available to meet the current needs of the State. Because this information does not encompass the long-term focus of the government-wide statements, reconciliations are provided on the subsequent page of the governmental fund statements.		
Type of asset, deferred outflows of resources, liability, deferred inflows of resources information	All assets and liabilities, both financial and capital, and short-term and long-term. Deferred inflows/outflows of resources reported only in limited instances as required by GASB standards.	Only assets expected to be used up and liabilities that come due during the year or soon thereafter; no capital assets included	All assets and liabilities, both financial and capital, and short-term and long- term	All assets and liabilities, both short- term and long-term
Type of inflow- outflow information	All revenues and expenses during the year, regardless of when cash is received or paid	 Revenues for which cash is received during or soon after the end of the year Expenditures when goods or services have been received and payment is due during the year or soon thereafter 	All revenues and expenses during the year, regardless of when cash is received or paid	All revenues and expenses during the year, regardless of when cash is received or paid

Additional Required Supplementary Information

In addition to this Management's Discussion and Analysis, which is required supplementary information, the basic financial statements are followed by a section of required supplemental information that further explains and supports the information in the financial statements. The required supplementary information includes:

- Postemployment Benefits State Health Insurance Program,
- State's Proportionate Share of the Net Pension Liability or Net Pension Asset,
- State's Pension Contributions,
- Infrastructure Assets Reported Using the Modified Approach, and
- Budgetary Comparison Schedule of the General and the Transportation funds (includes reconciliations between the statutory and GAAP fund balances at fiscal year-end).

Other Supplementary Information

The Other Supplementary Information includes combining financial statements for nonmajor governmental funds, nonmajor enterprise funds, internal service funds and fiduciary funds, each of which are added together and presented in single columns in the basic financial statements.

FINANCIAL ANALYSIS OF THE STATE AS A WHOLE

Tables 2 and 3 present summary information of the State's net position and changes in net position.

Net Position

As presented in Table 2, total assets of the State on June 30, 2015 were \$43.6 billion and deferred outflows of resources were \$941.8 million, while total liabilities were \$22.6 billion and deferred inflows of resources were \$31.1 million, resulting in combined net position (government and business-type activities) of \$22.0 billion. The largest component of the State's total net position consists of \$22.6 billion invested in capital assets (i.e., land, buildings, equipment, infrastructure, and others), less any related debt outstanding that was needed to acquire or construct the assets. Approximately \$7.9 billion of net position was restricted by external sources or the State Constitution or Statutes, and was not available to finance the day-to-day operations of the State.

The unrestricted net position, which, if positive, could be used at the State's discretion, showed a negative balance of \$(8.6) billion. Therefore, based on this measurement, no funds were available for discretionary purposes. A contributing factor to the negative balance is that governments recognize a liability on the government-wide statement of net position as soon as an obligation is incurred. While financing focuses on when a liability will be paid, accounting is primarily concerned with when a liability is incurred. Accordingly, the State recognizes long-term liabilities (such as general obligation debt, compensated absences, and future benefits and loss liabilities – listed in Note 10 to the financial statements) on the statement of net position. In addition to the effect of reporting long-term liabilities when incurred, the General Fund's total deficit fund balance of \$(1.8) billion at year-end, as discussed on Page 29, also contributed to the deficit unrestricted net position reported in the statement of net position.

During Fiscal Year 2015, the State issued \$1.5 billion of general obligation bonds, as well as \$279.8 million of general obligation long term notes and \$105.1 million of general obligation commercial paper, primarily for the acquisition or improvement of land, water, property, highways, buildings, and equipment. At June 30, 2015 general obligation bonds and long term general obligation notes outstanding totaled \$7.4 billion, outstanding annual appropriation bonds were \$3.1 billion, and outstanding revenue bonds, which are not considered general obligation debt of the State, totaled \$3.0 billion.

* Amounts for the prior fiscal year include restatements of prior year's balances, except for those related to the implementation of GASB Statement No. 68.

Changes in Net Position

The revenues and expenses information, as shown in Table 3, was derived from the government-wide statement of activities and reflects how the State's net position changed during the fiscal year. The State earned program revenues of \$19.4 billion and general revenues of \$16.3 billion for total revenues of \$35.7 billion during Fiscal Year 2015. Expenses for the State during Fiscal Year 2015 were \$34.4 billion. As a result of the excess of revenues over expenses, the total net position of the State increased \$1.3 billion, net of contributions and transfers.

Governmental Activities

The net position of governmental activities increased \$589.1 million in Fiscal Year 2015. Revenues for the governmental activities (including contributions to permanent fund principal) totaled \$28.2 billion, while expenses and net transfers totaled \$27.6 billion in Fiscal Year 2015.

General and program revenues of governmental activities increased \$460.3 million during this fiscal year. Tax revenues increased \$292.4 million primarily due to enhanced sales and excise taxes of \$268.3 million. Public utility, motor fuel, and other taxes also increased \$17.2 million, \$14.3 million, and \$6.6 million, respectively, while income taxes decreased \$14.0 million. In addition, capital grants and operating grants increased \$132.3 million and \$55.6 million, respectively. Offsetting those increases was a decrease of \$51.1 million in charges for services.

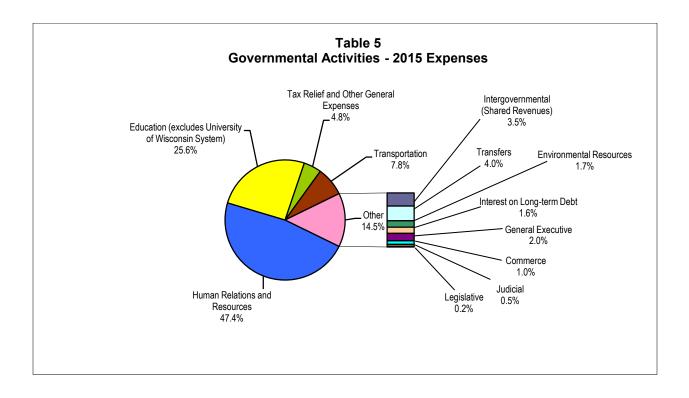

The State's governmental activities program expenses increased \$1.2 billion during Fiscal Year 2015. Contributing to the increase were education and human relations and resources expenses, which increased \$663.6 million and \$483.9 million respectively. Education expenses increased because of additional aid payments. Human relations and resources expenses increased because of increased medical assistance payments. Transportation, environmental resources, and commerce expenses increased \$111.3 million, \$36.0 million, and \$15.9 million, respectively. Conversely, general executive, tax relief and other general, and interest expenses decreased \$41.2 million, \$33.3 million and \$31.9 million, respectively.

As shown in Table 4, below, approximately 56.2 percent of revenues from all sources earned came from taxes (sales and excise, income, public utility, motor fuel, and other taxes). Operating grants and contributions represent amounts received from other governments/entities – primarily the federal government. Operating grants and contributions for non-capital purposes provided 31.2 percent of total revenues. Capital grants provided 3.1 percent, charges for services contributed 8.0 percent, and various other revenues provided 1.5 percent of the remaining governmental activity revenue sources.

As shown in Table 5, below, expenses for human relations and resources programs make up the largest portion – 47.4 percent – of total governmental expenses and transfers. Included in this cost function are programs such as Medical Assistance and Temporary Assistance for Needy Families as well as costs for state correctional facilities and services.

Educational expenses, which include various school aids but exclude expenses of the University of Wisconsin System, make up 25.6 percent of total expenses. Tax relief and other general expenses and the municipal and county shared revenue program represent 8.3 percent of the total, while transportation expenses represent 7.8 percent. Net transfers to businesstype activities, which include a general purpose revenue subsidy to the University of Wisconsin System, make up 4.0 percent of the total expenses and transfers. Remaining functional expenses totaled 5.3 percent while interest on long-term debt totaled 1.6 percent.

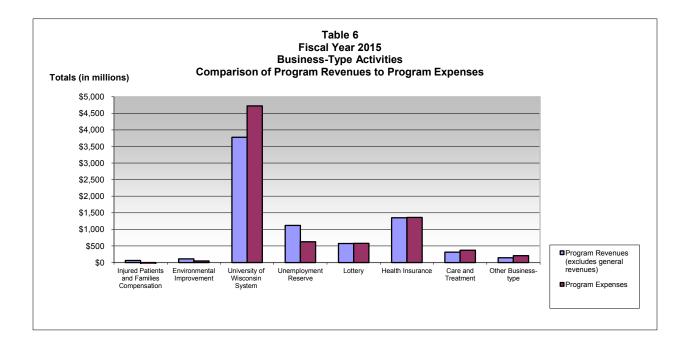

Business-Type Activities

Net position of the State's business-type activities increased \$721.0 million in Fiscal Year 2015.

Revenues of business-type activities totaled \$7.5 billion for Fiscal Year 2015, a decline of \$380.7 million from the prior year. Program revenues consisted of \$7.0 billion of charges for services, \$441.8 million of operating grants and contributions, and \$37.8 million of capital grants and contributions. General revenues, contributions to endowments and permanent fund principal, and net transfers totaled \$4.4 million, \$4.0 million, and \$1.1 billion, respectively.

The total expenses for business-type activities were \$7.8 billion a decrease of \$211.5 million from the prior fiscal year. The largest decrease in program expenses, \$302.7 million, related to decreased benefit expenses for the Unemployment Reserve Fund. Injured Patients and Family Compensation Fund expenses also declined by \$75.2 million. Offsetting those decreases was an increase in health insurance program expenses of \$72.0 million and University of Wisconsin System program expenses of \$51.1 million.

Table 6, below, compares the program revenues and program expenses of the various State business-type activities. This table does not include the transfer in (subsidy) from the General Fund to the University of Wisconsin System or other business-type activities.

FINANCIAL ANALYSIS OF THE STATE'S INDIVIDUAL FUNDS

Governmental Funds

At the end of Fiscal Year 2015, the State's governmental funds reported a negative combined fund balance of \$(438.0) million. Funds with significant changes in fund balance are discussed below:

General Fund

The General Fund is the chief operating fund of the State. At June 30, 2015, the State's General Fund reported a total fund deficit of \$(1.8) billion. The net change in fund balance during Fiscal Year 2015 was \$(413.7) million, in contrast to \$370.8 million in Fiscal Year 2014. Major revenue, expenditure and other sources/uses contributing to the change in fund balance are as follows:

Revenues

Revenues of the General Fund totaled \$24.6 billion in Fiscal Year 2015, an increase of \$310.2 million from Fiscal Year 2014. Factors contributing to this change included the following:

- Revenues from taxes increased \$265.6 million. The most significant increase relates to sales taxes, which increased \$267.8 million or 5.0 percent from Fiscal Year 2014. Sales tax revenue increases were driven by increased consumer expenditures of taxable goods. Income taxes decreased \$25.8 million or 0.3 percent from Fiscal Year 2014. Tax withholding from wages and salaries comprises the largest component of income taxes. Increases in wages and salaries earned during the fiscal year resulted in increased income tax revenues. However, these increases were offset by an update to the income tax withholding tables that went into effect April 1, 2014.
- Intergovernmental revenues (i.e. federal assistance) increased \$68.7 million in Fiscal Year 2015. Human relations
 and resources programs (e.g. Medicaid) reported increased revenues of \$46.9 million. Because costs are split
 between federal and State sources, revenues associated with Medicaid related programs increase as costs increase.

Expenditures

Expenditures of the General Fund totaled \$23.2 billion in Fiscal Year 2015, an increase of \$1.2 billion from Fiscal Year 2014. Factors contributing to the change include the following:

- Education expenditures increased \$657.2 million. Under 2013 Wisconsin Act 145, the Wisconsin Technical College System Board distributed an additional \$406.0 million to school districts during Fiscal Year 2015. Moreover, 2013 Wisconsin Act 20 provided \$74.1 million and \$63.5 in increased spending authority for general and per pupil school aids, respectively. Beginning in Fiscal Year 2015, the per pupil aid program provided \$150 per pupil up from \$75 per pupil in Fiscal Year 2014.
- Human relations and resources expenditures grew \$478.3 million, primarily as a result of medical assistance costs. This growth is mostly attributed to the implementation of the Badger Care Reform Waiver in April of 2014, which increased the number of childless adults enrolled in the Medicaid Program. The implementation increased costs for all of Fiscal Year 2015 compared to just the last quarter of the prior fiscal year.

Other Financing Sources and Uses

Other financing sources/uses totaled a net \$(1.8) billion in Fiscal Year 2015, compared to \$(1.8 billion) in Fiscal Year 2014. The components of this included the following:

- Transfers out of the General Fund totaled \$1.9 billion, a decrease of \$123.6 million from the prior year.
 - The general purpose revenue (GPR) supplement comprises a large portion of the transfers out and is provided to various enterprise funds. The supplement totaled \$983.5, decrease of \$16.6 million from the prior year. The University of Wisconsin System, which receives the majority of the GPR supplement, received \$896.6 million in Fiscal Year 2015, a decrease of \$22.1 million.

- Transfers out to the Transportation Fund were \$171.4 million in Fiscal Year 2015, an increase of \$135.7 million. Under the requirements of 2013 Wisconsin Act 20, the General Fund made a one-time transfer of \$133.3 million in Fiscal Year 2015.
- Transfers out to the Capital Improvement Fund totaled \$7.4 thousand in Fiscal Year 2015 compared to \$152.8 million in Fiscal Year 2014. Because debt was rolled over during the year, certain debt service payments did not need to be made. As such, transfers to the Capital Improvement Fund did not need to be made.
- Transfers in to the General Fund decreased \$78.8 million (from \$148.7 million in Fiscal Year 2014 to \$69.9 million in Fiscal Year 2015) as a result of decreased lapses. A one-time, budgeted transfer of \$58.3 million from the University of Wisconsin System for the higher education grant program was made in Fiscal Year 2014.

Note 9D provides additional information on transfers in and out of the General Fund.

As of June 30, 2015, the General Fund reported an unassigned fund balance deficit of \$(2.4) billion. This compares to a General Fund unassigned fund balance deficit of \$(2.0) billion as of June 30, 2014. A deficit unassigned fund balance represents the excess of the liabilities of the General Fund over its assets and nonspendable, restricted, and committed fund balance accounts.

General Fund Budgetary Highlights

Differences between the original budget and the final amended budget were significant and included a \$4.8 billion increase in appropriations. Contributing to the variance is the fact that several of the State's programs and various transfers (see the items denoted with *, below) are not included in the original budget. In addition, numerous adjustments to spending estimates were needed as the year progressed because of changing circumstances (spending needs can change dramatically over a one-year period). The largest variances occurred in the following appropriations (in millions):

Program	Variance	_
Food Stamps, Electronic Benefit Transfer*	\$ 1,200.0	
Federal Aid Medical Assistance	708.5	
UW System, General Program Operations (part of Statutory General Fund)	419.0	
Medical Assistance Program Benefits	160.0	
Education Federal Aids; Local Aid	100.2	

Actual charges to appropriations (expenditures) were \$3.9 billion below the final budgeted estimates. Large positive expenditure variances were reported in the Medical Assistance Federal Aid (\$588.9 million) and the UW System Federal Aid (\$247.8 million) appropriations.

During the past fiscal year, the budgetary-based fund balance decreased \$341.2 million for the statutory General Fund, in part, because of increased expenditures for education and human relations and resources. Net transfers from other funds totaled \$(102.4) million in Fiscal Year 2015 compared to \$47.4 million in the prior fiscal year.

Transportation Fund

In Fiscal Year 2015, the Transportation Fund's fund balance increased \$86.3 million from \$691.2 million to \$777.5 million. A constitutional amendment that passed during Fiscal Year 2015 restricted use of state resources deposited into the Fund for state transportation purposes. As such, \$743.9 million of restricted fund balance is reported for Fiscal Year 2015, compared to \$26.7 million last year. Fund balance created by state resources was reported as committed prior to Fiscal Year 2015.

Revenues of the Fund increased \$139.0 million, to a total of \$2.6 billion. Intergovernmental revenues, which are primarily from federal sources, increased \$126.9 million to a total of \$973.0 million. The State Highway Rehabilitation appropriation, which is federally-funded, reported higher expenditures as a result of increased spending authorized by 2013 Wisconsin Act 20. The timing of projects also impacted spending in the appropriation. Therefore, associated intergovernmental revenues also increased.

Expenditures of the Fund were funded primarily with motor fuel taxes, intergovernmental, and license and permit revenue sources, as well as interfund transfers in. Expenditures increased \$117.4 million to \$2.6 billion in Fiscal Year 2015 compared to \$2.4 billion in the prior year. In addition to the expenditures reported in the Transportation Fund, long term debt-funded transportation expenditures of \$127.0 million and \$208.3 million were reported in the Capital Improvement Fund and Transportation Revenue Bonds Fund, respectively. Transportation-related expenditures of these two funds increased \$65.2 million and \$18.8 million, respectively in the current year.

Transfers in to the Transportation Fund increased \$135.7 million from the prior year to \$193.6 million. 2013 Wisconsin Act 20 required a one-time transfer in the biennium of \$133.3 million from the General Fund to the Transportation Fund. Transfers out of the Fund increased \$14.3 million from the prior year to \$124.0 million. Transfers out for debt service payments to the Bond Security and Redemption Fund increased by \$17.0 million in Fiscal Year 2015.

Capital Improvement Fund

Fund balance of the Capital Improvement Fund decreased \$56.9 million from \$(678.8) million to \$(735.7) million. Assets of the Fund, which are comprised of cash and receivables, increased \$45.9 million to \$68.8 million. Short-term notes payable and amounts owed to the Transportation Fund for reimbursement of transportation-related projects comprise the majority of Fund liabilities. Liabilities totaled \$804.5 million, an increase of \$102.8 million from the prior year.

Three issues of long-term debt totaling \$560.5 million were made during Fiscal Year 2015, an increase of \$337.8 million from the prior fiscal year. During the year, debt and premium proceeds funded \$371.8 million of capital outlay expenditures in the Fund, an increase of \$37.9 million. Capital outlay expenditures reflect capital assets, such as buildings and highways, which were either in progress or completed during the fiscal year and will be used on a long-term basis. Debt proceeds also funded \$174.5 million of maintenance and repair expenditures on state owned assets that are reported as functional expenditures. Transportation related functional costs increased to \$127.0 million, an increase of \$65.2 million from the prior year, and comprised 72.7 percent of functional expenditures reported in the Fund.

Transfers In to the Capital Improvement Fund for debt service payments on outstanding notes payable decreased \$160.0 million to \$17.2 million. The decrease occurred because debt was rolled over in Fiscal Year 2015 reducing the amount of the debt service payments. Transfers Out of the Capital Improvement Fund, which are also funded from debt proceeds, increased \$57.9 million to \$185.9 million, because more debt was issued and subsequently distributed to proprietary funds.

Proprietary Funds

Proprietary funds provide the same type of information found in the government-wide financial statements but in more detail. Significant changes to balances of major proprietary funds from Fiscal Year 2014 to Fiscal Year 2015 include the following:

Environmental Improvement

Fund net position of the Environmental Improvement Fund increased \$67.7 million to \$2.0 billion. Total assets of the Fund increased by \$2.8 million while liabilities decreased by \$68.3 million. Loans to local governments increased by \$29.2 million to a total of \$2.0 billion. Conversely, liabilities decreased to \$763.9 million as a result of a \$67.7 million reduction in revenue bonds and notes payable that remained outstanding as of June 30, 2015.

Operating income of the Fund, which is comprised primarily of interest on loans, increased by \$1.6 million to \$13.6 million in Fiscal Year 2015. Non-operating revenue decreased by \$3.0 million due to a reduction in investment income which declined by \$8.2 million to \$4.6 million. This reduction in investment income was offset by an increase of \$4.6 million in federal grant funds to \$55.8 million.

Injured Patients and Families Compensation

Fund net position of the Injured Patients and Families Compensation Fund increased by \$152.4 million from \$580.9 million to \$733.3 million at June 30, 2015. Total assets of the Fund, which increased \$42.2 million to \$1.2 billion, are primarily comprised of investments. Fund liabilities, which decreased by \$110.1 million to \$490.4 million, are comprised primarily of actuarially-determined future benefits and loss liabilities of \$486.0 million.

Operating revenue of the Fund consisted of assessment income which decreased by \$3.5 million (9.4 percent) to \$33.6 million. The reduced revenue resulted from a 10.0 percent decrease in assessment rates and changes in the number of participating providers. Non-operating income consists solely of investment and interest income which decreased by \$55.6 million to \$30.2 million due to a decline in investment performance during the year.

Fund operating expenses consist primarily of benefit expenses. Benefit expenses, which are determined by an actuary, were negative \$89.4 million for Fiscal Year 2015 compared to negative \$14.3 million the prior year. Benefit payments totaled \$21.1 million an increase of \$3.9 million from Fiscal Year 2014 payments of \$17.2 million.

Unemployment Reserve

Fund net position of the Unemployment Reserve Fund increased by \$489.8 million from \$329.4 million to \$819.2 million at June 30, 2015. Benefit expenses decreased \$312.6 million from \$931.1 million to \$618.5 million in Fiscal Year 2015, a decrease of 33.6 percent. The decrease in benefit expenses is the result of the average unemployment rate falling from 6.13 percent during Fiscal Year 2014 to 4.98 percent during Fiscal Year 2015. While revenues of the Fund decreased, expenses also declined and the federal advance had been paid off in Fiscal Year 2014 resulting in an improved net position.

Operating revenues decreased by \$359.9 million from \$1.5 billion to \$1.1 billion in Fiscal Year 2015. Federal aids decreased by \$146.4 million from \$153.0 million to \$6.6 million because emergency federal benefit programs ended in December 2013. Employer contributions decreased \$196.0 million to \$1.1 billion a decrease of 15.7 percent.

Because the Fund had an advance outstanding with the federal government for more than three consecutive years, in 2014 the federal government recovered a portion of the advance by reducing the employers' federal unemployment tax credit by 0.9 percent. The revenue generated was credited to the Fund as contributions and used to repay the advance. In 2015, the Fund repaid the advance in full eliminating the reduction to the employers' federal unemployment tax credit and the additional contributions to the Fund.

University of Wisconsin System

Fund net position increased by \$64.7 million to \$6.7 billion. Assets, which consist primarily of capital assets and cash, increased \$384.9 million to \$8.9 billion. Liabilities consist mostly of bonds and short term payables, and increased by \$58.7 million to \$2.4 billion.

Operating revenues of the University of Wisconsin System increased \$31.3 million or approximately 0.9 percent to \$3.4 billion. Student tuition, and federal grants and contracts of \$1.2 billion and \$902.6 million, respectively, comprise 61.0 percent of operating revenues. Student tuition and fees increased by \$30.9 million (2.7 percent) while increases of \$15.8 million and \$8.5 million were reported for sales and services of educational activities and other operating revenues, respectively. Conversely, revenues decreased by \$16.5 million (1.8 percent), \$3.9 million (1.0 percent), and \$2.6 million (1.3 percent), for federal grants and contracts, sales and services of auxiliary enterprises, and local and private grants and contracts, respectively. Operating expenses increased \$66.1 million or 1.4 percent. Personal services increased by \$49.3 million (1.7 percent). Depreciation and supplies and services expenses also increased by \$16.9 million and \$12.5 million, respectively while scholarships and fellowships expense declined \$13.9 million.

Transfers in to the University of Wisconsin System increased by \$49.2 million to a total of \$1.1 billion in Fiscal Year 2015. The general purpose revenue supplement received from the State's General Fund, which comprises the majority of the amount transferred in, was \$896.6 million a decrease of \$22.1 million. The Capital Improvement Fund also transferred \$179.9 million of bond and note proceeds to the University of Wisconsin System an increase of \$83.9 million from the prior year.

GOVERNMENT-WIDE CAPITAL ASSET AND DEBT ADMINISTRATION

Capital Assets

At the close of Fiscal Year 2015, the State had \$28.6 billion invested in capital assets, net of accumulated depreciation of \$5.6 billion. This represents an increase of \$1.2 billion, or 4.3 percent, from Fiscal Year 2014. Depreciation charges totaled \$131.2 million and \$307.4 million for governmental and business-type activities, respectively, in Fiscal Year 2015. The details of these assets are presented in Table 7, below. Additional information about the State's capital assets is presented in Note 7 to the financial statements.

		Capi	tal As		Tab of De (in mil	preciation,	as of	June 30				
		Govern				Busines		ре			otal	
			vities		. <u> </u>		vities			Primary G	over

Totals	\$	22,365	\$	21,177	\$	6,235	\$	6,216	\$	28,600	\$	27,393

The major capital asset additions completed or acquired during Fiscal Year 2015 included the:

- Kenwood IRC UW-Milwaukee (\$77.4 million),
- Freshwater Science Addition UW-Milwaukee (\$51.3 million),
- Multi-Building Energy Construction UW-Madison (\$16.8 million), and
- Multi-Building Energy Conservation UW-Madison (\$15.4 million).

In addition to these completed projects, construction and software in progress as of June 30, 2015 for governmental and business-type activities totaled \$2.9 billion and \$313.3 million, respectively. A list of those projects is provided in Note 7. The State's continuing or proposed major capital projects for Fiscal Year 2015 and future years include:

- I-94 North South Freeway Project (completion in 2022) \$1.7 billion,
- Zoo Interchange (completion in 2021) \$1.7 billion,
- US 41 Winnebago and Brown Counties (completion in 2016) \$1.5 billion,
- St. Croix Crossing (completion in 2018) \$647 million,
- Hoan Bridge (completion in 2017) \$251 million,
- Verona Road (completion in 2019) \$247.6 million,
- Southeast Mega Zoo (completion date pending) \$200 million,
- Highway 12 Lake Delton to Sauk City (completion in 2018) \$195 million,
- Renovation and Remodeling of the Charter Street Heating Plant (completion in 2016) \$248 million,
- Hill Farms Building A&B Replacement (completion in 2018) \$195 million,
- Microbial Science Building UW-Madison (completion in 2016) \$122 million,
- Memorial Theater Wing Renovation (completion in 2016) \$117 million, and
- Biochemistry II Building UW-Madison (completion in 2016) \$112 million.

Debt Administration

The State of Wisconsin Building Commission, an agency of the State, is empowered by law to consider, act upon, authorize, issue and sell all debt obligations of the State. The total general obligation debt outstanding for the State as of June 30, 2015 was \$7.4 billion, as shown in Table 8. During Fiscal Year 2015, \$1.5 billion of general obligation bonds and \$279.8 million of general obligation long term notes were issued to provide for the acquisition or improvement of land, water, property, highways, buildings, equipment, or facilities for public purposes or to refund outstanding bonds. Of the bonds and long term notes issued in the current year, \$605.8 million was to be used for University of Wisconsin System academic and self-amortizing facilities; \$490.4 million for transportation projects, \$268.5 million for environmental programs, \$140.6 million for correctional facilities and \$323.1 million for various other projects.

In Fiscal Year 2004, the State issued \$1.8 billion of annual appropriation bonds to pay the State's unfunded accrued prior service (pension) liability and its unfunded accrued liability for sick leave conversion credits. In Fiscal Year 2009, the State issued \$1.5 billion of annual appropriation bonds to purchase the future right, title, and interest in the Tobacco Settlement Revenues (TSRs) from Badger Tobacco Asset Securitization Corporation (BTASC) as well as pay any issuance expenses. As of June 30, 2015, \$3.1 billion of these bonds were outstanding.

Chapter 18 of the Wisconsin Statutes authorizes the State to issue revenue obligations. These obligations, which are not general obligation debt of the State, are secured by a pledge of revenues or property derived from the operations of a program funded by the issuance of the obligations. Revenue bonds of the primary government totaled \$3.0 billion outstanding at June 30, 2015, as shown in Table 8. These bonds included \$2.2 billion of Transportation Revenue Bonds, \$69.1 million of Petroleum Inspection Revenue Bonds, and \$758.7 million of Environmental Improvement Revenue Bonds.

	Outstan	Tabl ding Debt as of (in mil	nd 2014			
		nmental vities		ess-Type vities	То	tal
	2015	2014	2015	2014	2015	2014
General obligations:						
Bonds and long term notes	\$5,850.3	\$5,653.2	\$1,599.2	\$1,607.7	\$7,449.5	\$7,260.9
Annual appropriation bonds	3,112.1	3,175.8			3,112.1	3,175.8
Revenue bonds	2,236.4	2,290.1	758.7	826.4	2,995.1	3,116.5
Totals	\$11,198.9	\$11,119.0	\$2,357.9	\$2,434.1	\$13,556.8	\$13,553.1

Article VIII of the Wisconsin Constitution and Wis. Stat. Sec. 18.05 limit the amount of general obligation bond debt the State can contract in total and in any calendar year. In total, debt cannot exceed five percent of the value of all taxable property in the State. The amount of debt contracted in any calendar year is limited to the lesser of three-quarters of one percent of the aggregate value of taxable property or five percent of the aggregate value of taxable property less net indebtedness at January 1.

At June 30, 2015, State of Wisconsin general obligation fixed rate bonds had a rating of AA from Fitch Ratings, AA from Kroll Bond Rating Agency, Aa2 from Moody's Investors Services, and AA from Standard and Poor's Rating Services. General obligation variable notes had a rating of F1+ from Fitch Investors Services, L.P, P-1 from Moody's, and A-1+ from Standard and Poor's Corporation.

Detailed information about the State's long-term debt activity is presented in Note 11 to the financial statements.

INFRASTRUCTURE -- MODIFIED APPROACH

The State reports infrastructure (i.e., roads, bridges, and buildings considered an ancillary part of roads) as capital assets. Infrastructure assets exclude right-of-way costs. The State has elected to report its infrastructure assets (11,200 centerline miles of roads and 5,200 bridges with a combined value of \$14.9 billion) using the modified approach. Under this method, infrastructure assets are not required to be depreciated if the State manages its eligible infrastructure assets using an asset management system designed to maintain and preserve these assets at a condition level established and disclosed by the State.

All infrastructure assets constructed prior to July 1, 2000 have been recorded at estimated historical cost. Historical cost was determined by calculating current costs of a similar asset and deflating that cost, using the Federal Highway Administration's composite index for federal-aid highway construction, to the estimated average construction date. All infrastructure assets constructed after July 1, 2000 have been recorded at historical cost.

In order to adequately serve the traveling public and support the State economy, it is the State's policy to ensure at least 85 percent of the state-owned roads and bridges are in good or fair condition. As of June 30, 2015, 92.7 percent of the roads and 96.8 percent of bridges were in good or fair condition, consistent with State policies. This compares to 91.7 percent of the roads and 96.7 percent of bridges as of June 30, 2014.

For the fiscal year ended June 30, 2015, actual maintenance and preservation costs for the State's road network were \$643.3 million, or \$39.9 million more than the estimated amount. On the same date, actual maintenance and preservation costs for the State's bridge network were \$164.4 million, or \$107.3 million more than the estimated amount. In developing estimated costs at the beginning of the fiscal year, it is difficult to predict the types of projects that will actually incur costs during the year. In addition, the State of Wisconsin, Department of Transportation's multi-year contracting process, allowing encumbrances to carry forward, makes a comparison of actual to estimated amounts difficult since expenditures for the current year may have been budgeted and committed to a project in prior years.

ECONOMIC FACTORS

During calendar year 2014, the Wisconsin economy continued its expansion.

Wisconsin employment continued to grow throughout 2014. According to the federal Bureau of Labor Statistics, total nonfarm employment in Wisconsin increased 1.1 percent in 2012, 1.0 percent in 2013 and 1.3 percent during 2014. This performance generally followed national employment trends. Nationally, employment grew 1.7 percent in both 2012 and 2013 and grew 1.9 percent in 2014.

More recently, Wisconsin's growth in employment has accelerated. Between September 2014 and September 2015, Wisconsin employment has increased 1.9 percent. Nationally, employment is up 2.0 percent over the same period. However, Wisconsin's seasonally adjusted unemployment rate in September 2015 was 4.3 percent, well below the 5.1 percent national unemployment rate.

Reflecting the continuing recovery, Wisconsin's state nominal gross domestic product increased 2.9 percent in 2014, slightly trailing the national growth rate of 3.9 percent. Wisconsin's 2014 growth was slightly below the growth rates in 2013 and 2012 of 4.3 percent and 3.5 percent, respectively. These figures compare with the 50-state total gross domestic product increases of 4.2 percent in 2012 and 3.8 percent in 2013. Since 2007, Wisconsin's gross domestic product increased by a similar magnitude to the national average at 20.1 percent compared to 20.3 percent nationally.

Steady growth in output has caused personal incomes to expand. Wisconsin personal income grew 4.3 percent, 1.0 percent and 3.7 percent in 2012, 2013 and 2014, respectively. Nationally, personal income grew 5.1 percent, 1.2 percent and 4.4 percent in the same years. On a per capita basis, Wisconsin's income performance is similar to the nation's. Per capita income in Wisconsin increased by 4.0 percent, 0.6 percent and 3.4 percent in 2012, 2013 and 2014, respectively. This compares to growth of 4.3 percent, 0.4 percent and 3.6 percent in the same years nationally. Relative to the national average, Wisconsin per capita income has remained in approximately the same range for the past three years at 95.9 percent,

96.2 percent and 96.0 percent of the national average in 2012, 2013 and 2014, respectively. This represents an improvement from 2008 when Wisconsin per capita income was only 94.9 percent of the national average.

Wisconsin's statewide total property value increased again in 2015 for the second straight year following five years of declines from 2009 through 2013. The recovery in values has been broad-based, reflecting improvements in all major sectors. In 2014, overall property values increased 2.5 percent, residential real estate values rose 2.3 percent and commercial real estate values increased 0.6 percent. In 2015, total property value increased 2.4 percent, with residential property value growing at 2.3 percent. In addition, commercial real estate and manufacturing values both increased 3.2 percent. Manufacturing values have now increased in four consecutive years.

CONTACTING THE STATE'S FINANCIAL MANAGEMENT

This financial report is designed to provide Wisconsin's citizens, taxpayers, customers, investors and creditors with a general overview of the State's finances and to demonstrate the State's accountability for the money it receives. Questions about this report or requests for additional financial information should be addressed to: State of Wisconsin, State Controller's Office, 101 E. Wilson Street, 5th Floor, Madison, WI 53707 or by email to: <u>DOACapitalFinanceOffice@wisconsin.gov</u>.

Some state agencies, such as the Department of Employee Trust Funds and the University of Wisconsin, issue stand-alone audited financial statements. The information contained in those statements may vary from this document due to scope and application of generally accepted accounting principles. Questions about how to obtain the separately issued financial statements should be directed to individual agencies or to the State Controller's Office.

