STATE OF WISCONSIN
DEPARTMENT OF ADMINISTRATION

Scott Walker, Governor
Ellen Nowak, Secretary
Waylon Hurlburt, Division Administrator

December 20, 2018

The Honorable Scott Walker
The Honorable Members of the Legislature
Citizens of the State of Wisconsin

We are pleased to submit the General Purpose External Financial Statements of the State of Wisconsin for the fiscal year ended June 30, 2018. They are part of the audited Comprehensive Annual Financial Report and present financial information in conformity with generally accepted accounting principles.

The General Purpose External Financial Statements include management's discussion and analysis (MD&A), the basic financial statements, and required supplementary information (RSI).

- MD&A presents a discussion and analysis of the State's financial performance during the fiscal year.
- The basic financial statements include an overview of the government as a whole (excluding the State's fiduciary activities) as well as detailed information on all governmental, proprietary, and fiduciary fund activity. Notes, which are considered part of the basic financial statements, provide additional information and should be used in conjunction with the financial statements.
- RSI includes information on post-employment health insurance benefits, the State's proportionate share of the net pension liability, the State's pension contribution, infrastructure and the budgetary comparison schedule with accompanying notes.

The General Purpose External Financial Statements, as well as the Comprehensive Annual Financial Report, are on file at the office of the State Controller and will benefit users requiring summary information about our State's finances. The Comprehensive Annual Financial Report is available on the Department of Administration's website.

Sincerely,

Ellen Nowak
Secretary

Jeffery C. Anderson, CPA
State Controller

Independent Auditor's Report on the Financial Statements and Other Reporting Required by *Government Auditing Standards*

Honorable Members of the Legislature The Honorable Scott Walker, Governor

Report on the Financial Statements

We have audited the accompanying financial statements and the related notes of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Wisconsin, which collectively make up the State's basic financial statements, as of and for the year ended June 30, 2018, as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management of the State of Wisconsin is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America. This includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the financial statements for the University of Wisconsin (UW) System Fund or, the Environmental Improvement Fund, both of which are major funds and represent 69 percent of the assets and 70 percent of the liabilities of the business-type activities. We also did not audit the College Savings Program Trust Fund, which represents 4 percent of the assets of the aggregate remaining fund information. Those financial statements were audited by other auditors whose reports have been furnished to us, and our opinions, insofar as they relate to the amounts included for these funds, are based solely on the reports of the other auditors. In addition, we did not audit the financial statements of the discretely presented component units. Our opinion on the aggregate discretely presented component units is based solely upon audit reports, prepared by other auditors and furnished to us, for the Wisconsin Housing and Economic Development Authority, the UW Hospitals and Clinics Authority, and the UW Foundation.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, which is issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement. The financial statements for the following were audited by other auditors in accordance with these standards: the UW System Fund, the Environmental Improvement Fund, the College Savings Program Trust Fund, the Wisconsin Housing and Economic Development Authority, and the UW Hospitals and Clinics Authority. The financial statements of the UW Foundation were

audited by other auditors in accordance with auditing standards generally accepted in the United States of America, but not in accordance with *Government Auditing Standards*.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinions on these financial statements.

Opinions

In our opinion, based on our audit and the reports of other auditors, the financial statements referred to in the first paragraph present fairly, in all material respects, the financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Wisconsin as of June 30, 2018, and the respective changes in its financial position and, where applicable, cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Emphases of Matter

As discussed in Note 1D, the State implemented Governmental Accounting Standards Board (GASB) Statement Number 74, *Accounting and Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans*, and Statement Number 75, *Accounting and Financial Reporting for Postemployment Benefits Other than Pensions*. These statements changed presentation and disclosure requirements for employers that offer other postemployment benefits.

As described in Notes 1E and 7, UW System changed its method of accounting for library holdings. Library holdings are now reported as depreciable capital assets.

As discussed in Note 5B, the financial statements include investments that do not have readily ascertainable market prices and are valued based on a variety of third-party pricing methods. However, because of the inherent uncertainty of valuation, those estimated values may differ from the values that would have been used had a ready market for the investments existed.

As discussed in Note 5B to the financial statements, as of June 30, 2018, the State Investment Fund held \$1.6 billion in a repurchase agreement with the Wisconsin Retirement System. The State Investment Fund and the Wisconsin Retirement System are both administered by the State of Wisconsin Investment Board.

Certain account balances cannot be measured precisely but must be estimated, particularly actuarially accrued liabilities and infrastructure assets reported in the financial statements and notes. Notes 14, 17, 18, and 20 include a discussion of estimates used by funds that accrue

liabilities based upon actuarial information, including assumptions used in their calculation, and other sources. Note 1E includes information related to the estimated historical cost of infrastructure assets constructed prior to July 1, 2000. Because estimates are based upon information available when the financial statements are prepared, actual values may differ from the estimated amounts. These differences cannot be quantified.

Our opinions are not modified with respect to these matters.

Other Matters

Required Supplementary Information—Accounting principles generally accepted in the United States of America require that the Management’s Discussion and Analysis, and the following items in the required supplementary information section, as listed in the table of contents—Postemployment Benefits–State Health Insurance Program, Postemployment Benefits–State Life Insurance Program, State’s Proportionate Share of Net Pension Liability or Net Pension (Asset), State’s Pension Contributions, Infrastructure Assets Reported Using the Modified Approach, Budgetary Comparison Schedule–General Fund, Budgetary Comparison Schedule–Transportation Fund, and Notes to Required Supplementary Information—be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by GASB, which considers it to be essential for placing the basic financial statements in an appropriate operational, economic, or historical context. In accordance with auditing standards generally accepted in the United States of America, we have applied certain limited procedures to the required supplementary information that included inquiries of management about the methods of preparing the information. We further compared the information for consistency with management’s responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other Reporting Required by *Government Auditing Standards*

In accordance with *Government Auditing Standards*, we have also issued a report dated December 20, 2018, on our consideration of the State’s internal control over financial reporting; our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements; and other matters. The purpose of that report is solely to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the State’s internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be used when considering the State’s internal control over financial reporting and compliance.

LEGISLATIVE AUDIT BUREAU

Joe Chrisman
State Auditor

December 20, 2018

MANAGEMENT'S DISCUSSION AND ANALYSIS

The *Management's Discussion and Analysis* of the State of Wisconsin's Comprehensive Annual Financial Report (CAFR) presents a discussion and analysis of the State's financial performance during the fiscal year that ended June 30, 2018. It should be read in conjunction with the transmittal letter located at the front of this CAFR, and the State's financial statements, including the note disclosures which are an integral part of the statements, that follow this part of the CAFR.

FINANCIAL HIGHLIGHTS -- PRIMARY GOVERNMENT

Government-wide (Tables 2 and 3 on Pages 10 and 11)

- *Net Position.* The assets plus deferred outflows of resources of the State of Wisconsin exceeded its liabilities plus deferred inflows of resources at the close of Fiscal Year 2018 by \$24.9 billion (reported as "net position"). Of this amount, \$(8.2) billion was reported as "unrestricted net position". A positive balance in unrestricted net position would represent the amount available to be used to meet a government's ongoing obligations to citizens and creditors.
- *Changes in Net Position.* The State's total net position increased by \$1.7 billion in Fiscal Year 2018. Net position of governmental activities increased by \$1.1 billion or 8.2 percent, while net position of the business-type activities showed an increase of \$658.0 million or 6.4 percent.
- *Excess of Revenues over (under) Expenses -- Governmental Activities.* During Fiscal Year 2018, the State's total revenues for governmental activities of \$30.1 billion were \$2.1 billion more than total expenses (excluding transfers) for governmental activities of \$28.0 billion. Of these expenses, \$12.2 billion were covered by program revenues. General revenues, generated primarily from various taxes, totaled \$17.8 billion.

Fund

- *Governmental Funds -- Fund Balances.* As of the close of Fiscal Year 2018, the State's governmental funds reported combined ending fund balances of \$1.3 billion, an increase of \$927.4 million in comparison with the prior year. Of this total amount, \$(2.1) billion represents the unassigned fund balances.
- *General Fund -- Fund Balance.* At the end of the current fiscal year, total fund balance was \$(1.3) billion, a change of \$372.4 million from a deficit of \$(1.6) billion reported in the prior year. The unassigned fund deficit for the General Fund was \$(1.8) billion, or 7.6 percent of total General Fund expenditures.

Additional information regarding individual funds begins on Page 15.

Long-term Debt

- The State's total long-term debt obligations (bonds and notes payable) increased by \$257.8 million during the current fiscal year which represents the net difference between new issuances, payments and refundings of outstanding debt. Increases in debt resulted from new borrowings in excess of repayments of existing debt, and the continued reporting of crossover refunded debt. The state issued crossover refunding bonds during Fiscal Year 2018 to refund \$530.4 million in certain general obligation and transportation revenue bonds. The outstanding refunded bonds will continue to be reported as a liability and resources provided by the refunding are held in escrow and reported as assets until the crossover dates. At the crossover dates those assets will be sufficient to redeem the \$530.4 million of refunded bonds. During the year issuances of new general obligations exceeded repayments and refundings of debt by \$352.6 million. Revenue bonds outstanding decreased by \$24.9 million. Annual appropriation bonds totaling \$69.9 million were repaid. Additional detail regarding these activities begins on Page 20.

OVERVIEW OF THE FINANCIAL STATEMENTS

The Financial Section of this CAFR consists of four parts: (1) **management's discussion and analysis** (this section), (2) **basic financial statements**, (3) additional **required supplementary information**, and (4) optional **other supplementary information**. Parts (2), (3), and (4) are briefly described on the following pages:

Basic Financial Statements

The basic financial statements include two sets of statements that present different views of the State -- the **government-wide financial statements** and the **fund financial statements**. These financial statements also include notes that explain some of the information in the financial statements and provide more detail.

- The *government-wide financial statements* provide a broad view of the State’s operations. The statements provide both short-term and long-term information about the State’s financial status, which assists in assessing the State’s financial condition at the end of the fiscal year.
- The *fund financial statements* focus on individual parts of the State government, reporting the State’s operations in greater detail than the government-wide statements. The basic fund financial statements provide more detailed information on the State’s most significant funds.

Table 1, below, summarizes the major features of the financial statements.