The State's component units issue their own separate audited financial statements. These statements may be obtained by directly contacting the component unit through their administrative offices identified in Note 1-B.

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Basis of Presentation

The accompanying basic financial statements have been prepared in conformity with generally accepted accounting principles (GAAP) for governments as prescribed by the Governmental Accounting Standards Board (GASB).

B. Financial Reporting Entity

For GAAP purposes, the State of Wisconsin includes all funds, elected offices, departments and agencies of the State, as well as boards, commissions, authorities and universities. The State has also considered all potential "component units" for which it is financially accountable, and other affiliated organizations for which the nature and significance of their relationship, including their ongoing financial support, with the State are such that exclusion would cause the State's financial statements to be misleading or incomplete.

The decision to include a potential component unit in the State's reporting entity is based on the criteria set forth in GASB Statement No. 14, The Financial Reporting Entity, GASB Statement No. 39, Determining Whether Certain Organizations Are Component Units, an amendment of GASB Statement No. 14, and GASB Statement No. 61, The Financial Reporting Entity: Omnibus, an amendment of GASB Statements No. 14 and No. 34. GASB Statement No. 14 criteria include the ability to appoint a voting majority of an organization's governing body and (1) the ability of the State to impose its will on that organization or (2) the potential for the organization to provide specific financial benefits to, or impose specific financial burdens on, the State. GASB Statement No. 39 provisions relate to separately legal, taxexempt organizations and include: (1) the economic resources received or held are entirely or almost entirely for the direct benefit of the State, (2) the State is entitled to, or has the ability to otherwise access, a majority of the economic resources received or held by the separate organization, and (3) the economic resources received or held by an individual organization that the State is entitled to, or has the ability to otherwise access, are significant to the State. GASB Statement No. 61 modifies certain requirements for inclusion in the financial reporting entity, especially in regards to the fiscal dependency criterion where a financial benefit or burden relationship is now required. It also amends the "blending" criteria for component units and clarifies the reporting of equity interests in legally separate organizations.

Based upon the application of the criteria contained in GASB Statement No. 14, as amended by GASB Statement No. 39, the

Wisconsin Public Broadcasting Foundation, Inc. is reported as a blended component unit; and the Wisconsin Housing and Economic Development Authority, the Wisconsin Health Care Liability Insurance Plan, the University of Wisconsin Hospital and Clinics Authority, the Wisconsin Economic Development Corporation and the University of Wisconsin Foundation, are presented as discrete component units, as discussed below.

Complete financial statements of the individual component units that issue separate statements can be obtained from their respective administrative offices:

Wisconsin Public Broadcasting Foundation Inc. Wisconsin Educational Communications Board 3319 West Beltline Highway Madison, WI 53713 http://www.ecb.org

Wisconsin Housing and Economic Development Authority 201 West Washington Avenue, Suite 700 Madison, WI 53703 http://www.wheda.com

Wisconsin Health Care Liability Insurance Plan Office of the Commissioner of Insurance 125 South Webster Street Madison, WI 53703 http://oci.wi.gov

University of Wisconsin Hospital and Clinics Authority 301 South Westfield Road Madison, WI 53717 http://www.uwhealth.org

Wisconsin Economic Development Corporation 201 West Washington Avenue Madison, Wisconsin 53703 http://inwisconsin.com

University of Wisconsin Foundation 1848 University Avenue Madison, WI 53726-4090 https://www.supportuw.org

Blended Component Unit

Blended component units are entities that are legally separate from the State, but are so intertwined with the State that they are, in substance, the same as the State. The blended component unit serves or benefits the primary government. They are reported as part of the State and blended into the appropriate funds.

Wisconsin Public Broadcasting Foundation, Inc. – The Wisconsin Public Broadcasting Foundation, Inc. (Foundation), created in 1983 by the Wisconsin Legislature, is a private, non-stock, nonprofit Wisconsin Corporation, wholly owned by the Wisconsin Educational Communications Board (ECB), a unit of the State. The Foundation solicits funds in the name of, and with the approval of, the ECB. The Foundation's funds are managed by a five-member board of trustees consisting of the executive director of the ECB and four members of the ECB board. The Foundation is reported as a special revenue fund.

Discretely Presented Component Units

Discretely presented component units are entities which are legally separate from the State, but are financially accountable to the State, whose relationship with the State is such that exclusion would cause the State's financial statements to be misleading or incomplete. The Wisconsin Housing and Economic Development Authority, the Wisconsin Health Care Liability Insurance Plan, the University of Wisconsin Hospital and Clinics Authority, the Wisconsin Economic Development Corporation and the University of Wisconsin Foundation are reported in a separate column and in separate rows in the government-wide statements to emphasize that they are legally separate.

Wisconsin Housing and Economic Development Authority – The Wisconsin Housing and Economic Development Authority (Authority) was established by the Wisconsin Legislature in 1972 to help meet the housing needs of Wisconsin's low and moderate income citizens. The State has significantly expanded the scope of services of the Authority by adding programs that include financing for farmers and for economic development projects. While the Authority receives no State tax dollars for its bondsupported programs and the State is not liable on bonds the Authority issues, the State has the ability to impose its will on the Authority through legislation. The State appoints the Authority's Board. The Authority reports on a June 30 fiscal year-end.

Wisconsin Health Care Liability Insurance Plan – The Wisconsin Health Care Liability Insurance Plan (Plan) was established by rule of the Commissioner of Insurance of the State of Wisconsin to provide health care liability insurance and liability coverage normally incidental to health care liability insurance to eligible health care providers in the State. Eight out of 13 members of the Board of Directors are appointed by the Governor, and the State has the ability to impose its will upon the Plan. The Plan reports on a fiscal year ended December 31.

University of Wisconsin Hospital and Clinics Authority – The University of Wisconsin Hospital and Clinics Authority (Hospital) is a not-for-profit academic medical center. The Hospital operates an acute-care hospital with 566 beds, numerous specialty clinics, and six intensive care units with a total of 83 beds, and it provides comprehensive health care to patients, education programs, research and community service. Prior to June 1996, the Hospital was a unit of the University of Wisconsin-Madison. In June 1996, in accordance with legislation enacted by the State Legislature, the Hospital was restructured as a Public Authority, a public body corporate and politic created by State statutes. The State appoints a majority of the Hospital's Board of Directors and a financial benefit/burden relationship exists between the Hospital and the State. The Hospital reports on a June 30 fiscal year-end.

The legislation that created the Hospital Authority also provided, among other things, for the Board of Regents of the University of Wisconsin System to execute various agreements with the Hospital. These agreements include an Affiliation Agreement, a Lease Agreement, a Conveyance Agreement and a Contractual Services Agreement and Operating and Service Agreement.

The Affiliation Agreement requires the Hospital to continue to support the educational, research and clinical activities of the University of Wisconsin-Madison, which are administered by the Hospital. Under the terms of a Lease Agreement, the Hospital leases facilities which were occupied by the Hospital as of June 29, 1996. Under a Conveyance Agreement, certain assets and liabilities related to the Hospital were identified and transferred to the Hospital effective July 1, 1996. Subject to the Contractual Services Agreement and Operating and Service Agreement between the Board of Regents and the Hospital, the two parties have entered into contracts for the continuation of services in support of programs and operations.

Wisconsin Economic Development Corporation-The Wisconsin Economic Development Corporation (WEDC) is a legally separate body corporate and politic. The WEDC's primary purpose is economic development activities in the State. The State appoints a majority of the WEDC's Board, has the ability to impose its will on the WEDC, and a financial benefit/burden relationship exists. The WEDC reports on a fiscal year ended June 30.

University of Wisconsin Foundation – The University of Wisconsin Foundation (the Foundation) is a legally separate, tax-exempt component unit of the State. The Foundation acts primarily as a fund-raising organization to supplement the resources that are available to the University of Wisconsin-Madison and several other units of the University of Wisconsin System (a fund of the State) in support of its programs. These include scientific, literary, athletic and educational program purposes. Although the State does not control the timing or amount of receipts from the

Foundation, the majority of resources, or income thereon, that the Foundation holds and invests, are restricted to the activities of the University of Wisconsin-Madison and other units of the University of Wisconsin System by the donors. Because these restricted resources held by the Foundation can only be used by, or for the benefit of, the University of Wisconsin-Madison and several other units of the University of Wisconsin System, the Foundation is considered a component unit of the State. The Foundation reports on a fiscal year ended December 31.

Related Organizations

These related organizations are excluded from the reporting entity because the State's accountability does not extend beyond appointing a voting majority of the organization's board members. Financial statements are available from the respective organizations.

Wisconsin Health and Educational Facilities Authority – a public body politic and corporate that provides financing for capital expenditures and refinancing of indebtedness for Wisconsin health care and educational institutions.

Bradley Center Sports and Entertainment Corporation – a public body politic and corporate that operates the Bradley Center.

Fox River Navigational System Authority – created under Chapter 237 as a public body corporate and politic to oversee the Fox River navigational system after the federal government (the U.S. Army Corps of Engineers) transferred the system to the State.

Health Insurance Risk-Sharing Plan Authority – created under 2005 Wisconsin Act 74, Chapter 149, to assume all administrative responsibilities of the health insurance risk-sharing plan.

C. Government-wide and Fund Financial Statements

The *government-wide* financial statements consist of the statement of net position and the statement of activities.

These statements report information on all activities, except for fiduciary activities, of the primary government and its component units. The statement of net position and the statement of activities distinguish between the governmental and businesstype activities of the State. Governmental activities are generally financed through taxes, intergovernmental revenues and other nonexchange revenues. Business-type activities are generally financed in whole or in part by fees charged to external parties for goods and services. The focus of the government-wide statements is the primary government. A separate column on the statement of net position and the statement of activities reports activities for all discretely presented component units. The *fund* financial statements provide detailed information on all governmental, proprietary and fiduciary funds. Separate columns are presented for all major governmental and enterprise funds. Nonmajor governmental and enterprise funds are aggregated and presented as a single column on the respective governmental or proprietary statements. Internal service funds are exempt from the major fund reporting requirements and are aggregated and ultimately reported as a single column on the proprietary statements. Fiduciary funds are also exempt from major fund reporting and are aggregated by fund type and ultimately reported as single columns on the fiduciary statements.

In Fiscal Year 2015, the State implemented GASB Statement 68 Accounting and Financial Reporting for Pensions and GASB Statement 71 Pension Transition for Contributions Made Subsequent to the Measurement Date. These statements address accounting and financial reporting by employers for pensions that are provided to the employees of state and local governmental employers through pension plans that are administered through trusts. These statements establish standards for measuring and recognizing any pension liability or asset, deferred outflows of resources, deferred inflows of resources, and expense/expenditures. For defined benefit pensions, these statements identify the methods and assumptions that should be used to project benefit payments, discount projected benefit payments to their actuarial present value, and attribute that present value to periods of employee service.

D. Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The *government-wide* statement of net position and statement of activities, as well as the *proprietary and fiduciary fund* statements, are reported using the economic resources measurement focus and the accrual basis of accounting. With this measurement focus, all assets, deferred outflows of resources, liabilities, and deferred inflows of resources associated with the operation of these funds are included on the statement of net position. Under the accrual basis, revenues are recorded when earned and expenses are recorded when the related liability is incurred.

In the University of Wisconsin System's enterprise fund, revenues and expenses of an academic term that spans two fiscal years are recognized in two years based on a proration of summer session days.

In reporting the financial activity of its enterprise funds and business-type activities, the State applies all applicable GASB pronouncements.

Most of the funds included in the State's Comprehensive Annual Financial Report are presented on a fiscal year ended June 30. However, because funds of the Department of Employee Trust Funds (DETF) are administered on a calendar year basis, they are presented on a fiscal year ended December 31. Funds

reported as of December 31 include: Wisconsin Retirement System, Accumulated Sick Leave, Duty Disability, Reimbursed Employee Expense, Local Retiree Life Insurance, Retiree Life Insurance, Milwaukee Retirement System, Retiree Health Insurance, Local Retiree Health Insurance, Income Continuation Insurance, Long-term Disability Insurance, Health Insurance, and Life Insurance.

As a result of the differences in timing, transactions between funds with different fiscal year ends may result in inconsistencies in amounts reported as due to/due from other funds or as interfund transfers. Similar differences may occur in amounts reported as due to/from component units.

The University of Wisconsin Foundation and Wisconsin Health Care Liability Insurance Plan are reported as component units. The Foundation financial statements are prepared using accounting standards promulgated by the Financial Accounting Standards Board as they apply to not-for-profit corporations. The Plan financial statements are prepared using prescribed statutory accounting practices included in the National Association of Insurance Commissioner's Accounting Practices and Procedures Manual. Statutory accounting practices vary somewhat from United States GAAP but are expected to be immaterial.

Governmental fund financial statements are accounted for using the current financial resources measurement focus. With this measurement focus, only current assets and current liabilities generally are included on the balance sheet. Operating statements of these funds present increases (i.e., revenues and other financing sources) and decreases (i.e., expenditures and other financing uses) in net available financial resources.

Governmental funds are reported on the modified accrual basis of accounting. This basis of accounting recognizes revenues generally when they become measurable and available to pay current reporting period liabilities. For this purpose, the State considers tax revenues to be available if they are collected within 60 days of the end of the current fiscal year end. Other revenues are considered to be available if received within one year after the fiscal year end except for tobacco settlement revenues for which just one-half of revenues expected to be received within one year are recognized. Material revenue sources susceptible to accrual include individual and corporate income taxes, sales taxes, public utility taxes, motor fuel taxes and federal revenues.

Expenditures and related liabilities are recognized when obligations are incurred as a result of the receipt of goods and services. However, expenditures related to debt service, compensated absences, and claims and judgments, are recorded only when payment is due.

The State reports the following major funds:

Major Governmental Funds

- General Fund the primary operating fund of the State, accounts for all financial transactions except those required to be accounted for in another fund.
- Transportation Fund a special revenue fund, accounts for the proceeds from motor fuel taxes, vehicle registrations, licensing fees, and federal and local governments which are used to supply and support safe, efficient and effective transportation in Wisconsin.
- Capital Improvement Fund a capital projects fund, accounts for the proceeds received from general obligation bonds and notes, and associated interest earnings. Resources of the fund are used for the acquisition or construction of major capital facilities and for repair and maintenance projects.

Major Enterprise Funds

- Injured Patients and Families Compensation Fund accounts for the program to provide excess medical malpractice insurance for Wisconsin health care providers. The revenues to finance this insurance are primarily derived from assessments charged to health care providers.
- Environmental Improvement Fund accounts for financial resources generated and used for clean water projects. Federal capitalization grants, interest earnings, revenue bond proceeds, and general obligation bond proceeds are its primary funding sources.
- University of Wisconsin System Fund accounts for the 13 universities, 13 two-year colleges, the University of Wisconsin Extension and System Administration.
- Unemployment Reserve Fund accounts for unemployment contributions made by employers, federal program receipts, benefit payment recoveries and unemployment benefits paid to laid off workers in the State.

In addition, the State reports the following fund types:

Governmental Funds

- Special Revenue Funds account for and report the proceeds of specific revenue sources that are restricted or committed to expenditure for specified purposes other than debt service or capital projects. Examples include the Conservation Fund and the Petroleum Inspection Fund.
- Debt Service Funds account for and report financial resources that are restricted, committed, or assigned to expenditure for principal and interest. Financial resources that are being accumulated for future principal and interest are also reported in debt service funds.

- Capital Projects Funds account for and report financial resources that are restricted, committed or assigned to expenditure for capital outlays, including the acquisition or construction of capital facilities and other capital assets (other than those financed by proprietary funds or that will be held in trust for individuals, private organizations, or other governments).
- Permanent Funds account for and report resources that are restricted to the extent that only earnings, and not principal, may be used for purposes that support the State's programs – that is, for the benefit of the State or its citizenry.

Proprietary Funds

- Enterprise Funds account for the activities for which fees are charged to external users for goods or services. Examples include the Lottery Fund and the Veterans Trust Fund.
- Internal Service Funds account for the operations of State agencies which provide goods or services to other State units or other governments on a cost-reimbursement basis. These services include technology, fleet management, financial, facilities management, and risk management. Additional goods and services are provided by the inmate work experience program, Badger State Industries.

Fiduciary Funds

- Pension and Other Employee Benefit Trust Funds used to account for resources that are required to be held in trust for members and beneficiaries for public employee retirement or other benefit plans e.g. Wisconsin Retirement System and duty disability.
- Investment Trust Funds account for assets invested on a commingled basis by the State on behalf of other governmental entities e.g. local government pooled investments.
- *Private-purpose Trust Funds* account for all other trust arrangements which benefit individuals, private organizations, or other governments e.g. the state-sponsored college savings program.
- Agency Funds account for those assets for which the State acts solely in a custodial capacity e.g. the collection and disbursement of court-ordered child support payments.

Amounts reported as program revenues on the government-wide statement of activities include (a) charges for services – amounts received from customers or applicants who purchase, use or directly benefit from the goods, services or privileges provided by the State; including interest earnings from various loan funds/ component units, (b) program-specific operating grants, contributions, and restricted interest, and (c) program-specific capital grants, contributions, and restricted interest. General revenues consist of taxes and all other revenues that do not meet the definition of program revenues. Special items, if any, are significant transactions or events within the control of management that are either unusual in nature or infrequent in occurrence.

As a general rule, the effect of interfund activity has been eliminated from the government-wide financial statements. This includes all internal service fund activity, as well as other internal allocations. Exceptions to this general rule are certain charges between various functions of the government, whose elimination would distort the direct costs and program revenues reported for the various functions concerned.

The revenues and expenses shown on the proprietary fund statements are identified as either operating or nonoperating. Operating revenues and expenses generally result from providing goods and services in connection with a proprietary fund's primary mission. The State's enterprise funds are involved in many diverse fields including patient care, insurance programs, loan programs, the University of Wisconsin System, employee benefit plans, and the lottery. The internal service funds provide services and goods to other State agencies and departments.

A significant portion of operating revenues for the proprietary funds is recorded under charges for goods and services. In the case of the State's loan program enterprise funds, investment and interest income is an important component of operating revenue. Operating revenues of the University of Wisconsin include tuition and fees, certain grants and contracts resulting from exchange transactions, and sales and services of educational activities and auxiliary enterprises. In regards to the employee benefit plans, the primary operating revenue source is participant and employer contributions. Operating expenses for the proprietary funds include the costs of sales and services, benefit expenses, administration expenses not related to a fund's primary purpose are reported as nonoperating.

When both restricted and unrestricted resources are available for use, it is the State's policy to use restricted resources first, then unrestricted resources as they are needed.

E. Assets, Deferred Outflows of Resources, Liabilities, Deferred Inflows of Resources, and Net Position/Fund Balances

1. Cash and Cash Equivalents

Cash balances of most funds are deposited with the Department of Administration where the available balances beyond immediate needs are pooled in the State Investment Fund for short-term investment purposes. Balances pooled are restricted to legally stipulated investments valued consistent with GASB Statement No. 31, Accounting and Financial Reporting for Certain Investments and for External Investment Pools. Cash balances not controlled by the Department of Administration may be invested where permitted by statute.

Cash and cash equivalents, reported on the balance sheet and statement of cash flows, include bank accounts, petty cash, cash in transit, short-term investments with an original maturity of three months or less such as certificates of deposit, money market certificates and repurchase agreements and individual funds' shares in the State Investment Fund.

GASB Statement No. 40, *Deposit and Investment Risk Disclosures*, requires disclosure of risks associated with deposit and investment balances and the policies applied to mitigate such risks. Specific disclosures are included in Note 5, Deposits and Investments.

2. Investments

The State may invest in direct obligations of the United States and Canada, securities guaranteed by the United States, certificates of deposit issued by banks in the United States and solvent financial institutions in the State, commercial paper and nonsecured corporate notes and bonds, bankers acceptances, participation agreements, privately placed bonds and mortgages, common and preferred stock and other securities approved by applicable sections of the Wisconsin Statutes, bond resolutions, and various trust indentures (see Note 5 to the financial statements).

Generally, investments of the primary government are reported at fair value consistent with the provisions of GASB Statement No. 31, Accounting and Financial Reporting for Certain Investments and for External Investment Pools. Typically, fair value information is determined using quoted market prices. However, when quoted market prices are not available for certain securities, fair values are estimated through techniques such as discounted future cash flows, matrix pricing and multi-tiers.

There are a certain number of securities carried at cost. Certain non-public or closely held stocks are carried at cost since no independent quotation is available to price these securities. Further, certain investment agreements are reported on a cost basis because the State cannot readily determine whether these agreements meet the definition of interest-earning investment contracts as defined by GASB Statement No. 31. However, the impact on the financial statements is immaterial.

Under Wisconsin Statutes, the investment earnings of certain Permanent Funds are assigned to other funds. The following table shows the funds earning the investment income and the ultimate recipients of that income:

Fund Generating Investment Income	Fund Receiving
Agricultural College	University of Wisconsin System
Normal School	General Fund and University of Wisconsin System
University	University of Wisconsin System
Benevolent	General Fund

3. Mortgage and Other Loans

Mortgage loans of the Veterans Mortgage Loan Repayment Fund and the Veterans Trust Fund programs, business-type activities, are stated at the outstanding loan balance less an allowance for doubtful accounts.

4. Forestation State Tax

The State levies an annual tax of two-tenths of one mill for each dollar of the assessed valuation of the property in the State, as described in Wis. Stat. Sec. 70.58. This tax is levied for the purpose of acquiring, preserving and developing the forests of the state; for forest crop law and county forest law administration and aid payments; and for the acquisition, purchase and development of forests. The proceeds of the tax are paid to the Conservation Fund.

This tax, the only property tax levied by the State, is levied to each county on or before the fourth Monday in August of each year on assessed valuation as of January 1 of that year. The tax is due and payable January 31 or on the due dates established through an installment option permitted under Wis. Stat. Sec. 74.12.

Consistent with the requirements of GASB Interpretation No. 5, Property Tax Revenue Recognition in Governmental Funds, collections received July 1 through August 31 that were due but unpaid at June 30 are accrued.

5. Interfund Assets/Liabilities

During the course of operations, numerous transactions occur between individual funds for goods provided or services rendered. The balance sheet or statement of net position for proprietary and fiduciary funds classifies these receivables and payables as "Due from Other Funds" or "Due to Other Funds." Short-term interfund loans are classified as "Interfund Receivables" or "Interfund Payables." Long-term interfund loans are classified as "Advances to Other Funds" and "Advances from Other Funds".

Balances that exist between the primary government and component units are classified as "Due to/from Primary

Government" and, correspondingly, "Due to/from Component Units".

Amounts reported in the funds as interfund assets/liabilities are eliminated in the governmental and business-type columns of the Statement of Net Position, except for the net residual amount due between governmental and business-type activities which is shown as internal balances.

6. Inventories and Prepaid Items

Inventories of governmental and proprietary funds are valued at cost, which approximates market, using the first-in/first-out, last in/first out, or weighted-average method. The costs of governmental fund-type inventories are recorded as expenditures when purchased rather than when consumed.

Inventories of the University of Wisconsin System held by central stores are valued at average cost, fuels are valued at market, and other inventories held by individual institutional cost centers are valued using a variety of cost flow assumptions that, for each type of inventory, are consistently applied from year to year.

Prepaid items reflect payments for costs applicable to future accounting periods.

The fund balances of governmental funds are reported as nonspendable for inventories and prepaid items, except in cases where prepaid items are offset by unearned revenues, to indicate that these accounts do not represent expendable available financial resources.

7. Capital Assets

Capital assets, which include property, plant, equipment, intangibles, land and infrastructure assets (roads, bridges, and buildings considered an ancillary part of roads), are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Assets of the primary government, other than infrastructure and land purchased for the construction of infrastructure assets, are capitalized when they have a unit cost of \$5,000 or more (except for a collection of library resources that must have a cumulative value equal to or greater than \$5.0 million and software purchased by the University of Wisconsin System) and a useful life of two or more years. In addition, internally generated intangible assets are capitalized only if costs are equal to or are greater than \$1.0 million.

Purchased or constructed capital assets are valued at cost or estimated historical cost if actual historical cost is not practicably determinable. Donated capital assets are recorded at their fair value at the time received.

The State has elected to report infrastructure assets (roads, bridges and buildings considered an ancillary part of roads) using the modified approach. Under this method infrastructure assets are not required to be depreciated if the State manages its eligible infrastructure assets using an asset management system designed to maintain and preserve its infrastructure assets at a condition level established and disclosed by the State. All infrastructure assets constructed prior to July 1, 2000 have been recorded at estimated historical cost. The estimated historical cost was determined by calculating the current cost of a similar asset and deflating that cost using the Federal Highway Administration's composite index for federal aid highway construction to the estimated average construction date. All infrastructure assets constructed after July 1, 2000 have been recorded at historical cost. The costs of maintenance and preservation that do not add to the asset's capacity or efficiency are not capitalized. Interest incurred during construction is not capitalized.

Exhaustible capital assets of the primary government generally are depreciated on the straight-line method over the asset's useful life. Select buildings of the University of Wisconsin System are depreciated using the componentized method over the estimated useful life of the related assets. Depreciation expense is recorded in the government-wide financial statements, as well as in the proprietary fund statements. There is no depreciation recorded for land, construction in process, infrastructure, and certain other capital assets including the State Capitol and Executive Residence and associated furnishings, defined as inexhaustible. Generally, estimated useful lives are as follows:

Buildings and improvements	6 - 40 years
Equipment, machinery and furnishings	3 - 15 years

Collections of works of art, historical treasures, and similar assets, which are on public display, used in furtherance of historical education, or involved in advancement of artistic or historical research, are not capitalized unless these collections were already capitalized at June 30, 1999. Collections range from memorabilia on display in the Wisconsin Veterans Museum, the Wisconsin Historical Society Museum and other museums to buildings such as the Villa Louis Mansion and the Fur Trade Museum located at the Villa Louis historical site. In addition, works of art or historical treasures on display in the various State office buildings, as well as statues on display outside the State Capitol, also are not capitalized.

8. Restricted and Limited Use Assets

Assets that are required to be held and/or used as specified in Wisconsin statutes, bond indentures, bond resolutions, trustee agreements, board resolutions, and donor specifications have been reported as Restricted and Limited Use Assets.

9. Local Assistance Aids

Municipal and County Shared Revenue Program

Through the Municipal and County Shared Revenue Program, the State distributes general revenues collected from general State tax sources to municipal and county governments to be used for providing local government services. State statutes require that payment to local governments be made during July and November.

At June 30, 2015, the State was liable to various local governments for unpaid shared revenue aid. To measure the amount of the program allocable to the State's fiscal year, the amount is prorated over portions of recipient local governments' calendar fiscal years that are within the State's fiscal year. The result is that a liability of \$442.0 million representing one-half of the total appropriated amount is reported at June 30, 2015 as Due to Other Governments.

State Property Tax Credit Program

At June 30, 2015, the State was liable to various taxing jurisdictions for the school levy, the first dollar, and the lottery property tax credits paid through the State Property Tax Credit Program.

The school levy tax credit provides property tax relief in the form of State credits on individual property tax bills.

The first dollar tax credit was first established for property taxes levied in 2008, and payable in 2009. This credit is allowed on every taxable real estate parcel containing an improvement in the state.

Under the lottery property tax credit, owners of property used as a primary residence receive a tax credit equal to the school property tax on a portion of the dwelling's value.

State statutes require that payment to local taxing jurisdictions for the school levy and first dollar tax credits be made during July. Although the state property tax credit is calculated on the property tax levy for school purposes, the State's July payment is paid to an administering municipality who treats the payment the same as other tax collections and distributes the collections to the various tax levying jurisdictions (e.g., cities, towns, and school districts).

The portion of the liability payable to school districts for the school levy and first dollar tax credits represents the amount of the July payment earned over the school districts' previous fiscal year ended June 30. Since the entire school districts' portion of the July payment occurs within the State's fiscal year, 100 percent of the July payment relating to the school taxing jurisdictions' levy is reported as a liability at June 30, 2015.

The portion of the liability payable to general government for the school levy and first dollar tax credits represents the amount of the July payment prorated over the portion of the local governments' calendar year which is within the State's fiscal year. The result is that 50 percent of the July payment based on the general government taxing jurisdictions' levy is reported as a liability at June 30, 2015.

The aggregated State Property Tax Credit Program liability of \$670.3 million is reported in the General Fund as Due to Other Governments. Of that amount, \$559.5 million relates to the school levy tax credit and \$110.8 million relates to the first dollar tax credit.

The lottery property tax credit is accounted for in the Lottery Fund, an enterprise fund that records revenues and expenses on the accrual basis. The State pays municipal treasurers for lottery credits who distribute the moneys to the various taxing jurisdictions. For credits reducing the calendar year 2015 property tax bills, the State made this payment in March 2015. A portion of the State's March payment distributed to the general government taxing jurisdictions applies to their fiscal year that ends on December 31. Therefore, part of the March distribution represents an expense of the State in Fiscal Year 2015, while the remaining portion represents advanced payments. The resulting deferred outflow of resources reported within the Lottery Fund totals \$41.8 million at June 30, 2015.

State Aid for Exempt Computers

The Aid for Exempt Computers compensates local governments for tax base lost due to the property tax exemption for computers, software and related equipment. Aid payments are calculated using a procedure that results in an aid amount equal to the amount of taxes that would be paid if the property were taxable. Payments to local governments are made on the fourth Monday in July.

At June 30, 2015, the State was liable to various local governments and other taxing jurisdictions for unpaid exempt computer aid payments of \$60.2 million.

10. Long-term Debt Obligations

In the government-wide financial statements, and proprietary fund types in the fund financial statements, long-term debt is reported as a liability net of the applicable bond premium or discount. Bond premiums and discounts are deferred and amortized using the effective interest rate method on a prospective basis beginning in Fiscal Year 2004, except for the annual appropriation bonds that are amortized ratably over the life of the obligations to which they relate.

In the fund financial statements, governmental fund types recognize flows for bond premiums and discounts, as well as issuance costs, during the current period. The face amount of the

debt issued is reported as other financing sources. Premiums and discounts are reported as other financing sources and other financing uses, respectively. Issuance costs are reported as other debt service expenditures for governmental fund types, and non-operating expenses for proprietary fund types.

On the government-wide financial statements, bond premiums and discounts related to the Transportation Revenue Bonds and the Petroleum Inspection Fee Obligation Revenue Bonds (which finance programs in a capital projects fund and a special revenue fund, respectively) are amortized ratably over the life of the obligations to which they relate. Results from the use of this method do not vary materially from those that would be obtained by use of the effective interest rate method.

11. Compensated Absences

Consistent with the compensated absences reporting standards of GASB Statement No. 16, *Accounting for Compensated Absences*, an accrual for certain salary-related payments associated with annual leave and an accrual for a certain portion of sick leave is included in the compensated absences liability at year end.

Annual Leave

Full-time employees' annual leave days are credited on January 1 of each calendar year in general at a minimum of 15 or 13 days per year, depending on Fair Labor Standards Act (FLSA) status. There is no requirement to use annual leave. However, unused leave is lost unless approval to carry over the unused portion is obtained from the employing agency. Generally, compensatory time accumulates for eligible employees for hours worked in excess of forty hours per week. In general, each full-time employee is eligible for four and one-half personal holidays each calendar year, provided the employee is in pay status for at least one day in the year. If a holiday occurs on a Saturday, employees receive leave time proportional to their working status to use at their discretion.

The State's compensated absence liability at June 30 consists of accumulated unpaid annual leave, compensatory time, personal holiday hours, and Saturday/legal hours earned and vested during January through June. The liability is reported in the government-wide, proprietary fund types and fiduciary funds.

Sick Leave

Full-time employees earn sick leave at a rate of five hours per pay period. Unused sick leave is accumulated from year to year without limit until termination or retirement. Accumulated sick leave is not paid. However, at employee retirement the accumulated sick leave may be converted to pay for the retiree's health insurance premiums. The State accumulates resources to pay for the expected health insurance premiums of retired employees. The portion of the health insurance obligation funded through the sick leave conversion and accumulated resources are presented in the Accumulated Sick Leave Fund, a pension and other employee benefit trust fund.

12. Unearned Revenue

In both the government-wide and fund financial statements unearned revenue represents amounts for which asset recognition criteria have been met, but not revenue recognition criteria. Unearned revenue arises when resources are received by the State before it has a legal claim to them, such as when grant moneys are received prior to the incurrence of qualifying expenditures. In subsequent periods, when revenue recognition criteria are met, or when the State has a legal claim to the resources, the liability for unearned revenue is removed and revenue is recognized.

Unearned revenue of the University of Wisconsin System consists of payments received but not earned at June 30, 2015, primarily for summer session tuition, tuition and room deposits for the next fall term, advance ticket sales for upcoming intercollegiate athletic events, and amounts received from grant and contract sponsors that have not yet been earned under the terms of the agreement.

13. Self-Insurance

Consistent with the requirements of GASB Statement No. 10, Accounting and Financial Reporting for Risk Financing and Related Insurance Issues, the State's risk management activities are reported in an internal service fund, and the claims liabilities associated with that fund are reported therein.

The State's policy is generally not to purchase commercial insurance for the risk of losses to which it is exposed. Instead, State management believes it is more economical to manage its own risks internally. The Risk Management Fund, an internal service fund, is used to pay for losses incurred by any State agency and for administrative costs incurred to manage a statewide risk management program. These losses include damage to property owned by the agencies, personal injury or property damage liabilities incurred by a State officer, agent or employee, and worker's compensation costs for State employees. A limited amount of insurance is purchased to limit the exposure to catastrophic losses. Annually, a charge is allocated to each agency for its proportionate share of the estimated cost attributable to the program per Wis. Stat. Sec. 16.865(8).

14. Deferred Outflows of Resources and Deferred Inflows of Resources

Deferred outflows of resources are a consumption of net assets by the government that is applicable to a future reporting period. Deferred inflows of resources are an acquisition of net assets by the government that is applicable to a future reporting period. The events associated with the outflows and inflows of resources have already occurred. Under GASB standards, however, the recognition of those outflows and inflows as expenses or expenditures and revenues are deferred until the future periods to which the outflows and inflows are applicable. GASB standards identify circumstances under which deferred outflows of resources and deferred inflows of resources must be reported. The reporting of deferred inflows and outflows are only allowable under those circumstances.

As applicable, the State reports deferred outflows of resources or deferred inflows of resources in the Statement of Net Position for governmental activities and business-type activities and for proprietary and fiduciary fund types as follows:

A decrease or increase in the fair value of derivative instruments classified as effective hedges is presented as a deferred outflow or deferred inflow of resources, respectively, with an off-setting liability or asset, as applicable.

Gains on refunded debt (i.e. the reacquisition price is less than the net carrying amount of the old debt) are reported as deferred inflows, while losses on refunded debt (i.e. the reacquisition price is greater than the net carrying amount of the old debt) are reported as deferred outflows. Both are amortized to interest expense over the remaining life of the old bonds or the life of the new bonds, whichever is shorter.

Differences between expected and actual pension experience with regard to economic and demographic factors in the measurement of the total pension liability for the State's proportionate share are reported as deferred inflows or deferred outflows of resources. They are amortized using a systematic and rational method over a closed period equal to the average of the expected remaining service lives of all active and inactive employees provided with pensions through the pension plan.

Changes of assumptions about future economic or demographic factors, or of other inputs in the measurement of the total pension liability for the State's proportionate share, are reported as deferred inflows or deferred outflows of resources. They are amortized using a systematic and rational method over a closed period equal to the average of the expected remaining service lives of all active and inactive employees provided with pensions through the pension plan.

Differences between projected and actual earnings on the State's proportionate share of pension plan investments are reported as

deferred inflows or deferred outflows of resources and amortized using a systematic and rational method over a closed five-year period.

Changes in the State's proportionate share of the net pension liability since the prior measurement date, and differences between actual and proportionate share of contributions are reported as deferred inflows or deferred outflows of resources. They are amortized using a systematic and rational method over a closed period equal to the average expected remaining service lives of all active and inactive employees provided with pensions through the pension plan.

Contributions to the pension plan from the State subsequent to the measurement date of the collective net pension liability and before the end of the State's fiscal year end are reported as deferred outflows of resources.

State resources transmitted to an entity before time requirements are met, but after all other eligibility requirements have been met, are reported as a deferred outflow of resources.

Federal or other entities' resources transmitted to the State before time requirements are met, but after all other eligibility requirements have been met, are reported as deferred inflows of resources.

Further, governmental fund types may report deferred inflows of resources for unavailable revenue, such as derived nonexchange revenue transactions (e.g. sales tax, income tax, assessments on earnings and consumption, etc.). These inflows are not deferred in the government-wide financial statements; rather, they are recognized as revenue.

15. Fund Balance Classification and Restricted Net Position

Fund Balance Classification

In the fund financial statements, governmental funds report fund balance classifications that comprise a hierarchy based primarily on the extent to which the state is bound to honor constraints on the specific purposes for which amounts in those funds can be spent. Fund balance is reported as restricted when constraints placed on the use of the resources are either externally imposed by creditors, grantors, contributors, or laws or regulations of other governments; or, imposed by law through constitutional provisions or enabling legislation.

Amounts that may be used only for specific purposes, pursuant to constraints imposed by passage of a bill by both houses of the legislature that is signed into law by the governor, are reported as committed fund balance. Those committed amounts cannot be used for any other purpose unless a bill passes both houses of the legislature and is signed by the governor to remove or change the specified use. Passage of a bill by both houses of the legislature and signing of the bill by the governor is the highest level action that results in committed fund balance.

Amounts that are constrained by the state's intent to be used for specific purposes, but are neither restricted nor committed, are classified as assigned fund balances. Intent is expressed by state officials to whom the state has delegated the authority to assign amounts to be used for specific purposes. Unassigned fund balance represents fund balance that has not been assigned to other funds and that has not been restricted, committed, or assigned to specific purposes within the general fund. Nonspendable fund balances include amounts that cannot be spent because they are either not in spendable form or are legally or contractually required to be maintained intact.

When both restricted and unrestricted resources are available for use it is the State's policy to use restricted resources first, and then unrestricted as they are needed. The state has not established a policy for use of unrestricted fund balance. Under the provisions of GASB Statement No. 54, *Fund Balance Reporting and Governmental Fund Type Definitions*, if a government does not establish a policy for its use of unrestricted fund balance amounts, committed amounts would be reduced first, followed by assigned amounts, and then unassigned amounts.

Restricted Net Position

Restricted Net Position, presented in the government-wide and proprietary funds statement of net position are reported when constraints placed on use are either (1) externally imposed by creditors (such as through debt covenants), grantors, contributors, or laws or regulations of other governments, or (2) imposed by law through constitutional provisions or enabling legislation. Enabling legislation authorizes the government to assess, levy, charge, or otherwise mandate payment of resources (from external resource providers) and includes a legally enforceable requirement that those resources be used only for the specific purposes stipulated in the legislation. Unrestricted net position may be used at the State's discretion but may have limitations on use based on State statutes. This page left intentionally blank.

NOTE 2. DETAILED RECONCILIATION OF THE GOVERNMENT-WIDE AND FUND STATEMENTS

A. Explanation of Differences Between the Balance Sheet – Governmental Funds and the Statement of Net Position

During the year ended June 30, 2015, the following adjustments and reclassifications were necessary to reconcile the information from the fund-based Balance Sheet – Governmental Funds to the amounts presented in the governmental activities section of the Statement of Net Position (in thousands). The differences result primarily from the long-term economic focus of the Statement of Net Position compared to the current financial focus of the Balance Sheet – Governmental Funds.

		Total Governmental Funds	Long-term Assets and Liabilities (1)	Internal Service Funds (2)	eclassifications and Eliminations (3)	Total Amount for Statement of Net Position
Assets:

- (1) Long-term asset and liability differences arise because governmental funds focus only on short-term financing (that is, resources that will be available to pay for current period expenditures). In contrast, the Statement of Net Position has a long-term economic focus and reports on all capital and financial resources.
- (2) The adjustment for internal service funds reflects the reclassification of these funds for the government-wide statement. The assets and liabilities of these funds are reported as proprietary activities on the fund statements, but are included as governmental activities on the Statement of Net Position.
- (3) Various reclassifications are necessary due to the differing level of detail needed on each of the statements. Eliminations are done on the Statement of Net Position to minimize the grossing-up effect on assets and liabilities within the governmental and businesstype activities columns of the primary government. The net residual amounts due between governmental and business-type activities are shown as internal balances.

B. Explanation of Differences Between the Statement of Revenues, Expenditures, and Changes in Fund Balances – Governmental Funds and the Statement of Activities

During the year ended June 30, 2015, the following adjustments and reclassifications were necessary to reconcile the information from the fund-based Statement of Revenues, Expenditures, and Changes in Fund Balances – Governmental Funds to the amounts presented in the governmental section of the Statement of Activities (in thousands). The differences result primarily from the long-term economic focus of the Statement of Activities compared to the current financial focus of the Statement of Revenues, Expenditures, and Changes in Fund Balance – Governmental Funds.

		Total Governmental Funds		Long-term Revenues and Expenses (1)	Capital-Related Items (2)

Change in Inventories		10,686	7	(,; ; ; ;),	.,,
-	\$	(527,267)			
	¥	(327,207)			

(1) Long-term revenue differences arise because governmental funds report revenues only when they are considered "available," while government-wide statements report revenues when earned. Long-term expense differences arise because governmental funds report operating expenses (including interest) using the modified accrual basis of accounting, while government-wide statements report using the accrual basis of accounting.

(2) Capital-related adjustments consist of the difference between proceeds for the sales of capital assets and the gain or loss from the sales of capital assets, and from the difference between capital outlay expenditures recorded in the governmental funds and depreciation expense recorded in the government-wide statements.

(3) The adjustment for internal service funds reflects the elimination of these funds from the government-wide statement, which is accomplished by charging/refunding additional amounts to participating governmental activities to completely offset the internal service funds' cost for the year.

Internal S Funds		Long-term Debt Transactions (4)	Eliminations (5)	Revenue/Expense Reclassifications (6)	Total Amount for Statement of Activities

	(,, -, +	, ¥		(10,686)	
					¢
				\$ (0)	\$ 589,141

(4) Long-term debt transaction differences consist of bond proceeds and principal repayments reported as other financing sources and expenditures in governmental funds, but as increases and decreases in liabilities in the government-wide statements.

Intra-entity activity within the same function is eliminated to remove the grossing up of both direct expenses and program revenues within that category.
 Revenue and expense reclassifications are necessary due to the differing level of detail needed on each of the statements. In addition, the Statement of Activities focuses on program revenue, which has been redefined from the traditional revenue source categories.

NOTE 3. BUDGETARY CONTROL

The legal level of budgetary control for Wisconsin is at the function, agency, program, appropriation-level. Supplemental appropriations require the approval of the Joint Finance Committee of the Legislature. Routine adjustments, such as pay plan supplements and rent increases, are distributed by the Division of Executive Budget and Finance from non-agency specific appropriations authorized by the Legislature. Various supplemental appropriations were approved during the year and have been incorporated into the budget figures.

The budgetary comparison schedule and related disclosures for the General and Transportation funds are reported as Required Supplementary Information. This schedule presents the original budget, the final budget and actual data of the current period. The related disclosures describe the budgetary practices of the State, as well as, provide a detailed reconciliation between the General and Transportation funds' equity balance on the budgetary basis compared to the GAAP basis as shown on the governmental fund statements.

NOTE 4. DEFICIT FUND BALANCE/FUND NET POSITION, RESTRICTED NET POSITION, BUDGET STABILIZATION ARRANGEMENT, MINIMUM FUND BALANCE POLICY, AND FUND BALANCE OF GOVERNMENTAL FUNDS

A. Deficit Fund Balance/Fund Net Position

In addition to the General and Capital Improvement Funds, funds reporting a deficit fund balance or net position at June 30, 2015 are (in thousands):

Special Revenue:	
Petroleum Inspection	\$ 39,022
Dry Cleaner Environmental Response	6,088
Land Information	175
Capital Projects:	
Transportation Revenue Bonds	89,860
Enterprise:	
Northern Developmental Disabilities Center	15,314
Local Government Property Insurance	5,852
Long Term Disability Insurance	89,176
Internal Service:	
Risk Management	97,864
Private-Purpose Trust:	
Retiree Health Insurance	65,381

B. Restricted Net Position

GASB Statement No. 46, Net Assets Restricted by Enabling Legislation, which amends GASB Statement No. 34, Basic Financial Statements – and Management's Discussion and Analysis – for State and Local Governments, provides guidance for determining when net assets have been restricted to a particular use by the passage of enabling legislation and how those net assets should be reported in financial statements when there are changes in the circumstances surrounding such legislation. Net position restricted by enabling legislation was as follows on June 30, 2015 (in thousands):

Governmental Activities:

Net Position Restricted by Enabling Legislation	366,924
Business-type Activities:	
Net Position Restricted by Enabling Legislation	575,664

C. Budget Stabilization Arrangement

Wisconsin Statutes 25.60 establishes a stabilization arrangement for monies to be set aside for use if General Fund revenues are less than projected and expenditures exceed budgeted amounts. Wisconsin Statues 16.518 provides for the automatic transfer of 50.0 percent of the excess of General Fund tax revenues over tax estimates to be deposited into a stabilization appropriation. However, the transfer may not be made if the stabilization balance is at least equal to 5.0 percent of estimated General Fund expenditures for the fiscal year. Further, the transfer may not reduce the General Fund balance below the required statutory balance. In addition to the transfer described, under Wisconsin Statutes 16.72(4) net proceeds from the sale of supplies, materials and equipment are also to be deposited into the stabilization appropriation except as otherwise provided by law.

Wisconsin Statutes 16.50(7) provides that if the secretary of the Department of Administration determines that previously authorized expenditures under the biennial budget act will exceed revenues in the current or forthcoming fiscal year by more than one-half of one percent of the estimated general purpose revenue appropriations for that fiscal year, he or she shall immediately notify the governor, the presiding officers of each house of the legislature and the joint committee on finance. Following such notification, the governor shall submit a bill containing recommendations for correcting the imbalance between projected and authorized expenditures, including revenues а recommendation as to whether moneys should be transferred from the budget stabilization appropriation to the General Fund.

Beyond the requirements noted above, 2013 Wisconsin Act 145, prohibited transfers from the General Fund to the budget stabilization appropriation in Fiscal Year 2015. The balance of the budget stabilization arrangement as of June 30, 2015 was \$280.3 million.

D. Minimum Fund Balance

Wisconsin Statutes 20.003(4) establishes a minimum General Fund balance. Under the statutes, no bill directly or indirectly affecting general purpose revenues as defined in Wisconsin Statues 20.001(2)(a) may be enacted by the legislature if the bill would cause the estimated General Fund balance on June 30 of any fiscal year to be an amount equal to or less than the amount specified for that fiscal year. The minimum required balance for the fiscal year ending June 30, 2015 was \$65.0 million.

E. Fund Balance for Governmental Funds

Governmental funds reported the following categories of fund balance as of June 30, 2015 (in thousands):

	General	Transportation	Capital Improvement	Nonmajor Governmental	Total Governmental
	Centeral	Transportation	Improvement	Governmentar	Governmentar
Nonspendable for:					
Inventory, Prepaid and Long-term

Total Fund Balance	(1,779,409)	777,486	(735,727)	1,299,685	(437,965)

NOTE 5. DEPOSITS AND INVESTMENTS

The State maintains a short-term investment "pool", the State Investment Fund, for the State, its agencies and departments, and certain other public institutions which elect to participate. The investment "pool" is managed by the State of Wisconsin Investment Board (the Board) which is further authorized to carry out investment activities for certain enterprise, trust and agency funds. A small number of State agencies and the University of Wisconsin System also carry out investment activities separate from the Board.

A. Deposits

Deposits include cash and cash equivalents on deposit in banks or other financial institutions, and nonnegotiable certificates of deposit. The majority of the State's deposits are under the control of the Department of Administration. The Department of Administration maintains multiple accounts with an agreement with the bank that allows an overdraft in one account if the overdraft is offset by balances in other accounts.

Custodial credit risk is the risk that in the event of a bank failure, the government's deposits may not be returned to it. The State's policy regarding custodial credit risk is detailed in Chapter 34 of the State Statutes. In brief, any federal or state bank, credit union or savings bank may be designated a public depository. A surety bond may be required. The State's insured deposits are covered by the Federal Deposit Insurance Corporation (FDIC) and an appropriation for losses on public deposits. In the event of loss, the division of banking makes payments up to \$400,000 per deposit Insurance Corporation or the Wisconsin Credit Union Savings Insurance Corporation. Payments are made, until the funds available in the appropriation are exhausted, in the order in which satisfactory proofs of loss are received by the State's Department of Financial Institutions.

1. Primary Government

As of June 30, 2015, \$350.7 million of the primary government's bank balance of \$378.4 million was exposed to custodial credit risk as follows (in millions):

Uninsured and uncollateralized	\$	350.7
	Ψ	000.1

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of a deposit. Deposits in foreign currency at June 30, 2015 are immaterial. The primary government does not have a formal policy specifically related to foreign currency risk.

The State's Unemployment Reserve Fund had \$513.8 million on deposit with the U.S. Treasury. This amount is presented as Cash and Cash Equivalents and is not included in the carrying amount of deposits nor is it categorized according to risk because it is neither a deposit with a financial institution nor an investment.

B. Investments

1. Primary Government

Wisconsin Statutes, program policy provisions, appropriate governing boards, and general resolutions contained in revenue bond indenture documents define the types of securities authorized as appropriate investments and the conditions for making investment transactions.

Investments of the State are managed by various portfolios. For disclosure purposes, the following investment portfolios are discussed separately:

- Primary government, excluding the University of Wisconsin System, the Wisconsin Retirement System and the State Investment Fund. The primary government portfolios include Various Funds managed by the State of Wisconsin Investment Board consisting of the following:
 - -- Local Government Property Insurance Fund (LGPIF)
 - -- State Life Insurance Fund (SLF)
 - -- Injured Patients and Families Compensation Fund (IPFCF)
 - -- Historical Society Fund
 - -- Tuition Trust Fund
- University of Wisconsin System (UWS)
- Wisconsin Retirement System (WRS)
- State Investment Fund (SIF) -- functions as the State's cash management fund by "pooling" the idle cash balances of all State funds and other public institutions. Investments of the SIF are discussed in section B2 of this note disclosure.

Primary Government (excluding the University of Wisconsin System (UWS), the Wisconsin Retirement System (WRS), and the State Investment Fund (SIF))

For the primary government, except for the Various Funds discussed later, permitted investments include: direct general obligations of the United States of America and obligations (including obligations of any federal agency or corporation) for which the payment of the principal and interest are unconditionally guaranteed by the full faith and credit of the United States; bonds or other obligations of any state or the United States of America or of any agency, instrumentality or local governmental unit of any such state including the State of Wisconsin; bonds, debentures, participation certificates, notes or similar evidences of indebtedness of any of the Federal Financing Bank, Federal Home Loan Bank System, Federal Farm Credit Bank, Federal National Mortgage Association, Federal Home Loan Mortgage Corporation, Resolution Funding Corporation, Government National Mortgage Association, Student Loan Marketing Association or Tennessee Valley Authority; public housing bonds issued by public agencies or municipalities; commercial paper; interest-bearing time deposits, certificates of deposit or other similar banking arrangements; shares of a diversified open-end management investment company; repurchase agreements; common and preferred stock; bankers acceptances; corporate commercial paper; bonds issued by a local district created under Wisconsin Act 229; and investment agreements with a bank, bank holding company, insurance company or other financial institution.

The State of Wisconsin Investment Board (SWIB or the Board) has control of the investment and collection of principal, interest, and dividends of all monies invested of the Local Government Property Insurance Fund (LGPIF), the State Life Insurance Fund (SLF), the Injured Patients and Families Compensation Fund (IPFCF), the Historical Society Trust Fund, and the Tuition Trust Fund, which are collectively known as the "Various Funds".

Wisconsin Statutes allow investments of the LGPIF in direct obligations of the United States and Canada, securities guaranteed by the United States, unsecured notes of financial and industrial issuers, Yankee/Euro dollar issues, and certificates of deposit issued by banks in the United States, including solvent financial institutions in Wisconsin.

Permitted classes of investments of the SLF and the IPFCF include bonds of government units or of corporations, loans secured by mortgages, preferred or common stocks, real property and other investments not specifically prohibited by statute.

Funds available for the Historical Society Trust Fund are managed with an investment objective of maintaining a diversified portfolio of high quality publicly issued equities and fixed income obligations providing long-term growth in capital and income generation.

The Board is directed to invest moneys held in the Tuition Trust Fund in investments with maturities and liquidity that are appropriate for the needs of the fund as reported by the State Department of Administration.

University of Wisconsin System (UWS)

The University of Wisconsin System (UWS) investment policies and guidelines are governed and authorized by the Board of Regents. The current approved asset allocation policy for longterm funds sets a general target of 35.0 percent marketable equities, 30.0 percent fixed income, and 35.0 percent alternatives. The approved asset allocation for intermediate term funds is 15.0 percent marketable equities, 70.0 percent fixed income, 10.0 percent alternatives and 5.0 percent cash. These target allocations were last affirmed/approved by the Board of Regents in December 2014.

Wisconsin Retirement System (WRS)

All assets of the WRS are invested by the State of Wisconsin Investment Board (the Board). The WRS consists of shares in the Core Retirement Investment Trust and the Variable Retirement Investment Trust.

The investments of the Core Retirement Investment Trust consist of a diversified portfolio of securities. Wis. Stat. Sec. 25.182 authorizes the Board to manage the Core Retirement Investment Trust in accordance with "prudent investor" standard of responsibility as described in Wis. Stat. Sec. 25.15(2) which requires that the Board manage the funds with the diligence, skill and care that a prudent person acting in a similar capacity and with the same resources would use in managing a large public pension fund.

Investments of the Variable Retirement Investment Trust are authorized under Wis. Stat. Sec. 25.15 and 25.17. Wis. Stat. Sec. 25.17(5) states assets of the Variable Retirement Investment Trust shall be invested primarily in equity securities which shall include common stocks, real estate or other recognized forms of equities whether or not subject to indebtedness, including securities convertible into common stocks and securities of corporations in the venture capital stage. The Variable Retirement Investment Trust consists primarily of common stock and bonds convertible into common stock, although, because of existing conditions in the securities market, there may temporarily be other types of investments.

Credit Risk

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations.

Primary Government (excluding the University of Wisconsin System (UWS), the Wisconsin Retirement System (WRS), and the State Investment Fund (SIF)

The primary government, except for the Various Funds discussed later, follows Wisconsin Statutes, program policy provisions, appropriate governing boards, and general resolutions contained in revenue bond indenture documents limits investments in public housing bonds issued by public agencies or municipalities, the State of Wisconsin, interest-bearing time deposits, certificates of deposit or other similar banking arrangement, shares of a diversified open-end management investment company repurchase agreements and investment agreements to a rating no lower than the rating assigned to the bonds. Investments in all other permitted debt securities are required to bear the highest rating available from each nationally recognized rating agency. In addition, credit risk of certain funds such as the Retiree Life Insurance Fund is minimized by monitoring portfolio diversification by asset class, creditor and industry and by complying with investment limitations governed by insurance laws and regulations.

Investment credit quality ratings as of June 30, 2015, from Standard and Poor's, Moody's Investors Service, and Fitch Ratings are presented below and at the top of the next page using the Standard and Poor's rating scale (in millions):

Primary Government (excluding the Various Funds, UWS, WRS and SIF)						
Credit Quality Ratings	Fair Value					
AAA	\$ 259.4					
AA	839.2					
A	29.9					
Not Rated	1,477.2					
Total	\$ 2,605.7					

The Various Funds' investment guidelines generally require that issues be rated "A-" or better at the time of purchase based on the minimum credit ratings as issued by Nationally Recognized Statistical Rating Organizations (NRSROs). IPFCF guidelines provide that, at the time of purchase, at least 80 percent of the bond portfolio must be rated "A3/A-" or better, using the lower of split ratings.

		Various	Funds				
	 SLF	IPFCF		Historic	Tuition Trust		
AAA	\$ 1.1	\$	15.7	\$		\$	
AA	46.2		425.6				3.2
A	38.8		336.1				0.1

BB	0.6		5.3				
Bond Fund (Not Rated)	 				3.3		
Totals	\$ 110.6	\$	932.6	\$	3.3	\$	3.6

The following schedule displays the credit ratings at June 30, 2015, for the Various Funds (fair values in millions):

University of Wisconsin System (UWS)

The UWS currently holds below investment grade securities within commingled vehicles representing 6.5 percent of total assets of the Long Term Fund and 5.7 percent of total assets of the Intermediate Term Fund. In addition, actively-managed, investment grade fixed income separate accounts must maintain an average portfolio quality of AA by Standard & Poor's and/or Aa by Moody's, and hold only securities rated BBB- or higher by Standard & Poor's and/or Baa3 or higher by Moody's.

The following schedule displays the credit ratings as provided by Moody's Investor Service for debt securities held as of June 30, 2015 (in millions). Obligations of the United States and obligations explicitly guaranteed by the U.S. government have been included in the Aaa rating below.

UWS								
Ratings Fair Value								
Aaa	\$ 60.6							
Aa1	0.7							
Aa2	0.9							
Aa3	1.0

B3	0.2							
Caa2	0.7							
No Rating	4.3							
Unrated Pooled Cash	28.9							
Total	\$ 141.0							

Wisconsin Retirement System (WRS)

With the exception of derivative instrument credit risk, there are no fund-wide or system-wide investment guidelines related to credit risk exposures for investments of the WRS. Fixed income credit risk investment guidelines outline the minimum ratings required at the time of purchase by individual portfolios, or groups of portfolios, based on the portfolios' investment objectives. In addition, some fixed income portfolios are required to carry a minimum weighted average rating at all times.

The following schedule displays the lowest credit rating assigned by nationally recognized statistical rating organizations on debt securities held as of December 31, 2014 (in millions).

WRS		
Rating	F	air Value
P-1 or A-1	\$	523.0

Reverse Repurchase Agreements

Wisconsin Retirement System (WRS)

SWIB held \$820.5 million in reverse repurchase agreements at December 31, 2014. Investment guidelines permit certain portfolios to enter into reverse repurchase agreements, which are a sale of securities with a simultaneous agreement to repurchase the securities in the future at the same price plus a stated rate of interest. The market value of the securities underlying reverse repurchase agreements exceeds the cash received, providing the

counterparty a margin against a decline in market value of the securities. If the counterparty defaults on their obligations to sell these securities back to SWIB or provide cash of equal value, SWIB could suffer an economic loss equal to the difference between the market value of the underlying securities plus accrued interest and the agreement obligation, including accrued interest. This credit exposure at December 31, 2014 was \$17.0 million.

During the calendar year 2014 SWIB began entering into repurchase agreements under a new Master Repurchase Agreement with an agent who retains full control of the underlying securities. Under this new arrangement credit risk exposure is limited to \$200 million per reverse repurchase agreement counterparty. The counterparty credit exposure is monitored daily and managed through the transfer of margin, in the form of cash or securities, between SWIB and the counterparty.

The cash proceeds from reverse repurchase agreements are reinvested by the Board. The maturities of the purchases made with the proceeds of reverse repurchase agreements are not necessarily matched to the maturities of the agreements. The agreed-upon yields earned by the counterparty were between 0.15 percent and 0.30 percent. The reverse repurchase agreements had open maturities, whereby a maturity date is not established upon entering into the agreement; however, interest rates on the agreements are negotiated daily. The agreements can be terminated at the will of either SWIB or the counterparty.

Custodial Credit Risk

Custodial credit risk is the risk that, in the event of a failure of the counterparty, the State will not be able to recover the value of the investment or collateral securities that are in the possession of an outside party.

Primary Government (excluding the University of Wisconsin System (UWS), the Wisconsin Retirement System (WRS), and the State Investment Fund (SIF))

The primary government, including the Various Funds, does not have an investment policy specifically for custodial credit risk. As of June 30, 2015, the primary government did not have any direct investment securities exposed to custodial credit risk.

University of Wisconsin System (UWS)

The UWS's investments are registered in the name of the UWS and the UWS does not participate in any securities lending programs through its custodian bank. Investment securities underlying the UWS's investment in shares of external investment pools or funds are in custody at those funds. The shares owned in these external investment pools are registered in the name of the UWS.

Wisconsin Retirement System (WRS)

The WRS does not have a formal policy for custodial credit risk. As of December 31, 2014, the WRS held 13 repurchase agreements totaling \$151.5 billion. All of these repurchase agreements were tri-party agreements held in short-term cash management portfolios managed by SWIB's custodian. The underlying securities for these repurchase agreements were held by the tri-party's agent, not in SWIB's name.

Concentration of Credit Risk

Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer.

Primary Government (excluding the University of Wisconsin System (UWS), the Wisconsin Retirement System (WRS), and the State Investment Fund (SIF)

Although the primary government, except for the Various Funds discussed later, does not have a formal policy on limiting the exposure to concentrations of credit risk, it is the primary government's policy to comply with the provisions contained within the general resolutions of revenue bond indentures and other program policy investment criteria. For example, the College Savings Program Trust Fund's exposure to a particular industry is limited to no more than double that industry's percentage in the ML All Corporate Index (COAO).

Debt securities issued by the State of Wisconsin represent the largest concentration of investments in a single issuer. In total \$339.7 million of the reported investments of the primary government were issued by the State of Wisconsin which represents 14.9 percent of total investments. Of that amount \$176.6 million belongs to the Environmental Improvement Fund, and represents 79.5 percent of that fund's investments. The non-major governmental funds in aggregate hold investments of \$223.1 million issued by the State of Wisconsin representing 32.1 percent of investments. The non-major governments in debt securities issued by the Farm Credit System, and the Federal Home Loan Bank totaling \$122.1 million and \$67.0 million respectively. The dollar figures represent 17.6 percent, and 9.6 percent of non-major governmental funds' investments respectively.

The Various Funds' investment guidelines limit concentrations of credit risk by establishing maximum issuer and/or sector exposure limits. Generally, the guidelines require that no single issuer may exceed 5 percent of the fund investments, with the exception of U.S. Government and its Agencies, whose exposure is unlimited. The LGPIF further limits AAA-rated U.S. mortgage-backed, AAA-rated asset-backed and individual corporate issuers to 3 percent of the market value of the fund investments. No investments from these issuers were owned at fiscal year-end.

Excluding investments issued or explicitly guaranteed by the U.S. government and pooled investments, as of June 30, 2015, none of the Various Funds had more than 5 percent of their total investments in a single issuer.

University of Wisconsin System (UWS)

Actively-managed, fixed income separate accounts are limited to holding no more than 7.0 percent in any one issuer (U.S. Government/Agencies are exempted). During fiscal year 2015, the largest concentration in a non-U.S. Government/Agency was Citigroup, Inc., which represented 0.4 percent of total Trust Funds assets.

Wisconsin Retirement System (WRS)

For investments of the WRS, concentration of credit risk is limited by establishing investment guidelines for individual portfolios or groups of portfolios that generally restrict issuer concentrations in any one company or Rule 144A securities to less than 5 percent of the portfolio's market value.

Interest Rate Risk

Interest rate risk is the risk that changes in interest rates of debt investments will adversely affect the fair value of an investment.

Primary Government (excluding the University of Wisconsin System (UWS), the Wisconsin Retirement System (WRS), and the State Investment Fund (SIF))

Although the primary government, except for the Various Funds discussed later, does not have a formal policy on limiting the exposure to changes in interest rates, it is the primary government's policy to comply with the provisions contained within the general resolutions of revenue bond indentures and other program policy investment criteria. For example, the Lottery Fund acquires investments with maturity dates that significantly coincide with scheduled payment dates of prize annuities. Investments are held to maturity unless an annuitant requests premature termination of an annuity, then any loss or gain due to market fluctuations are passed through to the redeeming annuitant. Therefore, the Lottery Fund has minimal interest rate risk exposure. Further, as a means of limiting its exposure to interest rate risks, certain funds are required to limit at least half of the fund's investment portfolio to maturities of less than one year. In addition, interest rate risk of certain other funds such as the Retiree Life Insurance Fund is minimized by maintaining a diversified portfolio of investments and monitoring cash flow patterns in order to approximately match the expected maturity of liabilities. The following table provides information about the interest rate risks associated with the primary government's investments, except those of the Various Funds. The investments include certain short-term cash equivalents, and various long-term items. At June 30, 2015, the primary government's investments were (in millions):

		_					
Investment Type		s Than Year	1 to 5 Years	6 to 10 vears	 re Than) Years		Fair Value

Total	\$	426.0	\$ 527.2	\$ 1,167.1	\$ 503.8	\$	2,624.1

Primary Government (excluding the Various Funds, UWS, WRS, SIF, and investments in an external investment pool)

The Various Funds, which are managed by the Board, use the duration method to identify and manage interest rate risk. Three of the Various Funds have investment guidelines relating to interest rate risk. The LGPIF guidelines require that a bond's maturity must not exceed ten years. The SLF guidelines require the Weighted Average Maturity (WAM) of the portfolio, including cash, to be a minimum of ten years. The IPFCF guidelines require the average duration of the aggregate bond portfolio to be less than ten years.

As of June 30, 2015, the Various Funds had interest rate risk statistics as detailed below (in millions):

	Various Funds Duration or WAM (in years) for Fixed Income Securities								
Investment Type	SLF		IPFCF		Historical Society		Tuition Trust		
	Fair		Fair		Fair		Fair		
	Value	WAM	Value	Duration	Value	Duration	Value	Duration	
Govt/Agency	\$ 43.4	12.73	\$ 394.0	6.26	\$		\$ 3.2	2.26	
Corporate	67.2	16.15	538.5	5.64			0.4	2.16	
Bond Fund					3.3	5.77			
Total/Wtd Ave	\$ 110.6	14.81	\$ 932.6	5.90	\$ 3.3	5.77	\$ 3.6	2.25	

Various Eunde

Investments of the Retiree Life Insurance Fund and the Local Retiree Life Insurance Fund (reported as pension and other employee benefit trust funds) are held in an external investment pool with the investment objective of maintaining levels in its general account sufficient to guarantee principal amounts of reserves. The interest rate exposure of this pool expressed in terms of duration and the weighted average life is 6.3 and 8.9 years, respectively.

University of Wisconsin System (UWS)

The UWS uses the option adjusted modified duration method to analyze interest rate risk. As of June 30, 2015, the UWS had interest rate risk statistics as detailed below (in millions):

UWS			
		Fair	Modified
Fixed Income Sector	١	/alue	Duration
Corporates and Other Credit	\$	17.8	3.12
Government		16.9	4.74

Total	\$	74.3	
Fixed Income Commingled Fund			
Seix Advisors High Yield Fund	\$	29.7	3.56

Wisconsin Retirement System (WRS)

Generally, analysis of long or intermediate term portfolios' interest rate risk is performed using various duration calculations. Modified duration, which is stated in years, is the measure of price sensitivity of a fixed income security to an interest rate change of 100 basis points. The calculation is based on the weighted average of the present values for all cash flows. Some pooled investments are analyzed using an option adjusted duration calculation which is similar to the modified duration method. Option adjusted duration incorporates the duration shortening effect of any embedded call provisions in the securities.

Short term portfolios' interest rate risk is analyzed using the weighted average maturity (to next reset). Weighted average

maturity is the maturity of each position in a portfolio weighted by the dollar value of the position to compute an average maturity for the portfolio as a whole. This measure indicates a portfolio's sensitivity to interest rate changes: a longer weighted average maturity implies greater volatility in response to interest rate changes.

SWIB's investment guidelines related to interest rate risk vary by portfolio. Some fixed income portfolios are required to be managed within a range of a targeted duration, while others are required to maintain a weighted average maturity at or below a specified number of days or years.

Aggregated interest rate risk exposure as of December 31, 2014, stated in terms of modified duration (for long term instruments) and weighted average maturity (for repurchase agreements and short term pooled investments), is presented below (in millions):

WF	RS

Foreign Currency Risk

Foreign currency risk is the risk that changes in exchange rates will adversely impact the fair value of an investment.

Primary Government (excluding the University of Wisconsin System (UWS), the Wisconsin Retirement System (WRS), and the State Investment Fund (SIF)

The primary government, except for the Various Funds discussed later, does not have a formal policy to limit foreign currency risk, however, certain funds such as the Environmental Improvement Fund are not permitted to invest in foreign currency based on provisions contained in its bond indenture general resolution. However, foreign currency risk of the Retiree Life Insurance Fund is minimized by utilizing short-duration spot forward contracts to minimize the adverse impact of foreign currency exchange rate risks inherent in the elapsed time between trade processing and trade settlement. At June 30, 2015, the primary government, excluding the Various Funds, did not own any issues denominated in a foreign currency.

The Various Funds' investment guidelines do not specifically address foreign currency risk with the exception that the SLF only allows investments in U.S. dollar denominated instruments. As of June 30, 2015, the Various Funds did not directly own any issues denominated in a foreign currency.