Table 1				
Major Features of State of Wisconsin's Government-wide and Fund Financial Statements				
	GOVERNMENT-WIDE STATEMENTS	FUND STATEMENTS		
		Governmental Funds	Proprietary Funds	Fiduciary Funds
Scope	<p>Entire State government (except fiduciary funds) and the State’s component units, reported as follows:</p> <ul style="list-style-type: none"> • <i>Governmental Activities</i> – Most services generally associated with State government fall into this category, including commerce, education, transportation, environmental resources, human relations and resources, general executive, judicial and legislative. • <i>Business-Type Activities</i> – Those operations for which a fee is charged to external users for goods and services are reported in this category. • <i>Discretely Presented Component Units</i> – These are operations for which the State has financial accountability but that have certain independent qualities. The State’s discretely presented component units are discussed in Note 1-B to the financial statements. 	<p>These funds report activities of the State that are not proprietary or fiduciary in nature. Most of the basic services provided by the State, which are primarily financed through taxes, intergovernmental revenues, and other nonexchange revenues, are reported as governmental funds.</p> <p>Examples of the State’s governmental funds (including the State’s three major governmental funds), as reported within their respective fund types, follow:</p> <ul style="list-style-type: none"> • <i>General Fund</i> (major fund) • <i>Special Revenue:</i> <ul style="list-style-type: none"> -- Transportation (major fund) • <i>Debt Service:</i> <ul style="list-style-type: none"> -- Bond Security and Redemption • <i>Capital Projects:</i> <ul style="list-style-type: none"> -- Capital Improvement (major fund) • <i>Permanent:</i> <ul style="list-style-type: none"> -- Common School 	<p>The activities the State operates similar to private business. These funds are used to show activities that operate more like those of commercial enterprises. Fees are charged for services provided, both to outside customers and to other units of the State.</p> <p>Examples of the State’s proprietary funds, including the State’s four major enterprise funds, follow:</p> <ul style="list-style-type: none"> • <i>Enterprise:</i> <ul style="list-style-type: none"> -- Injured Patients and Families Compensation (major fund) -- Environmental Improvement (major fund) -- University of Wisconsin System (major fund) -- Unemployment Reserve (major fund) -- Lottery • <i>Internal services:</i> <ul style="list-style-type: none"> -- Technology Services -- Facilities Operations and Maintenance 	<p>These funds are used to show assets held by the State as trustee or agent for others and cannot be used to support the State’s own programs.</p> <p>Examples of the State’s fiduciary funds, as reported within their respective fund types, follow:</p> <ul style="list-style-type: none"> • <i>Pension and Other Employee Benefit Trust Funds:</i> <ul style="list-style-type: none"> -- Wisconsin Retirement System • <i>Investment Trust:</i> <ul style="list-style-type: none"> -- Local Government Pooled Investment • <i>Private Purpose Trust:</i> <ul style="list-style-type: none"> -- College Savings Program Trust • <i>Agency:</i> <ul style="list-style-type: none"> -- Support Collection Trust
Required financial statements	<ul style="list-style-type: none"> • Statement of net position – Presents all of the government’s assets and deferred outflows of resources, and liabilities and deferred inflows of resources, with the difference between the two reported as "net position". Over time, increases or decreases in the state’s net position is an indicator of whether its financial health is improving or weakening, respectively. • Statement of activities – Presents a comparison between direct expenses and program revenues for each function of the State’s governmental activities and for different identifiable business-type activities of the State. 	<ul style="list-style-type: none"> • Balance sheet • Statement of revenues, expenditures, and changes in fund balances 	<ul style="list-style-type: none"> • Statement of net position • Statement of revenues, expenses and changes in fund net position • Statement of cash flows 	<ul style="list-style-type: none"> • Statement of fiduciary net position • Statement of changes in fiduciary net position <p>Because the State cannot use these assets to finance its operations, fiduciary funds are not included in the government-wide financial statements discussed in the left column.</p>

Major Features of State of Wisconsin's Government-wide and Fund Financial Statements

	GOVERNMENT-WIDE STATEMENTS	FUND STATEMENTS		
		Governmental Funds	Proprietary Funds	Fiduciary Funds
Accounting basis and measurement focus	<p>Accrual accounting and economic resource focus</p> <p>The accrual basis of accounting, which is similar to the methods used by most businesses, takes into account all revenues and expenses associated with the fiscal year even if cash involved has not been received or paid.</p>	<p>Modified accrual accounting and current financial resource focus</p> <p>These statements provide a detailed short-term view of the State's finances that assists in determining whether there will be adequate financial resources available to meet the current needs of the State. Because this information does not encompass the long-term focus of the government-wide statements, reconciliations are provided on the subsequent page of the governmental fund statements.</p>	<p>Accrual accounting and economic resources focus</p>	<p>Accrual accounting and economic resources focus</p>
Type of asset, deferred outflows of resources, liability, deferred inflows of resources information	<p>All assets and liabilities, both financial and capital, and short-term and long-term. Deferred inflows/outflows of resources reported only in limited instances as required by GASB standards.</p>	<p>Only assets expected to be used up and liabilities that come due during the year or soon thereafter; no capital assets included</p>	<p>All assets and liabilities, both financial and capital, and short-term and long-term</p>	<p>All assets and liabilities, both short-term and long-term</p>
Type of inflow-outflow information	<p>All revenues and expenses during the year, regardless of when cash is received or paid</p>	<ul style="list-style-type: none"> Revenues for which cash is received during or soon after the end of the year Expenditures when goods or services have been received and payment is due during the year or soon thereafter 	<p>All revenues and expenses during the year, regardless of when cash is received or paid</p>	<p>All revenues and expenses during the year, regardless of when cash is received or paid</p>

Additional Required Supplementary Information

In addition to this Management's Discussion and Analysis, which is required supplementary information, the basic financial statements are followed by a section of required supplemental information that further explains and supports the information in the financial statements. The required supplementary information includes:

- Postemployment Benefits - State Health Insurance Program and State Life Insurance Program,
- State's Proportionate Share of the Net Pension Liability or Net Pension Asset,
- State's Pension Contributions,
- Infrastructure Assets Reported Using the Modified Approach, and
- Budgetary Comparison Schedule of the General and the Transportation funds (includes reconciliations between the statutory and GAAP fund balances at fiscal year-end).

Other Supplementary Information

The Other Supplementary Information includes combining financial statements for nonmajor governmental funds, nonmajor enterprise funds, internal service funds and fiduciary funds, each of which are added together and presented in single columns in the basic financial statements.

FINANCIAL ANALYSIS OF THE STATE AS A WHOLE

Tables 2 and 3 present summary information of the State's net position and changes in net position.

Net Position

As presented in Table 2, total assets of the State on June 30, 2018 were \$48.2 billion and deferred outflows of resources were \$1.9 billion, while total liabilities were \$23.4 billion and deferred inflows of resources were \$1.8 billion, resulting in combined net position (government and business-type activities) of \$24.9 billion. The largest component of the State's total net position consists of \$23.4 billion invested in capital assets (i.e., land, buildings, equipment, infrastructure, and others), less any related debt outstanding that was needed to acquire or construct the assets. Approximately \$9.7 billion of net position was restricted by external sources or the State Constitution or Statutes, and was not available to finance the day-to-day operations of the State.

The unrestricted net position, which, if positive, could be used at the State's discretion, showed a negative balance of \$(8.2) billion. Therefore, based on this measurement, no funds were available for discretionary purposes. A contributing factor to the negative balance is that governments recognize a liability on the government-wide statement of net position as soon as an obligation is incurred. While financing focuses on when a liability will be paid, accounting is primarily concerned with when a liability is incurred. Accordingly, the State recognizes long-term liabilities (such as general obligation debt, compensated absences, other postemployment benefits and future benefits and loss liabilities – listed in Note 10 to the financial statements) on the statement of net position. In addition to the effect of reporting long-term liabilities when incurred, the General Fund's total deficit fund balance of \$(1.3) billion at year-end, as discussed on Page 15, also contributed to the deficit unrestricted net position reported in the statement of net position.

During Fiscal Year 2018, the State issued \$1.9 billion of general obligation bonds, primarily for the acquisition or improvement of land, water, property, highways, buildings, and equipment. At June 30, 2018 general obligation bonds and long term general obligation notes outstanding totaled \$8.2 billion, outstanding annual appropriation bonds were \$3.0 billion, and outstanding revenue bonds, which are not considered general obligation debt of the State, totaled \$2.7 billion.

	Governmental Activities		Business-type Activities		Total		Total Percentage Change 2018-2017

* Amounts for the prior fiscal year include restatements of prior year's balances, except for those related to the implementation of GASB Statement No. 75, library holdings and a loan liability adjustment.

Changes in Net Position

The revenues and expenses information, as shown in Table 3, was derived from the government-wide statement of activities and reflects how the State's net position changed during the fiscal year. The State earned program revenues of \$19.8 billion and general revenues of \$17.9 billion for total revenues of \$37.7 billion during Fiscal Year 2018. Expenses for the State during Fiscal Year 2018 were \$36.0 billion. As a result of the excess of revenues over expenses, the total net position of the State increased \$1.7 billion, net of contributions and transfers.

Governmental Activities

The net position of governmental activities increased \$1.1 billion in Fiscal Year 2018. Revenues for the governmental activities (including contributions to permanent fund principal) totaled \$30.1 billion, while expenses and net transfers totaled \$29.0 billion in Fiscal Year 2018.

General and program revenues of governmental activities increased \$1.1 billion during this fiscal year. Tax revenues increased \$550.2 million primarily due to enhanced income and sales and excise taxes of \$522.4 million and \$115.3 million, respectively, while other taxes decreased \$111.5 million from the prior year. Operating grants increased by \$349.8 million, while capital grants also increased by \$159.5 million. In addition, other general revenues and charges for goods and services increased \$29.1 million and \$25.0 million, respectively.