University of Wisconsin System (UWS)

As of June 30, 2015, the Long Term and Intermediate Term Funds held equity securities denominated in foreign currencies within pooled investment vehicles only, with market values totaling \$107.6 million and \$6.1 million, respectively. Some of the trades for such foreign positions will not settle in foreign currencies until after the fiscal year end. For the Long Term and Intermediate Term Funds, it is generally expected and desired that foreign currency exposure is not hedged, as this enhances the diversification benefits from non-U.S. investments.

Wisconsin Retirement System (WRS)

The WRS held foreign currency denominated cash and securities directly in designated actively managed portfolios and indirectly through its investment in certain commingled invest funds.

As of December 31, 2014, the WRS had the following currency exposure (all assets stated in millions of United States Dollars):

Currency	cash polinale	ints stocks	Fixed ncome	Limited theresh	Preferred preferred	Futures tracts	short sell stort	other nvestme	115 TOtal

Securities Lending Transactions

Wisconsin Retirement System (WRS)

Securities Lending Transactions - State statutes and Board policies permit the use of investments of the WRS to enter into securities lending transactions. These transactions involve the lending of securities to broker-dealers and other entities in exchange for collateral, in the form of cash or securities, with the simultaneous agreement to return the collateral for identical securities in the future. The securities custodian is an agent in lending the domestic and international securities. When securities are delivered to a borrower as part of a securities lending agreement, the borrower is required to place collateral equal to 102 percent of the loaned securities' fair value, including interest accrued, as of the delivery date with the lending agent. In the event that securities are loaned against collateral denominated in a different currency, the borrower is required to place collateral totaling 105 percent of the loaned securities' fair value, including interest accrued, as of the delivery date with the lending agent. Collateral is marked to market daily and adjusted as needed to maintain the required minimum level.

Cash collateral is reinvested by the lending agent in two separate pools, a U.S. dollar cash collateral pool and a pool denominated in Euros, in accordance with contractual investment guidelines, which are designed to minimize the risk of principal loss and provide a modest rate of return. Investment guidelines limit credit and liquidity risk by restricting new investments to overnight repurchase agreements collateralized with high quality U.S. government, U.S. government agencies, and sovereign debt securities. The earnings generated from the collateral investments, plus or minus the rebates received from or paid to the dealers and less fees paid to agents, results in the net earnings from lending activities, which are then split on a percentage basis with the lending agent.

At December 31, 2014, minimal credit risk exposure to borrowers existed because the amounts owed the borrowers exceeded the amounts the borrowers owed. The contract with the lending agent requires it to indemnify the WRS if the borrowers fail to return the loaned securities and the collateral is inadequate to replace the securities lent. Losses resulting from violations of investment guidelines are also indemnified.

The majority of security loans are open-ended and can be terminated on demand. The risk that SWIB would be unable to return collateral to securities borrowers upon termination of the loan is low because the majority of investments made with cash collateral mature in one to two business days. At December 31, 2014, the average maturities of the loans and the assets of the collateral reinvestment pools did not materially differ. Securities lending is allowed in certain commingled fund investments. All earnings of these funds are reported in the Statement of Changes in Fiduciary Net Position.

Derivative Instruments

Wisconsin Retirement System (WRS)

Derivatives may be used to implement investment strategies for the Core and Variable Funds. All derivative instruments are subjected to risk analysis and monitoring processes at the portfolio, asset class and fund levels. Investment guidelines define allowable derivative activity for each portfolio and are based on the investment objectives which have been approved by the Board. Where derivatives are permitted, guidelines stipulate allowable instruments and the manner and degree to which they are to be used.

Gains and losses for all derivative instruments are reported in the Statement of Changes in Fiduciary Net Position.

SWIB seeks to mitigate counterparty credit risk through counterparty credit evaluations and approvals, counterparty credit limits, and exposure monitoring techniques. Additionally, policies have been established which seek to implement master netting arrangements with counterparties that permit the closeout and netting of transactions with the same counterparty. Agreements may also require daily collateral postings to further mitigate credit risk. At December 31, 2014, SWIB posted \$18.7 million in cash collateral to OTC counterparties. No securities were pledged relating to OTC positions.

Certain investments and cash deposits were posted as collateral for exchange-traded derivatives positions. At December 31, 2014, the Core and Variable Funds posted \$98.0 million in cash and \$68.7 million in equity securities as collateral with exchange clearing brokers.

The aggregate fair value of receivables relating to OTC derivative contracts at December 31, 2014 was \$4.0 billion. This represents the maximum loss that would be recognized at the reporting date if all sixteen counterparties failed to perform as contracted. This maximum exposure is reduced to \$196.4 million when counterparty collateral and master netting arrangements are taken into account.

The table below summarizes, by credit rating, the retirement fund's exposure to OTC derivative instruments' counterparty credit risk as of December 31, 2014 (in millions), without respect to any collateral or netting arrangement.

OTC Derivative Investments Subject to Counterparty Credit Risk					
Counterparty Credit Rating	Payable	Receivable	Fair Value		
AA	\$ (227.1)	\$ 228.8	\$1.7		
A	(2,063.5)	2,051.6	(11.9)		
BBB	(1,716.5)	1,715.8	(0.7)		
Total	\$(4,007.1)	\$3,996.2	\$(10.9)		

Foreign Currency Spot and Forward Contracts — Foreign Currency Spot and Forward contracts are OTC agreements between two counterparties to exchange designated currencies at a specific time in the future. No cash is exchanged when a foreign exchange spot or forward contract is initiated. Amounts due are paid or received on the contracted settle date.

Currency exposure management is permitted through the use of currency derivative instruments. Direct hedging of currency exposure back to the U. S. dollar is permitted when consistent with the strategy of the portfolio. Cross-currency exposure management to transfer out of an exposed currency and into a benchmark currency is permitted. In some portfolios, currencies of non-benchmark countries may be held through the use of forward contracts, provided that the notional value of any single non-benchmark currency does not exceed 5 percent of the market value of the portfolio.

Discretionary currency overlay strategies at the total fund and asset class level may be employed when currency market conditions suggest such strategies are warranted.

The net receivable or payable for spot and forward contracts is included in Foreign Currency Contracts on the Statement of Fiduciary Net Position. Losses may arise from future changes in the value of the underlying currency, or if the counterparties do not perform under the terms of the contract. Spot and forward contracts are valued daily with the changes in fair value included in the Net Appreciation (Depreciation) in Fair Value of Investments on the Statement of Changes in Fiduciary Net Position. During the year, currency exposure management involved the use of foreign currency spot and forward contracts. The following table presents the fair value of foreign currency spot and forward contract assets and liabilities held as of December 31, 2014 (in millions):

	Fore	ign Currency Co Receivables	ntract	Foreign	ign Currency Contract Payables

Foreign Currency Spot and Forward Contracts

Futures Contracts – A futures contract is an exchange-traded agreement to buy or sell a financial instrument, index or commodity at an agreed upon price and time in the future.

The fair value of futures contracts represents the unrealized gain/(loss) on the contracts, since trade inception, and is reflected as a portion of Financial Futures Contracts and Swaps on the Statement of Fiduciary Net Position. Futures contracts are marked to market daily, based upon the closing market price of the contract at the board of trade or exchange on which they are traded. Gains and losses resulting from investments in futures contracts are included in the Net Appreciation (Depreciation) in the Fair Value of Investments on the Statement of Changes in Fiduciary Net Position.

The following table presents the investments in futures contracts as of December 31, 2014 (in millions).

Futures Contracts						
Description	Explaint	Noiral And	Unealized hopeoalidation			
Long Positions						
Fixed Income Futures	Mar 15	\$4,197.6	\$ 30.2			
Equity Index Futures	Mar 15	897.7	19.3			
Commodity Futures	Jan – Mar 15	792.4	(45.0)			
Short Positions						
Fixed Income Futures	Mar 15	(506.9)	(4.4)			
Equity Index Futures	Mar – May 15	(15.5)	(0.4)			
Total		\$5,365.3	\$ (0.3)			
* Unrealized apprecia gains/(losses).	ation/(deprec	iation) includes	foreign currency			

Futures contracts involve, to varying degrees, risk of loss in excess of margin deposited with the broker. Losses may arise from future changes in the value of the underlying instrument.

Futures contracts may be entered into to efficiently gain or adjust market exposures for purposes that include trust fund rebalancing, sector, interest rate, or duration types of exposure adjustments; the securitization of cash or as a substitute for cash market transactions.

Swap Contracts - Swaps are negotiated contractual agreements between two counterparties. Periodically, the WRS enters into a total return swap agreements. Under the terms of the swaps, the Retirement Funds receive the total return of an equity index while paying the counterparty a variable rate of return based on the 3month London Interbank Offering Rate (LIBOR). The two swaps in effect during parts of the calendar were each based on a notional value of \$10 million. The first swap which was entered into during calendar year 2013 matured in December 2014. The second swap which was entered into during calendar year 2014 terminates November 2015. Fair value is determined based on quoted market prices for each leg, plus accrued interest. The fair value of swaps is reported as part of Financial Futures Contracts and Swaps on the Statement of Fiduciary Net Position and was \$(27.8) thousand at calendar year-end, which also represents the unrealized loss on the position at that time. Gains and losses resulting from investments in swap contracts are included in the Net Increase (Decrease) in the Fair Value of Investments on the Statement of Changes in Fiduciary Net Position.

As is specified in SWIB's investment guidelines, OTC derivatives, including swaps, may be used as an alternative to physical securities when it is deemed advantageous for portfolio construction. In addition, swaps may be used to adjust asset class exposures for the Retirement Funds. Guideline limits and soft risk parameters for each portfolio are applied to the aggregate exposures which includes both physical and synthetic securities.

Options – An option contract gives the purchaser of the contract the right, but not the obligation, to buy (call) or sell (put) the security or index underlying the contract at an agreed upon price on or before the expiration of the option contract. The seller of the contract is subject to market risk, while the purchaser is subject to credit risk and market risk, to the extent of the premium paid to enter into the contract.

Rebalancing policies and portfolio investment guidelines permit the use of exchange-traded and over-the-counter options. Options may be used to improve market exposure efficiency, enhance expected returns, or provide market exposure hedges. Exchange rules require that the seller of exchange-traded call option contracts cover these positions either by collateral deposits in the form of cash or securities or by pledging, in escrow, the actual securities that would be transferred to the option purchaser in the event the option contract were exercised.

The fair value of option contracts is based upon the closing market price of the contract and is reflected as Options on the

Statement of Fiduciary Net Position. Gains and losses as a result of investments in option contracts are included in the Net Appreciation (Depreciation) in the Fair Value of Investments on the Statement of Changes in Fiduciary Net Position.

The table below presents the fair value of option contracts as of December 31, 2014 (in millions):

	Option Contracts						
Security Description	contrac	TWP ^e Expitation		Notional	Untealited	Fail Value

Short Sell Obligations

Wisconsin Retirement System (WRS)

The WRS may sell a security it does not own in anticipation of purchasing the security later at a lower price. This is known as a short sale transaction. For the duration of the short sale transaction, a liability is recorded under "Short Sales of Securities" on the Statement of Fiduciary Net Position. The liability presented represents the fair value of the shorted securities necessary for delivery to the purchaser and is marked-to-market daily. Realized and unrealized gains and losses associated with short sales are recorded on the Statement of Changes in Fiduciary Net Position within the "Net Appreciation (Depreciation) in Fair Value of Investments" category. While the transaction is open, the WRS incurs expenses for securities borrowing costs. In addition, as a security borrower, the WRS may incur dividend and interest expense as such payments must be remitted to the security lender during the course of the loan. Such expenses are included in "Investment Expense" on the Statement of Changes in Fiduciary Net Position.

Risks arise from short sales due to the possible illiquidity of the securities markets and from potential adverse movements in security values. The cost to acquire the securities sold short may exceed the amount of proceeds initially received, as well as the amount of the liability recorded as "Short Sales of Securities" in the Statement of Fiduciary Net Position. Short sales expose the short seller to potentially unlimited liability because there is no upward limit on the price a shorted security could attain. Certain portfolio guidelines permit short sales and, to mitigate risks, the total value of short sales in any portfolio may not exceed 50% of a portfolio's value. In addition, portfolios which engage in short sales have long only benchmarks established by the Board. Investment performance and risk associated with each portfolio is measured against benchmarks and monitored by management.

When a short sale occurs, the shorting portfolio must borrow the security and deliver it to the buyer. If the shorted security is owned by another WRS portfolio, investment policies allow the borrowing of the shorted securities from other WRS portfolios, including inter-fund borrowings.

Except in the case of borrowings within the same trust fund, the WRS is required to post collateral to the lender, at the required rate of 102% for in-currency loans and 105% for cross-currency loans. At December 31, 2014, the WRS posted \$765.2 million in collateral to security lenders. This represented \$32.8 million in excess of the fair market value of the securities borrowed. If the security lender recalled the security and SWIB was not able to supply the lender with the security, the lender would be permitted to use SWIB's collateral to fund the purchase of the security.

Multi Asset

Wisconsin Retirement System (WRS)

SWIB employs portfolio strategies which involve investment across multiple asset classes. The "Multi Asset" category on the Statement of Fiduciary Net Position consists of risk parity and hedge fund multi asset strategies. Risk parity and hedge fund investments are either in the form of a commingled fund, with ownership through fund shares, or a limited partnership.

The risk parity portfolios seek to equally weight asset allocation risk across multiple assets and geographies. Exposures are

expected to deliver improved risk and return tradeoffs versus conventional portfolios comprised primarily of stocks and bonds. The risk parity portfolios also intend to provide more diversified exposure over various economic environments.

The WRS invests in a diversified set of hedge fund strategies, invested across multiple asset classes. In general, a hedge fund is a private investment fund that seeks to produce absolute returns using a broad range of strategies with low to moderate levels of volatility, typically employing both long and short positions. An allocation to a diversified hedge fund portfolio is intended to have low correlation to traditional publicly traded equities and contribute to overall total fund diversification.

Hedge funds can be illiquid, either by virtue of the illiquidity of underlying assets or due to lock-up terms. However, SWIB has taken steps to minimize this risk by investing in hedge funds with more liquid asset classes and by structuring its investments to stagger lock-up periods. Hedge funds also use leverage to varying degrees, and while it is possible that a hedge fund can lose a significant portion of its capital, SWIB has limited the amount it invests in hedge funds in total and with any individual hedge fund manager.

At December 31, 2014, the majority of SWIB's risk parity and hedge fund investments are reflected within the "Multi Asset" category on the Statement of Fiduciary Net Position. Hedge fund portfolios with a long only equity strategy are included within the "Stocks" classification on the Statement of Fiduciary Net Position.

Unfunded Capital Commitments

University of Wisconsin System (UWS)

The UWS has unfunded limited partnership commitments of \$25.0 million for the fiscal year ending June 30, 2015.

Wisconsin Retirement System (WRS)

The Board has entered into a number of agreements that commit the WRS to make investment purchases up to predetermined amounts over certain investment time periods. The unfunded capital commitments for private equity, real estate and multi-asset investments not reported on the Statement of Fiduciary Net Position total \$6.2 billion as of December 31, 2014.

2. State Investment Fund

The State Investment Fund (SIF) functions as the State's cash management fund by "pooling" the idle cash balances of all State funds and other public institutions. In the State's Comprehensive Annual Financial Report, the SIF is not reported as a separate fund; rather, each State fund's share in the "pool" is reported on the balance sheet as "Cash and Cash Equivalents." Shares of the SIF belonging to other participating public institutions are presented in the Local Government Pooled Investment Fund, an investment trust fund.

Wis. Stat. Secs. 25.17(3)(b), (ba), (bd) and (dg) enumerate the various types of securities in which the SIF can be invested, which include obligations of the United States or its agencies, corporations wholly owned by the United States or chartered by an act of Congress, securities guaranteed by the United States, the unsecured notes of financial and industrial issuers, direct obligations of or guaranteed by the government of Canada, certificates of deposit issued by banks in the United States including solvent financial institutions in Wisconsin and bankers acceptances. The State of Wisconsin Investment Board's (the Board) Board of Trustees may specifically approve other prudent legal investments.

For financial statement purposes, the carrying value of securities depends on asset class and maturity date. Per GASB No. 31, Repurchase Agreements and non-negotiable Certificates of Deposit are valued at cost because they are nonparticipating contracts that do not capture interest rate changes in their value.

Also per GASB No. 31, all short-term debt investments with remaining maturities of up to ninety days (certain U.S. Government/Agency securities & Bankers Acceptances) are valued at amortized cost, provided that the fair value of those investments is not significantly affected by the impairment of the credit standing of the issuer.

Finally, per GASB No. 31, all short-term investments with remaining maturities of over ninety days (certain U.S. Government/Agency securities) are valued at fair value as determined by quoted market prices, if available. Because quoted market prices for SIF securities are often not available, at month end BNY Mellon, as SWIB's custodial bank, compiles fair values from third party pricing services which use matrix pricing models to determine fair market value.

For purposes of calculating earnings to each participant, all investments are valued at amortized cost. Specifically, income is distributed to pool participants monthly, based on their average daily share balance. Distributions include interest income based on stated rates (both paid and accrued), amortization of discounts and premiums on a straight-line basis, realized investment gains and losses calculated on an amortized cost basis, and investment expenses. This method does not distribute to participants any unrealized gains and losses generated by the pool's investments.

Custodial Credit Risk

The custodial credit risk for investments is the risk that, in the event of the failure of the counterparty to a transaction, the Board will not be able to recover the value of investments or collateral securities that are in the possession of an outside party. Investments are exposed to custodial credit risk if the securities are uninsured and unregistered and are either held by the counterparty or by the counterparty's trust department or agent but not in the name of the Board.

Although the Board has not adopted a formal deposit or investment policy specifically related to custodial credit risk, investment staff monitors the creditworthiness of the custodian as a counterparty and depository financial institution. Concerns and issues are discussed with the Board's credit task force for further action.

Concentration of Credit Risk

Concentration of credit risk is the risk of loss attributed to the magnitude of an organization's investment in a single issuer. The SIF's investment guidelines limit concentrations of credit risk by establishing maximum issuer and/or issue exposure limits based on credit rating. These guidelines do not place a limit on maximum exposure for any U.S. Treasury or Agency securities. As of June 30, 2015 the SIF has more than five percent of its investments in FHLB (28.8 percent), FHLMC (28.7 percent), FNMA (29.8 percent), and Repurchase Agreement collateral (11.8 percent) consisting of various securities issued by these same three U.S. Agencies. Since the Repurchase Agreements mature each day, new collateral, consisting of a different blend of U.S. Treasury and Agency securities, is assigned each night.

Credit Quality Risk

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The Board established investment guidelines with maximum exposure limits by security type based on the minimum credit ratings as issued by Nationally Recognized Statistical Rating Organizations (NRSROs).

The following table presents these credit ratings and aggregate exposures by investment type as of June 30, 2015 (in millions):

		Fair	
Investment Type	Ratings	Value	Percent
Repurchase Agreements (Collateral):			
U.S. Government Debt & Agencies	AA	958.0	11.8
Government Sponsored Entity U.S. Agency: Federal Home Loan Bank (FHLB)	A-1+	2,334.3	28.8
Federal Home Loan Mortgage Corporation (FHLMC)	A-1+	2,324.6	28.7
Federal National Mortgage Association (FNMA)	A-1+	2,417.6	29.8
Certificates of Deposit: Non-Negotiable (Wisconsin CD			
Program)	NR	39.8	0.5
Banker's Acceptances	A-1+	30.7	0.4
Total Investments	\$	8,105.1	100.0

Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The Weighted Average Maturity (WAM) method is used to analyze interest rate risk. Investment guidelines mandate that the WAM for the entire portfolio will not exceed one year.

At June 30, 2015, the following table shows the investments by investment type, amount and the weighted average maturities (in millions):

Investment Type	Fa	air Value	Weighted Average Maturity (Days)
Repurchase Agreements	\$	958.0	1
Government & Agencies		7,076.5	90
Certificates of Deposit		39.8	115
Banker's Acceptances		30.7	41
Total Investments	\$	8,105.1	-
Portfolio Weighted Average I	80		

Foreign Currency Risk

Foreign currency risk is the risk that changes in exchange rates will adversely impact the fair value of an investment. SIF guidelines allow the investment in U.S. dollar denominated issues only.

Copies of the separately issued financial report that includes financial statements and other supplementary information for the SIF may be obtained at <u>doa.wi.gov/capitalfinance</u> or by writing to:

State of Wisconsin Investment Board PO Box 7842 Madison, WI 53707-7842

3. Lottery Investments and Related Future Prize Obligations

Investments of the State Lottery Fund totaling \$35.6 million are held to finance grand prizes payable over a 20-year or 25-year period. The investments in prize annuities are debt obligations of the U.S. government backed by its full faith and credit as to both principal and interest. Liabilities related to the future prize obligations are presented at their present value and included in Accounts Payable and Other Accrued Liabilities.

The following is a schedule of future prize obligations (in millions):

Fiscal Year	An	nount
2016		6.1
2017		6.3
2018		5.6
2019		4.6
2020		4.1
Thereafter		12.1
Total future value		38.9
Less: Present value adjustment		(7.7)

This page left intentionally blank.

NOTE 8. ENDOWMENTS

Primary Government

University of Wisconsin System

The University of Wisconsin System invests its trust funds, principally gifts and bequests designated as endowments or quasi-endowments, in two of its own investment pools: the Long Term Fund and the Intermediate Term Fund. Benefiting University of Wisconsin System entities receive quarterly distributions from the Long Term Fund, principally endowed assets, based on an annual spending rate applied to a 12-quarter moving average market value of the fund. The annual spending rate is currently 4.0 percent. Distributions from the Intermediate Term Fund, principally quasi-endowments and unspent income distributions, consist of interest earnings distributed guarterly. Spending rate and interest distributions from both of these funds are transferred to the State Investment Fund, pending near-term At June 30, 2015, net appreciation of expenditures. \$123.2 million was available to meet spending rate distributions, of which \$16.0 million was actually authorized for expenditure.

For University of Wisconsin System-controlled, donor-restricted endowments, the Uniform Prudent Management of Institutional Funds Act as adopted, permits the Board of Regents of the University of Wisconsin System to appropriate for current spending, an amount of realized and unrealized endowment appreciation as they determine to be prudent. Realized and unrealized appreciation in excess of that amount appropriate for current spending is retained by the endowments.

University of Wisconsin System investment policies and guidelines for the Long Term Fund and Intermediate Term Fund are governed and authorized by the Board of Regents. The approved asset allocation policy for the Long Term Fund sets a general target of 35.0 percent marketable equities, 30.0 percent fixed income, and 35.0 percent alternatives The approved asset allocation for the Intermediate Term Fund is 15.0 percent marketable equities, 70.0 percent fixed income, 10.0 percent alternatives, and 5.0 percent cash.

The fair value of Endowments as of June 30, 2015 was \$471.4 million including an unrealized gain of \$65.7 million when fair values as of June 30, 2015 are compared to asset acquisition costs.

The calculation of realized gains and losses is independent of a calculation of the net change in the fair value of investments since realized gains and losses are based on the difference between the selling price and the acquisition cost of the asset. Therefore, when assets are reported at fair value much of the realized gain or loss may have already been included in prior years as part of the overall change in the fair value of investments.

At June 30, 2015, the book value and fair value of principal funds under control of the University of Wisconsin System was (in millions):

Original Contributions and Distributed Net Gains	\$ 234.6
Realized Gains – Undistributed	171.1
Book Value	405.7
Unrealized Net Gains/Losses - Undistributed	65.7
Fair Value	\$ 471.4

On June 30, 2015, the portfolio at market, for the Long Term Fund, contained 38.5 percent in common stock and convertible securities, 11.4 percent in bonds and preferred stock, 21.0 percent in alternative assets, 21.0 percent in tactical allocation strategies, 6.5 percent in short-term investments, and 1.6 percent in real assets. The total return on the principal Long Term Fund including capital appreciation was 0.5 percent.

On June 30, 2015, the portfolio at market, for the Intermediate Fund, contained 14.4 percent in common stock and convertible securities, 81.2 percent in bonds and preferred stock, and 4.4 percent in short-term investments. The total return on the principal Intermediate Fund including capital appreciation was 1.2 percent.

External investment counsel was furnished for funds representing 90.4 percent of market value principal.

NOTE 9. INTERFUND RECEIVABLES, PAYABLES AND TRANSFERS

Interfund balances as of or for the year ended June 30, 2015 consists of the following (in thousands):

A. Due from/to Other Funds:

Due from Other Funds and the Due to Other Funds represent short-term interfund accounts receivable and payable. The balances in these accounts at June 30, 2015 were as follows (in thousands):

	Due	to Othe	er Funds:										
	G	General	Trans- portation	Capital Improvement	Nonmajor Govern- mental	Injured Patients and Families Compensation	Environ- mental Improve- ment	Universityof Wisconsin System	Unemploy- ment Reserve	Nonmajor Enterprise	Internal Service	Fiduciary	Total
Due from Other Funds:													
General	\$	-	\$ 17,566	\$ 814 \$	55,015	\$ 155 \$	176	\$ 48,053	\$ 2,124	\$ 20,253 \$	14,469 \$	62,141 \$	220,766

University of Wisconsin System		19,665	1,537	-	1,303	-	33	-	-	2	19	-	22,559
Unemployment Reserve	t	433	-	-	-	-	-	-	-	-	-	-	433
Nonmajor Enterprise		19,451	173	-	88	-	-	12	-	1,275	186	42,477	63,662
Internal Service		27,689	3,676	-	1,777	2	17	559	-	2,419	386	791	37,316
Fiduciary		22,543	3,103	-	1,852	5	3	-	-	9,733	503	3,075	40,816
Total	\$3	806,192	\$ 39,270	\$ 147,609 \$	121,398	\$ 163 \$	1,264	\$ 53,393	\$ 2,146	\$ 36,606 \$	16,171 \$	108,483 \$	832,695

The balances in the Due from Other Funds and Due to Other Funds accounts typically result from the time lag between the dates that

(1) interfund goods and services were provided and when the payments occurred, and

(2) interfund transfers were accrued and when the liquidations occurred.

Most of the State's funds are presented on a fiscal year ended June 30. However, some funds are presented on a fiscal year ended December 31. As a result, inconsistencies may occur in amounts reported as interfund receivables or payables between funds with different fiscal year ends.

B. Interfund Receivables/Payables

Interfund Receivables/Payables represent short-term loans from one fund to another to cover cash overdrafts. Interfund receivables/payables at June 30, 2015 were as follows (in thousands):

	Interfund Receivable:										
	General	General Nonmajor Fiduciary		Total							
		Enterprise									
Interfund											
Payables:											
Nonmajor											
Enterprise	\$ 39,612	\$-	\$-	\$ 39,612							
Internal Service	44,075	-	-	44,075							
Fiduciary	-	79,677	334,900	414.577							
Total	\$ 83,687	\$ 79,677	\$ 334,900	\$ 498,264							

C. Advances to/from Other Funds

Advances to/from Other Funds represent long-term loans to one fund from another fund. Advances at June 30, 2015 were as follows (in thousands):

	Adva	Advances from Other Funds (liability):								
			Non	major						
	Ge	eneral	Govern	nmental		Total				
Advances to										
Other Funds (asset):										
Environmental Improvement	\$	-	\$	6,222	\$	6,222				
Nonmajor Enterprise		685		-		685				
Total	\$	685	\$	6,222	\$	6,907				

D. Interfund Transfers

Interfund Transfers in and out that occurred during Fiscal Year 2015 were as follows (in thousands):

	Transfe	ers in:												
				University of										
		Trans-	Capital	Nonmajor	Environmental Wisconsin		Nonmajor	Internal						
	General	portation	Improvemen	t Governmental	Improvement	System	Enterprise	Service	Total					
Transfers out:

Injured Patients and														
Families Compensation	n -	-	-	15	-	-	-	-	15					
Environmental														
Improvement	-	-	-	8,012	-	-	-	-	8,012					
University of Wisconsin														
System	27,545	-	467	67,478	-	-	-	-	95,491					
Unemployment Reserve	629	-	-	-	-	-	-	-	629					
Nonmajor Enterprise	11, 160	-	13	10,471	-	-	110	-	21,754					
Internal Service	8,391	-	660	1,394	3	4	48	125	10,624					
Fiduciary	435	-	-	472	-	-	-	-	907					
Total	\$ 69,945	\$ 193,629	\$ 17,242	\$ 951,943	\$ 11,307 \$	1,100,735	\$ 109,827 \$	5,321 \$	2,459,948					

Transfers are typically used to move: (1) revenues from the fund that statute or budget requires to collect them to the fund that statute or budget requires to expend them, (2) receipts restricted to debt service from the funds collecting the receipts to the debt service fund as debt service payments become due, (3) unrestricted revenues collected in one fund to finance various programs accounted for in other funds in accordance with statute or budgetary authorizations, and (4) accumulated surpluses from other funds to the General Fund when authorized by statute.

Most of the State's funds are presented on a fiscal year ended June 30. However, some funds are presented on a fiscal year ended December 31. As a result, inconsistencies may occur in amounts reported as interfund transfers between funds with different fiscal year ends.

Nonroutine and Other Transfers

In the fiscal year ended June 30, 2015, transfers considered non-routine or inconsistent with the fund making the transfer included the following (in thousands):

Transfers in to the General Fund:

Funds Reporting the Transfer Out	Amount		
University of Wisconsin System	\$ 9,944		
Facilities Operations and Maintenance	4,500		
Technology Services	1,536		
Financial Services	1,000		

Transfer out from the General Fund:

Funds Reporting the Transfer In	Amount				
Transportation	\$	170,961			
Environmental		11,144			

Transfers out from the Petroleum Inspection Fund:

Fund Reporting the Transfer In	Amount		
Transportation	\$	16,000	

NOTE 10. CHANGES IN LONG-TERM LIABILITIES

During the year ended June 30, 2015, the following changes occurred in long-term liabilities (in thousands):

Primary Government

	Balance			Balance	Amounts Due Within
Governmental Activities	July 1, 2014	Additions	Reductions	June 30, 2015	One Year
Bonds and Long-term Notes Payable:					
General Obligation Bonds & Notes for:					
Governmental Funds	\$ 5,165,180 \$	1,324,578	\$ 1,199,295 \$	5,290,463	524,194
Internal Services Funds	161,139	32,837	42,409	151,567	14,529

Other Postemployment Benefits	210,427	11,129	-	221,556	-
Claims, Judgments and Commitments	645	-	90	555	-
Pollution Remediation Obligations	7,490	-	-	7,490	-
Total Governmental Activities					
Long-term Liabilities	\$ 11,653,364 \$	2,080,123	\$ 1,939,512 \$	11,793,974 \$	973,261

Repayment of the general obligation bonds and notes is made from the Bond Security and Redemption Fund. The amount presented in this fund represents the liability to be paid from resources accumulated to provide debt service payments in Fiscal Year 2015. Repayment of the revenue bonds principal and interest is made from the appropriate debt service fund with payments secured by registration and inspection fees collected by the appropriate program. Most of the compensated absences and other postemployment benefits liabilities are attributed to the General, Transportation and Conservation funds. Long-term liabilities for claims, judgments and commitments are generally liquidated with resources of the governmental activities.

Business-type Activities	Balance July 1, 2014	Additions	Reductions	Balance June 30, 2015	Amounts Due Within One Year

Revenue Bonds:	
Environmental Improvement	758,716
Total Business-type Activities	2,357,887
Total Primary Government	\$ 13,556,754

A. General Obligation Bonds

The State of Wisconsin Building Commission, an agency of the State, is empowered by law to consider, act upon, authorize, issue and sell all debt obligations of the State. To date, the Commission has authorized and issued general obligation bonds and notes primarily to provide funds for the acquisition or improvement of land, water, property, highways, buildings, equipment or facilities for public purposes. Occasionally, general obligation bonds are also issued for the purpose of providing funds for veterans housing loans and to refund general obligation bonds. All general obligation bonds and notes authorized and issued by the State are secured by a pledge of the full faith, credit and taxing power of the State of Wisconsin and are customarily repaid over a period of twenty to thirty years.

Article VIII of the Wisconsin Constitution and Wis. Stat. Section 18.05 set limits on the amount of debt that the State can contract in total and in any calendar year. In total, debt outstanding cannot exceed five percent of the value of all taxable property in the State. Annual debt issued cannot exceed the lesser of three-quarters of one percent or five percent of the value of all taxable property in the State less net indebtedness at January 1.

At June 30, 2015, \$3.6 billion of general obligation bonds were authorized but unissued.

General obligation bonds issued and outstanding as of June 30, 2015 were as follows (in thousands):

Fiscal Year Issued	Series	Dates	Interest Rates	Maturity Through	Amount Issued	Amount Outstanding
1999	1998 Series 1, and E;	8/98; 10/98	4.75 to 5.5	5/17	\$ 163,735	\$ 17,145

Qualified Build America Bonds

The State has issued four series of general obligation bonds, in the aggregate amount of \$769.2 million, that are "qualified Build America Bonds" pursuant to Section 54AA of the Internal Revenue Code of 1986, as amended (Code). Based on the credit allowed for "qualified Build America Bonds", the State has elected to receive from the United States Treasury on each payment date a direct payment in the amount of 35 percent of the interest payable by the State with respect to such date, and the credit will not be allowed to the taxpayers holding the bonds.

With respect to the direct payments the State expects to receive, since such payments are not Program Income and not pledged to the payment on the Bonds, there is no direct impact on the Bonds with these direct payments being subject to the mandated across-the-board cuts to the Federal budget for the federal fiscal year that started October 1, 2014 and ends September 30, 2015. The impact of these cuts for the current federal fiscal year is a 7.3% reduction in the direct payment amount that the State expected to receive.

• The interest rates on the 2009 Series B bonds, in the amount of \$54.5 million, range from 5.15 percent to 5.40 percent payable semiannually on May 1 and November 1 beginning with the first interest payment date of November 1, 2009. These bonds are callable at par on May 1, 2019 or any date thereafter. The bonds mature beginning May 1, 2023 through 2030.

- The interest rates on the 2009 Series D bonds, in the amount of \$225.8 million, range from 4.9 percent to 5.9 percent payable semiannually on May 1 and November 1 beginning with the first interest payment date of May 1, 2010. These bonds are callable at par on May 1, 2020 or any date thereafter. The bonds mature beginning May 1, 2023 through 2040.
- The interest rates on the 2010 Series B bonds, in the amount of \$179.1 million, range from 4.3 percent to 5.65 percent payable semiannually on May 1 and November 1 beginning with the first interest payment date of November 1, 2010. These bonds are callable at par on May 1, 2020 or any date thereafter. The bonds mature beginning May 1, 2020 through 2030.
- The interest rates on the 2010 Series D bonds, in the amount of \$309.7 million, range from 3.45 percent to 5.1 percent payable semiannually on May 1 and November 1 beginning with the first interest payment date of May 1, 2011. These bonds are callable at par on May 1, 2021 or any date thereafter. The bonds mature beginning May 1, 2020 through 2041.