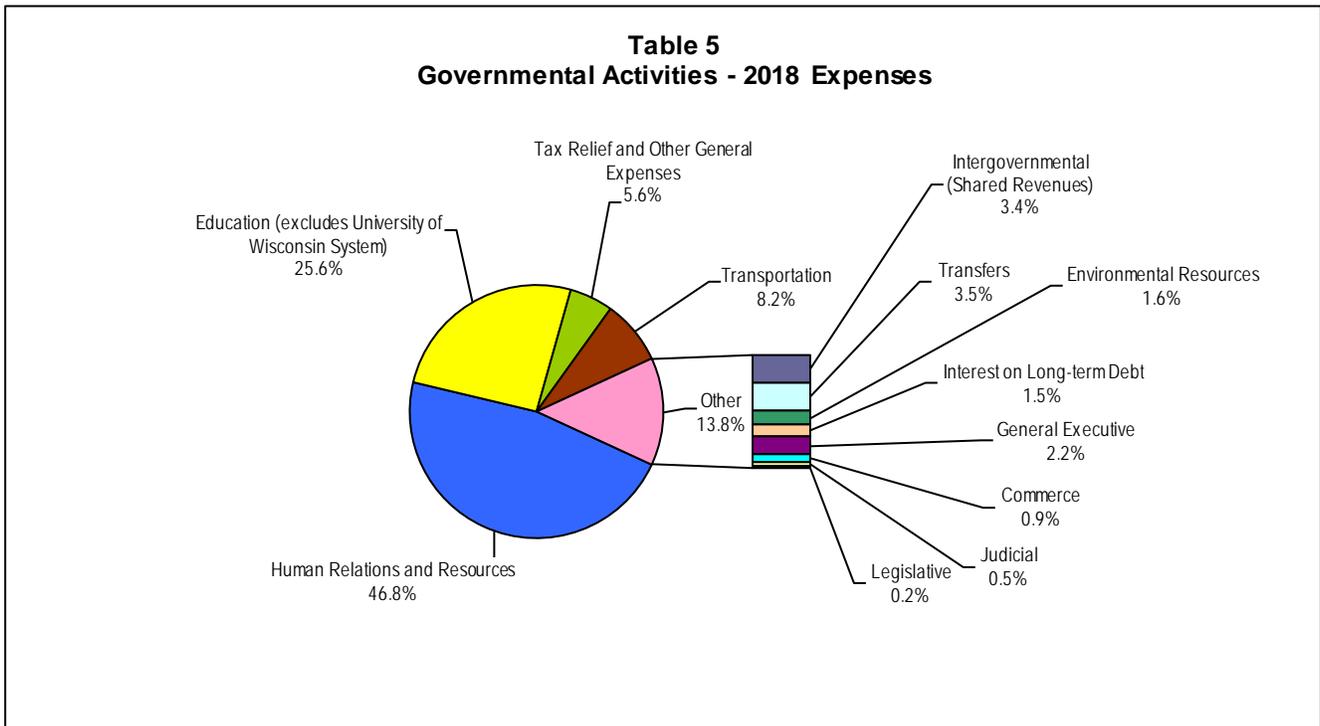

The State’s governmental activities program expenses increased \$810.5 million to \$28.0 billion during Fiscal Year 2018. Human relations and resources expenses increased by \$203.3 million (1.5 percent) to a total of \$13.6 billion. Education expenses increased by \$204.6 million (2.8 percent) to \$7.4 billion due in part to increase in per pupil aid. Transportation expenses increased \$240.5 million (11.2 percent) to \$2.4 billion as the result of increased operating costs to maintain and preserve infrastructure. A one-time Child Sales Tax Rebate caused tax relief and other general expenses to increase \$184.2 million (12.9 percent) to \$1.6 billion. Commerce and environmental resource expenses increased \$17.3 million and \$15.2 million, respectively. Conversely, general executive expenses decreased \$49.1 million, while interest on long-term debt also decreased \$10.1 million.

As shown in Table 4, below, approximately 57.8 percent of revenues from all sources earned came from taxes (sales and excise, income, public utility, motor fuel, and other taxes). Operating grants and contributions represent amounts received from other governments/entities – primarily the federal government. Operating grants and contributions for non-capital purposes provided 30.2 percent of total revenues. Capital grants and contributions provided 2.5 percent, charges for services contributed 8.0 percent, while various other revenues provided 1.5 percent of the remaining governmental activity revenue sources.

As shown in Table 5, below, expenses for human relations and resources programs make up the largest portion – 46.8 percent – of total governmental expenses and transfers. Included in this cost function are programs such as Medical Assistance and Temporary Assistance for Needy Families as well as costs for state correctional facilities and services.

Educational expenses, which include various school aids but exclude expenses of the University of Wisconsin System, make up 25.6 percent of total expenses. Tax relief and other general expenses and the municipal and county shared revenue program represent 9.0 percent of the total, while transportation expenses represent 8.2 percent. Net transfers to business-type activities, which include a general purpose revenue subsidy to the University of Wisconsin System, make up 3.5 percent of the total expenses and transfers. Remaining functional expenses totaled 5.4 percent while interest on long-term debt totaled 1.5 percent.

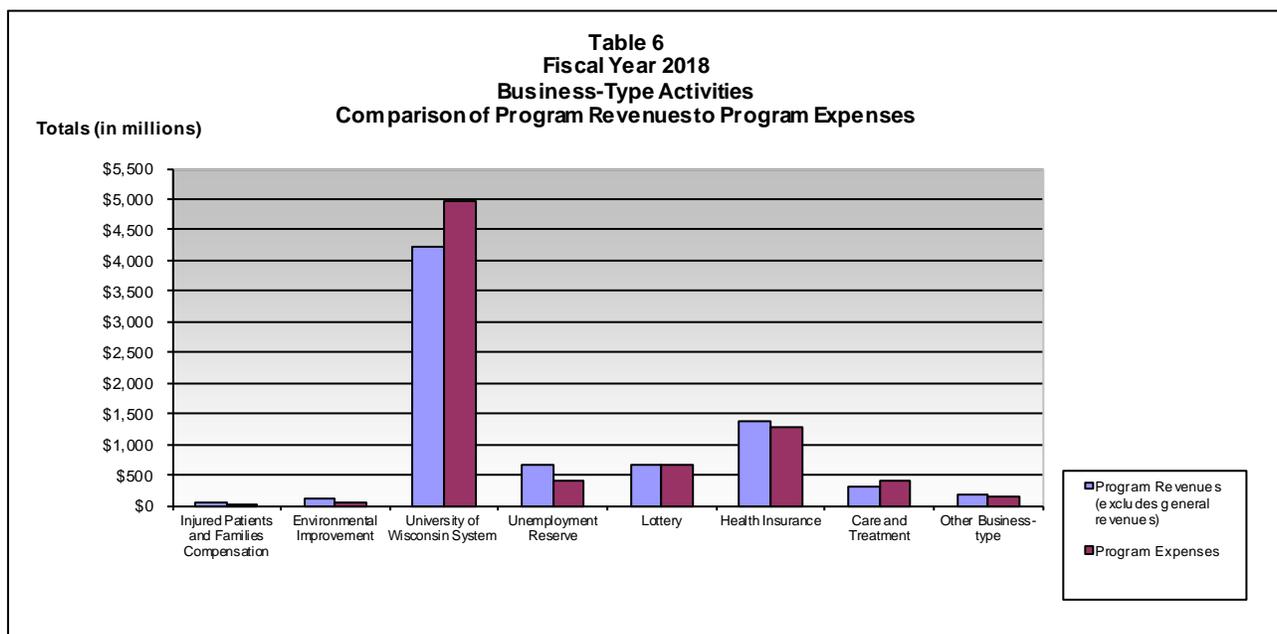

Business-Type Activities

Net position of the State’s business-type activities increased \$658.0 million in Fiscal Year 2018.

Revenues of business-type activities totaled \$7.6 billion for Fiscal Year 2018, an increase of \$153.3 million from the prior year. Program revenues consisted of \$6.7 billion of charges for services, \$812.5 million of operating grants and contributions, and \$45.2 million of capital grants and contributions. General revenues, contributions to endowments and permanent fund principal and net transfers totaled \$22.1 million, \$1.1 million, and \$1.0 billion, respectively.

The total expenses for business-type activities were \$7.9 billion, a decrease of \$38.8 million from the prior fiscal year. The largest decrease in program expenses, \$59.7 million, related to decreased expenses for the Unemployment Reserve. Expenses for the University of Wisconsin System, Environmental Improvement and other business type program expenses also decreased \$32.1 million, \$31.0 million and \$34.4 million, respectively. Offsetting those decreases were increases in Injured Patients and Family Compensation and Lottery funds of \$80.7 million and \$44.7 million, respectively.

Table 6, below, compares the program revenues and program expenses of the various State business-type activities. This table does not include the transfer in (subsidy) from the General Fund to the University of Wisconsin System or other business-type activities.

FINANCIAL ANALYSIS OF THE STATE'S INDIVIDUAL FUNDS

Governmental Funds

At the end of Fiscal Year 2018, the State's governmental funds reported a combined fund balance of \$1.3 billion. Funds with significant changes in fund balance are discussed below:

General Fund

The General Fund is the chief operating fund of the State. At June 30, 2018, the State's General Fund reported a total fund deficit of \$(1.3) billion. The net change in fund balance during Fiscal Year 2018 was \$372.4 million, in contrast to \$96.7 million in Fiscal Year 2017. Major revenue, expenditure and other sources/uses contributing to the change in fund balance are as follows:

Revenues

Revenues of the General Fund totaled \$26.4 billion in Fiscal Year 2018, an increase of \$960.7 million (3.8 percent) from the prior year. Factors contributing to this change included the following:

- Revenues from taxes increased \$634.7 million. The increases relate to income and sales taxes, which increased \$526.3 million and \$116.4 million, respectively, from Fiscal Year 2017. Sales tax revenue increases were driven by increased consumer expenditures for taxable goods, while the increase in income taxes was the result of growth in personal income.
- Intergovernmental revenues (i.e. federal assistance) increased \$317.9 million to \$8.7 billion in Fiscal Year 2018. Human relations and resources programs (e.g. Medicaid) reported increased revenues of \$331.8 million. Because costs are split between federal and State sources, revenues associated with Medicaid related programs increase as costs increase.

Expenditures

2017 Wisconsin Act 59 established spending authority for the State of Wisconsin for Fiscal Year 2018. Expenditures of the General Fund totaled \$24.3 billion in Fiscal Year 2018, an increase of \$602.7 million from Fiscal Year 2017. Factors contributing to the change include the following:

- Human relations and resources expenditures increased by \$261.5 million to \$13.4 billion, primarily the result of increased medical assistance costs. These costs comprise 55.2 percent of General Fund expenditures.
- Education expenditures increased \$203.6 million to \$7.4 billion, due in part to an increase in per pupil aid in Fiscal Year 2018. These costs comprise 30.2 percent of General Fund expenditures.
- Tax relief and other general expenditures increased by \$181.3 million to a total of \$1.6 billion primarily the result of a one-time Child Sales Tax Rebate in Fiscal Year 2018.

Other Financing Sources and Uses

Other financing sources/uses totaled a net \$(1.7) billion in Fiscal Year 2018, an \$84.0 million increase from Fiscal Year 2017. The components of this included the following:

- Transfers out of the General Fund totaled \$1.8 billion, an increase of \$43.4 million from the prior year.
- The GPR supplement comprises a large portion of the transfers out and is provided to various enterprise funds. The supplement totaled \$909.4 million, an increase of \$38.7 million from the prior year. The University of Wisconsin System, which receives the majority of the GPR supplement, had \$838.8 million in GPR expenses in Fiscal Year 2018, an increase of \$30.6 million.

- Transfers out for debt service payments to the Bond Security and Redemption Fund totaled \$466.9 million in Fiscal Year 2018 compared to \$514.8 million in Fiscal Year 2017.
- Transfers out to nonmajor enterprise funds, the Capital Improvement Fund and Transportation Fund were \$101.2 million, \$83.4 million and \$43.4 million, respectively.
- Transfers in to the General Fund decreased \$42.0 million (from \$99.6 million in Fiscal Year 2017 to \$57.6 million in Fiscal Year 2018). Non-major enterprise funds transferred \$22.4 million while non-major governmental funds and the University of Wisconsin System transferred \$19.0 million and \$13.3 million, respectively.

Note 9D provides additional information on transfers in and out of the General Fund.

As of June 30, 2018, the General Fund reported an unassigned fund balance deficit of \$(1.8) billion, a reduction of the deficit of \$310.9 million from the prior year. A deficit unassigned fund balance represents the excess of the liabilities of the General Fund over its assets and nonspendable, restricted, and committed fund balance accounts.