B. General Obligation Long-term Notes

In April 2015, the State issued \$279.8 million of General Obligation Long-term Notes Payable for the purpose of refunding General Obligation Bonds. The face value of the notes are reported as part of General Obligation Bonds and Notes in the Statements of Net Position and bear interest at rates from 1.94 percent to 3.43 percent, payable semi-annually on each May 1 and November 1 until their maturity dates. Principal outstanding at year end totaled \$279.8 million.

As of June 30, 2015, long-term general obligation note debt service requirements for principal and interest for governmental activities and business-type activities are as follows (in millions):

Fiscal Year	Governme	ental Activities	Business-Type Activities			
Ended June 30	Principal	Interest	Principal	Interest		
2016	\$-	\$ 6,694	\$-	\$ 928

Total	\$ 247,001	\$ 24,583	\$ 32,809	\$ 3,659		

C. Annual Appropriation Bonds

2003 Annual Appropriation Bonds

In December 2003, the State issued \$1.8 billion of General Fund Annual Appropriation Bonds consisting of Series A (Taxable Fixed Rate) and Series B (Taxable Auction Rate Certificates). These appropriation obligations were authorized by Wisconsin Statutes to obtain proceeds to pay the State's anticipated unfunded accrued prior service (pension) liability under Wis. Stat. Section 40.05(2)(b) and its unfunded accrued liability for sick leave conversion credits under Wis. Stat. Section 40.05(4)(b), (bc), and (bw) and Subchapter IX of Chapter 40. In April and June 2008, the State issued \$1.0 billion of General Fund Annual Appropriation Refunding Bonds to refund the Series B (Taxable Auction Rate Certificates) that were issued in 2003. The 2008 issuance consisted of Series A (Taxable Fixed Rate) and Series B and C (Taxable Floating Rate Notes). In November 2012, the State issued \$251.6 million bonds to refund a portion of the 2003 Series A bonds.

These appropriation obligations are not general obligations of the State, and do not constitute "public debt" of the State as that term is used in the Constitution and in the State Statutes. The payment of the principal of, and premium, if any, and interest on the obligations is subject to annual appropriation; that is, payments due in any fiscal year of the State will be made only to the extent sufficient amounts are appropriated by the Legislature. The State is not legally obligated to appropriate any amounts for payment of debt service. The Legislature, recognizing its moral obligation to make timely appropriations from the General Fund sufficient to pay debt service on such obligations, expresses in

Wis. Stat. Section 16.527(10) its expectation and aspiration that it will do so. The Legislature's recognition of a moral obligation, however, does not create a legally enforceable obligation.

The General Fund Annual Appropriation Bonds of 2003, Series A (Taxable Fixed Rate) in the outstanding principal amount of \$568.7 million ("2003 Series A Bonds"), bear interest at rates from 5.20 percent to 5.70 percent computed on the basis of a 30 day month and a 360-day year, payable semiannually on each May 1 and November 1 until their maturity dates.

The General Fund Annual Appropriation Refunding Bonds of 2008, Series A (Taxable Fixed Rate) in the outstanding principal amount of \$363.0 million ("2008 Series A Bonds"), bear interest at rates from 5.05 percent to 5.238 percent computed on the basis of a 30-day month and a 360-day year, payable semiannually on each May 1 and November 1 until their maturity dates.

The General Fund Annual Appropriation Bonds of 2008, Series B (Taxable Floating Rate Notes), in the outstanding principal amount of \$300.0 million, bear interest at rates 120 basis points over the one-month LIBOR, computed on the basis of a 360-day year and for the number of days actually elapsed, payable monthly on the first business day of the month.

The General Fund Annual Appropriation Bonds of 2008, Series C (Taxable Floating Rate Notes), ("2008 Series C Bonds") in the outstanding principal amount of \$188.5 million, bear interest at rates 110 basis points over the one-month LIBOR computed on the basis of a 360-day year and for the number of days actually elapsed, payable monthly on the first business day of the month.

The General Fund Annual Appropriation Refunding Bonds of 2012, Series A (Taxable Fixed Rate) in the outstanding principal amount of \$217.0 million ("2012 Series A Bonds"), bear interest at rates from 1.077 percent to 4.019 percent computed on the basis of a 30-day month and a 360-day year, payable semiannually on May 1 and November 1 until their maturity dates.

As of June 30, 2015, the debt service requirements for principal and interest on these bonds are as follows (in millions):

Fiscal Year Ended June 30	F	Principal	Interest
2016		51.3	88.2
2017		58.3	86.9
2018		429.0	85.2
2019		41.0	64.3
2020		51.8	62.0
2021 – 2025		353.8	266.9
2026 – 2030		515.4	120.3
2031 – 2032		136.7	9.5
Total		1,637.2	783.2
Unamortized Prem./Discount		(0.8)	
Total, net	\$	1,636.3 \$	783.2

The principal due in the fiscal year ended June 30, 2018 includes \$363.0 million maturity that the State intends to refund prior to the May 1, 2018 maturity date.

Derivatives

The State has entered into interest rate exchange agreements, or swap agreements, to modify interest rates for nearly all of the 2008 Series B bonds and 2008 Series C bonds. All interest rate agreements at June 30, 2015, are classified as effective cash flow hedges. Since the interest rate exchange agreements qualify as an effective hedge, changes to fair value are not reported in the Statement of Activities. The State has contracted with a third party advisor to provide estimates of the fair value of the aggregate swap agreements as of June 30, 2015.

Objective – In December 2003, the State entered into four interest rate exchange agreements with four different counterparties in order to reduce the interest rate risk in connection with \$595.2 million of the Series B (Taxable Auction Rate Certificates) issued in 2003. In June 2005, the State entered into four additional interest rate exchange agreements with three counterparties in order to reduce the interest rate risk on the balance of the Series B (Taxable Auction Rate Certificates) issued in 2003, (\$349.7 million). In April and June 2008, the State issued \$509 million of annual appropriation refunding bonds as floating rate notes having variable interest rate set every month (2008 Series B Bonds and 2008 Series C Bonds). In conjunction with issuance in April 2008, at its option the State terminated and

made corresponding termination payments in the aggregate amount of \$40.0 million on some, and a portion of other, interest rate exchange agreements previously entered into in December 2003 and June 2005. As of June 30, 2015, interest rate exchange agreements remain to reduce the interest rate risk in connection with \$480.3 million in floating rate notes.

Terms – Nearly all of the outstanding 2008 Series B Bonds and 2008 Series C Bonds are subject to the interest rate exchange agreements with a notional amount totaling \$480.3 million as of June 30, 2015. 2008 Series B Bonds and Series C Bonds mature and a related notional amount of the related interest rate exchange agreements decline from May 1, 2016 through 2032. Based on the interest rate exchange agreements, the State owes to the counterparties an amount calculated at fixed rates ranging from 4.661 percent to 5.47 percent and the counterparties owe the State interest on an amount based on a variable rate, which is the one-month LIBOR. The net amount is paid monthly.

Fair Value – As of June 30, 2015, the aggregate fair value of the interest exchange agreements was negative \$158.4 million, a decrease of \$12.9 million compared to the aggregate fair value of negative \$145.5 million reported as of June 30, 2014. Since the interest rate exchange agreements qualify as effective cash flow hedges, a deferred outflow of resources and a liability are reported in the statement of net position for the fair value of the swap agreements. Changes in the fair value are not reported in the statement of activities.

The fair value was valued by a third party consultant based on information contained in the broker Interest Rate Swap Confirmations supplied by the three counterparties -- JP Morgan Chase, Citigroup N.A. New York, and UBS AG. The fair value takes into consideration the prevailing interest rate environment and the specific terms and conditions of the interest rate exchange agreement. The fair value was estimated using the zero-coupon discounting method. This method calculates the future payments required by the interest rate exchange agreements, assuming that the current forward rates implied by the yield curve are the market's best estimate of future spot interest rates. These payments are then discounted using the spot rates implied by the current yield curve for a hypothetical zero-coupon rate bond due on the date of each future net settlement payment on the interest rate exchange agreements. The fair value may vary throughout the life of the swap agreements due to any changes in fixed swap interest rates and swap market conditions.

Associated Debt – Using rates as of June 30, 2015, debt service requirements are presented for the 2008 Series B Bonds and 2008 Series C Bonds that are subject to the interest rate exchange agreements and the net swap payments assuming that interest rates remain the same for their term. As rates vary, interest payments on the floating rate notes and net swap payments will vary.

				(in millions)
Fiscal Year Ended June 30	Principal	Interest	Interest Rate Swaps, Net	Totals
2016	1.1	6.6	24.9	32.6
2017	1.1	6.6	24.9	32.5
2018	1.1	6.5	24.8	32.5
2019	1.1	6.5	24.8	32.4
2020	1.1	6.5	24.7	32.3
2021 – 2025	48.9	31.2	118.8	198.9
2026 – 2030	316.9	20.0	76.6	413.5
2031 – 2032	109.0	1.7	6.7	117.4
	\$ 480.3	\$ 85.6	\$ 326.2 \$	\$ 892.1

Interest Rate Risk – Currently, the State does not have interest rate risk because it is paying a fixed-rate of interest on the interest rate exchange agreements. However, if for some unforeseen reason any of the swap agreements are terminated prior to maturity; the State will have interest rate risk associated with the outstanding 2008 Series B Bonds and 2008 Series C Bonds until their maturity.

Credit Risk - As of June 30, 2015, the State was exposed to only a minimal amount of credit risk, as the fair values of all of the four interest rate exchange agreements were negative. Should rates change, the State could have increased exposure in the future. The State has entered into four interest rate agreements with three different counterparties. The lowest rating assigned to these counterparties is, as of June 30, 2015, A2 by Moody's, A by Standard & Poor's, and A by Fitch Ratings. Under the interest rate exchange agreements and to mitigate the potential for credit risk, if any of the counterparties' credit quality falls below A2 by Moody's Investors Service or A- by either Standard & Poor's or Fitch Ratings, the fair value of the interest rate exchange agreement for that respective counterparty will be fully collateralized by that counterparty. In addition, an event of termination occurs if any of the counterparties' credit quality falls below Baa2 by Moody's Investors service or BBB by either Standard & Poor's or Fitch Ratings.

Basis Risk – The interest rate exchange agreements expose the State to basis risk (i.e., a shortfall or surplus between the variable interest rate received on the interest rate exchange agreements and the interest rate paid on the floating rate notes), however this risk is fixed at the spreads for the respective series.

Termination Risk – The interest rate exchange agreements may be terminated by the State, upon two business days' written notice, designating to the counterparty the termination date. In addition, the State or the counterparties may terminate the interest rate exchange agreements if the other party fails to perform under the terms of the interest rate exchange agreements or if other various events occur. As of June 30, 2015, there have not been any such events. If any interest rate exchange agreement is terminated, the State would be unhedged and exposed to additional interest rate risk on the 2008 Series B Bonds and the 2008 Series C Bonds. In addition, if the interest rate exchange agreement has a negative fair value at the time of termination, the State would incur a loss and would be required to make a settlement payment to the related counterparty. Actual termination payments, if required to be made, can be made, at the State's discretion, from the Stabilization Fund, or delayed until funds are available in the Subordinated Payment Obligations Fund or until the next biennium when appropriations can be made in the biennial budget for the termination payments.

Market-Access Risk and Rollover Risk – The State's swap agreements are for the term (maturity) of the 2008 Series B Bonds and the 2008 Series C Bonds and, therefore, there is no market-access risk or rollover risk.

Foreign Currency Risk – The State's swap agreements are not subject to foreign currency risk.

2009 Annual Appropriation Bonds

In April 2009, the State issued \$1.5 billion of General Fund Annual Appropriation Bonds. These appropriation obligations were authorized by Wisconsin Statutes for the purpose of purchasing the tobacco settlement revenues that had been sold by the Secretary of Administration to the Badger Tobacco Asset Securitization Corporation pursuant to Wis. Stat. Section 16.63. The 2009 General Fund Annual Appropriation Bonds bear interest rates from 4.00 percent to 6.25 percent computed on the basis of a 30-day month and a 360-day year, payable semiannually on each May 1 and November 1, until their maturity dates.

These appropriation obligations are not general obligations of the State, and do not constitute "public debt" of the State as that term is used in the Constitution and in the State Statutes. The payment of the principal of, and premium, if any, and interest on the obligations is subject to annual appropriation; that is, payments due in any fiscal year of the State will be made only to the extent sufficient amounts are appropriated by the Legislature. The State is not legally obligated to appropriate any amounts for payment of debt service. The Legislature, recognizing its moral obligation to make timely appropriations from the General Fund sufficient to pay debt service on such obligations, expresses in Wis. Stat. Section 16.527(10) its expectation and aspiration that it will do so.

The Legislature's recognition of a moral obligation, however, does not create a legally enforceable obligation.

As of June 30, 2015, the debt service requirements for principal and interest on these bonds are as follows (in millions):

Fiscal Year Ended June 30	P	Principal	Interest
2016		28.3	85.0

D. Revenue Bonds

Chapter 18, Wisconsin Statutes, authorizes the State to issue revenue obligations secured by a pledge of revenues or property derived from the operation of a program funded by the issuance of these obligations. The resulting bond obligations are not general obligations of the State.

Transportation Revenue Bonds

Transportation Revenue Bonds are issued to finance part of the costs of certain transportation facilities and major highway projects. Chapter 18, Subchapter II of the Wisconsin Statutes as amended, Wis. Stat. Sec. 84.59 and a general bond resolution and series resolutions authorize the issuance of these bonds.

The Department of Transportation is authorized to issue a total of \$3.8 billion of revenue bonds. Presently, there are fourteen issues of Transportation Revenue Bonds outstanding totaling \$2.0 billion. Debt service payments are secured by driver and vehicle registration fees and the program resolution provides for a reserve fund, which if funded, will be used in the event that a deficiency exists in the redemption fund.

The Transportation Revenue Bonds issued and outstanding as of June 30, 2015 were as follows (in thousands):

	Issue	Interest	Maturity

Petroleum Inspection Fee Revenue Bonds

Petroleum Inspection Fee (PIF) Revenue Bonds are issued to finance claims made under the Petroleum Environmental Cleanup Fund Award (PECFA) Program for reimbursement of cleanup costs to soil and groundwater contamination. The program reimburses owners for 75 percent to 99 percent of cleanup costs associated with soil and groundwater contamination. As of June 30, 2015, PIF Bonds outstanding are \$68.0 million. Debt service payments are secured by petroleum inspection fees.

The PIF revenue bonds issued and outstanding as of June 30, 2015 were as follows (in thousands):

	Issue	Interest	Maturity

Clean Water Revenue Bonds

The Environmental Improvement Fund (the Fund) provides loans and grants to local municipalities to finance wastewater treatment planning and construction. The Fund is authorized to issue up to \$2.5 billion in Revenue Bonds. At June 30, 2015, there were fifteen issues of Revenue Bonds outstanding totaling \$706.3 million. These bonds are secured by payments on program loans and earnings of investments. Bonds issued and outstanding for the Environmental Improvement Fund as of June 30, 2015 were as follows (in thousands):

Issue	lssue Date	Interest Rates	Maturity Through	Issued	Outstanding

Qualified Build America Bonds

The State has issued three series of revenue bonds, in the aggregate amount of \$320.8 million, that are "qualified Build America Bonds" pursuant to Section 54AA of the Internal Revenue Code of 1986, as amended (Code). Based on the credit allowed for "qualified Build America Bonds", the State has elected to receive from the United States Treasury on each payment date a direct payment in the amount of 35 percent of the interest payable by the State with respect to such date, and the credit will not be allowed to the taxpayers holding the bonds.

With respect to the direct payments the State expects to receive, since such payments are not Program Income and not pledged to the payment on the Bonds, there is no direct impact on the Bonds with these direct payments being subject to the mandated across-the-board cuts to the Federal budget for the federal fiscal year that started October 1, 2014 and ends September 30, 2015. The impact of these cuts for the current federal fiscal year is a 7.3% reduction in the direct payment amount that the State expected to receive.

The interest rates on the 2009 Series B (taxable) Transportation Revenue Bonds in the amount of \$147.1 million range from 3.5 percent to 5.8 percent payable semiannually on January 1 and July 1 beginning with the first interest payment date of July 1, 2010. These bonds are callable at par on July 1, 2019 or any date thereafter. The bonds mature beginning July 1, 2015 through 2030.

The interest rates on the 2010 Clean Water Revenue, Series 3 bonds in the amount of \$49.7 million bonds range from 3.957 percent to 5.441 percent payable semiannually on June 1 and December 1 beginning with the first interest payment date of June 1, 2010. These bonds are callable at par on June 1, 2020 or any date thereafter. The bonds mature beginning June 1, 2017 through 2025.

The interest rates on the 2010 Series B (taxable) Transportation Revenue Bonds in the amount of \$123.9 million range from 4.7 percent to 6.0 percent payable semiannually on January 1 and July 1 beginning with the first interest payment date of July 1, 2011. These bonds are callable at par on July 1, 2020 or any date thereafter. The bonds mature beginning July 1, 2022 through 2031.

E. Refundings, Exchanges and Early Extinguishments

Refunding Provisions of GASB Statement No. 23

The State implemented the provisions of GASB Statement No. 23. *Accounting and Financial Reporting for Refunding of Debt*

Reported by Proprietary Activities beginning with Fiscal Year 1996. This Statement requires proprietary activities to adopt certain accounting and reporting changes for both current refunding and advance refunding resulting in defeasance of debt. GASB Statement No. 23 permits, but does not require, retroactive application of its provisions. The State has chosen not to apply the provisions retroactively to previously issued financial statements.

Current Year Refundings/General Obligation Bonds

In September 2014, the State issued \$275.9 million of general obligation refunding bonds (2014 Series 3), the proceeds of \$325.7 million were deposited in an escrow account to provide for future debt service payments and redemption of \$287.4 million of various general obligation bonds outstanding at the time of the refunding. As a result of the advance refunding, the \$287.4 million of various general obligation bonds for which future debt service payments and redemption are paid from the escrow account are considered defeased and the associated liability removed from the financial statements. The refunding resulted in a decrease in total debt service payments by \$24.5 million and an economic gain of \$21.2 million.

In January 2015, the State issued \$257.4 million of general obligation refunding bonds (2014 Series 4), the proceeds of \$308.7 million were deposited in an escrow account to provide for future debt service payments and redemption of \$277.6 million of various general obligation bonds outstanding at the time of the refunding. As a result of the advance refunding, the \$277.6 million of various general obligation bonds for which future debt service payments and redemption are paid from the escrow account are considered defeased and the associated liability removed from the financial statements. The refunding resulted in a decrease in total debt service of \$19.7 million and an economic gain of \$19.4 million.

In April 2015, the State issued \$171.1 million of general obligation refunding bonds (2015 Series 1), the proceeds of which were used to current refund on May 1, 2015 principal of various general obligation bonds outstanding in the amount of \$63.5 million and advance refund various general obligation bonds outstanding in the amount of \$108.2 million. For the advance refunding, the proceeds of \$123.2 million were deposited in an escrow account to provide for future debt service payments and redemption of \$108.2 million of various general obligation bonds outstanding at the time of the refunding. As a result of the advance refunding, the \$108.2 million of various general obligation bonds for which future debt service payments and redemption are paid from the escrow account are considered defeased and the associated liability removed from the financial statements. The refunding resulted in a decrease in total debt service of \$10.1 million and an economic gain of \$9.8 million.

In April 2015, the State issued \$279.8 million of General Obligation Long Term Notes Payable, the proceeds of which were used to current refund various general obligation bonds with outstanding principal of \$278.3 million. The refunding resulted in a decrease in total debt service of \$20.5 million and an economic gain of \$18.9 million.

Prior Year Refundings/General Obligation Bonds

Government Accounting Standards Board Statement No. 7 Advance Refundings Resulting in Defeasance of Debt, provides that refunded debt and assets placed in escrow for the payment of related debt service be excluded from the financial statements. At June 30, 2015, \$991.3 million of general obligation bond principal has been defeased.

Current Year Refundings/Revenue Bonds

In December 2014, the State issued \$94.1 million of transportation revenue refunding bonds (2014 Series 2), the proceeds of \$112.0 million were deposited in an escrow account to provide for future debt service payments and redemption of \$101.2 million of various transportation revenue bonds outstanding at the time of the refunding. As a result of the advance refunding, the \$101.2 million of various transportation revenue bonds for which future debt service payments and redemption are paid from the escrow account are considered defeased and the associated liability removed from the financial statements. The refunding resulted in a decrease in total debt service of \$8.2 million and an economic gain of \$6.5 million.

In April 2015, the State issued \$207.2 million of transportation revenue refunding bonds (2015 Series 1), the proceeds of which were used to current refund on July 1, 2015 principal of various transportation revenue bonds outstanding in the amount of \$88.4 million and advance refund various transportation revenue bonds outstanding in the amount of \$137.2 million. For the advance refunding, the proceeds of \$155.3 million were deposited in an escrow account to provide for future debt service payments and redemption of \$137.2 million of various transportation revenue bonds outstanding at the time of the refunding. As a result of the advance refunding, the \$137.2 million of various transportation revenue bonds for which future debt service payments and redemption are paid from the escrow account are considered defeased and the associated liability removed from the financial statements. The refunding resulted in a decrease in total debt service of \$23.8 and an economic gain of \$20.5 million.

Prior Year Refundings/Revenue Bonds

For financial reporting purposes, the following primary government revenue bonds have been defeased, and therefore, removed as a liability from the balance sheet:

- Environmental Improvement Fund revenue bonds At June 30, 2015, revenue bonds outstanding of \$53.3 million have been defeased.
- Transportation revenue bonds At June 30, 2015, revenue bonds outstanding of \$506.19 million have been defeased.

F. Short-term Financing

The State of Wisconsin Building Commission, an agency of the State, is empowered by law to consider, authorize, issue, and sell debt obligations of the State. To date, the Commission has authorized the issuance of notes. When this short-term debt does not meet long-term financing criteria, it is classified among fund liabilities.

General Obligation Commercial Paper Notes

The State has authorized General Obligation Commercial Paper Notes for the acquisition, construction, development, extension, enlargement, or improvement of land, waters, property, highway, buildings, equipment or facilities. Periodically, additional commercial paper notes are issued to pay for maturing commercial paper notes.

The State intends to make annual May 1 payments on the outstanding commercial paper notes that reflect principal amortization of the notes. The State also intends to make regular payments to the issuing and paying agent that will be used to pay interest due on maturing notes. On June 30, 2015, the amount of commercial paper notes outstanding was \$163.3 million which had interest rates ranging from 0.07 percent to 0.09 percent and maturities ranging from July 16, 2015 to September 2, 2015.

Short-term debt activity for the year ended June 30, 2015 for general obligation commercial paper notes was as follows (in millions):

В	alance					В	alance
July 1, 2014 Additions		ditions	Reductions		June 30, 2015		
\$	155.1	\$		\$	8.2	\$	146.9

General Obligation Extendible Municipal Commercial Paper

The State has authorized General Obligation extendible municipal commercial paper for the acquisition, construction, development, extension, enlargement, or improvement of land, waters, property, highway, buildings, equipment or facilities. Periodically, additional extendible municipal commercial papers are issued to pay for maturing extendible municipal commercial paper. The State intends to make annual May 1 payments on the outstanding commercial paper notes that reflect principal amortization of the paper. The State also intends to make regular payments to the issuing and paying agent that will be used to pay the interest due on the maturing notes. At June 30, 2015, the amount of extendible municipal commercial paper outstanding was \$631.8 million which had interest rates ranging from 0.08 percent to 0.20 percent and maturities from July 8, 2015, to November 10, 2015.

Short-term debt activity for the year ended June 30, 2015 for general obligation extendible municipal commercial paper was as follows (in millions):

В	alance					B	alance
July	July 1, 2014 Additions		Reductions		June 30, 2015		
\$	532.1	\$	105.1	\$	24.6	\$	612.6
Ψ	552.1	Ψ	105.1	Ψ	24.0	Ψ	012.0

Petroleum Inspection Fee Revenue Extendible Municipal Commercial Paper

The State has authorized petroleum inspection fee revenue extendible municipal commercial paper to pay the costs of claims under the Petroleum Environmental Cleanup Fund Award (PECFA) Program. Periodically, additional extendible municipal commercial paper is issued to pay for maturing paper. The State may periodically deposit money into the Junior Subordinate Principal Account, which represents principal payments to be made on the extendible municipal commercial paper. The State also intends to make regular deposits to the issuing and paying agent that will be used to pay interest due on maturing paper. At June 30, 2015, the amount of petroleum inspection fee revenue extendible commercial paper outstanding was \$71.2 million which had interest rates ranging from 0.11 percent to 0.18 percent and maturities ranging from August 12, 2015 to September 17, 2015.

Short-term debt activity for the year ended June 30, 2015 for the petroleum inspection fee revenue extendible municipal commercial paper was as follows (in millions):

	alance 1, 2014	۸d	ditions	Podu	uctions		ance
July	1, 2014	Additions		Reductions		June 30, 2015	
\$	71.2	\$		\$		\$	71.2

Transportation Revenue Commercial Paper Notes

The State authorized transportation revenue commercial paper notes to pay the costs of major highway projects and certain State transportation facilities. Periodically, additional commercial paper notes are issued to pay for maturing commercial paper notes. The State intends to make annual July 1 payments on the commercial paper notes that reflect principal amortization of the notes. The State also intends to make regular deposits to the issuing and paying agent that will be used to pay interest due on maturing notes. At June 30, 2015, the amount of transportation revenue commercial paper notes outstanding was \$144.1 million which had interest rates ranging from 0.08 percent to 0.09 percent and maturities ranging from August 3, 2015 to October 8, 2015.

Short-term debt activity for the year ended June 30, 2015 for the transportation revenue commercial paper notes was as follows (in millions):

_	alance	اء ۵	ditiono	Ded		-	
July	July 1, 2014 Additions		Rea	Reductions		June 30, 2015	
\$	163.7	\$		\$	19.6	\$	144.1

G. Certificates of Participation - Master Lease Program

The State established a facility in 1992 that provides lease purchase financing for property and certain service items acquired by state agencies. This facility is the Third Amended and Restated Master Lease between the State acting by and through the Department of Administration and U.S. Bank National Association. Lease purchase obligations under the Master Lease are not general obligations of the State, but are payable from appropriations of State agencies participating in the Master Lease Program, subject to annual appropriation. The interest component of each lease/purchase payment is subject to a separate determination. Pursuant to the terms and conditions of this agreement, the trustee for the facility issues parity Master Lease certificates of participation that evidence proportionate interest of the owners thereof in lease payments. A common pool of collateral ratably secures all Master Lease certificates. Title in the property and service items purchased under the facility remains with the State and the State grants to the Trustee, for the benefit of all Master Lease certificate holders, a first security interest in the leased items.

The outstanding balance as of June 30, 2015 was as follows:

Balance Due	Average Life (Weighted Term)
\$116.1 million	3.99 Years

At June 30, 2015, the following parity Master Lease certificates were outstanding:

- Master Lease Certificates of Participation of 2006, Series A, in the amount of \$4.7 million. This series of Master Lease certificates has an interest rate of 4.0 percent and matures semi-annually through September 1, 2016.
- Master Lease Certificates of Participation of 2013, Series A (Revolving Credit Agreement - Taxable) in the amount of \$39.8 million. This Master Lease certificate evidences the State's obligation to repay advances under a Revolving Credit Agreement, dated September 1, 2013, as amended between U.S. Bank National Association (as trustee), the State of Wisconsin, acting by and through its Department of Administration, as lessee, and PNC Bank National Association. The scheduled termination date under the Revolving Credit Agreement, as amended, is September 1, 2016. This Master Lease certificate shall bear interest at the rates and mature on the dates provided for in the Revolving Credit Agreement. The balance of this Master Lease certificate may include some accrued interest that will be payable at the next semi-annual interest payment date.
- Master Lease Certificates of Participation of 2010, Series B, in the amount of \$1.6 million. This series of Master Lease certificates has interest rates ranging from of 3.0 percent to 4.0 percent and matures semi-annually through September 1, 2017.
- Master Lease Certificates of Participation of 2012, Series A, in the amount of \$5.9 million. This series of Master Lease certificates has interest rates ranging from 3.0 percent to 4.0 percent and matures semi-annually through September 1, 2017.

- Master Lease Certificates of Participation of 2014, Series A, in the amount of \$28.6 million. This series of Master Lease certificates has interest rates ranging from 2.75 percent to 5.0 percent and matures semi-annually through March 1, 2023.
- Master Lease Certificates of Participation of 2014, Series B in the amount of \$34.9 million. This series of Master Lease certificates has interest rates ranging from 1.65 to 5.00 percent and matures semi-annually through March 1, 2023.

The Third Amended and Restated Master Lease 1992-1 provides that certain lease schedules to the facility can be terminated if the State deposits with the Trustee an amount that is equal to the outstanding amount of the lease schedule, or in amounts that are sufficient to purchase investments that mature on dates and in amounts to make the lease payments when due. At June 30, 2015, the State has not deposited with the Trustee amounts, that when invested, will terminate lease schedules.

H. Arbitrage Rebate

The Tax Reform Act of 1986 requires that governmental entities issuing tax-exempt debt subsequent to August 1986, calculate and rebate arbitrage earnings to the federal government. Specifically, the excess of the aggregated amount earned on investments purchased with bond proceeds over the amount that would have been earned if the proceeds were invested at a rate equal to the bond yield, is to be rebated to the federal government. As of June 30, 2015, a liability for arbitrage rebate did not exist.

I. Moral Obligation Debt

Through legislation enacted in 1999, the State authorized the creation of local districts. These districts (Wisconsin Center District, Southeast Wisconsin Professional Baseball Park District, and the Green Bay/Brown County Professional Football Stadium District) are authorized to issue bonds for their respective purpose, and if the State determines that certain conditions are satisfied, the State may have a moral obligation to appropriate moneys to make up deficiencies in the districts' special debt service reserve funds. To date, the Wisconsin Center District has the authority to issue up to \$200.0 million in bonds and has issued one series with an outstanding balance of \$121.0 million that is subject to the moral obligation. The two other local districts each have authority to issue \$160.0 million of revenue obligations that, subject to the Secretary of Administration's determination that certain conditions have been met, could carry a moral obligation of the State. All of the districts have issued revenue obligations that do not carry the moral obligation of the State.

Through legislation enacted in 1999, the State authorized the issuance of up to \$170.0 million principal amount of bonds to finance the development or redevelopment of sites and facilities to be used for public schools. If certain conditions are satisfied, and if a special debt service reserve fund is created for the bonds, the State will provide a moral obligation pledge, which would restore the special debt reserve fund established for the bonds to an amount not to exceed the maximum annual debt service on the bonds. Three bond issues with an aggregate outstanding balance of \$81.7 million have been issued that have a special debt service reserve fund secured by the State's moral obligation.

J. Credit Agreements

The State has entered into a credit agreement that provides the State a line of credit for liquidity support for up to \$200.0 million of general obligation commercial paper notes. As of June 30, 2015, \$200.0 million was unused and available. The line of credit expires in March, 2016, but is subject to termination and renewal as provided for in the credit agreement. The cost of this line of credit is 0.25 percent per year.

The State has entered into a credit agreement to provide the State a line of credit for liquidity support for its transportation revenue commercial paper program. The amount of the line of credit is \$175.0 million. As of June 30, 2015, \$175.0 million was unused and available. This line of credit expires in April, 2016, but is subject to termination and renewal as provided for in the credit agreement. The cost of this line of credit is 0.33 percent per year.

NOTE 12. LEASE COMMITMENTS AND INSTALLMENT PURCHASES

The State leases office buildings, space, and equipment under a variety of agreements that vary in lease term, many of which are subject to appropriation from the State Legislature to continue the lease commitment. If such funding, i.e., through legislative appropriation, is judged to be assured, and the likelihood of cancellation through exercise of the fiscal funding clause is remote, leases are considered non-cancelable and reported as either a capital lease or an operating lease.

A. Capital Leases

Primary Government

Capital lease commitments in the government-wide and proprietary funds statements are reported as liabilities at lease inception. The related assets along with the depreciation are also reported at that time. Lease payments are reported as a reduction of the liability.

For capital leases in governmental funds, "Other Financing Sources - Capital Lease Acquisitions" and expenditures are recorded at lease inception. Lease payments are recorded as expenditures.

The following is an analysis of the gross minimum lease payments along with the present value of the minimum lease payments as of June 30, 2015 for capital leases (in thousands):

	<u>Governmental Activities</u>					
Fiscal Year		Principal	Inte	rest		
2016	\$	16,061	\$	4,441		
2017		13,258		3,981		
2018		12,927		3,330		
2019		7,291		2,737		
2020		4,235		2,438		
2021- 2025		35,556		7,399		
2026 - 2030		9,943		1,216		
2031- 2035		-		-		
2036 - 2040		-		-		
2041- 2045		-		-		
Total minimum future payments		99,271		-		
Total minimum interest payments	\$	_		25,541		
interest payments	\$	-		25,8		

	Business-t	ype	
Fiscal Year	Principal		Interest
2016 2017	\$ 4,882 3,366	\$	2,447 2,242
2018 2019 2020	1,085 561 510		2,130 2,076 2,037
2021- 2025 2026 - 2030	2,757 3,925		9,627 8,439
2031- 2035 2036 - 2040 2044 - 2045	5,627 8,067		6,737 4,296
2041- 2045 Total minimum future payments	 6,429 37,209		989
Total minimum interest payments	\$ -		41,020

Assets acquired through capital leases are valued at the lower of fair market value or the present value of minimum lease payments at the inception of the lease. The following is an analysis of capital assets recorded under capital leases as of June 30, 2015 (in thousands):

	Governmental Activities	Business-type Activities
l and and l and		
Improvements	\$ 376 \$	β -
Buildings and Improvements	1,000	100,237
Machinery and Improvements	181,275	14,433
Construction in	10 1,27 0	1,400
Progress Less: Accumulated		
Depreciation	 (52,205)	(55,703)
Carrying Amount	\$ 130,446	\$ 58,967

B. Operating Leases

Operating leases, those leases not recorded as capital leases, are not recorded in the statement of net assets. These leases contain various renewal options, the effect of which are reflected in the minimum lease payments only if it is considered that the option will be exercised. Certain other operating leases contain escalation clauses and contingent rentals which are not included in the calculation of the future minimum lease payments. Operating lease expenditures/expenses are recognized as incurred or paid over the lease term.