General Fund Budgetary Highlights

Differences between the original budget and the final amended budget were significant and included a \$3.7 billion increase in appropriations. Contributing to the variance is the fact that several of the State’s programs and various transfers (see the items denoted with *, below) are not included in the original budget. In addition, numerous adjustments to spending estimates were needed as the year progressed because of changing circumstances (spending needs can change dramatically over a one-year period). The largest variances occurred in the following appropriations (in millions):

Program	Variance
Food Stamps, Electronic Benefit Transfer*	\$ 1,200.0
Federal Aid Medical Assistance	544.1
UW System, General Program Operations (part of Statutory General Fund)	197.8
Federal Aid Local Assistance	145.1
Child Sales Tax Rebate*	122.1

Actual charges to appropriations (expenditures) were \$3.6 billion below the final budgeted estimates. Large positive expenditure variances were reported in the Medical Assistance Federal Aid (\$637.2 million) and the Food Stamps Benefits (\$368.0 million) appropriations.

During the past fiscal year, the budgetary-based fund balance increased \$212.4 million for the statutory General Fund, in part, because of increased general purpose revenues for taxes. Net transfers from other funds totaled \$47.4 million in Fiscal Year 2018 compared to \$20.0 million in the prior fiscal year.

Transportation Fund

In Fiscal Year 2018, the Transportation Fund's fund balance increased \$73.5 million (12.6 percent) from \$582.4 million to \$655.9 million. The state constitution restricts use of state resources deposited into the Fund for transportation purposes. As such, \$637.7 million or 97.2 percent of fund balance is reported as restricted for Fiscal Year 2018. Remaining fund balance is reported as nonspendable and correlates to prepaid and inventory assets.

Primary revenue sources of the fund include motor fuel taxes, intergovernmental, and license and permit revenue sources, as well as interfund transfers in. Additional federal and local funding in Fiscal Year 2018 caused revenues of the fund to increase \$248.4 million (10.3 percent) to a total of \$2.7 billion. Use of external sources of funding for projects, rather than state resources such as taxes and licenses, contributes to revenue fluctuations between years.

An increase in transportation functional expenditures of \$240.4 million, offset by a reduction in capital outlay expenditures of \$205.6 million, resulted in total expenditures increasing by \$34.8 million to \$2.5 billion. The change in the types of expenditures reported in the fund was the result of a higher proportion of maintenance and preservation projects versus capitalizable projects. In addition to the expenditures reported in the Transportation Fund, long term debt-funded transportation expenditures of \$163.7 million and \$72.2 million were reported in the Capital Improvement Fund and Transportation Revenue Bonds Fund, respectively. In the current year, transportation-related expenditures decreased \$170.6 million in the Capital Improvement Fund, while also decreasing \$8.4 million in the Transportation Revenue Bonds Fund.

Transfers in increased slightly from \$67.1 million to \$73.7 million in Fiscal Year 2018. An on-going transfer equal to 0.25 percent of general fund taxes as published in the general fund condition statement is made annually with that amount being \$40.2 million in Fiscal Year 2018. In addition, \$30.3 million was transferred from the Petroleum Inspection special revenue fund. Transfers out increased \$13.8 million to \$173.6 million. Transfers out to the Bond Security and Redemption Fund for debt service were \$136.3 million, while transfers out to the Conservation Fund were \$20.0 million in Fiscal Year 2018.

Capital Improvement Fund

Fund balance of the Capital Improvement Fund increased by \$23.3 million from \$(261.5) million to \$(238.2) million. Assets of the Fund, which are comprised of cash and receivables, decreased \$69.4 million to \$126.7 million. Short-term notes payable and amounts owed to the Transportation Fund for reimbursement of transportation-related projects comprise most Fund liabilities. Liabilities totaled \$364.9 million, a decrease of \$92.7 million from the prior year.

Two issues of long-term debt totaling \$324.3 million were made during the year, a decrease of \$293.0 million from the prior fiscal year. During the year, debt and premium proceeds funded \$147.4 million of capital outlay expenditures, a decrease of \$156.5 million and the result of less transportation related projects funded by the Capital Improvement Fund. Capital outlay expenditures reflect capital assets, such as buildings and highways, which were either in progress or completed during the fiscal year and will be used on a long-term basis. Debt proceeds also funded \$117.9 million of maintenance and repair expenditures on state owned assets that are reported as functional expenditures. Transportation related functional costs were \$57.0 million, a decrease of \$25.8 million, and comprised 48.3 percent of functional expenditures. Environmental resource related expenditures were \$26.3 million and 22.3 percent of functional expenditures.

Transfers in to the Capital Improvement Fund for debt service payments on outstanding notes payable decreased \$9.4 million to \$95.4 million. Transfers Out of the Capital Improvement Fund, which are also funded from debt proceeds, increased \$49.0 million to \$170.2 million, because more debt was distributed to proprietary funds.

Proprietary Funds

Proprietary funds provide the same type of information found in the government-wide financial statements but in more detail. Significant changes to balances of major proprietary funds from Fiscal Year 2017 to Fiscal Year 2018 include the following:

Environmental Improvement

Fund net position of the Environmental Improvement Fund increased \$75.9 million to \$2.0 billion. Total assets of the Fund decreased by \$17.9 million, while total liabilities decreased \$95.9 million. Assets decreased to \$2.3 billion as the result of a

\$42.1 million reduction in loans to local governments and a cash increase of \$27.5 million. Conversely, liabilities decreased to \$271.1 million due to a \$97.1 million reduction in revenue bonds payable.

Operating income of the Fund increased by \$39.2 million to \$30.1 million in Fiscal Year 2018. Operating revenues, which consists primarily of investment and interest income of \$48.5 million, remained steady in Fiscal Year 2018. Operating expenses decreased \$40.5 million in Fiscal Year 2018, the result of a \$40.9 million reduction in interest expense. The defeasance of \$583.0 million of clean water revenue bonds in the prior year reduced the amount of interest expense for Fiscal Year 2018.

Injured Patients and Families Compensation

Net position of the Injured Patients and Families Compensation Fund increased by \$10.0 million, from \$999.4 million to \$1.0 billion at June 30, 2018. Total assets of the Fund, which increased \$18.1 million to \$1.4 billion, are primarily comprised of investments. Fund liabilities, which increased by \$8.0 million to \$382.1 million, are comprised primarily of actuarially-determined future benefits and loss liabilities of \$366.5 million, an increase of \$9.4 million from the prior year.

Operating revenue of the Fund consisted of assessment income which decreased \$4.3 million (27.5 percent) to \$11.5 million. The reduced revenue was the result of a 30.0 percent decrease in assessment rates and changes in the number of participating providers. Non-operating revenue consists solely of investment and interest income of \$22.4 million in Fiscal Year 2018.

Fund operating expenses consist primarily of benefit expenses. Benefit expenses, which are determined by an actuary, were \$22.4 million for Fiscal Year 2018 compared to negative \$58.2 million the prior year. Fiscal Year 2018 benefit payments totaled \$12.9 million, compared to \$9.1 million the prior year.

Unemployment Reserve

Net position of the Unemployment Reserve Fund increased by \$250.4 million during Fiscal Year 2018 from \$1.5 billion at June 30, 2017 to \$1.8 billion at June 30, 2018. Benefit expenses decreased from \$465.8 million in Fiscal Year 2017 to \$407.3 million in Fiscal Year 2018, a decrease of \$58.5 million (12.6 percent). The decrease in benefits is the result of the average unemployment rate falling from 3.6 percent during Fiscal Year 2017 to 3.0 percent during Fiscal Year 2018.

Total operating revenues decreased by \$115.7 million from \$744.6 million in Fiscal Year 2017 to \$628.9 million in Fiscal Year 2018. Employer contributions decreased from \$706.9 million in Fiscal Year 2017 to \$597.1 million in Fiscal Year 2018, a decrease of \$109.8 million (15.5 percent). The average tax rate on taxable wages decreased from 2.06% during Calendar Year 2017 to an estimated 1.72% in Calendar Year 2018.

University of Wisconsin System

Fund net position increased \$198.4 million to \$5.4 billion. Assets, which consist primarily of capital assets and cash, increased \$709.9 million to \$8.4 billion. A restricted net pension asset of \$399.1 million was reported in Fiscal Year 2018 compared to a net pension liability of \$(112.7 million) in the prior year. Liabilities, which consist mostly of bonds payable and OPEB, decreased by \$42.8 million to \$2.9 billion. Deferred outflows of resources decreased \$81.8 million to \$750.5 million, while deferred inflows of resources increased \$489.7 million to \$849.6 million. The changes in deferred outflows and inflows were primarily related to changes in pension related amounts.

Operating revenues decreased \$90.4 million or 2.5 percent to \$3.6 billion. Student tuition, and federal grants and contracts of \$1.3 billion and \$748.2 million, respectively, comprise 56.7 percent of operating revenues. Increases of \$21.1 million, \$15.9 million and \$58.8 million were reported for tuition and fees, sales and services of auxiliary enterprises and other income, respectively. Conversely, revenues decreased by \$161.3 million (17.7 percent) and \$9.2 million (3.6 percent), for federal grants and contracts and local and private grants and contracts, respectively. The federal grants and contracts account previously included federal Pell grants. Beginning in Fiscal Year 2018, however, Pell grants of \$162.7 million are reported as nonoperating revenue. Sales and services of educational activities revenues also declined by \$16.1 million or 4.8 percent. Operating expenses decreased \$3.8 million or 0.1 percent. Personal services expense declined by \$66.7 million (2.0 percent) while other expenses declined by \$12.6 million. These were offset by an increase in supplies and services, scholarship and fellowship, and depreciation expenses of \$31.4 million, \$12.4 million, and \$31.5 million, respectively. Nonoperating investment and interest income declined \$11.2 million while gifts and donations declined \$8.1 million. Offsetting those declines was an increase in other revenues caused by reporting Pell grants as non-operating revenue beginning in Fiscal Year 2018.

Transfers in to the University of Wisconsin System totaled \$1.0 billion in Fiscal Year 2018. The general purpose revenue supplement received from the State's General Fund was \$838.8 million an increase of \$30.6 million. The Capital Improvement Fund also transferred \$142.4 million of bond and note proceeds to the University of Wisconsin System an increase of

\$39.0 million from the prior year. Bond proceeds transferred in are a function of on-going capital projects funded with those bonds.

GOVERNMENT-WIDE CAPITAL ASSET AND DEBT ADMINISTRATION

Capital Assets

At the close of Fiscal Year 2018, the State reported \$29.9 billion invested in capital assets, net of accumulated depreciation of \$7.8 billion. This represents an increase of \$599.0 million, or 2.0 percent, from Fiscal Year 2017. Depreciation charges totaled \$156.4 million and \$339.9 million for governmental and business-type activities, respectively, in Fiscal Year 2018. The details of these assets are presented in Table 7, below. Additional information about the State's capital assets is presented in Note 7 to the financial statements.

	Governmental		Business-Type		Total	
	Activities		Activities		Primary Government	
	2018	2017*	2018	2017*	2018	2017*
Land and Land Improvements	\$ 2,925	\$ 2,893	\$ 172	\$ 171	\$ 3,097	\$ 3,065
Buildings and Improvements	1,612	1,387	4,216	4,387	5,828	5,774
Library Holdings	59	59	155	159	214	218
Machinery and Equipment	369	333	311	307	680	640
Infrastructure	16,955	15,843	-	-	16,955	15,843
Construction and Software in Progress	2,582	3,473	516	262	3,098	3,735
Totals	\$ 24,502	\$ 23,988	\$ 5,371	\$ 5,286	\$ 29,873	\$ 29,274

*Amounts for the prior fiscal year have been restated

The major capital asset additions completed or acquired during Fiscal Year 2018 included the:

- USH 12: Lake Delton – Sauk City \$182.7 million
- Hill Farms Building A and B Replacement \$158.2 million
- Preservation Storage Building \$34.9 million
- Wisconsin Housing and Economic Development Authority Building Purchase \$29.1 million
- Capitol Heat and Power Plant Facility Renovation and Upgrade \$21.1 million
- Wisconsin Resource Center Female Treatment Center \$16.0 million
- UW Milwaukee Children Center Renovation \$10.4 million

In addition to these completed projects, construction and software in progress as of June 30, 2018 for governmental and business-type activities totaled \$2.6 billion and \$516.2 million, respectively. A list of those projects is provided in Note 7. The State's continuing or proposed major capital projects for Fiscal Year 2018 and future years include:

- I-94 North South Freeway Project (Completion in 2021) \$1.6 billion
- Zoo Interchange (Completion in 2023) \$1.5 billion
- I39/90: USH 12 to Illinois (Completion 2020) \$1.2 billion
- US 10 / State Highway 441 (Completion in 2019) \$390.1 million
- St. Croix Bridge Crossing (Completion in 2019) \$304.5 million
- USH18/151 Verona Road (Completion in 2019) \$269.8 million
- USH 53 La Crosse Corridor (Completion TBD) \$162.8 million
- STH 23 / State Highway 67 / US 41 (Completion in 2021) \$153.1 million
- STH 15 / STH 76 New London (Completion in 2023) \$143.8 million
- STH 50 / I94 43rd Avenue (Completion 2023) \$104.5 million

Debt Administration

The State of Wisconsin Building Commission, an agency of the State, is empowered by law to consider, act upon, authorize, issue and sell all debt obligations of the State. The total general obligation debt outstanding for the State as of June 30, 2018 was \$8.2 billion, as shown in Table 8. During Fiscal Year 2018, \$1.9 billion of general obligation bonds were issued to provide for the acquisition or improvement of land, water, property, highways, buildings, equipment, or facilities for public purposes or to refund outstanding bonds. Of the bonds issued in the current year, \$647.2 million was to be used for University of Wisconsin System academic and self-amortizing facilities; \$472.0 million for transportation projects, \$154.9 million for environmental programs, and \$79.2 million for correctional and mental health facilities. The remaining proceeds from new bonds issued were used for various other projects.

In Fiscal Year 2004, the State issued \$1.8 billion of annual appropriation bonds to pay the State's unfunded accrued prior service (pension) liability and its unfunded accrued liability for sick leave conversion credits. In Fiscal Year 2009, the State issued \$1.5 billion of annual appropriation bonds to purchase the future right, title, and interest in the Tobacco Settlement Revenues (TSRs) from Badger Tobacco Asset Securitization Corporation (BTASC). As of June 30, 2018, \$3.0 billion of these bonds were outstanding.

Chapter 18 of the Wisconsin Statutes authorizes the State to issue revenue obligations. These obligations, which are not general obligation debt of the State, are secured by a pledge of revenues or property derived from the operations of a program funded by the issuance of the obligations. Revenue bonds of the primary government totaled \$2.7 billion outstanding at June 30, 2018, as shown in Table 8. These bonds included \$2.3 billion of Transportation Revenue Bonds, \$56.1 million of Petroleum Inspection Revenue Bonds, and \$265.0 million of Environmental Improvement Revenue Bonds.

	Governmental Activities		Business-Type Activities		Total	
	2018	2017	2018	2017	2018	2017
General obligations:						
Bonds and long-term notes	\$6,478.1	\$6,190.4	\$1,685.4	\$1,620.5	\$8,163.5	\$7,810.8
Annual appropriation bonds	3,044.0	3,113.9	--	--	3,044.0	3,113.9
Revenue bonds	2,386.8	2,314.7	265.0	362.0	2,651.8	2,676.7
Totals	\$11,908.9	\$11,618.9	\$1,950.4	\$1,982.5	\$13,859.2	\$13,601.4

Article VIII of the Wisconsin Constitution and Wis. Stat. Sec. 18.05 limit the amount of general obligation bond debt the State can contract in total and in any calendar year. In total, debt cannot exceed five percent of the value of all taxable property in the State. The amount of debt contracted in any calendar year is limited to the lesser of three-quarters of one percent of the aggregate value of taxable property or five percent of the aggregate value of taxable property less net indebtedness at January 1.

At June 30, 2018, State of Wisconsin general obligation fixed rate bonds had a rating of AA+ from Fitch Ratings, AA+ from Kroll Bond Rating Agency, Aa1 from Moody's Investors Services, and AA from Standard and Poor's Rating Services. General obligation variable notes had a rating of F1+ from Fitch Investors Services, L.P, P-1 from Moody's, and A-1+ from Standard and Poor's Corporation.

Detailed information about the State's long-term debt activity is presented in Note 11 to the financial statements.

INFRASTRUCTURE -- MODIFIED APPROACH

The State reports infrastructure (i.e., roads, bridges, and buildings considered an ancillary part of roads) as capital assets. Infrastructure assets exclude right-of-way costs. The State has elected to report its infrastructure assets (11,200 centerline miles of roads and 5,200 bridges with a combined value of \$17.0 billion) using the modified approach. Under this method, infrastructure assets are not required to be depreciated if the State manages its eligible infrastructure assets using an asset management system designed to maintain and preserve these assets at a condition level established and disclosed by the State.

All infrastructure assets constructed prior to July 1, 2000 have been recorded at estimated historical cost. Historical cost was determined by calculating current costs of a similar asset and deflating that cost, using the Federal Highway Administration's composite index for federal-aid highway construction, to the estimated average construction date. All infrastructure assets constructed after July 1, 2000 have been recorded at historical cost.

In order to adequately serve the traveling public and support the State economy, it is the State's policy to ensure at least 85 percent of the state-owned roads and bridges are in good or fair condition. As of June 30, 2018, 92.6 percent of the roads and 97.0 percent of bridges were in good or fair condition, consistent with State policies. This compares to 92.6 percent of the roads and 96.9 percent of bridges as of June 30, 2017.

For the fiscal year ended June 30, 2018, actual maintenance and preservation costs for the State's road network were \$616.7 million, or \$131.3 million less than the estimated amount. On the same date, actual maintenance and preservation costs for the State's bridge network were \$89.9 million, or \$2.2 million less than the estimated amount. In developing estimated costs at the beginning of the fiscal year, it is difficult to predict the types of projects that will actually incur costs during the year. In addition, the State of Wisconsin, Department of Transportation's multi-year contracting process, allowing encumbrances to carry forward, makes a comparison of actual to estimate amounts difficult since expenditures for the current year may have been budgeted and committed to a project in prior years.

ECONOMIC FACTORS

During calendar year 2017, the Wisconsin economy continued its strong expansion.

Wisconsin employment continued to grow throughout 2017. According to the federal Bureau of Labor Statistics, total nonfarm employment in Wisconsin increased 1.4 percent in 2015, 1.2 percent in 2016 and 0.6 percent during 2017. This performance generally followed national employment trends. Nationally, employment grew 2.1 percent in 2015, 1.8 percent in 2016 and 1.6 percent in 2017. Wisconsin employment growth is somewhat constrained due to a lower unemployment rate and a slower overall population growth than the nation as a whole.

More recently, Wisconsin's growth in employment has slightly accelerated along with national employment growth. Between September 2017 and September 2018, Wisconsin employment has increased 1.4 percent. Nationally, employment is up 1.7 percent over the same period, in line with 2017 employment growth. In addition, Wisconsin's seasonally adjusted unemployment rate in September 2018 was 3.0 percent, well below the 3.7 percent national unemployment rate.

Reflecting the continuing expansion, Wisconsin's state nominal gross domestic product increased 3.1 percent in 2017, tracking national growth of 4.1 percent. Wisconsin's 2017 growth followed growth rates of 4.3 percent and 3.4 percent in 2015 and 2016, respectively. These figures compare with the 50-state total gross domestic product increases of 4.0 percent in 2015 and 2.8 percent in 2016. Since 2007, Wisconsin's gross domestic product increased by a similar magnitude as the country as a whole with 33.0 percent cumulative growth versus 33.9 percent nationally.

Steady growth in output has spurred gains in personal income. Wisconsin personal income grew 4.1 percent, 2.1 percent and 3.6 percent in 2015, 2016 and 2017, respectively. Nationally, personal income grew 4.9 percent, 2.6 percent and 4.4 percent in the same years. On a per capita basis, Wisconsin's income performance is similar to the nation's. Per capita income in Wisconsin increased by 4.0 percent, 1.8 percent and 3.2 percent in 2015, 2016 and 2017, respectively. This compares to growth of 4.1 percent, 1.8 percent and 3.6 percent in the same years nationally. Relative to the national average, Wisconsin per capita income has remained in approximately the same range for the past three years at 95.2 percent, 95.2 percent and 94.8 percent of the national average in 2015, 2016 and 2017, respectively.

Wisconsin's statewide total property value increased again in 2018 for the fifth straight year following five years of declines from 2009 through 2013. The recovery in values has been broad-based, reflecting improvements in all major sectors. In 2018, total property values increased 4.5 percent, with residential property value growing at 5.1 percent. In addition, commercial real estate values grew 6.8 percent and manufacturing values grew 4.5 percent. Manufacturing values have now increased for seven consecutive years.

CONTACTING THE STATE'S FINANCIAL MANAGEMENT

This financial report is designed to provide Wisconsin's citizens, taxpayers, customers, investors and creditors with a general overview of the State's finances and to demonstrate the State's accountability for the money it receives. Questions about this report or requests for additional financial information should be addressed to: State of Wisconsin, State Controller's Office, 101 E. Wilson Street, 5th Floor, Madison, WI 53707 or by email to: DOAWebMaster@wi.gov.

Some state agencies, such as the State of Wisconsin Investment Board, Department of Employee Trust Funds and the University of Wisconsin, issue stand-alone audited financial statements. The information contained in those statements may vary from this document due to scope and application of generally accepted accounting principles. Questions about how to obtain the separately issued financial statements should be directed to individual agencies or to the State Controller's Office.

The State's component units issue their own separate audited financial statements. These statements may be obtained by directly contacting the component unit through their administrative offices identified in Note 1-B.