Governmental and business-type activities rental expenses under operating leases for Fiscal Year 2015 were \$83.5 million. Of this amount, \$83.4 million relates to minimum rental payments stipulated in lease agreements, \$49.1 thousand relates to sub rental payments.

The following is an analysis of the future minimum rental payments due under operating leases (in thousands):

Fiscal Year	G	Bovernmental Activities	Business-type Activities
2016	\$	49,700	\$ 18,731
2017		38,316	14,885
2018		30,179	12,996
2019		21,454	10,997
2020		16,655	9,876
2021- 2025		41,342	32,288
2026 - 2030		19,314	28,493
2031- 2035		6,703	14,647
2036 - 2040		481	152
2041- 2045		444	21
2046 - 2050		420	-
2051- 2055		9	-
Thereafter		206	-
Minimum lease			
payments	\$	225,223	\$ 143,087

C. Installment Purchases

The State has entered into installment purchase agreements. The following is an analysis of the gross minimum installment payments, along with the present value of the minimum installment payments, as of June 30, 2015 for installment purchases (in thousands):

Fiscal Year	Governmenta Principal	l Activities Interest
2016 2017	\$ 637 280	16 3
2018 2019 2020	- - -	- - -
Total minimum future installment payments	\$ 917	-
Total interest payments	\$ -	19

Fiscal Year	Business-typ Principal	e Activities Interest
2016 2017 2018 2019 2020	\$ 18 18 13 5 5	1 1 1 1
Total minimum future installment payments	\$ 57	-
Total interest payments	\$ 	4

NOTE 13. POLLUTION REMEDIATION OBLIGATIONS

Governmental Accounting Standards Board (GASB) Statement No. 49, Accounting and Financial Reporting for Pollution Remediation Obligations, establishes accounting and financial reporting standards for pollution remediation obligations. These are obligations to address the current or potential detrimental effects of existing pollution by participating in pollution remediation activities such as site assessments and cleanups. The scope of the standard excludes pollution prevention or control obligations with respect to current operations, and future pollution remediation obligations that are required upon retirement of an asset, such as landfill closure and post closure care and nuclear power plant decommissioning.

Measurement of Obligations

GASB Statement No. 49 requires the State to calculate pollution remediation obligations using the expected cash flow technique. These estimates are subject to change over time. Costs may vary due to price fluctuations, changes in technology, changes in potential responsible parties, results of environmental studies, changes to statutes or regulations and other factors. Recoveries from other responsible parties may reduce the State's obligation. In accordance with the standard, if the State cannot reasonably estimate a pollution remediation obligation, it does not report a liability. Under specific circumstances capital assets may be created when pollution remediation is performed. The State has adopted a minimum reporting threshold of \$1.0 million. Therefore, only remediation sites with outlays estimated to meet or exceed that amount are reported in the financial statements.

During fiscal year 2015, the State did not recognize additional estimated liabilities for pollution remediation. The State expended nothing to clean up sites in fiscal year 2015; therefore, the beginning liability of \$7.5 million remained at \$7.5 million. There were no recoveries received from other responsible parties during fiscal year 2015 and none are expected for the identified obligations.

Identified Remediation Obligations:

Pollution remediation liabilities are updated annually and are based on engineering studies and the judgment of agency officials. The following table shows liabilities included in the Statement of Net Position as of June 30, 2015 (in millions):

Nature and Source of Pollution	Estimated Liability	Estimated Recovery
Contract agreement with EPA to clean up Superfund site of former wood treatment facility	\$.5	
Voluntary commencement by the State to clean up heavy metal contamination of canal near former industrial site	7.0	-
Total estimated obligations	\$7.5	

In addition to the liability reported in the table above, the State expects to incur estimated costs of \$27,000 per year indefinitely to pump and treat contamination at a former chrome plating facility. The State also expects to incur estimated costs of \$70,000 per year indefinitely to operate and maintain a closed landfill. Both are Superfund sites and estimated total remediation costs for them cannot be reasonably determined. Therefore, a liability has not been reported in the Statement of Net Position for either site.

NOTE 14. RETIREMENT PLAN

The Wisconsin Retirement System (WRS) was established and is administered by the State of Wisconsin to provide pension benefits for State and local government public employees. The WRS consists of the Core Retirement Investment Trust, the Variable Retirement Investment Trust, and the Police and Firefighters Trust. Although separated for accounting purposes, the assets of these trust funds can be used to pay benefits for any member of the WRS, and are reported as one pension plan.

The WRS is considered part of the State of Wisconsin's financial reporting entity. Copies of the separately issued financial report that includes audited financial statements and required supplementary information for the year ending December 31, 2014, is available at: <u>doa.wi.gov/capitalfinance</u> as report number 15-11.

Plan Description

The WRS, governed by Chapter 40 of the Wisconsin Statutes, is a cost-sharing multiple-employer defined benefit pension plan administered by the Department of Employee Trust Funds. Benefit terms may only be modified by the Legislature. It provides coverage to all eligible State of Wisconsin, local government and other public employees. All employees, initially employed by a participating WRS employer prior to July 1, 2011, expected to work at least 600 hours a year (440 hours for teachers and school district educational support employees) and expected to be employed for at least one year from employee's date of hire are eligible to participate in the WRS. All employees, initially employed by a participating WRS employer on or after July 1, 2011, and expected to work at least 1200 hours a year (880 hours for teachers and school district educational support employees) and expected to be employed for at least one year from employee's date of hire are eligible to participate in the WRS. Note: Employees hired to work nine or ten months per year, (e.g. teachers contracts), but expected to return year after year are considered to have met the one-year requirement.

As of December 31, 2014, the number of participating employers was:

State Agencies	57
Cities	152
Counties	71
4 th Class Cities	36
Villages	261
Towns	246
School Districts	424
Wisconsin Technical College System Board Districts	16
Cooperative Educational Service Agencies	12
Other	207
Total Employers	1,482

For employees beginning participation on or after January 1, 1990 and no longer actively employed on or after April 24, 1998, creditable service in each of five years is required for eligibility for a retirement annuity. Participants employed prior to 1990 and on or after April 24, 1998 and prior to July 1, 2011 are immediately vested. Participants who initially became WRS eligible on or after July 1, 2011 must have five years of creditable service to be vested. Employees who retire at or after age 65 (54 for protective occupation employees, 62 for elected officials and State executive participants) are entitled to receive an unreduced retirement benefit. The factors influencing the benefit are: (1) final average earnings, (2) years of creditable service, and (3) a formula factor.

Final average earnings is the average of the participant's three highest years' earnings. Creditable service is the creditable current and prior service expressed in years or decimal equivalents of partial years for which a participant receives earnings and makes contributions as required. The formula factor is a standard percentage based on employment category.

Vested employees may retire at age 55 (50 for protective occupation employees) and receive reduced benefits. Employees terminating covered employment before becoming eligible for a retirement benefit may withdraw their contributions, plus interest, and forfeit all rights to any subsequent benefits, or may leave contributions on deposit and defer application until eligible to receive a retirement benefit. The WRS also provides death and disability benefits for employees.

The Employee Trust Funds Board may periodically adjust annuity payments from the WRS based on annual investment performance in accordance with s. 40.27, Wis. Stat. An increase or decrease in annuity payment may result when investment gains or losses, together with other actuarial experience factors, create a surplus or shortfall in the reserves, as determined by the WRS' consulting actuary. Annuity adjustments are not based on cost of living or other similar factors. For Core Retirement Investment Trust fund annuities, decreases may be applied only to previously granted increases. By law, Core Retirement Investment Trust fund annuities cannot be reduced to an amount below the original, guaranteed amount set at retirement.

Accounting Policies and Plan Asset Matters

The financial statements of the WRS have been prepared in accordance with generally accepted accounting principles, using the flow of economic resources measurement focus and a full accrual basis of accounting. Under the accrual basis of accounting, revenues are recorded when earned and expenses are recorded at the time the liabilities are incurred. Plan member contributions are recognized in the period in which contributions are paid. Employer contributions to the plan are recognized in the accounting period in which the underlying earnings on which the contributions are based are paid and the employer has made a formal commitment to provide contributions. Benefits and refunds are recognized when due and payable in accordance with the terms of the plan.

All assets of the WRS are invested by the State of Wisconsin Investment Board. The retirement fund assets consist of shares in the Variable Retirement Investment Trust and the Core Retirement Investment Trust. The Variable Retirement Investment Trust consists primarily of equity securities. The Core Retirement Investment Trust is a balanced investment fund made up of fixed income securities and equity securities. Shares in the Core Retirement Investment Trust are purchased as funds are made available from retirement contributions and investment income, and sold when funds for benefit payments and other expenses are needed.

The assets of the Core and Variable Retirement Investment Trusts are carried at fair value with all market value adjustments recognized in current operations. Investments are revalued monthly to current market value. The resulting valuation gains or losses are recognized as income, although revenue has not been realized through a market-place transaction.

The WRS does not have any investments (other than those issued or guaranteed by the U.S. Government) in any one organization that represent 5.0 percent or more of plan net position.

Contributions Required

Required contributions are determined by an annual actuarial valuation in accordance with Chapter 40 of the Wisconsin Statutes. The employee required contribution is one-half of the actuarially determined contribution rate for general category employees, including teachers, and executives and elected officials. Required contributions for protective contributions are the same rate as general employees. Employers are required to contribute the remainder of the actuarially determined contribution rate. The employer may not pay the employee required contribution unless provided for by an existing collective bargaining agreement. Contribution rates as of June 30, 2015 are:

General (including teachers) Executives & Elected Officials Protective with Social Security	Employee 6.8% 7.7% 6.8%	Employer 6.8% 7.7% 9.5% 13.1%	
Protective without Social Security	6.8%	13.1%	

Employers are required to contribute an actuarially determined amount necessary to fund the remaining projected cost of future benefits.

State of Wisconsin Net Pension Asset, Pension Contributions, Pension Expenses, and Deferred Outflows and Inflows of Resources

At June 30, 2015, the State reported a net pension asset of \$686.9 million for its proportionate share of the WRS' net pension asset. The net pension asset is reported as a Net Pension Asset on the Statement of Net Position.

The net pension asset was measured as of December 31, 2014, and the total pension liability was based on an actuarial valuation as of December 31, 2013. Update procedures were used to roll forward the total pension liability to the measurement date. No material changes in assumptions or benefit terms occurred between the actuarial valuation date and the measurement date.

The State's proportionate share of the net pension asset was determined based on the average of the State's contributions to the WRS over the three most recent calendar years relative to the average contributions of all employers for the same period. At December 31, 2014, the State's proportionate share was 28.0 percent, which is an increase of 0.2 percent from its proportionate share as of December 31, 2013.

For calendar year 2014, State employers made \$276.0 million in contributions recognized by the WRS.

For the year ended June 30, 2015, the State recognized pension expense of \$269.0 million. At June 30, 2015, the State reported deferred outflows and inflows of resources related to pensions of \$552.8 million and \$12.4 million, respectively. More information about deferred outflows and inflows related to pensions, including the types and the amounts applicable to each type, can be found in Note 21.

A schedule presenting multi-year trend information of the State's proportionate share of the net pension liability or asset is presented as required supplementary information following the notes to the financial statements.

Actuarial Valuation

The pension measurements as of December 31, 2014 were based upon the following actuarial assumptions.

Actuarial Valuation Date	December 31, 2013
Measurement Date of Net Pension Asset	December 31, 2014
Actuarial Cost Method	Entry Age
Asset Valuation Method	Fair Value
Long-Term Expected Rate of Return	7.2%
Discount Rate	7.2%
Salary Increases	
Inflation	3.2%
Seniority/Merit	0.2% - 5.8%
	Wisconsin 2012
Mortality	Mortality Table
Post-retirement Adjustments*	2.1%

* Post-retirement adjustments are not guaranteed. Actual adjustments are based on recognized investment return, actuarial experience, and other factors. The assumed annual adjustment based on the investment return assumption and the post-retirement discount rate is 2.1%.

Actuarial assumptions are based upon an experience study conducted in 2012 using experience from 2009-2011.

Long-Term Expected Return on Plan Assets

The long-term expected rate of return on WRS investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return, net of WRS investment expense and inflation, are developed for each major asset class. The ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The long-term expected rate of return is reviewed every three years in conjunction with the WRS experience study. For each major asset class that is included in the Core Retirement Investment Trust fund's target asset allocation as of December 31, 2014, these best estimates of geometric long-term real rates of return were used:

Asset Class	Target Allocation	Rate of Return
Domestic Equity	21.0%	5.3%
International Equity	23.0	5.7
Fixed Income	36.0	1.7
Inflation Sensitive	20.0	2.3
Real Estate	7.0	4.2
Private Equity/Debt	7.0	6.9
Multi-asset	6.0	3.9
Cash	(20.0)	0.9

For each major asset class that is included in the Variable Retirement Investment Trust fund's target asset allocation as of December 31, 2014, these best estimates of geometric long-term real rates of return were used:

Asset Class	Target Allocation	Rate of Return
Domestic Equity	70.0%	5.3%
International Equity	30.0	5.7

The money-weighted rates of return on pension plan investment for the Core and Variable funds for the calendar year ended 2014 were 5.4% and 7.2%, respectively. The money-weighted rate of return expresses investment performance, net of pension plan expenses, adjusted for the changing amounts actually invested.

Discount Rate

A single discount rate of 7.2% was used to measure the total pension liability. This rate was based on the expected rate of return on pension plan investments of 7.2% and a long term bond rate of 3.56%. Because of the unique structure of the WRS, the 7.2% expected rate of return implies that a dividend of approximately 2.1% will always be paid. For purposes of the single discount rate, it was assumed that the dividend would always be paid. The projection of cash flows used to determine this single discount rate assumed that plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rate. Based on these assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments (including expected dividends) of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

The following presents the State's proportionate share of the net pension (liability) asset, calculated using a single discount rate of 7.2%, as well as what the State's net pension (liability) asset would be if it were calculated using a single discount rate that is 100 basis points lower or 100 basis points higher:

	State's share of the net pension	
	(liability) asset	
1% Decrease (6.2%)	\$ (1,937,788,328)	
Current Rate (7.2%)	\$ 686,873,469	
1% Increase (8.2%)	\$ 2,759,725,231	

NOTE 15. MILWAUKEE RETIREMENT SYSTEM

The Milwaukee Retirement System (MRS) is reported as an Investment Trust Fund. MRS participants provide assets to the State of Wisconsin, Department of Employee Trust Funds (DETF) for investing in its Core Retirement Investment Trust Fund (Core Fund) and the Variable Retirement Investment Trust Fund (Variable Fund) of the Wisconsin Retirement System. Participation of the MRS in the Core Fund and Variable Fund is described in the DETF Administrative Code, Chapter 10.12. The State of Wisconsin Investment Board (SWIB) manages the Core Fund and Variable Fund with oversight by a Board of Trustees as authorized in Wis. Stat. 25.14 and 25.17. SWIB is not registered with the Securities and Exchange Commission as an investment company.

The investments of the Core Fund and Variable Fund consist of a highly diversified portfolio of securities. Wis. Stat. 25.17(3)(a) allows investments in loans, securities and any other investments as authorized by Wis. Stat. 620.22. Permitted classes of investments include bonds of governmental units or of private corporations, loans secured by mortgages, preferred or common stock, real property and other investments not specifically prohibited by statute.

Investments are revalued monthly to fair value, with unrealized gains and losses reflected in income.

Monthly, the DETF distributes a pro-rata share of the total Core Fund and Variable Fund earnings less administrative expenses to the MRS accounts. The MRS accounts are adjusted to fair value and gains/losses are recorded directly in the accounts per DETF Administrative Code, Chapter 10.12(2). Neither State statute, a legal provision nor a legally binding guarantee exists to support the value of shares.

Copies of the separately issued financial report that includes audited financial statements along with the accompanying footnote disclosures and supplementary information for the Core Fund and the Variable Fund is available at <u>doa.wi.gov/</u> <u>capitalfinance</u> or may be obtained upon request from:

State of Wisconsin Investment Board P.O. Box 7842 Madison, Wisconsin 53707-7842

NOTE 16. POSTEMPLOYMENT BENEFITS – STATE HEALTH INSURANCE PROGRAM

Effective Fiscal Year 2008, the State implemented the Governmental Accounting Standards Board (GASB) Statement No. 45, Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions. This Statement establishes standards for the measurement, recognition, and display of other postemployment benefit expense/expenditures and related liabilities (assets), note disclosures, and, if applicable, required supplementary information in financial reports of state and local governmental employers.

Plan Description

The State's Health Insurance Program, a cost-sharing multiple employer, defined benefit plan, is an employer-sponsored program (not administered as a trust) offering group medical coverage to eligible employees and retirees of State and participating local government employers. Created under Chapter 40, of the Wisconsin Statutes, the State Department of Employee Trust Funds and the Group Insurance Board have program administration and oversight responsibilities under Wis. Stat. Sections 15.165(2) and 40.03(6). As of January 2013 (most recent actuarial valuation date), there were 55,197 active, and 8,151 retirees and beneficiaries participating in the plan.

Under this plan, retired employees of the State are allowed to pay the same healthcare premium as active employees, creating an implicit rate subsidy for retirees. This implicit rate subsidy, which is calculated to cover pre-age 65 retirees (since at age 65 retirees are required to enroll in Medicare when eligible), is treated as an other postemployment benefit (OPEB).

The Department of Employee Trust Funds issues a publicly available financial report. That report is available at <u>doa.wi.gov/</u> <u>capitalfinance</u> or may be obtained upon request from:

The Department of Employee Trust Funds 801 West Badger Road P.O. Box 7931 Madison, Wisconsin 53707-7931

Funding Policy

The health insurance plan is currently funded on a "pay-as-yougo" basis. GASB Statement No. 45 does not require funding of the OPEB expense and the State does not currently intend to prefund the OPEB obligation. Under this plan, retirees contribute premiums directly to the plan either through "out-of-pocket" or from unused accumulated sick leave conversion credits. The value of the sick leave benefit is defined as compensated absences and reported under the provisions of GASB Statement No. 16, *Accounting for Compensated Absences*. Contribution requirements are established and may be amended by the Group Insurance Board. For retirees that participate in the health insurance plan, premiums, for non-Medicare retirees, are based on an effective rate structure for the health care service provider selected. Monthly Rates range from \$602.10 to \$1,392.80 for single coverage and \$1,497.80 to \$3,477.80 for family coverage.

The annual required contribution of the employer (ARC) is an amount actuarially determined in accordance with the parameters of GASB Statement No. 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liabilities (or funding excess) over a period not to exceed thirty years. At June 30, 2015, the ARC was \$86.2 million while the employer contributions were \$41.8 million, and the ARC adjustment, with interest, was \$34.6 million.

Annual OPEB Cost

The State's annual OPEB cost, the percentage of annual OPEB costs contributed to the plan, and the net OPEB obligation were as follows (in thousands):

Fiscal Year	Annual OPEB Cost		Percentage of Annual OPEB Cost Contributed	Net OPEB Obligation
2015	\$ 70,510	\$41,802	59.3%	\$502,559
2014	69,740	41,649	59.7	473,851
2013	78,158	38,919	49.8	445,760

Interest on the net OPEB obligation was \$18.9 million while the net OPEB obligation increased \$28.7 million.

Funded Status and Funding Progress

The funded status of the plan as of January 1, 2013 (most recent actuarial valuation date) was as follows (in thousands):

Actuarial accrued liability (AAL)	\$ 892,844
Actuarial value of plan assets	0
Unfunded actuarial accrued liability (UAAL)	\$ 892,844
Funded ratio (actuarial value of plan assets/AAL)	0.0%
Covered payroll (active plan members)	\$3,108,942
UAAL as a percentage of covered payroll	28.7%

Effective January 1, 2012, prescription drug coverage for Medicare eligible retirees enrolled in the State group health insurance program is provided by Navitus Health Solutions through a selffunded, Medicare Part D Employer Group Waiver Plan (EGWP). A Medicare "Wrap" product is also included to provide full coverage to members, as required by uniform benefits, when they reach the Medicare coverage gap, also known as the "donut hole".

As result of the implementation of the EGWP + Wrap, the State no longer receives the Retiree Drug Subsidy; therefore, there is no liability for the State associated with their Medicare retirees.

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Amounts determined regarding the funded status of the plan and the annual required contributions of the employer are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future.

Actuarial Methods and Assumptions

Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. The actuarial methods and assumptions used include techniques that are designed to reduce short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

In the January 1, 2013 actuarial valuation, the entry age normal actuarial cost method was used. Actuarial assumptions included a discount rate of 4.0 percent, determined using an underlying assumption of 3.0 percent for inflation plus 1.0 percent for high quality investments with durations of one year or less, and a 3.2 percent assumed annual payroll growth. The projected annual healthcare cost trend rate is (1.64) percent initially, adjusted by increments to an ultimate rate of 5.0 percent. Other assumptions used, such as mortality, disability and retirement rates for active members, are consistent with an actuarial valuation on the Wisconsin Retirement Plan dated December 31, 2012. In addition, a 30 year, level percent of pay, closed amortization period was used for the initial UAAL, while a 15 year, level percent of pay, closed amortization period was used for any future gains and losses.

Currently, the health insurance plan is not funded by assets held in a separate trust. The discount rate (discussed above) was based on the State's general assets not earmarked for certain uses, such as building funds. The State's general assets are held in short-term fixed income investments. Therefore, the discount rate reflects that type of investment policy.

A Schedule of Funding Progress, presented as required supplementary information following the notes to the financial statements, is designed to present multiyear trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liability for benefits.

NOTE 17. OTHER POSTEMPLOYMENT BENEFIT (OPEB) PLANS

The State of Wisconsin, Department of Employee Trust Funds (DETF), administers three postemployment benefit plans other than pension plans – the State Retiree Health Insurance Fund, the Duty Disability Fund, and the Retiree Life Insurance Fund.

Plan Descriptions

State Retiree Health Insurance Fund

The State *Retiree Health Insurance Fund* is a multiple-employer defined benefit OPEB plan offering group health insurance. Disclosures relating to the plan are provided in Note 16 – *Postemployment Benefits of the State Other Than Pensions* – *Health Insurance Program*.

Duty Disability Fund

The *Duty Disability Fund* is a cost-sharing multiple-employer defined benefit OPEB plan. The plan offers special disability insurance for state and local participants in protective occupations. The plan is self-insured, and risk is shared between the State and local government employers in the plan. The plan is administered under Wis. Stat. Section 40.65. The plan is reported as a pension and other employee benefit trust fund.

Contributions are actuarially determined in accordance with Wis. Stats. Section 40.05 (2)(ar). All contributions are employer paid based on a graduated, experienced-rated formula. During Calendar Year 2014 contribution rates ranged from 0.21 percent to 6.56 percent of covered payroll based on employer experience.

Eligibility for program benefits is based upon whether a dutyrelated injury or disease is likely to be permanent, which causes a protective occupation participant to retire, accept reduced pay or light duty assignment, or in some cases, that impairs promotional opportunities. Benefits approximate 80 percent of salary (75 percent if partially disabled and not a State Employee), less certain offsets such as; social security, unemployment compensation, worker's compensation and other retirement benefits. Survivor benefits are also offset by certain benefits based on program requirements.

Retiree Life Insurance Fund

The *Retiree Life Insurance Fund* is a cost-sharing multipleemployer defined benefit OPEB plan. The plan provides postemployment life insurance coverage to all eligible employees. The plan is administered under Wis. Stats. Section 40.70. The plan is reported as a pension and other employee benefit trust fund. Generally, members may enroll during a 30-day enrollment period once they satisfy a six-month waiting period. They may enroll after the initial 30-day enrollment period with evidence of insurability. Members under evidence of insurability enrollment must enroll in group life insurance coverage before age 55 to be eligible for Basic or Supplemental coverage.

Employers are required to pay the following contributions for active members to provide them with basic coverage after age 65. There are no employer contributions for pre-65 annuitant coverage. All contributions are actuarially determined.

	State	Local
50 percent post retirement	28 percent of	40 percent of
coverage	the employee	employee
	premium	premium
25 percent post retirement	N/A	20 percent of
coverage		employee
		premium

At retirement, the member must have active group life insurance coverage and satisfy one of the following:

- Wisconsin Retirement System (WRS) coverage prior to January 1, 1989, or
- At least one month of group life insurance coverage in each of five calendar years after 1989 and one of the following:
- Eligible for an immediate WRS benefit, or
- At least 20 years from their WRS creditable service as of January 1, 1990, plus their years of group life insurance coverage after 1989, or
- At least 20 years on the payroll of their last employer.

In addition, terminating members and retirees must continue to pay the employee premiums until age 65 (age 70 if active).

After retirement, basic coverage is continued for life in amounts for the insurance in force before retirement. Additional coverage may be continued until age 65 at 100 percent of the amount of the insurance in force before retirement at the employee's expense, and spouse and dependent coverage benefits is terminated.

Summary of Significant Accounting Policies

Basis of Accounting

The OPEB plans are reported in accordance with GASB Statement No. 43, *Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans*, and accounted for using the flow of economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded at the time liabilities are incurred.

Method Used to Value Investments

Duty Disability Fund

Investments for the *Duty Disability Fund* are invested in the Core Retirement Investment Trust, which is managed by the State of Wisconsin Investment Board (SWIB). These investments are valued at fair value. Generally, fair value information represents actual bid prices or the quoted yield equivalent at the end of the year for securities of comparable maturity, quality, and type, as obtained from one or more major investment brokers. If quoted market prices are not available, a variety of third-party pricing methods are used, including appraisals, certifications, pricing models, and other methods deemed acceptable by industry standards.

Retiree Life Insurance Fund

Investments for the *Retiree Life Insurance Fund* are held with the insurance carrier (the Company). The Retiree Life Insurance Fund's investment is a share in the investment pool.

Fixed maturity securities, which may be sold prior to maturity, including fixed maturities on loan, are classified as available-forsale and are carried at fair value. Premiums and discounts are amortized or accreted over the estimated lives of the securities based on the interest yield method.

The Company uses book value as cost for applying the retrospective adjustment method to loan-backed fixed maturity securities purchased. Prepayment assumptions for single class and multi-class mortgage-backed securities were obtained from broker/dealer survey values or internal estimates.

Marketable equity securities are classified as available-for-sale and are carried at fair value. Mutual funds and exchange traded fund investments in select asset classes that are sub-advised are carried at the fair value of the underlying net position of the funds.

Available-for-sale securities are stated at fair value.

Mortgage loans are carried at amortized cost less any valuation allowances. Premiums and discounts are amortized or accreted

over the terms of the mortgage loans based on the effective interest yield method. Impairments are determined by specific identification. A mortgage loan is considered impaired if it is probable that amounts due for principal and interest will not be collected in accordance with the contractual terms. Impaired mortgage loans are valued at the present value of expected future cash flows discounted at the loan's effective interest rate, or the fair value of the underlying collateral, if the loan is collateral dependent.

Private equity investments in limited partnerships are carried at the amount invested, adjusted to recognize the Company's ownership share of the earnings or losses of the investee after the date of the acquisition, adjusted for any distributions received (equity method accounting).

Investments in partnerships, which represent minority interests owned in certain general agencies, are carried at the amount invested, adjusted to recognize the Company's ownership share of the earnings or losses of the investee after acquisition adjusted for any distributions received (equity method accounting).

Fair values of fixed maturity securities are based on quoted market prices where available. Fair values of marketable equity securities are based on quoted market prices. Fair values of private equity investments are obtained from the financial statement valuations of the underlying fund or independent broker bids. For fixed maturity securities not based on quoted market prices, generally private placement securities, securities that do not trade regularly, and embedded derivatives, an internally developed pricing model using a commercial software application is most often used. The internally developed pricing model is developed by obtaining spreads versus the U.S. Treasury yield for corporate securities with varying weighted average lives and bond ratings.

Real estate is carried at cost less accumulated depreciation and an allowance for estimated losses.

The Company's derivative instrument holdings are carried at fair value. All derivatives are recorded as non-hedge transactions. Derivative instrument fair values are based on quoted market prices or dealer quotes. If a quoted market price is not available, fair value is estimated using current market assumptions and modeling techniques, which are then compared with quotes from counterparties.

For mortgage-backed securities of high credit quality, excluding interest-only securities, the Company recognizes income using a constant effective yield method based on prepayment assumptions obtained from an outside service provider or upon analyst review of the underlying collateral and the estimated economic life of the securities. For interest-only securities and mortgage-backed securities not of high credit quality, the Company recognizes the excess of all cash flows, including estimated prepayments, attributable to the security estimated at the acquisition date over the initial investment using the effective yield method with adjustments made as a result of subsequent cash flow information recorded prospectively. If the fair value of the security has declined below its carrying amount, the Company will write the security down to fair value if the decline is deemed other-than-temporary.

Policy loans are carried at the unpaid principal balance.

Cash and cash equivalents are carried at cost, which approximates fair value. The Company considers all money market funds and commercial paper with original maturity dates of less than three months to be cash equivalents.

Finance receivables that management has the intent and ability to hold for the foreseeable future or until maturity or payoffs are reported at their outstanding unpaid principal balances reduced by any charge-offs.

The Company holds "To-Be-Announced" (TBA) Government National Mortgage Association forward contracts that require the Company to take delivery of a mortgage-backed security at a settlement date in the future. Most of the TBAs are settled at the first available period allowed under the contract. However, the deliveries of some of the Company's TBA securities happen at a later date, thus extending the forward contract date. These securities are reported at fair value as derivative instruments with the changes in fair value reported in net realized investment gains and losses on the consolidated statements of operations.

Required Supplementary Information

Required Supplementary Information about the OPEB plans is presented in the Department of Employee Trust Funds audited financial statements. The December 31, 2013 financial report is available at <u>doa.wi.gov/capitalfinance</u> and on request from:

The Department of Employee Trust Funds 801 West Badger Road P.O. Box 7931 Madison, Wisconsin 53707-7931

The December 31, 2014 financial report will be available at a later date.

NOTE 16. POSTEMPLOYMENT BENEFITS – STATE HEALTH INSURANCE PROGRAM

Effective Fiscal Year 2008, the State implemented the Governmental Accounting Standards Board (GASB) Statement No. 45, Accounting and Financial Reporting by Employers for Postemployment Benefits Other Than Pensions. This Statement establishes standards for the measurement, recognition, and display of other postemployment benefit expense/expenditures and related liabilities (assets), note disclosures, and, if applicable, required supplementary information in financial reports of state and local governmental employers.

Plan Description

The State's Health Insurance Program, a cost-sharing multiple employer, defined benefit plan, is an employer-sponsored program (not administered as a trust) offering group medical coverage to eligible employees and retirees of State and participating local government employers. Created under Chapter 40, of the Wisconsin Statutes, the State Department of Employee Trust Funds and the Group Insurance Board have program administration and oversight responsibilities under Wis. Stat. Sections 15.165(2) and 40.03(6). As of January 2013 (most recent actuarial valuation date), there were 55,197 active, and 8,151 retirees and beneficiaries participating in the plan.

Under this plan, retired employees of the State are allowed to pay the same healthcare premium as active employees, creating an implicit rate subsidy for retirees. This implicit rate subsidy, which is calculated to cover pre-age 65 retirees (since at age 65 retirees are required to enroll in Medicare when eligible), is treated as an other postemployment benefit (OPEB).

The Department of Employee Trust Funds issues a publicly available financial report. That report is available at <u>doa.wi.gov/</u> <u>capitalfinance</u> or may be obtained upon request from:

The Department of Employee Trust Funds 801 West Badger Road P.O. Box 7931 Madison, Wisconsin 53707-7931

Funding Policy

The health insurance plan is currently funded on a "pay-as-yougo" basis. GASB Statement No. 45 does not require funding of the OPEB expense and the State does not currently intend to prefund the OPEB obligation. Under this plan, retirees contribute premiums directly to the plan either through "out-of-pocket" or from unused accumulated sick leave conversion credits. The value of the sick leave benefit is defined as compensated absences and reported under the provisions of GASB Statement No. 16, *Accounting for Compensated Absences*. Contribution requirements are established and may be amended by the Group Insurance Board. For retirees that participate in the health insurance plan, premiums, for non-Medicare retirees, are based on an effective rate structure for the health care service provider selected. Monthly Rates range from \$602.10 to \$1,392.80 for single coverage and \$1,497.80 to \$3,477.80 for family coverage.

The annual required contribution of the employer (ARC) is an amount actuarially determined in accordance with the parameters of GASB Statement No. 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and amortize any unfunded actuarial liabilities (or funding excess) over a period not to exceed thirty years. At June 30, 2015, the ARC was \$86.2 million while the employer contributions were \$41.8 million, and the ARC adjustment, with interest, was \$34.6 million.

Annual OPEB Cost

The State's annual OPEB cost, the percentage of annual OPEB costs contributed to the plan, and the net OPEB obligation were as follows (in thousands):

Fiscal Year	Annual OPEB Cost		Percentage of Annual OPEB Cost Contributed	Net OPEB Obligation
2015	\$ 70,510	\$41,802	59.3%	\$502,559
2014	69,740	41,649	59.7	473,851
2013	78,158	38,919	49.8	445,760

Interest on the net OPEB obligation was \$18.9 million while the net OPEB obligation increased \$28.7 million.

Funded Status and Funding Progress

The funded status of the plan as of January 1, 2013 (most recent actuarial valuation date) was as follows (in thousands):

Actuarial accrued liability (AAL)	\$ 892,844
Actuarial value of plan assets	0
Unfunded actuarial accrued liability (UAAL)	\$ 892,844
Funded ratio (actuarial value of plan assets/AAL)	0.0%
Covered payroll (active plan members)	\$3,108,942
UAAL as a percentage of covered payroll	28.7%

Effective January 1, 2012, prescription drug coverage for Medicare eligible retirees enrolled in the State group health insurance program is provided by Navitus Health Solutions through a selffunded, Medicare Part D Employer Group Waiver Plan (EGWP). A Medicare "Wrap" product is also included to provide full coverage to members, as required by uniform benefits, when they reach the Medicare coverage gap, also known as the "donut hole".

As result of the implementation of the EGWP + Wrap, the State no longer receives the Retiree Drug Subsidy; therefore, there is no liability for the State associated with their Medicare retirees.

Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts and assumptions about the probability of occurrence of events far into the future. Examples include assumptions about future employment, mortality, and the healthcare cost trend. Amounts determined regarding the funded status of the plan and the annual required contributions of the employer are subject to continual revision as actual results are compared with past expectations and new estimates are made about the future.