Balance Sheet - Governmental Funds
June 30, 2018

(Continued)

**Total
Governmental**

Reconciliation to the Statement of Net Position:

Total Fund Balances - Governmental Funds (from previous page) \$ 1,341,812

Capital assets used in governmental activities are not financial resources and, therefore, are not reported in the funds:

Infrastructure	16,955,242	
Other Capital Assets	8,685,219	
Accumulated Depreciation	(1,680,164)	
		<u>23,960,297</u>

Other long-term assets and deferred outflows and inflows of resources that are not available to pay for current period expenditures and, therefore, are not recognized in the funds. 507,900

Deferred outflows of resources used to accumulate decreases in fair values of hedging derivatives that are not reported in the governmental funds. 107,902

Derivative instruments (interest rate swaps) that also are not reported in the governmental funds. (107,902) 0

Some of the State's revenues will be collected after year-end but are not available soon enough to pay for the current period's expenditures and, therefore, are not recognized in the funds. 278,425

Internal service funds are used by management to charge the costs of certain activities, such as telecommunications and insurance, to individual funds. The assets and liabilities of the internal service funds are included in governmental activities in the Statement of Net Position. 16,838

Long-term liabilities, including bonds payable, are not due and payable in the current period and, therefore, are not reported in the fund statements. These liabilities, however, are included in the Statement of Net Position.

Revenue Bonds Payable	(2,255,665)	
Appropriation Bonds Payable	(3,043,979)	
General Obligation Bonds and Notes Payable	(6,105,940)	
Accrued Interest on Bonds	(60,405)	
Capital Leases	(67,625)	
Compensated Absences	(152,011)	
Pollution Remediation	(5,725)	
Claims and Judgments	(479)	
Other Postemployment Benefits Liability	(482,351)	
		<u>(12,174,180)</u>

Net Position of Governmental Activities as reported on the Statement of Net Position (See page 23) \$ 13,931,092

The notes to the financial statements are an integral part of this statement.

**Statement of Revenues, Expenditures, and Changes in Fund Balances -
Governmental Funds
For the Fiscal Year Ended June 30, 2018**

(Continued)

	Total Governmental
Reconciliation to the Statement of Activities:	
Net Change in Fund Balances (from previous page)	\$ 930,155
Inventories, which are recorded under the purchases method for governmental fund reporting, are reported under the consumption approach on the Statement of Activities. As a result of this change, the Increase (Decrease) in Reserve for Inventories on the fund statement has been reclassified as functional expenses on the government-wide statement.	(2,715)
Governmental funds report the acquisition or construction of capital assets as expenditures, while governmental activities report depreciation expense to allocate the cost of these assets over their estimated useful life. Donated assets are set up at acquisition value with a corresponding amount of revenue recognized. In the current period, these amounts are:	
Capital Outlay/Functional Expenditures	534,600
Depreciation Expense	(114,434)
Grants and Contributions (Donated Assets)	<u>180</u>
	420,346
Transfers of capital assets between governmental and business-type activities results in the movement of those assets on the Statement of Net Assets and corresponding recognition of the related transfer in/out on the Statement of Activities.	972
In the Statement of Activities, only the gain/(loss) on the sale/disposal of capital assets is reported, while in the governmental funds, any proceeds from the sale increases financial resources. Thus, the change in net position differs from the change in fund balance by the cost of the capital assets sold/disposed.	(76,814)
Revenues in the Statement of Activities that do not provide current financial resources are not reported as revenues in the funds.	15,307
Bond proceeds provide current financial resources to governmental funds, but issuing debt increases long-term liabilities in the Statement of Net Position. Repayment of bond principal is reported as an expenditure in the governmental funds, but the repayment reduces long-term liabilities in the Statement of Net Position.	
Bonds Issued	(1,572,543)
Payments to Refunding Bond Escrow Agent	1,014,508
Repayment of Bond Principal	605,401
Bond Premium	(301,018)
Prepaid Bond Insurance Costs (Amortization)	<u>(16)</u>
	(253,668)
Some expenses reported in the Statement of Activities do not require the use of current financial resources and, therefore, are not reported as expenditures in governmental funds.	
Net Decrease (increase) in Accrued Interest	93,621
Decrease (increase) in Capital Leases	5,413
Decrease (increase) in Compensated Absences	(3,434)
Decrease (increase) in Pollution Remediation Liabilities	2,257
Decrease (increase) in Claims and Judgments	77
Change in net pension assets, net pension liabilities, and pension-related deferred outflows and inflows of resources	(49,502)
Decrease (increase) in Postemployment Benefit Liabilities	<u>(35,856)</u>
	12,575
Internal service funds are used by management to charge the costs of certain activities, such as insurance and telecommunications to individual funds. The net revenue (expense) of the internal service funds is reported with governmental activities.	<u>9,276</u>
Changes in Net Position of Governmental Activities as reported on the Statement of Activities (See page 25)	\$ 1,055,434

The notes to the financial statements are an integral part of this statement.

Notes To The Financial Statements

NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Basis of Presentation

The accompanying basic financial statements have been prepared in conformity with generally accepted accounting principles (GAAP) for governments as prescribed by the Governmental Accounting Standards Board (GASB).

B. Financial Reporting Entity

For GAAP purposes, the State of Wisconsin includes all funds, elected offices, departments and agencies of the State, as well as boards, commissions, authorities and universities. The State has also considered all potential "component units" for which it is financially accountable, and other affiliated organizations for which the nature and significance of their relationship, including their ongoing financial support, with the State are such that exclusion would cause the State's financial statements to be misleading or incomplete.

The decision to include a potential component unit in the State's reporting entity is based on the criteria set forth in GASB Statement No. 14, *The Financial Reporting Entity*, GASB Statement No. 39, *Determining Whether Certain Organizations Are Component Units*, an amendment of GASB Statement No. 14, and GASB Statement No. 61, *The Financial Reporting Entity: Omnibus*, an amendment of GASB Statements No. 14 and No. 34. GASB Statement No. 14 criteria include the ability to appoint a voting majority of an organization's governing body and (1) the ability of the State to impose its will on that organization or (2) the potential for the organization to provide specific financial benefits to, or impose specific financial burdens on, the State. GASB Statement No. 39 provisions relate to separately legal, tax-exempt organizations and include: (1) the economic resources received or held are entirely or almost entirely for the direct benefit of the State, (2) the State is entitled to, or has the ability to otherwise access, a majority of the economic resources received or held by the separate organization, and (3) the economic resources received or held by an individual organization that the State is entitled to, or has the ability to otherwise access, are significant to the State. GASB Statement No. 61 modifies certain requirements for inclusion in the financial reporting entity, especially in regards to the fiscal dependency criterion where a financial benefit or burden relationship is now required. It also amends the "blending" criteria for component units and clarifies the reporting of equity interests in legally separate organizations.

Based upon the application of the criteria contained in GASB Statement No. 14, as amended by GASB Statement No. 39, the

Wisconsin Public Broadcasting Foundation, Inc. is reported as a blended component unit; and the Wisconsin Housing and Economic Development Authority, the Wisconsin Health Care Liability Insurance Plan, the University of Wisconsin Hospital and Clinics Authority, the Wisconsin Economic Development Corporation and the University of Wisconsin Foundation, are presented as discrete component units, as discussed below.

Complete financial statements of the individual component units that issue separate statements can be obtained from their respective administrative offices:

Blended Component Unit

Blended component units are entities that are legally separate from the State, but are so intertwined with the State that they are, in substance, the same as the State. The blended component unit serves or benefits the primary government. They are reported as part of the State and blended into the appropriate funds.

Wisconsin Public Broadcasting Foundation, Inc. – The Wisconsin Public Broadcasting Foundation, Inc. (Foundation), created in 1983 by the Wisconsin Legislature, is a private, non-stock, nonprofit Wisconsin Corporation, wholly owned by the Wisconsin Educational Communications Board (ECB), a unit of the State. The Foundation solicits funds in the name of, and with the approval of, the ECB. The Foundation's funds are managed by a five-member board of trustees consisting of the executive director of the ECB and four members of the ECB board. The Foundation is reported as a special revenue fund.

Discretely Presented Component Units

Discretely presented component units are entities which are legally separate from the State, but are financially accountable to the State, whose relationship with the State is such that exclusion would cause the State's financial statements to be misleading or incomplete. The Wisconsin Housing and Economic Development Authority, the Wisconsin Health Care Liability Insurance Plan, the University of Wisconsin Hospital and Clinics Authority, the Wisconsin Economic Development Corporation and the University of Wisconsin Foundation are reported in a separate column and in separate rows in the government-wide statements to emphasize that they are legally separate.

Wisconsin Housing and Economic Development Authority – The Wisconsin Housing and Economic Development Authority (Authority) was established by the Wisconsin Legislature in 1972 to help meet the housing needs of Wisconsin's low and moderate income citizens. The State has significantly expanded the scope of services of the Authority by adding programs that include financing for farmers and for economic development projects. While the Authority receives no State tax dollars for its bond-supported programs and the State is not liable on bonds the Authority issues, the State has the ability to impose its will on the Authority through legislation. The State appoints the Authority's Board. The Authority reports on a June 30 fiscal year-end.

Wisconsin Health Care Liability Insurance Plan – The Wisconsin Health Care Liability Insurance Plan (Plan) was established by rule of the Commissioner of Insurance of the State of Wisconsin to provide health care liability insurance and liability coverage normally incidental to health care liability insurance to eligible health care providers in the State. Eight out of 13 members of the Board of Directors are appointed by the Governor, and the State

has the ability to impose its will upon the Plan. The Plan reports on a fiscal year ended December 31.

University of Wisconsin Hospital and Clinics Authority – The University of Wisconsin Hospital and Clinics Authority (Hospital) is a not-for-profit academic medical center. The Hospital operates an acute-care hospital with 566 beds, numerous specialty clinics, and six intensive care units with a total of 83 beds, and it provides comprehensive health care to patients, education programs, research and community service. Prior to June 1996, the Hospital was a unit of the University of Wisconsin-Madison. In June 1996, in accordance with legislation enacted by the State Legislature, the Hospital was restructured as a Public Authority, a public body corporate and politic created by State statutes. The State appoints a majority of the Hospital's Board of Directors and a financial benefit/burden relationship exists between the Hospital and the State. The Hospital reports on a June 30 fiscal year-end.

The legislation that created the Hospital Authority also provided, among other things, for the Board of Regents of the University of Wisconsin System to execute various agreements with the Hospital. These agreements include an Affiliation Agreement, a Lease Agreement, a Conveyance Agreement and a Contractual Services Agreement and Operating and Service Agreement.

The Affiliation Agreement requires the Hospital to continue to support the educational, research and clinical activities of the University of Wisconsin-Madison, which are administered by the Hospital. Under the terms of a Lease Agreement, the Hospital leases facilities which were occupied by the Hospital as of June 29, 1996. Under a Conveyance Agreement, certain assets and liabilities related to the Hospital were identified and transferred to the Hospital effective July 1, 1996. Subject to the Contractual Services Agreement and Operating and Service Agreement between the Board of Regents and the Hospital, the two parties have entered into contracts for the continuation of services in support of programs and operations.

Wisconsin Economic Development Corporation – The Wisconsin Economic Development Corporation (WEDC) is a legally separate body corporate and politic. The WEDC's primary purpose is economic development activities in the State. The State appoints a majority of the WEDC's Board, has the ability to impose its will on the WEDC, and a financial benefit/burden relationship exists. The WEDC reports on a fiscal year ended June 30.

University of Wisconsin Foundation – The University of Wisconsin Foundation (the Foundation) is a legally separate, tax-exempt component unit of the State. The Foundation acts primarily as a fund-raising organization to supplement the resources that are available mostly to the University of Wisconsin-Madison (UW-Madison) as well as several other units of the University of Wisconsin System in support of its programs. These include scientific, literary, athletic and educational program purposes. The University of Wisconsin System is reported as an enterprise fund

of the State. Although the State does not control the timing or amount of receipts from the Foundation, the majority of resources, or income thereon, that the Foundation holds and invests, are restricted to the activities of the UW-Madison by the donors. Because these restricted resources held by the Foundation can only be used by, or for the benefit of, the UW-Madison and several other units of the University of Wisconsin System, the Foundation is considered a component unit of the State. The Foundation reports on a fiscal year ended June 30.

Related Organizations

These related organizations are excluded from the reporting entity because the State's accountability does not extend beyond appointing a voting majority of the organization's board members. Financial statements are available from the respective organizations.

Wisconsin Health and Educational Facilities Authority – a public body politic and corporate that provides financing for capital expenditures and refinancing of indebtedness for Wisconsin health care and educational institutions.

Bradley Center Sports and Entertainment Corporation – a public body politic and corporate that operates the Bradley Center.

Fox River Navigational System Authority – created under Chapter 237 as a public body corporate and politic to oversee the Fox River navigational system after the federal government (the U.S. Army Corps of Engineers) transferred the system to the State.

C. Government-wide and Fund Financial Statements

The *government-wide* financial statements consist of the statement of net position and the statement of activities.

These statements report information on all activities, except for fiduciary activities, of the primary government and its component units. The statement of net position and the statement of activities distinguish between the governmental and business-type activities of the State. Governmental activities are generally financed through taxes, intergovernmental revenues and other nonexchange revenues. Business-type activities are generally financed in whole or in part by fees charged to external parties for goods and services. The focus of the government-wide statements is the primary government. A separate column on the statement of net position and the statement of activities reports activities for all discretely presented component units.

The *fund* financial statements provide detailed information on all governmental, proprietary and fiduciary funds. Separate columns are presented for all major governmental and enterprise funds. Nonmajor governmental and enterprise funds are aggregated and presented as a single column on the respective governmental or

proprietary statements. Internal service funds are exempt from the major fund reporting requirements and are aggregated and ultimately reported as a single column on the proprietary statements. Fiduciary funds are also exempt from major fund reporting and are aggregated by fund type and ultimately reported as single columns on the fiduciary statements.

D. Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The *government-wide* statement of net position and statement of activities, as well as the *proprietary and fiduciary fund* statements, are reported using the economic resources measurement focus and the accrual basis of accounting. With this measurement focus, all assets, deferred outflows of resources, liabilities, and deferred inflows of resources associated with the operation of these funds are included on the statement of net position. Under the accrual basis, revenues are recorded when earned and expenses are recorded when the related liability is incurred.

In the University of Wisconsin System's enterprise fund, revenues and expenses of an academic term that spans two fiscal years are recognized in two years based on a proration of summer session days.

In reporting the financial activity of its enterprise funds and business-type activities, the State applies all applicable GASB pronouncements.

Most of the funds included in the State's Comprehensive Annual Financial Report are presented on a fiscal year ended June 30. However, because funds of the Department of Employee Trust Funds (DETF) are administered on a calendar year basis, they are presented on a fiscal year ended December 31. This may result in GASB standards being implemented in different fiscal years for the DETF GAAP funds. Funds reported as of December 31 include: Wisconsin Retirement System, Accumulated Sick Leave, Duty Disability, Reimbursed Employee Expense, Local Retiree Life Insurance, Retiree Life Insurance, Milwaukee Retirement System, Retiree Health Insurance, Local Retiree Health Insurance, Income Continuation Insurance, Health Insurance, and Life Insurance.

As a result of the differences in timing, transactions between funds with different fiscal year ends may result in inconsistencies in amounts reported as due to/due from other funds or as interfund transfers. Similar differences may occur in amounts reported as due to/from component units.

The University of Wisconsin Foundation and Wisconsin Health Care Liability Insurance Plan are reported as component units. The Foundation financial statements are prepared using accounting standards promulgated by the Financial Accounting Standards Board as they apply to not-for-profit corporations. The Plan financial statements are prepared using prescribed statutory accounting practices included in the National Association of

Insurance Commissioner's Accounting Practices and Procedures Manual. Statutory accounting practices vary somewhat from United States GAAP but are expected to be immaterial.

Governmental fund financial statements are accounted for using the current financial resources measurement focus. With this measurement focus, only current assets and current liabilities generally are included on the balance sheet. Operating statements of these funds present increases (i.e., revenues and other financing sources) and decreases (i.e., expenditures and other financing uses) in net available financial resources.

Governmental funds are reported on the modified accrual basis of accounting. This basis of accounting recognizes revenues generally when they become measurable and available to pay current reporting period liabilities. For this purpose, the State considers tax revenues to be available if they are collected within 60 days of the end of the current fiscal year end. Other revenues are considered to be available if received within one year after the fiscal year end except for tobacco settlement revenues for which just one-half of revenues expected to be received within one year are recognized. Material revenue sources susceptible to accrual include individual and corporate income taxes, sales taxes, public utility taxes, motor fuel taxes and federal revenues.

Expenditures and related liabilities are recognized when obligations are incurred as a result of the receipt of goods and services. However, expenditures related to debt service, compensated absences, and claims and judgments, are recorded only when payment is due.

The State reports the following major funds:

Major Governmental Funds

- *General Fund* – the primary operating fund of the State, accounts for all financial transactions except those required to be accounted for in another fund.
- *Transportation Fund* – a special revenue fund, accounts for the proceeds from motor fuel taxes, vehicle registrations, licensing fees, and federal and local governments which are used to supply and support safe, efficient and effective transportation in Wisconsin.
- *Capital Improvement Fund* - a capital projects fund, accounts for the proceeds received from general obligation bonds and notes, and associated interest earnings. Resources of the fund are used for the acquisition or construction of major capital facilities and for repair and maintenance projects.

Major Enterprise Funds

- *Injured Patients and Families Compensation Fund* – accounts for the program to provide excess medical malpractice insurance for Wisconsin health care providers. The revenues to finance this insurance are primarily derived from assessments charged to health care providers.
- *Environmental Improvement Fund* – accounts for financial resources generated and used for clean water projects. Federal capitalization grants, interest earnings, revenue bond proceeds, and general obligation bond proceeds are its primary funding sources.
- *University of Wisconsin System Fund* – accounts for the 13 universities, 13 two-year colleges, the University of Wisconsin Extension and System Administration.
- *Unemployment Reserve Fund* – accounts for unemployment contributions made by employers, federal program receipts, benefit payment recoveries and unemployment benefits paid to laid off workers in the State.

In addition, the State reports the following fund types:

Governmental Funds

- *Special Revenue Funds* – account for and report the proceeds of specific revenue sources that are restricted or committed to expenditure for specified purposes other than debt service or capital projects. Examples include the Conservation Fund and the Petroleum Inspection Fund.
- *Debt Service Funds* – account for and report financial resources that are restricted, committed, or assigned to expenditure for principal and interest. Financial resources that are being accumulated for future principal and interest are also reported in debt service funds.
- *Capital Projects Funds* – account for and report financial resources that are restricted, committed or assigned to expenditure for capital outlays, including the acquisition or construction of capital facilities and other capital assets (other than those financed by proprietary funds or that will be held in trust for individuals, private organizations, or other governments).
- *Permanent Funds* – account for and report resources that are restricted to the extent that only earnings, and not principal, may be used for purposes that support the State's programs – that is, for the benefit of the State or its citizenry.

Proprietary Funds

- Enterprise Funds – account for the activities for which fees are charged to external users for goods or services. Examples include the Lottery Fund and the Veterans Trust Fund.
- *Internal Service Funds* – account for the operations of State agencies which provide goods or services to other State units or other governments on a cost-reimbursement basis. These services include technology, fleet management, financial, facilities management, and risk management. Additional goods and services are provided by the inmate work experience program, Badger State Industries.

Fiduciary Funds

- *Pension and Other Employee Benefit Trust Funds* – used to account for resources that are required to be held in trust for members and beneficiaries for public employee retirement or other benefit plans e.g. Wisconsin Retirement System.
- *Investment Trust Funds* – account for assets invested on a commingled basis by the State on behalf of other governmental entities e.g. local government pooled investments.
- *Private-purpose Trust Funds* – account for all other trust arrangements which benefit individuals, private organizations, or other governments e.g. the state-sponsored college savings program.
- *Agency Funds* – account for those assets for which the State acts solely in a custodial capacity e.g. the collection and disbursement of court-ordered child support payments.

Amounts reported as program revenues on the government-wide statement of activities include (a) charges for services – amounts received from customers or applicants who purchase, use or directly benefit from the goods, services or privileges provided by the State; including interest earnings from various loan funds/component units, (b) program-specific operating grants, contributions, and restricted interest, and (c) program-specific capital grants, contributions, and restricted interest. General revenues consist of taxes and all other revenues that do not meet the definition of program revenues. Special items, if any, are significant transactions or events within the control of management that are either unusual in nature or infrequent in occurrence.

As a general rule, the effect of interfund activity has been eliminated from the government-wide financial statements. This includes all internal service fund activity, as well as other internal allocations. Exceptions to this general rule are certain charges between various functions of the government, whose elimination would distort the direct costs and program revenues reported for the various functions concerned.

The revenues and expenses shown on the proprietary fund statements are identified as either operating or nonoperating.

Operating revenues and expenses generally result from providing goods and services in connection with a proprietary fund's primary mission. The State's enterprise funds are involved in many diverse fields including patient care, insurance programs, loan programs, the University of Wisconsin System, employee benefit plans, and the lottery. The internal service funds provide services and goods to other State agencies and departments.

A significant portion of operating revenues for the proprietary funds is recorded under charges for goods and services. In the case of the State's loan program enterprise funds, investment and interest income is an important component of operating revenue. Operating revenues of the University of Wisconsin include tuition and fees, certain grants and contracts resulting from exchange transactions, and sales and services of educational activities and auxiliary enterprises. In regards to the employee benefit plans, the primary operating revenue source is participant and employer contributions. Operating expenses for the proprietary funds include the costs of sales and services, benefit expenses, administration expenses and depreciation on capital assets. All revenues and expenses not related to a fund's primary purpose are reported as nonoperating.