Actuarial Methods and Assumptions

Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. The actuarial methods and assumptions used include techniques that are designed to reduce short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

In the January 1, 2013 actuarial valuation, the entry age normal actuarial cost method was used. Actuarial assumptions included a discount rate of 4.0 percent, determined using an underlying assumption of 3.0 percent for inflation plus 1.0 percent for high quality investments with durations of one year or less, and a 3.2 percent assumed annual payroll growth. The projected annual healthcare cost trend rate is (1.64) percent initially, adjusted by increments to an ultimate rate of 5.0 percent. Other assumptions used, such as mortality, disability and retirement rates for active members, are consistent with an actuarial valuation on the Wisconsin Retirement Plan dated December 31, 2012. In addition, a 30 year, level percent of pay, closed amortization period was used for the initial UAAL, while a 15 year, level percent of pay, closed amortization period was used for any future gains and losses.

Currently, the health insurance plan is not funded by assets held in a separate trust. The discount rate (discussed above) was based on the State's general assets not earmarked for certain uses, such as building funds. The State's general assets are held in short-term fixed income investments. Therefore, the discount rate reflects that type of investment policy.

A Schedule of Funding Progress, presented as required supplementary information following the notes to the financial statements, is designed to present multiyear trend information about whether the actuarial value of plan assets is increasing or decreasing over time relative to the actuarial accrued liability for benefits.

NOTE 19. SELF-INSURANCE

It is the general policy of the State not to purchase commercial insurance for the risks of losses to which it is exposed. Instead, the State believes it is more economical to manage its risks internally and set aside assets for claim settlement in its internal service fund, the Risk Management Fund. The fund services most claims for risk of loss to which the State is exposed, including damage to State owned property, liability for property damages and injuries to third parties, and worker's compensation. All funds and agencies of the State participate in the Risk Management Fund.

State Property Damage

Property damages to State-owned properties are covered by the State's self-funded property program up to \$3.0 million per occurrence and \$5.0 million annual aggregate. When claims, which exceed \$100,000 per occurrence, total \$5.0 million, the State's private insurance becomes available. Losses to property occurring after the threshold are first subject to a \$100,000 deductible. The amount of loss in excess of \$100,000 is covered by the State's private insurance company. During Fiscal Year 2015, the excess insurance limits were written to \$300 million.

The liabilities for State property damage are reported when it is probable that a loss has occurred and the amount of that loss can be reasonably estimated. The estimate for future benefits and loss liabilities is based on the reserves on open claims and paid claims. Losses incurred but not reported are expected to be immaterial. Claims incurred but not paid as of June 30, 2015 are estimated to total \$12.3 million.

Property Damages and Bodily Injuries to Third Parties

The State is self-funded for third party liability to a level of \$4.0 million per occurrence and purchases insurance in excess of this self-funded retention. The policy limit during Fiscal Year 2015 was \$49.0 million.

The liabilities for property damages and injuries to third parties are reported when it is probable that a loss has occurred and the amount of that loss can be reasonably estimated. The estimate for future benefits and loss liabilities for the prior fiscal year was the reserves on open claims. The estimate for future benefits and loss liabilities is calculated by an actuary based on the reserves on open claims and prior experience. No liability is reported for environmental impairment liability claims either incurred or incurred but not reported because existing case law makes it unlikely the State would be held liable for material amounts. Because actual claims liabilities depend upon complex factors such as inflation, changes in legal doctrines, and damage awards, the process used in computing claims liability does not necessarily result in an exact amount. Immaterial nonincremental claims adjustment expenses are not included as part of the liability. Claims incurred but not paid as of June 30, 2015 are estimated to total \$20.9 million.

Worker's Compensation

The Worker's Compensation Program was created by Wisconsin Statutes Chapter 102 to provide benefits to workers injured on the job. All employees of the State are included in the program. An injury is covered under worker's compensation if it is caused by an accident that arose out of and in the course of employment.

The responsibility for claiming compensation is on the employee. A claim must be filed with the program within two years from the date of injury; otherwise the claim is not allowable.

The worker's compensation liability has been determined by an actuary using paid claims and current claims reserves. Liabilities include an amount for claims that have been incurred but not reported. Because actual claims liabilities are affected by external factors, the process used in computing claims liabilities does not necessarily result in an exact amount. Claims incurred but not paid as of June 30, 2015 are estimated to total \$80.3 million.

Changes in the balances of claims liability for the Risk Management Fund during the current and prior fiscal years are as follows (in thousands):

	2015	2014
Beginning of fiscal year liability	\$ 105,036	\$ 99,567
Current year claims and changes in estimates	39,140	67,601
Claim payments	(30,796) 113,380	(27,502) 139,666
Excess insurance reimbursable	(6,340)	(34,630)
Balance at fiscal year-end	\$ 107,040	\$ 105,036

Settlements have not exceeded coverages for each of the past three fiscal years.

Annuity Contracts

The Risk Management Fund purchased annuity contracts in various claimants' names to satisfy claim liabilities. The likelihood that the fund will be required to make future payments on those claims is remote and, therefore, the fund is considered to have satisfied its primary liability to the claimants. Accordingly, the annuity contracts are not reported in, and the related liabilities are removed from, the fund's balance sheet. The aggregate outstanding amount of liabilities removed from the financial statements at June 30, 2015 is \$6.1 million.

NOTE 20. INSURANCE FUNDS

A. Local Government Property Insurance Fund

The purpose of the Local Government Property Insurance Fund is to provide property insurance coverage to tax-supported local government units such as counties, towns, villages, cities, school districts and library boards. Property insured includes government buildings, schools, libraries and motor vehicles. Coverage is available on an optional basis. As of June 30, 2015 the Local Government Property Insurance Fund insured 955 local governmental units. The total amount of insurance in force as of June 30, 2015 was \$51.1 billion.

Valuation of Cash Equivalents and Investments - All investments of the Local Government Property Insurance Fund are managed by the State of Wisconsin Investment Board, as discussed in Note 5-B to the financial statements. At June 30, 2015, the fund had \$1.8 million of shares in the State Investment Fund which are considered cash equivalents.

Premium - Unearned premium reported as unearned revenue represents the daily pro rata portion of premium written which is applicable to the unexpired terms of the insurance policies in force. Policies are generally written for annual terms.

Unpaid Loss Liabilities - The Local Government Property Insurance Fund establishes the unpaid loss liability titled future benefits and loss liabilities on the financial statements based on estimates of the ultimate cost of losses (including future loss adjustment expenses) that have been reported but not settled, and of losses that have been incurred but not reported. Estimated amounts of excess-of-loss insurance recoverable on unpaid losses are deducted from the liability for unpaid losses. Loss liabilities are recomputed periodically to produce current estimates that reflect recent settlements, loss frequency, and other economic factors. Adjustments to future benefits and loss liabilities are charged or credited to expense in the periods in which they are made. *Policy Acquisition Costs* - Since the Local Government Property Insurance Fund has no marketing staff and incurs no sales commissions, acquisition costs are minimal and charged to operations as incurred.

Excess-of-Loss Insurance Coverage - The Local Government Property Insurance Fund purchases excess-of-loss insurance coverage, the operation of which is analogous to "reinsurance," to reduce its exposure to large losses on all types of insured events. Excess-of-loss insurance permits recovery of a portion of losses from the excess-of-loss insurers, although it does not discharge the primary liability of the fund as direct insurer of the risks reinsured. The fund does not report excess-of-loss insured risks as liabilities unless it is probable that those risks will not be covered by excess-of-loss insurers. As of June 30, 2015 the fund had \$800.0 million of per occurrence excess of loss reinsurance in force with a \$1.8 million combined single limit retention for each occurrence, and an annual aggregate reinsurance contract with a \$22.0 million annual aggregate retention plus a per claim retention of \$5 thousand once the aggregate is met, as respects occurrences for the term of the agreement. Premiums ceded to excess-of-loss insurers, which is netted against premium revenue (charges for goods and services in the financial statements), amounted to \$9.7 million during the fiscal year. Excess-of-loss and adjusting expense recoveries earned would typically reduce claims paid (benefit expense on the financial statements). During the fiscal year the losses recovered through excess-of-loss insurance was \$18.4 million.

Unpaid Loss Liabilities

As discussed above, the Local Government Property Insurance Fund establishes a liability for both reported and unreported insured events, which includes estimates of both future payments of losses and related loss expenses. The following represents changes in those aggregate liabilities for the fund during the past two fiscal years (in thousands):

- - - -

	2015	2014
Unpaid loss liabilities		
at beginning of the year	\$30,364	\$10,606
Less: Excess-of-loss insurance		
recoverable	16,920	1,641

Trend Information

Historical trend information showing revenue and claims development information is presented in the Office of the Commissioner of Insurance June 30, 2015 financial statements. Copies of these statements may be requested from:

Office of the Commissioner of Insurance 125 South Webster Street Madison, Wisconsin 53703

B. State Life Insurance Fund

The State Life Insurance Fund was created under Chapter 607, Wisconsin Statutes, to offer life insurance to residents of Wisconsin in a manner similar to private insurers. This fund functions much like a mutual life insurance company and is subject to the same regulatory requirements as any life insurance company licensed to operate in Wisconsin.

Premiums are reported as earned when due. Benefits and expenses are associated with earned premiums so as to result in recognition of profits over the life of the contracts. This association is accomplished by means of the provision for liabilities for future benefits and the amortization of acquisition costs.

The State Life Insurance Fund does not pay commissions nor does it incur agent expenses.

Future benefits and loss liabilities have been computed by the net level premium method based upon estimated future investment yield and mortality. The composition of liabilities and the more material assumptions pertinent thereto are presented below (in thousands):

lssue Year	Ir	dinary Life Isurance n Force	Amount of Policy Liability		
1913-1966	\$	7,541		5,988	
1967-1976	Ψ	26,901	1	6,074	
1977-1985		66,743	2	24,733	
1986-1994		46,761		9,688	
1995-2012		44,735		7,200	
2013+		2,599		173	
	\$	195,280	\$ 6	3,856

2013+	3.5	2001 CSO, ALB, Aggregate					

* Age Next Birthday

All of the State Life Insurance Fund's life insurance in force is participating. This Fund is required by statute to maintain surplus at a level between 7 percent and 10 percent of statutory admitted assets as far as practicably possible. All excess surplus is to be returned to the policyholders in the form of policyholder dividends. Policyholder dividends are declared each year in order to achieve the required level of surplus.

The statutory assets at December 31, 2014 were \$100.2 million and statutory capital and surplus was \$9.9 million. Fund equity at June 30, 2015 was \$26.6 million.

C. Injured Patients and Families Compensation Fund

The Injured Patients and Families Compensation Fund was created in 1975 for the purpose of providing excess medical malpractice coverage for claims exceeding the legal primary insurance limits prescribed in Wis. Stat. Section 655.23(4), or the maximum liability limit for which the health care provided is insured, whichever limit is greater. Management of the Fund is vested with a 13-member Board of Governors, which is chaired by the Commissioner of Insurance. Most health care providers permanently practicing or operating in the State of Wisconsin are required to pay Injured Patients and Families Compensation Fund assessment fees. Risk of loss is retained by the Fund.

The Future Benefits and Loss Liability account includes individual case estimates for reported losses and estimates for incurred but not reported losses based upon the projected ultimate losses recommended by a consulting actuary. The liability for incurred but not reported losses as of June 30, 2015, is determined by deducting individual case estimates of the liability for reported losses and net losses paid from inception of the Fund, and adding a risk margin to the projected ultimate loss liabilities, as follows (in thousands):

Projected ultimate loss liability	\$ 1,217,603
Less: Net loss paid from inception	(861,596)
Less: Liability for reported losses	(4,001)
Risk Margin	 89,002
Liability for incurred but not reported losses	\$ 441,008

The Future Benefits and Loss Liability account also includes an estimate of the loss adjustment expense (LAE). Using the data available through September 30 of the fiscal year, the actuary estimates the liability for LAE as 18 percent of the estimated unpaid losses as of June 30, 2015. The percentage used in the financial statements will differ slightly, since the actuary's estimate will be adjusted to reflect actual LAE payments. Specifically, the loss adjustment expenses paid from the inception of the Fund through June 30, 2015, are deducted from the projected ultimate LAE to determine the liability for LAE as June 30, 2015 as follows (in thousands):

Projected ultimate LAE liability Less: LAE paid from inception	\$ 156,060 (91,729)
Risk Margin	 16,084
Liability for LAE	\$ 80,415

In accordance with Section Ins. 17.27(3), Wis. Adm. Code, the liability for reported losses, liability for incurred but not reported losses, and liability for loss adjustment expense are maintained on a present value basis with the difference from full value being reported as a contra account to these estimated loss liabilities. These estimated loss liabilities are discounted only to the extent that they are matched by cash and invested assets. Using the actuarially determined discount factor of 0.8482, which is based on an investment yield assumption of 4.5 percent approved by the Board of Governors, the discounted loss liability would be as follows as of June 30, 2015 (in thousands):

Estimated liability for incurred but not	
reported losses	\$ 441,008
Estimated liability for reported losses	4,001
Estimated liability for loss adjustment expense	80,415
Total estimated loss liabilities	525,424
Less: Amount representing interest	(79,741)
Discounted loss liabilities	\$ 445,683

Included in the above estimates of loss liabilities, both undiscounted and discounted, is a 25 percent risk margin, which was recommended by the actuary and approved by the Board of Governors.

The Office of the Commissioner of Insurance contracts for an actuarial audit of the Fund. This audit includes a review by another actuary of the reasonableness of the actuarial methodology and assumptions used in developing estimates of the Fund's liabilities. The actuarial audits have concluded that the Fund's loss liability estimates are reasonable, although conservative. The Fund's contracted actuary has considered the recommendations made in the actuarial audits and appropriately incorporated any necessary changes based on those recommendations into the actuarial methodology and assumptions used to calculate the Fiscal Year 2015 liabilities estimate.

In addition to discounted loss liabilities, the Future Benefit and Loss Liabilities account also includes a future medical expenses liability and a contributions being held liability. The future medical expenses liability consists of those accounts required by Wis. Stat. Sec. 655.015 to be established if a settlement or judgment provides for future medical expense payments in excess of \$100,000. The accounts are managed by the Fund and earn a proportionate share of the Fund's interest. Any account balance remaining when a claimant dies reverts back to the Fund. The contributions being held liability consists of nonrefundable payments, generally in amounts equal to the primary coverage in effect for related claims, that primary insurers have voluntarily presented to the Fund and which are negotiable with the Fund in exchange for a release of payment for any future defense costs that may be incurred on the claim. This amount is held as a liability to the Fund until a payment on the claim is made.

The breakdown of Future Benefit and Loss Liabilities, including the portions that are estimated as current and noncurrent as of June 30, 2015 (in thousands), is as follows:

Discounted loss liabilities	\$ 445,683
Future medical expense liability	38,356
Contributions being held liability	2,000
Total estimated loss liabilities	486,039
Current portion	(64,042)
Noncurrent portion	\$ 421,997

The uncertainties inherent in projecting the frequency and severity of large claims because of the Injured Patients and Families Compensation Fund's unlimited liability coverage and extended reporting and settlement periods makes it likely that the amounts ultimately paid will differ from the recorded estimated loss liabilities. These differences cannot be quantified.

The estimated amounts included in the balance of Future Benefits and Loss Liabilities are continually reviewed and adjusted as the Fund gains additional experience. Such adjustments are reflected in current operations. Because of the changes in these estimates, the benefit expense for the fiscal year is not necessarily indicative of the loss experience for the year.

The following is a reconciliation of the change in the balance of Future Benefits and Loss Liabilities during Fiscal Year 2015 (in thousands):

Liability at the beginning of the year	\$ 596,456
Incurred claims and related expenses for the	
current year and the change in estimated	
amounts for claims incurred in prior years	(89,360)
Less: current year payments attributable to	
claims incurred in current and prior years	 (21,057)
Liability at the end of the year	\$ 486,039

NOTE 21. DEFERRED OUTFLOWS OF RESOURCES AND DEFERRED INFLOWS OF RESOURCES

NOTE 22. SEGMENT INFORMATION AND CONDENSED FINANCIAL DATA

Primary Government

The State issues revenue bonds to finance the Leveraged Loan Program, which is accounted for as part of the Environmental Improvement Fund. Investors in those bonds rely solely on the revenue generated within the Leveraged Loan Program. Assets of this program are used primarily for loans for Wisconsin municipal waste water projects. Condensed financial statement information of the Leveraged Loan Program as of and for the year ended June 30, 2015 is presented below (in thousands):

NOTE 25. LITIGATION, CONTINGENCIES AND COMMITMENTS

A. Litigation and Contingencies

The State is a participant in various legal proceedings pertaining to matters incidental to the performance of routine governmental operations.

The State accrues liabilities related to legal proceedings, if a loss is probable and reasonably estimable. Such losses, totaling \$18.9 million on June 30, 2015 reported in the governmental activities, are discussed below:

The Work Injury Supplemental Benefit Fund, administered by the Department of Workforce Development, provides compensatory payments to survivors of fatally injured employees or disabled employees with work-related injuries. The liability for annuities to be paid totaled \$.6 million at June 30, 2015.

The U.S. Department of Housing and Urban Development (HUD) provided federal funding to the State through the Community Development Block Grant (CDBG) program. The funds were subgranted to units of general local government by the former Department of Commerce, the State agency responsible for administering CDBG prior to Fiscal Year 2012. Of the amounts sub-granted, \$16.2 million were determined to not meet program The State accepted HUD's finding of requirements. noncompliance and settled the matter as agreed upon with HUD. This consisted of a \$1.0 million cash payment to HUD and a \$7.6 million deposit into a local account in September 2015. A liability for this \$8.6 million is reported at June 30, 2015 in the General Fund. In addition, the HUD entitlement grant accepted and received by the State in August 2015, was voluntarily reduced by \$7.6 million.

Talgo, Inc. (Talgo) and the State entered into two contracts. The first contract was for the construction and purchase of high speed passenger rail trains. The second contract was to maintain the trains and contained a non-appropriation clause that permitted either party to terminate the agreement if the Legislature did not appropriate funds necessary to perform the contract. The State decided to discontinue the project. In November 2012, Talgo filed a lawsuit claiming the State defaulted on its legal obligations. The circuit court denied the State's motion to dismiss the case.

In August 2015 the State and Talgo settled the case and resolved all claims related to the two contracts. Under the settlement agreement, Talgo kept the trains and received a \$9.75 million payment from the State to close out the contracts. Talgo will attempt to sell the trains. If the trains are sold, the State can collect up to 30 percent of the sale price up to \$9.75 million. As a result, dependent on the selling price, the State could recover the entire \$9.75 million payment. A liability of \$9.75 million is reported at June 30, 2015 in the Transportation Fund.

Other Claims, Judgments, and Contingencies

The State is also named as a party in other legal proceedings where the ultimate disposition and consequence are not presently determinable. The potential liability amount relating to an unfavorable outcome for certain of these proceedings could not be reasonably determined at this time. However, the ultimate dispositions and consequences of any single legal proceeding or all legal proceedings collectively should not have a material adverse effect on the State's financial position.

Notice of Transferee Liability – In September 2008, the Internal Revenue Service (IRS) provided the State of Wisconsin Investment Board (SWIB) a Notice of Transferee Liability. This claim seeks taxes, penalties and interest relating to the sale of Shockley Communications Corporation (SCC) stock in 2001.

The IRS asserts that the shareholders' sale of SCC stock in 2001 should have been characterized as a sale of assets by SCC, on which SCC should have paid income taxes. The IRS asserts that the former SCC shareholders, including SWIB, would be liable for those taxes, plus penalties and interest. The SWIB's liability, as a putative transferee of SCC assets, would be limited to \$46.9 million including taxes, interest and potential penalties.

The SWIB believes that the loss, if any, resulting from the claim being upheld will not have a material impact on net investment position or net income in future years. Due to uncertainty in predicting an outcome, a liability has not been recorded.

B. Commitments

Primary Government

As of June 30, 2015, encumbrances of the General Fund totaled \$435.2 million, encumbrances of the Transportation Fund totaled \$1.3 billion, and encumbrances of other non-major governmental funds totaled \$534.0 million. Obligations at June 30, 2015 representing multi-year, long-term commitments included (in thousands):

Transportation Fund	\$ 407,175
Capital Improvement Fund – WisDOT Harbors,	89,227
Rails and Highway Programs	
Transportation Revenue Bonds Capital	
Projects Fund	471.6
General Fund – Housing Programs	17,202

The Environmental Improvement Fund (the Fund) was established to administer the Clean Water Fund Loan Program. Loans are made to local units of government for wastewater treatment projects for terms of up to 20 years. These loans are made at a number of prescribed interest rates based on environmental priority. The loans contractually are revenue obligations or general obligations of the local governmental unit. Additionally, various statutory provisions exist which provide further security for payment. The Fund has made financial assistance commitments of \$125.0 million as of June 30, 2015. These loan commitments are expected to be met through proceeds from issuance of revenue obligations and additional federal grants.

In addition, the revenue obligation bonds of the Leveraged Loan Program in the Fund are collateralized by a security interest in all the assets of the Leveraged Loan Program. Neither the full faith and credit nor the taxing power of the State is pledged for the payment of the Fund's revenue obligation bonds. However, as the loans granted to local units of government are at an interest rate less than the revenue bond rate, the State is obligated by the Fund's General Resolution to fund, at the time each loan is made, a reserve which subsidizes the Leveraged Loan Program in an amount which offsets this interest disparity.

The *Injured Patients and Families Compensation Fund* may be required to purchase an annuity as a result of a claim settlement. Under specific annuity arrangements, the Fund may have ultimate responsibility for annuity payments if the annuity company defaults on annuity payments. One of the Fund's annuity providers defaulted on \$111 thousand in annuity payments through June 30, 2015, which the Fund subsequently paid. The annuity provider is currently making the majority of these annuity payments to cover defaulted payments. The Fund has received reimbursement for these payments, including interest

of \$93 thousand through June 30, 2015. It is unclear when the annuity provider will be able to make the remaining annuity payments and whether the Fund will be able to recover the remaining annuity payments made on the behalf of the annuity provider. The total estimated replacement value of the Fund's annuities as of June 30, 2015 was \$32.8 million. The replacement value calculation includes only annuities where the Fund remains the owner. Annuities with qualified assignments are no longer included. The Fund reserves the right to pursue collection from State guarantee funds.

State Public Deposit Guarantee - As required by Wis. Stat. Sec. 34.08, the State is to make payments to public depositors for proofs of loss (e.g., loss resulting from a bank failure) up to \$400 thousand per depositor above the amount of federal insurance. This statutory requirement guarantees that the State will make payments in favor of the public depositor that has submitted a proof of loss. Payments would be made in the order in which satisfactory proofs of loss are received by the State's Department of Financial Institutions, until the designated appropriation is exhausted. At June 30, 2015, the appropriation available totaled \$55.1 million. Losses become fixed as of the date of the loss. A public depositor experiencing a loss must assign its interest in the deposit, to the extent of the amount paid, to the Department of Financial Institutions. Any recovery made by the Department of Financial Institutions under the assignment is to be repaid to the appropriation. The possibility of a material loss resulting from payments to and recovery from public depositors is remote.

NOTE 26. SUBSEQUENT EVENTS

Primary Government

Long-term Debt

General Obligation Bonds – In September 2015, the State issued \$387.0 million of 2015 Series C general obligation bonds to be used for the acquisition, construction, development, extension, enlargement or improvement of land, water, property, highways, buildings, equipment or facilities for public purposes. The bonds had an interest rate of 4.0 to 5.0 percent payable semiannually, beginning May 1, 2016. The bonds mature annually beginning May 1, 2017 through May 1, 2036.

In July 2015, the State issued \$133.2 million of 2015 Series 1 clean water revenue refunding bonds to be used for the current and advanced refunding of certain principal of previously issued clean water revenue bonds. The interest rates associated with these bonds were all set at 5.0 percent payable semiannually beginning December 1, 2015. The bonds mature annually beginning June 1, 2017 through June 1, 2028.

Revenue Bonds - In December 2015, the State issued \$225.0 million of 2015 Series A transportation revenue bonds to be used to pay the costs of State transportation facilities and highway projects and to pay costs of issuance. The bonds have fixed interest rates of 3.0 to 5.0 percent payable semiannually beginning in 2017 with a final maturity in 2036.

In December 2015, the State issued \$43.4 million of 2015 Series A Environmental Improvement Fund revenue bonds to be used to make loans under the Clean Water Fund Program to municipalities, primarily for the construction or improvement of their wastewater treatment facilities. The interest rates associated with these bonds had an interest rate of 3.0 to 5.0 percent payable semiannually beginning in 2016 with final maturity in 2030.

Certificates of Participation

In July 2015, the State issued \$40.0 million of 2015 Series A master lease certificates of participation to be used for the acquisition of tangible property and sometimes, intangible property for various State agencies. The interest rates range from 2.0 to 5.0 percent payable semiannually beginning September 1, 2015. The certificates mature semi-annually beginning September 1, 2015 through March 1, 2023.

* The amounts presented were measured for the calendar year ended that occurred within the fiscal year listed.

GASB standards require the presentation of 10 years of information. Because fiscal year 2015 is the first year for reporting this information, a full 10-year schedule will not be available until fiscal year 2024.

Required Supplementary Information

Infrastructure Assets Reported Using the Modified Approach

The State has adopted the modified approach for reporting infrastructure assets. Under the modified approach, infrastructure assets are not depreciated as long as the State can demonstrate that these assets are properly managed and are being preserved at or above an established condition level. Instead of depreciation, the costs to maintain and preserve infrastructure assets are expensed, while additions and improvements are capitalized. The State owns approximately 11,200 centerline miles of road and 5,200 bridges.

Road Network

Condition assessments are completed on a two-year cycle with the most current results reported for each State road. The State completes the assessment of the Eastern half of the State in one year and the Western half of the State in the next. Numerous measures are used to assess the condition of the State's road network. The State has adopted the International Roughness Index (IRI), as defined by the Federal Highway Administration, as one of its condition measures. IRI is a direct measure of road roughness, with an IRI of 2.69 mm/m (170 inches/mile) or greater being defined as a "poor" ride. Roads with a "poor" IRI assessment may cause negative impacts for the traveling public by decreasing driver comfort and potentially increasing the damage to vehicles and goods. It is the State's policy to ensure no more than 15 percent of its roads receive a "poor" IRI assessment.

Recent condition assessment results are as follows:

Year Ended June 30	Miles of Road	Percent Rated "Poor"	Established Percent	Variance Favorable/ (Unfavorable)
2015	11,200	7.3	15.0	7.7
2014	11,200	8.3	15.0	6.7
2013	11,200	6.2	15.0	8.8
2012	11,200	7.0*	15.0	8.0
2011	11,200	12.0**	15.0	3.0
2010	11,200	9.3**	15.0	5.7
2009	11,200	6.9	15.0	8.1
2008	11,200	6.9	15.0	8.1
2007	11,200	6.4	15.0	8.6
2006	11,200	5.4	15.0	9.6

* The 2012 decrease in the percentage of roads rated poor is due to inclusion of new construction in the scope of condition assessment. Without such inclusion, the percentage of poor roads would have been equivalent to the 2011 level. New construction was included because efficiencies were gained from a new van used to capture condition assessment data, resulting in new construction being included in the assessment closer to the completion date. In prior years, new construction was generally not included in condition assessments until the following year.

** The 2011 and 2010 increase in the percentage of roads rated poor compared to previous years is partially attributable to the new equipment used in assessing the IRI. For 2011, all of the miles were tested using the new equipment. For 2010, approximately half of the miles were tested using the new equipment. DOT officials believe the current data collection methods provide a more accurate view of existing ride quality because of improvements in equipment and methodology.

Each year the State estimates the costs to maintain and preserve the road network at, or above, the established condition level. Actual maintenance/preservation costs compare to estimates as follows:

			Variance
Year	Estimated	Actual	(In millions)
Ended	Costs	Costs	Favorable/
June 30	(In millions)	(In millions)	(Unfavorable)
2015	\$603.4	\$643.3	\$ (39.9)
2014	\$619.4	\$605.9	\$ 13.5
2013	580.9	561.8	19.1
2012	611.0	585.3	25.7
2011	606.7	705.7	(99.0)
2010	660.7	669.1	(8.4)
2009	647.7	624.4	23.3
2008	531.8	537.3	(5.5)
2007	501.8	441.6	60.2
2006	495.7	367.5	128.2

Estimated costs are developed at the beginning of the fiscal year based on projects planned for the current and future years. The types of projects ultimately contracted and incurring costs during the year are often very different. In addition, the State of Wisconsin, Department of Transportation's multi-year contracting process, allowing encumbrances to carry forward, makes a comparison of actual to estimated amounts difficult since expenditures for the current year may have been budgeted and committed to a project in prior years. Estimated costs for 2006 and actual costs for 2006 through 2008 have been restated from amounts reported in prior years due to an error in classification of costs on a capital project as maintenance/preservation costs.

Bridge Network

Condition assessments are completed on a two-year cycle, with more frequent inspections completed if warranted. The most current assessment results are reported for each State bridge, making the overall assessment a blend of measures completed in the current fiscal year and those completed in the prior year.

The structural condition rating is a broad measure of the condition of a bridge. Each bridge is rated using three National Bridge Inventory (NBI) condition codes and two NBI appraisal ratings. The three NBI condition codes are Deck Condition, Superstructure Condition, and Substructure Condition. The two NBI appraisal ratings are Structural Evaluation and Waterway Adequacy. The NBI uses a 10-point scale for condition codes and appraisal ratings. A bridge is considered "structurally deficient" if any condition code is 4 or less, or if either appraisal code is 2 or less.

"Structurally deficient" bridges cause negative impacts for the public by increasing the likelihood that heavy loads will need to be rerouted to less efficient routes, thus increasing logistic costs for State businesses. It is the State's policy to ensure no more than 15 percent of its bridges are "structurally deficient".

Recent condition assessment results are as follows:

Year Ended June 30	Number of Bridges	Percent Structurally Deficient	Established Percent	Variance Favorable/ (Unfavorable)
2015	5,200	3.2	15.0	11.8
2014	5,100	3.3	15.0	11.7
2013	5,100	3.1	15.0	11.9
2012	5,100	3.3	15.0	11.7
2011	5,100	3.6	15.0	11.4
2010	5,000	4.1	15.0	10.9
2009	5,000	3.8	15.0	11.2
2008	4,900	4.5	15.0	10.5
2007	4,900	4.1	15.0	10.9
2006	4,900	4.3	15.0	10.7

Each year, the State estimates the costs to maintain and preserve the bridge network at, or above, the established condition level. Actual maintenance/preservation costs compare to estimates as follows:

Year Ended	Estimated Costs	Actual Costs	Variance (In millions) Favorable/
June 30	(In millions)	(In millions)	(Unfavorable)
2015	\$57.1	\$164.4	\$(107.3)
2014	\$261.2	\$131.0	\$130.2
2013	123.2	115.3	7.9
2012	101.9	61.1	40.8
2011	42.4	64.2	(21.8)
2010	91.7	93.0	(1.3)
2009	55.9	56.9	(1.0)
2008	61.0	46.2	14.8
2007	36.0	46.9	(10.9)
2006	42.4	31.3	11.1

Estimated costs are developed at the beginning of the fiscal year based on projects planned for the current and future years. The types of projects ultimately contracted and incurring costs during the year are often very different. The State of Wisconsin, Department of Transportation's multi-year contracting process, allowing encumbrances to carry forward, makes a comparison of actual to estimated amounts difficult since expenditures for the current year may have been budgeted and committed to a project in prior years. Estimated and actual costs for 2014 have been restated from amounts reported in prior years due to an error in classification costs of on а capital project as maintenance/preservation costs.

Notes To Required Supplementary Information

NOTE 1. BUDGETARY INFORMATION

A. Budgetary – GAAP Reporting Reconciliation

The accompanying Budgetary Comparison Schedule compares the legally adopted budget (more fully described in RSI Note 1-B) with actual data on a budgetary basis. Because accounting principles applied for purposes of developing data on the budgetary basis differ significantly from those used to present financial statements in conformity with generally accepted accounting principles (GAAP), a reconciliation of basis and perspective differences as of June 30, 2015 is presented below (in thousands):

	General Fund	Transportation Fund
Fund balance June 30, 2015 (budgetary basis – budgetary fund structure):		
General Purpose Revenue – fund balance per budgetary basis Annual Fiscal Report		
Undesignated fund balance	\$ 135,555	
Designated fund balance	91,276	
Total General Purpose Revenue fund balance	226,831	
Program Revenue – fund balance per budgetary basis Annual Fiscal Report	1,223,601	
Fund balance June 30, 2015 (budgetary basis – budgetary fund structure)		
as reported on the budgetary comparison schedule	1,450,432	\$(1,137,702)
Reclassifications:		
To eliminate encumbrances reported as expenditures under budgetary reporting (basis difference)	564,687	1,793,596
To include activities of funds such as the Medical Assistance Trust, Hospital Assessment, Critical		
Hospital Assessment, Budget Stabilization, and Permanent Endowment Funds (reported as special		
revenue funds under budgetary reporting) as part of the General Fund (perspective difference)	362,753	
To remove activities reported in another GAAP fund type (perspective differences):		
Enterprise funds (except for the University of Wisconsin System)	(41,279)	
University of Wisconsin System	(1,193,476)	
Internal Service funds	(46,044)	
Fiduciary funds	(4,536)	
Transportation Revenue Bonds capital project fund		(1,424)
Fund balance June 30, 2015 (GAAP fund structure – budgetary basis, excluding encumbrances		
treated as expenditures at year end)	1,092,537	654,470
Adjustments (basis differences):		
To accrue receivables and establish payables for individual income taxes (net)	(712,802)	
To defer revenues for gross receipts public utility taxes	(279,595)	
To adjust revenues and expenditures for tax-related items and other tax credit/aid programs (net)	(440,152)	(856)
To adjust expenditures for the municipal and county shared revenue program	(502,170)	
To adjust expenditures for State property tax credit program	(670,312)	
To accrue unpaid Medicaid payments to providers (net of receivable from federal government)	(250,893)	
To adjust revenues and expenditures for certain major Health Services, and Children and		
Families human services payments to local governments	(144,480)	
To accrue receivable for Medicaid drug rebates (net of payable to federal government)	148,355	
To adjust expenditures/revenues for other Health Services, Workforce Development, and		
Children and Families accruals and deferrals	(105,408)	
To recognize the tobacco settlement revenue receivable	69,016	
To accrue State educational aids payments deferred until the subsequent year	(75,000)	
To adjust expenditures and revenues for State Energy Program and other revolving loan programs	36,017	
To adjust revenues and expenditures for other items (net)	55,478	123,872
Fund balance June 30, 2015 (GAAP fund structure – GAAP basis) as reported on the		

The State's biennial budget is prepared using a modified cash basis of accounting. The final budget is primarily a general purpose revenue and expenditure budget. General purpose revenues consist of general taxes and miscellaneous receipts which are paid into the General Fund, lose their identity, and are then available for appropriation by the Legislature. The remaining revenues consist of program revenues, which are credited by law to an appropriation to finance a specified program or State agency, and segregated revenues which are paid into separate identifiable funds.

While State departments and agencies are required to submit estimates of expected revenues for program revenue and segregated revenue categories, these estimates are not formally incorporated into the adopted budget except for revenue estimates of the Lottery Fund. As a result, legally budgeted revenues for these categories are not available and, consequently, actual amounts are reported in the budget column of the Budgetary Comparison Schedules.

Expenditure budgeting differs for the various types of appropriations. For most appropriations, budgeted expenditures equal the amount from the adopted budget plus any subsequent legislative or administrative revisions. Various supplemental appropriations were approved during the year and have been incorporated into the budget figures.

While State statutes prohibit spending beyond budgetary authority, a provision is made to include the value of accounts receivable, inventories and work in process in identifying available revenues. The State also utilizes nonbudget accounts for which no budget is established but expenditures may be incurred. As a result, actual expenditures may exceed budgeted amounts in certain categories.

The budgetary basis of accounting required by State law differs materially from the basis used to report revenues and expenditures in accordance with GAAP. Other variances arise because the State's biennial budget is developed according to the statutory required fund structure which differs extensively from the fund structure used in the GAAP basis financial statements. This difference is primarily caused by the elimination of the University of Wisconsin System, and various fiduciary, proprietary and other governmental fund activities from the statutory General and Transportation funds. In addition, funds such as the Medical Assistance Trust, Hospital Assessment, Budget Stabilization and Permanent Endowment, special revenue funds under statutory reporting, are included as part of the General Fund under GAAP reporting. As a consequence of these differences, a reconciliation between budgetary basis and GAAP basis is provided in Note 1-A of the notes to the required supplementary information.

The Budgetary Comparison Schedules for the General and the Transportation Fund present both the original and final

appropriated budgets, as well as the actual inflows, outflows, and fund balance on the budgetary basis. The supplementary budget comparison schedule provides this same information (with the exception of the original budget data) for the nonmajor governmental funds with annual budgets. The capital project and debt service funds are excluded from this schedule because no comprehensive budget is approved for these funds. One special revenue fund, the Wisconsin Public Broadcasting Foundation, has been excluded from reporting because it is a blended component unit that is neither budgeted nor included under statutory reporting. Of the permanent funds, only the Historical Society Fund and a portion of the Common School and Normal School funds are budgeted.

The State's biennial budget was enacted on June 30, 2013 and published on July 1, 2013. This legislation is recognized by State officials as the original budget and is treated as such on the Budgetary Comparison Schedules.

While the legal level of budgetary control for the reported funds is maintained at the appropriation line as specified by the Legislature in Chapter 20 of the Wisconsin Statutes, this level of detail is impractical for inclusion in the Comprehensive Annual Financial Report. Accordingly, a supplementary report is available upon request which provides budgetary comparisons at the legal level of control.

Appropriation unexpended balances lapse at year-end or forward to the subsequent fiscal year depending on the type of appropriation involved:

- Continuing unexpended balances automatically forward to ensuing years until fully depleted or repealed by subsequent action of the Legislature.
 Annual:
 - General Purpose Revenue unencumbered balances lapse at year end.
 - Program Revenue unexpended cash balances may be forwarded to the next fiscal year.
- *Biennial* unexpended balances or deficits automatically forward to the second year. At the end of the second year all unencumbered general purpose revenue balances lapse.
- Sum sufficient moneys are appropriated and expended in the amounts necessary to accomplish the purpose specified.

Encumbrances may be carried over to the next fiscal year as a revision to the budgetary appropriation with Department of Administration approval. Under budgetary reporting, encumbrances are treated like expenditures and are shown as a reduction of fund balance.

Supplementary Information

Nonmajor Governmental Funds

SPECIAL REVENUE: Special revenue funds account for the proceeds of specific revenue sources that are legally restricted to expenditures for a specified purpose. The State's special revenue funds are described below:

The **Conservation Fund** accounts for the management of the State's fish, wildlife, parks and other natural resources with funds provided from hunting and fishing licenses, recreational fees and forestry taxes.

The **Police and Fire Protection Fund** accounts for the distribution of fees collected by communication providers and retailers for distribution to counties and municipalities as State shared revenue.

The **Utility Public Benefits Fund** accounts for voluntary contributions and public benefits fees collected from customers by utilities to assist in funding low income assistance grants and energy conservation and efficiency grants.

The **Petroleum Inspection Fund** accounts for revenues received from inspection fees on petroleum products shipped into Wisconsin and proceeds received from revenue bonds. These resources are used for petroleum inspection programs, environmental cleanup awards, clean air and water administration and other environmental programs in the State.

The **Wisconsin Public Broadcasting Foundation Fund** accounts for financial resources generated to support the activities of the Educational Communications Board. The primary revenue sources of the fund are from gifts, grants and contributions.

The **Economic Development Fund** accounts for economic development surcharges collected from Wisconsin businesses for the privilege of doing business in the state. Resources of the fund are provided to the Wisconsin Economic Development Corporation.

The **Other Environmental Special Revenue Funds**, in conjunction with the Conservation Fund, account for resources used to provide for the preservation of the State's parks, forests and environment, and includes the following:

• The Heritage State Parks and Forests Fund accounts for the funding for operations and maintenance of State parks, southern State forests, and recreation areas either by making partial matching grants to "friends groups" or by accepting expenditure transfers from park and forest programs in the Conservation Fund.

- The Waste Management Fund accounts for the closure and long-term care of approved landfills from fees imposed on landfill operators.
- The Environmental Fund accounts for the development and enforcement of groundwater standards, as well as assistance in the emergency response, investigation and clean up of contamination. This assistance is funded by fees on activities or substances which may contaminate groundwater and fees for solid waste tipping, pesticide licenses and oil inspections.
- The Dry Cleaner Environmental Response Fund accounts for the financial assistance for the remediation of environmental contamination caused by the spillage of dry cleaning solvents. Revenues used to fund this program are dry cleaning facility license and solvent fees.
- The Recycling and Renewable Energy Fund accounted for the moneys from the recycling surcharge tax and recycling fees, used to reduce the amount of solid waste disposed of in landfills and incinerators. 2011 Wisconsin Act 32 ended the program and most of the remaining resources were provided to the Economic Development Fund.

The **Other Special Revenue Funds** account for resources that must be used for specific purposes and include the following:

- The Unemployment Interest Payment Fund accounts for assessments collected on employers in the state. Revenues are used to pay interest due on outstanding advances from the federal government that were used to pay unemployment claims.
- The **Investment and Local Impact Fund** accounts for grants and loans to municipalities where metalliferous minerals exist to offset the negative effects of mining projects. These grants and loans are funded with taxes which have been imposed on mining activities.
- The Industrial Building Construction Loan Fund accounts for economic development grants and loans for the construction of industrial buildings. These grants and loans are funded primarily with investment income.

Nonmajor Governmental Funds

- The Election Administration Fund accounts for federal and State moneys provided to develop, administer and manage a statewide voter registration system, enabling all qualified electors, including those with disabilities, the opportunity to vote while maintaining uniform standards within the voting process and safeguarding the vote of all electors.
- The Self-insured Employers Liability Fund collects fees assessed from employers who self-insure for workers compensation purposes. The reserve is used to pay judgements owed to employees of insolvent self-insured employers.
- The Work Injury Supplemental Benefit Fund accounts for compensatory payments to survivors of fatally injured employees or disabled employees with work-related injuries. This compensation is provided with funds collected from State employers and insurance carriers.
- The Workers Compensation Fund accounts for the expenditures related to administering the worker's compensation laws in Wisconsin. These expenditures are funded by annual assessments of insurers and self-insured employers doing business in the State.
- The **Uninsured Employers Fund** accounts for the administration of insurance enforcement activities and compensation to injured employees of uninsured employers. The revenue is primarily provided by funds collected from uninsured employers.
- The **Mediation Fund** accounts for the resolution of disputes regarding medical malpractice. Primary revenue sources are dispute filing fees and fees charged to health care providers.
- The Working Lands Fund accounts for the deposit of farmland preservation conversion fees, gifts and grants. Proceeds are used to purchase agriculture conservation easements and to provide grants to counties for farmland preservation plan costs.
- The **State Capitol Restoration Fund** accounts for moneys from private donations used to offset the costs of restoration work at the State Capitol.
- The Agricultural Chemical Cleanup Fund accounts for the portion of the costs responsible persons pay to clean up fertilizer and pesticide spills and historical handling areas. Fertilizer and pesticide licenses and registration fees primarily provide the revenue.

- The Agrichemical Management Fund accounts for the regulation and enforcement of pesticide, feed and fertilizer industries. The revenue is generated by licenses and fees assessed to these industries.
- The Agricultural Producer Security Fund accounts for fees, surcharges, assessments, reimbursements and bond proceeds of surety bonds collected from contractors doing business with agricultural producers. Payments are made to producers from the fund if contractors default on amounts owed to producers.
- The Historical Legacy Trust Fund accounts for gifts, grants and bequests given to commemorate the 200th anniversary of statehood. The fund also reports all moneys received by the State Sesquicentennial Commission after September 30, 1998.
- The History Preservation Partnership Trust Fund accounts for moneys received from admissions, sales, and other receipts of the Historical Society. The fund is supported primarily by program revenues from daily receipts, site deposits and other generated income from goods and services.
- The **Wireless 911 Fund** accounts for residual assets from the wireless 911 program that provided grants to local governments. 2009 Wisconsin Act 28 ended the program.
- The Military Family Relief Fund accounts for donations received via designation on Wisconsin state income tax returns, gifts, and bequests. Resources are used to provide financial assistance to the spouse and dependent children of service members who are residents of this state and serving on active duty in the U.S. armed forces.
- The Universal Service Fund accounts for programs that ensure that all State residents receive essential telecommunication services at reasonable prices. Assessment of entities in the telecommunications industry is the primary source of revenues.
- The Land Information Fund receives a portion of fees counties collect pertaining to legal documents filed with the county register of deeds. The revenues are used to make grants to the counties to develop and operate a basic land information system.
- The **Children's Trust Fund** accounts for the program which provides information and encourages the development of child abuse and neglect prevention programs. This fund is supported primarily with investment income and moneys received as contributions, grants, gifts and bequests.

Nonmajor Governmental Funds

DEBT SERVICE: Debt service funds account for the accumulation of resources for, and the payment of, principal, interest and related costs of general long-term obligations.

The **Bond Security and Redemption Fund** accounts for the accumulation of resources for, and the payment of principal, interest and related costs of, general obligation bond debt.

The **Annual Appropriation Bonds Fund** accounts for the accumulation of resources for, and the payment of principal, interest and related costs of, the appropriation obligations issued in Fiscal Year 2004 to pay the State's unfunded accrued prior service (pension) liability and its unfunded accrued liability for sick leave conversion credits.

The **2009 Annual Appropriation Bonds Fund** accounts for the accumulation of resources for, and the payment of principal, interest and related costs of, the appropriation obligations issued in Fiscal Year 2009 to purchase tobacco settlement revenues that were previously sold by the State to the Badger Tobacco Asset Securitization Corporation.

The **Petroleum Inspection Revenue Bonds Fund** accounts for the accumulation of resources for, and the payment of principal, interest and related costs of, petroleum inspection fee revenue bond obligations.

The **Transportation Revenue Bonds Fund** accounts for the accumulation of resources for, and the payment of principal, interest and related costs of, transportation revenue bond obligations.

CAPITAL PROJECTS: Capital projects funds account for financial resources used for the acquisition, construction, renovation or repair of major capital facilities (other than those financed by proprietary funds and trust funds). The State's capital projects funds are described below:

The **Building Trust Fund** accounts for repair projects of major capital facilities which are funded primarily through General Fund and agency transfers.

The **Transportation Revenue Bonds Fund** accounts for the accumulation of financing resources for the construction, maintenance, and repair of certain major highway projects and administrative facilities.

PERMANENT: Permanent funds are used to report resources that are legally restricted to the extent that only earnings, not principal, may be used to support the State's programs.

The Common School Fund accounts for proceeds from the sale of land granted by the federal government to Wisconsin when it became a state. The fund also receives fines and forfeitures from penal law breaches and proceeds from the disposal of escheated property. The fund provides low cost loans to municipalities and school districts for public purposes. Earnings are distributed to aid local school districts as required by the state constitution.

The **Other Permanent Funds** account for various resources with legal restrictions requiring that principal remain intact and that only earnings be spent and includes the following:

- The Historical Society Fund accounts for investment income and donations received by the Wisconsin Historical Society to assist in the operations of the State's archives, research and library services, museums, historic preservation, and executive and administrative services.
- The **Agricultural College** and **University** statutory funds account for federal land grant revenues used as public purpose loans for municipalities and school districts.
- The Normal School statutory fund accounts for public purpose loans to municipalities and school districts. These loans are financed with revenues derived from the sale of federally granted land and timber. The interest generated from this fund is used to support and maintain State universities.
- The **Benevolent** statutory fund accounts for investment income used for the care, custody and education of residents committed to the Lincoln Hills School.

Nonmajor Enterprise Funds

ENTERPRISE: Enterprise funds account for business-like State activities that provide goods and/or services to the public and are financed primarily through user charges. The State's enterprise funds are described below:

The **Lottery Fund** accounts for State managed lottery activities used to provide property tax relief to taxpayers. Revenues from ticket sales are used to pay winners, commissions to retailers, operating expenses and property tax relief.

The **Income Continuation Insurance Fund** accounts for longterm and short-term disability benefits for employees of the State and of participating local public employers and operates on a self-insured basis. Contributions and investment activity provide funding for the benefits.

The **Long-term Disability Insurance Fund** accounts for longterm disability benefits paid to State employees and participating local public employees. Contributions and investment activity provide funding for the benefits.

The **Health Insurance Fund** accounts for group health insurance plans provided on a self-insured, fee for service basis or prepaid basis to current employees of the State and of participating local public employers.

The **Veterans Trust Fund** accounts for various programs for veterans, including loans and grants to individuals and organizations and the operations of the State Veterans Museum. Revenues to finance this program are primarily derived from veteran loan payments and investment income.

The **Veterans Mortgage Loan Repayment Fund** accounts for the issuance and administration of veterans' first mortgage loans. Funding sources are primarily derived from bond proceeds, mortgage payments, and investment income.

The **Care and Treatment Facilities Funds**, account for various resident facilities including:

- •The Mendota Mental Health Institute Fund and the Winnebago Mental Health Institute Fund account for the diagnosis, care and treatment of individuals with mental and emotional disturbances. The services are provided with funds collected from third parties and contributions from the State.
- The **Homes For Veterans Fund** accounts for nursing home and assisted living facilities for veterans and their spouses. The costs associated with providing this care are funded by private pay charges, the U.S. Department of Veterans Affairs and Medical Assistance.

 The Northern, Central, and Southern Developmental Disabilities Center Funds account for services provided to developmentally disabled citizens with the goal of ultimately returning such persons to the community if possible. These services are provided with funds collected from third parties and contributions from the State.

The Other Enterprise Funds account for the following programs:

- The **State Fair Park Fund** accounts for the annual State Fair, and various year round major sports events, agricultural and industrial expositions, and other programs of civic interest. Its revenues are derived from admissions, fees, rents and sales, with no contributions from the State.
- The Institutional Farm Operations Fund accounts for the revenues and expenses associated with employing inmates in agricultural and other work activities. The associated costs are funded from farm product sales and a General Fund supplement.
- The Correctional Canteen Operations Fund accounts for the program which provides goods for the education, recreation, and convenience of inmates. Charges made to inmates are the primary source of funds for these activities.
- The Local Government Property Insurance Fund accounts for property insurance coverage provided to local governments. This insurance is financed with premiums collected from policyholders and income on investments.
- The **State Life Insurance Fund** accounts for the program to provide State sponsored life insurance to residents in a manner consistent with private insurers. This insurance is financed with premiums collected from policyholders and investment earnings.
- The Transportation Infrastructure Loan Fund accounts for the development of innovative financing mechanisms that will more effectively use federal financial transportation resources. Federal Highway Administration funds, and interest from the fund balance and from loan recipients, are the primary revenues for this fund.
- •The Life Insurance Fund accounts for the collection and payment of premiums for State and local participating employees' group life insurance contracts with a life insurance carrier.

Internal Service Funds

INTERNAL SERVICE: Internal service funds account for the operations of State agencies which render services to other State agencies, institutions, or other governmental units on a cost-reimbursement basis. The State's internal service funds are described below:

The **Technology Services Fund** accounts for computer and telephone services provided to State and local governmental agencies and school systems. The moneys to finance these services come from computing service charges and telephone and data network charges.

The **Fleet Services Fund** accounts for the costs associated with providing vehicle and aircraft services to State agencies. Moneys to finance these services come from user fees and the sale of used vehicles.

The **Financial Services Fund** accounts for the costs associated with providing accounting, auditing, payroll and other financial services to State agencies. Moneys to finance these services come from State agency user fees.

The Facilities Operations and Maintenance Fund accounts for the costs of operating State-owned facilities including utilities, heat, protective services, custodial and maintenance services and minor repair projects. The moneys to finance these costs are supplied from rents charged for facility and parking use and a general purpose revenue supplement for maintenance of the capitol and executive residence.

The **Risk Management Fund** accounts for the costs of losses for damage to property owned by agencies, personal injury or property damage liabilities incurred by a State officer, agent or employee, and workers' compensation costs for State employees. Moneys to finance these costs come from charges to State agencies.

The **Badger State Industries Fund** accounts for the program which gives inmates work experience in manufacturing goods and providing services. The sale of goods and services provides the moneys necessary to run the program.

Fiduciary Funds

FIDUCIARY: Fiduciary funds are maintained to account for assets held by the State acting in the capacity as a trustee or agent. The State's fiduciary funds, consisting of pension and other employee benefit trust, investment trust, private-purpose trust, and agency funds, are described below:

PENSION AND OTHER EMPLOYEE BENEFIT TRUST FUNDS: Pension and other employee benefit trust funds are used to report resources that are required to be held in trust for members and beneficiaries of the public employee retirement system or other employee benefit plans.

The **Wisconsin Retirement System Fund** accounts for the collection of employee and employer contributions, the investment of assets, and the payment of retirement, disability, and death benefits to current and former employees of the State and participating local Wisconsin governments and their beneficiaries.

The **Accumulated Sick Leave Fund** accounts for the collection of employer contributions, the investment of assets, and termination payments of employees' unused sick leave balances at the time they retire.

The **Duty Disability Fund** accounts for the compensation of protective category employees of the Wisconsin Retirement System for duty-related disabilities, as well as the collection of contributions and investment activity providing funding for the benefits.

The **Reimbursed Employee Expense Fund** accounts for the collection of voluntary payroll deferrals, the investment of assets, and the reimbursement of qualifying medical, dependent care, and transportation expenses of State employees, in compliance with Internal Revenue Code Sections 132 and 425.

The **Local Retiree Life Insurance Fund** accounts for the accumulation of employer contributions, during the course of local government employees working lifetimes, for postretirement life insurance coverage for retired participants.

The **Retiree Life Insurance Fund** accounts for the accumulation of employer contributions, during the course of State employees working lifetimes, for postretirement life insurance coverage for retired participants.

INVESTMENT TRUST FUNDS: Investment trust funds account for assets invested on a commingled basis by the State on behalf of other governmental entities. The State's investment trust funds are described below:

The Local Government Pooled Investment Fund was established to enable local governments in the State to voluntarily invest any idle local moneys. The sources of this fund are local government investment deposits and their share of the investment earnings of the fund. Deductions occur as withdrawals are requested by local governments. The **Milwaukee Retirement System Fund** accounts for funds of the Milwaukee Public Schools invested as part of the fixed and variable investment trusts of the Wisconsin Retirement System.

PRIVATE-PURPOSE TRUST: Private-purpose trust funds are used to report all other trust arrangements under which principal and income benefit individuals, private organizations, or other governments.

The **Tuition Trust Fund** accounts for the program that allows participants to invest in order to meet the cost of future tuition expenses.

The **BadgerRx for Individuals Fund** accounts for the program that, through the leveraged bargaining powers established by the State for employee health insurance, provides discounts and rebates on prescription drugs to participants. The program has ended due to changes in state and federal laws.

The **College Savings Program Trust Fund** accounts for the program that allows participants to invest in a college savings account to cover tuition, fees and the costs of room and board, books, supplies and equipment required for the enrollment or attendance of a beneficiary at an eligible educational institution.

The **Retiree Health Insurance Fund** accounts for the accumulation of premiums for group health insurance plans provided on a self-insured, fee for service basis or prepaid basis to retired employees of the State.

AGENCY FUNDS: Agency funds report those assets for which the State acts solely in a custodial capacity. The State's agency funds are described below:

The **Insurance Company Liquidation Account Fund** accounts for the assets of insurance companies that are liquidated. These assets are used to pay claims and administrative costs associated with the liquidation.

The Local Retiree Health Insurance Fund accounts for the accumulation of premiums for group health insurance plans provided on a self-insured, fee for service basis or prepaid basis to retired employees of participating local public employers.

The **Inmate and Resident Fund** accounts for the assets of inmates and residents in State institutions.

The **Bank and Insurance Company Deposits Fund** accounts for the statutorily required deposits of securities with the State by banks and insurance companies doing business in the State.

The **Support Collection Trust Fund** accounts for the centralized receipt and disbursement of court ordered temporary or permanent maintenance, child support or family support and related fees.

STATISTICAL SECTION

Narrative

Page

The statistical section of Wisconsin's Comprehensive Annual Financial Report provides additional historical perspective, context, and detail to assist financial statement users in understanding the government's economic condition. The State's financial trends, revenue capacity, debt capacity, demographic and economic information, and operating information are presented in the following sections:

Financial Trends Information

The following schedules are intended to assist users in understanding and assessing how the State's financial position has changed over time. Information is presented at both the entity wide and fund level perspective.

Entity-Wide Persp	ective (Accrual Basis of Accounting)	
Schedule A-1	Net Position by Component	212
Schedule A-2	Changes in Net Position	214
Fund-Level Perspe Schedule A-3 Schedule A-4	ective (Modified Accrual Basis of Accounting) Fund Balances of Governmental Funds Changes in Fund Balances of Governmental Funds	218 220

Revenue Capacity Information

The following information is intended to assist users in understanding and assessing the factors affecting the State's ability to generate tax revenues to finance its continued operations.

Schedule B-1	Personal Income by Industry	222
Schedule B-2	Personal Income Tax Rates	223
Schedule B-3	Personal Income Filers and Liability by Income Level	224

Debt Capacity Information

The following information is presented to assist the user in understanding and assessing the State's debt burden and its ability to issue additional debt.

Schedule C-1	Ratio of Outstanding Debt by Type	225
Schedule C-2	Ratio of General Obligation Bonded Debt and Appropriation Bonds to Personal Income and Per Capita	226
Schedule C-3	Legal Debt Margin	228
Schedule C-4	Department of Transportation Revenue Bond Coverage	229
Schedule C-5	Environmental Improvement Fund Revenue Bond Coverage	230
Schedule C-6	Petroleum Inspection Fee Revenue Bond Coverage	231

Demographic and Economic Information

The following information provides demographic and economic indicators to assist the reader in understanding the socioeconomic environment within which the State's financial activities takes place.

Schedule D-1	Demographic and Economic Statistics	232
Schedule D-2	Principal Employers	233

Operating Information

The following information relates to the operations, services and resources provided within the State's financial environment.

(a) In 2008, the Life Insurance Fund was reclassified from a fiduciary to a proprietary fund.

(b) In 2007, GASB Statement No. 43, Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans, was implemented. In the same year, the Health Insurance Risk Sharing Plan, an enterprise fund, became an authority and is no longer included in the Comprehensive Annual Financial Report.

Capital Projects Funds	-	-	-	-
Permanent Funds	 -	-	-	-
Total All Other Governmental Funds	\$ 1,341,443 \$	1,455,028 \$	1,467,105 \$	1,304,296

(a) Prior to 2011 and the implementation of GASB Statement No. 54, Fund Balance Reporting and Government Fund Type Definitions, fund balances were classified as Reserved or Unreserved. Under GASB Statement 54, fund balances are classified as Nonspendable, Restricted, Committed, or Unassigned.

(b) In 2008, the Medical Assistance Trust Fund (a special revenue fund with fund balance of \$2.7 million at June 30, 2007) was reclassified to be included in the General Fund. Prior years have not been restated.

(c) In 2007, the Budget Stabilization Fund (a special revenue fund with fund balance of \$.6 million at June 30, 2006) was reclassified to be included in the General Fund. Prior years have not been restated.

(d) In 2015, a constitutional amendment was passed restricting the use of state resources deposited into the Transportation fund for transportation systems. This resulted in the reclassification of that portion of fund balance from committed to restricted beginning in 2015.

(a) 2007 bonds restated to report net of issuance premiums/discounts and refundings and to include internal service funds in governmental activities.

(b) In 2004, the State issued appropriation obligations to obtain proceeds to pay the State's anticipated unfunded accrued prior service (pension) liability and its unfunded accrued liability

for sick leave conversion credits. In 2009, the State issued additional appropriation bonds to purchase future tobacco settlement revenues that had been sold.

(c) These ratios are calculated using personal income and population for the prior calendar year.

SOURCE: Details regarding the State's outstanding debt can be found in the notes to the financial statements. Schedule C-2 lists personal income and population data by year.

Ratio of General Obligation Bonded Debt and Appropriation Bonds to Personal Income and Per Capita

For the Last Ten Fiscal Years

	2015	2014	2013	2012
General Obligation Bonds and Notes:				
Payable from Governmental Funds	\$ 5,689,648	\$ 5,481,976	\$ 5,664,981	\$ 5,540,586

Bonded Debt per Capita (in Dollars) (c)	\$ 1,834	\$ 1,817	\$ 1,877	\$ 1,852

(a) 2007 bonds restated to report net of issuance premiums/discounts and refundings.

(b) 2003 Wisconsin Acts 33 and 84 were enacted and authorized the issuance of appropriation obligations to obtain proceeds to pay the State's anticipated unfunded accrued prior service (pension) liability under Wis. Stat. Section 40.05(2)(b) and its unfunded accrued liability for sick leave conversion credits under Wis. Stat. Section 40.05(4)(b), (bc), and (bw) and Subchapter IX of Chapter 40. 2007 Wisconsin Act 226 authorized the issuance of additional appropriation obligations for the purpose of purchasing tobacco settlement revenues that had been sold by the State under s. 16.63 of Wisconsin statutes. Appropriation bonds are not general obligations of the State, and do not constitute "public debt" of the State as that term is used in the Constitution and in the State Statutes. The payment of the principal of, and premium, if any, and interest on the bonds is subject to annual appropriation; that is, payments due in any fiscal year of the State will be made only to the extent sufficient amounts are appropriated by the Legislature. The State is not legally obligated to appropriate any amounts for payment of debt service on the Bonds.

(c) These ratios are calculated using personal income and population for the prior calendar year.

For the Last Ten Calendar Years

Calculation of Annual Public Debt Limit for 2014:

Wis. Stat. Sec. 18.05 limits the amount of public debt contracted in any calendar year to the lesser of:

 Three-fourths of one percent of the aggregate value of taxable property 	\$ 3,679,519
or	
(2) Five percent of aggregate value of taxable property	\$ 24,530,127
Less: Net indebtedness at January 1	 8,134,099
	\$ 16,396,028
The lesser of (1) or (2) is:	\$ 3,679,519

(a) Consists of bonds and notes issued less refundings.

(b) Debt issued through October 21, 2015.

The State of Wisconsin, Department of Transportation finances certain state highway projects and related transportation facilities through the issuance of revenue bonds. The revenue bonds, \$2,006.4 million outstanding at June 30, 2014, are secured by a pledge of the registration and registration-related fees collected under Wis. Stat. Sec. 341.25 and investments.

(a) Includes revenues from Wis. Stat. Sec. 341.25 registration and registration-related fees including fees collected under the International Registration Plan (IRP), a multi-state plan for the collection of registration fees from interstate trucking, and interest earnings.

For fiscal years 2005 and 2006, IRP revenues due Wisconsin were mistakenly recorded as a liability to other states. Gross revenues are corrected (increased) for those years. (b) Includes administrative operating expenses.

2006	114,949	18,205	13,728		31,933	3.60

(a) The table presents the calculation of revenue bond coverage based on a ratio of petroleum inspection fees remitted to the trustee during the respective fiscal years, divided by the senior debt service payments made from those fees during each fiscal year.

(b) The 2006-2007 information does not include \$37,885,000 in principal or \$36,140 interest that were paid with monies transferred from the State's Petroleum Inspection Fund. Fiscal year 2006-2007 is the first full fiscal year at the reduced rate for petroleum inspection fees. 2005 Wisconsin Acts 25 and 85 amended Wis. Stat. Sec. 168.12 (1) by reducing the petroleum inspection fee imposed from \$0.03 per gallon to \$0.02 per gallon, effective April 1, 2006.

The table above illustrates how the Local Government Property Insurance Fund's earned revenues (net of insurance) and investment income compare to related costs of loss (net of loss assumed by reinsurers) and other expenses assumed by the fund as of the end of each of the last ten years. The rows of the table are defined as follows:

(1) These lines show the total of each fiscal year's earned contribution revenues and investment revenues, amount of reinsurance premium ceded and net earned revenues.

(2) This line shows each fiscal year's other operating cost of the fund including overhead and claims expense not allocable to individual claims.

(3) This section shows the fund's incurred claims and allocated claims adjustment expense (both paid and accrued) as originally reported at the end of the first year in which the event that triggered coverage under the contract occurred (called policy year).

(4) This section of ten rows shows the cumulative amounts paid as of the end of successive years for each policy year.

	Nine years later	16,580									
7.	Increase (decrease) in estimated incurred claims and										
	expense from end of policy year	ar 928	480	707	142	1,772	(168)	758	435	(1,374)	N/A

(5) This line represents the reestimated losses assumed by reinsurers as of the end of the current fiscal year for each of the policy years presented.

(6) This section of ten rows shows how each policy year's incurred claims increased or decreased as of the end of successive years. This annual reestimation results from new information received on known claims, reevaluation of existing information on known claims, as well as emergence of new claims not previously known.

(7) This line compares the latest reestimated incurred claims amount to the amount originally established (line 3) and shows whether this latest estimate of claims cost is greater or less than originally thought. As data for individual policy years mature, the correlation between original estimates and reestimated amounts is commonly used to evaluate the accuracy of incurred claims currently recognized in less mature policy years. The columns of the table show data for successive policy years.

Reestimated incurred claims: End of policy year One year later Two years later Three years later Four years later Five years later Six years later Seven years later Eight years later Nine years later	73.6 73.7 73.7 73.7 73.7 73.7 73.7 73.7	60.1 58.4 58.2 58.2 58.2 58.2 58.2 58.2 58.2 58.2	23.7 23.6 23.5 23.5 23.5 23.5 23.5 23.5 23.5	30.5 28.3 28.2 28.2 28.2 28.2 28.2 28.2 28.2	25.9 23.5 23.5 23.5 23.5 23.5 23.5	24.0 22.6 22.6 22.6 22.6	21.4 20.7 20.7 20.7	17.7 17.2 17.1	16.9 16.0	17.7
 Increase (decrease) in estimated incurred claims from end of policy year 	0.1	(1.9)	(0.2)	(2.3)	(2.4)	(1.4)	(0.7)	(0.6)	(0.9)	0.0

The table above illustrates how the Health Insurance Fund Risk Pool's earned revenues and investment income compare to related costs of loss assumed by the fund as of the end of each of the last ten years. The rows of the table are defined as follows:

(1) This line shows the total of each calendar year's earned contribution and investment revenues.

(2) This line shows each calendar year's other operating costs of the funds including overhead and claims expenses not allocable to individual claims.

(3) This line shows the fund's incurred claims and allocated claim adjustment expense (both paid and accrued) as originally reported at the end of the first year in which the event that triggered coverage under the contract occurred (called policy year).

(4) This section shows the cumulative amounts paid as of the end of successive years for each policy year.

(5) This section shows each policy year's incurred claims as reestimated at the end of each successive policy year. This annual reestimation results from new information received on known claims, reevaluation of existing information on known claims, as well as emergence of new claims not previously known.

(6) This line compares the latest reestimated incurred claims amount to the amount originally established (line 3) and shows whether this latest estimate of claims cost is greater or less than originally thought.

As data for individual policy years mature, the correlation between original estimates and reestimated amounts is commonly used to evaluate the accuracy of incurred claims currently recognized in less mature policy years.

(a) Starting in 2006, in accordance with GASB 43, retiree health is reported separately in an agency fund and is not included with the active health information in this table.

The table above illustrates how the BadgerRX for Individuals Fund Risk Pool's earned revenues and investment income compare to related costs of loss assumed by the fund as of the end of the calendar year. The pharmacy benefit plan began operation in 2004. The rows of the table are defined as follows:

(1) This line shows the total of each calendar year's earned contribution and investment revenues.

(2) This line shows each calendar year's other operating costs of the funds including overhead and claims expenses not allocable to individual claims.

(3) This line shows the fund's incurred claims and allocated claim adjustment expense (both paid and accrued) as originally reported at the end of the first year in which the event that triggered coverage under the contract occurred (called policy year).

(4) This section shows the cumulative amounts paid as of the end of successive years for each policy year. Paid claims include payments expected to be reimbursed as rebate payments from participating pharmaceutical companies.

(5) This section shows each policy year's incurred claims as reestimated at the end of each successive policy year. This annual reestimation results from new information received on known claims, reevaluation of existing information on known claims, as well as emergence of new claims not previously known. Incurred claims are presented net of anticipated rebates.

(6) This line compares the latest reestimated incurred claims amount to the amount originally established (line 3) and shows whether this latest estimate of claims cost is greater or less than originally thought.

As data for individual policy years mature, the correlation between original estimates and reestimated amounts is commonly used to evaluate the accuracy.

(a) Starting in 2006, in accordance with GASB 43, retiree health is reported separately in an agency fund and is not included with the active health information in this table.