When both restricted and unrestricted resources are available for use, it is the State's policy to use restricted resources first, then unrestricted resources as they are needed.

GASB Standards Implemented During the Fiscal Year

Effective for Fiscal Year 2018, the State implemented Governmental Accounting Standards Board (GASB) Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*. This statement establishes standards of accounting and financial reporting for defined benefit other postemployment benefits (OPEB) and defined contribution OPEB that are provided to the employees of state and local governmental employers.

The State also implemented GASB Statement No. 74, *Financial Reporting for Postemployment Benefit Plans Other than Pension Plans*. This statement establishes reporting standards for other postemployment benefits included in the general purpose external financial reports of state and local governmental OPEB plans.

E. Assets, Deferred Outflows of Resources, Liabilities, Deferred Inflows of Resources, and Net Position/Fund Balances

1. Cash and Cash Equivalents

Cash balances of most funds are deposited with the Department of Administration (DOA) where the available balances beyond immediate needs are pooled in the State Investment Fund for short-term investment purposes. Balances pooled are restricted to legally stipulated investments valued consistent with GASB Statement No. 72, *Fair Value Measurement and Application*. Cash balances not controlled by DOA may be invested where permitted by statute.

Cash and cash equivalents, reported on the balance sheet and statement of cash flows, include bank accounts, petty cash, cash in transit, short-term investments with an original maturity of three months or less such as certificates of deposit, money market certificates, repurchase agreements and individual funds' shares in the State Investment Fund.

GASB Statement No. 40, *Deposit and Investment Risk Disclosures*, requires disclosure of risks associated with deposit and investment balances and the policies applied to mitigate such risks. Specific disclosures are included in Note 5, Deposits and Investments.

2. Investments

The State may invest in direct obligations of the United States and Canada, securities guaranteed by the United States, certificates of deposit issued by banks in the United States and solvent financial institutions in the State, commercial paper and nonsecured corporate notes and bonds, bankers acceptances, participation agreements, privately placed bonds and mortgages, common and preferred stock and other securities approved by applicable sections of the Wisconsin Statutes, bond resolutions, and various trust indentures (see Note 5 to the financial statements).

Investments of the primary government are reported at fair value consistent with the provisions of GASB Statement No. 72, *Fair Value Measurement and Application*. Typically, fair value information is determined using quoted market prices. However, when quoted market prices are not available for certain securities, fair values are estimated through techniques such as discounted future cash flows, matrix pricing and multi-tiers.

In some instances, securities are reported at cost. Certain non-public or closely held stocks are carried at cost since no independent quotation is available to price these securities. Further, certain investment agreements are reported on a cost basis because the State cannot readily determine whether these agreements meet the definition of interest-earning investment

contracts as defined by GASB Statement No. 31. However, the impact on the financial statements is immaterial.

Under Wisconsin Statutes, the investment earnings of certain Permanent Funds are assigned to other funds. The following table shows the funds earning the investment income and the ultimate recipients of that income:

Fund Generating Investment Income	Fund Receiving Investment Income
Agricultural College	University of Wisconsin System
Normal School	General Fund and University of Wisconsin System
University	University of Wisconsin System
Benevolent	General Fund

3. Mortgage and Other Loans

Mortgage loans of the Veterans Mortgage Loan Repayment Fund and the Veterans Trust Fund programs, business-type activities, are stated at the outstanding loan balance less an allowance for doubtful accounts.

4. Forestation State Tax

2017 Wis. Act 59 (the Budget Act) ended the forestry mill tax, the only property tax that had been levied by the State. The proceeds of the tax had been paid to the Conservation Fund. The tax ended effective with the January 1, 2017 property tax assessments (property taxes levied in 2017 for payment in 2018).

5. Interfund Assets/Liabilities

During the course of operations, numerous transactions occur between individual funds for goods provided or services rendered. The balance sheet or statement of net position for proprietary and fiduciary funds classifies these receivables and payables as "Due from Other Funds" or "Due to Other Funds." Short-term interfund loans are classified as "Interfund Receivables" or "Interfund Payables." Long-term interfund loans are classified as "Advances to Other Funds" and "Advances from Other Funds".

Balances that exist between the primary government and component units are classified as "Due to/from Primary Government" and, correspondingly, "Due to/from Component Units".

Amounts reported in the funds as interfund assets/liabilities are eliminated in the governmental and business-type columns of the Statement of Net Position, except for the net residual amount due between governmental and business-type activities which is shown as internal balances.

6. Inventories and Prepaid Items

Inventories of governmental and proprietary funds are valued at cost, which approximates market, using the first-in/first-out, last in/first out, or weighted-average method. The costs of governmental fund-type inventories are recorded as expenditures when purchased rather than when consumed.

Inventories of the University of Wisconsin System held by central stores are valued at average cost, fuels are valued at market, and other inventories held by individual institutional cost centers are valued using a variety of cost flow assumptions that, for each type of inventory, are consistently applied from year to year.

Prepaid items reflect payments for costs applicable to future accounting periods.

The fund balances of governmental funds are reported as nonspendable for inventories and prepaid items, except in cases where prepaid items are offset by unearned revenues, to indicate that these accounts do not represent expendable available financial resources.

7. Capital Assets

Capital assets, which include property, plant, equipment, intangibles, land and infrastructure assets (roads, bridges, and buildings considered an ancillary part of roads), are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Assets of the primary government, other than infrastructure and land purchased for the construction of infrastructure assets, are capitalized when they have a unit cost of \$5,000 or more (except for a collection of library resources that must have a cumulative value equal to or greater than \$5.0 million and software purchased by the University of Wisconsin System) and a useful life of more than one year. In addition, internally generated intangible assets are capitalized only if costs are equal to or are greater than \$1.0 million.

Purchased or constructed capital assets are valued at cost or estimated historical cost if actual historical cost is not practicably determinable. Donated capital assets are recorded at their acquisition value at the time received.

The State has elected to report infrastructure assets (roads, bridges and buildings considered an ancillary part of roads) using the modified approach. Under this method infrastructure assets are not required to be depreciated if the State manages its eligible infrastructure assets using an asset management system designed to maintain and preserve its infrastructure assets at a condition level established and disclosed by the State. All infrastructure assets constructed prior to July 1, 2000 have been recorded at estimated historical cost which was determined by calculating the current cost of a similar asset and deflating that cost using the Federal Highway Administration's composite index for federal aid

highway construction to the estimated average construction date. All infrastructure assets constructed after July 1, 2000 have been recorded at historical cost. The costs of maintenance and preservation that do not add to the asset's capacity or efficiency are not capitalized. Interest incurred during construction is not capitalized.

Exhaustible capital assets of the primary government generally are depreciated on the straight-line method over the asset's useful life. Select buildings of the University of Wisconsin System are depreciated using the componentized method over the estimated useful life of the related assets. Depreciation expense is recorded in the government-wide financial statements, as well as in the proprietary fund statements. There is no depreciation recorded for land, construction in process, and infrastructure. In addition, depreciation is not recorded for certain other capital assets including the State Capitol, Executive Residence and associated furnishings, and the Historical Society library collection. Generally, estimated useful lives are as follows:

Buildings and improvements	6 - 40 years
Equipment, machinery and furnishings	3 - 15 years
Library Holdings	15 years

Collections of works of art, historical treasures, and similar assets, which are on public display, used in furtherance of historical education, or involved in advancement of artistic or historical research, are not capitalized unless these collections were already capitalized at June 30, 1999. Collections range from memorabilia on display in the Wisconsin Veterans Museum, the Wisconsin Historical Society Museum and other museums to buildings such as the Villa Louis Mansion and the Fur Trade Museum located at the Villa Louis historical site. In addition, works of art or historical treasures on display in the various State office buildings, as well as statues on display outside the State Capitol, also are not capitalized.

In Fiscal Year 2018, the University of Wisconsin System elected to change the accounting method for library holdings. Library holdings will be treated as a composite asset and depreciated over a 15-year average life. In prior years, those assets were not depreciated. The new accounting method, which was applied prospectively, is common with other peer university systems. The University of Wisconsin System financial statements for Fiscal Year 2018 include a prior period adjustment of \$961.0 million for accumulated depreciation.

8. Restricted and Limited Use Assets

Assets that are required to be held and/or used as specified in Wisconsin statutes, bond indentures, bond resolutions, trustee agreements, board resolutions, and donor specifications have been reported as Restricted and Limited Use Assets.

9. Local Assistance Aids**Municipal and County Shared Revenue Program**

Through the Municipal and County Shared Revenue Program, the State distributes general revenues collected from general State tax sources to municipal and county governments to be used for providing local government services. State statutes require that payment to local governments be made during July and November.

At June 30, 2018, the State was liable to various local governments for unpaid shared revenue aid. To measure the amount of the program allocable to the State's fiscal year, the amount is prorated over portions of recipient local governments' calendar fiscal years that are within the State's fiscal year. The result is that a liability of \$441.7 million representing one-half of the total appropriated amount is reported at June 30, 2018 as Due to Other Governments.

State Property Tax Credit Program

At June 30, 2018, the State was liable to various taxing jurisdictions for the school levy, the first dollar, and the lottery property tax credits paid through the State Property Tax Credit Program.

The school levy tax credit provides property tax relief in the form of State credits on individual property tax bills.

The first dollar tax credit was first established for property taxes levied in 2008, and payable in 2009. This credit is allowed on every taxable real estate parcel containing an improvement in the state.

Under the lottery property tax credit, owners of property used as a primary residence receive a tax credit equal to the school property tax on a portion of the dwelling's value.

State statutes require that payment to local taxing jurisdictions for the school levy and first dollar tax credits be made during July. Although the state property tax credit is calculated on the property tax levy for school purposes, the State's July payment is paid to an administering municipality who treats the payment the same as other tax collections and distributes the collections to the various tax levying jurisdictions (e.g., cities, towns, and school districts).

The portion of the liability payable to school districts for the school levy and first dollar tax credits represents the amount of the July payment earned over the school districts' previous fiscal year ended June 30. Since the entire school districts' portion of the July payment occurs within the State's fiscal year, 100 percent of the July payment relating to the school taxing jurisdictions' levy is reported as a liability at June 30, 2018.

The portion of the liability payable to general government for the school levy and first dollar tax credits represents the amount of the July payment prorated over the portion of the local governments' calendar year which is within the State's fiscal year. The result is

that 50 percent of the July payment based on the general government taxing jurisdictions' levy is reported as a liability at June 30, 2018.

The aggregated State Property Tax Credit Program liability of \$811.0 million is reported in the General Fund as Due to Other Governments. Of that amount, \$700.0 million relates to the school levy tax credit and \$111.0 million relates to the first dollar tax credit.

The lottery property tax credit is accounted for in the Lottery Fund, an enterprise fund that records revenues and expenses on the accrual basis. The State pays municipal treasurers for lottery credits who distribute the moneys to the various taxing jurisdictions. For credits reducing the calendar year 2018 property tax bills, the State made this payment in March 2018. A portion of the State's March payment distributed to the general government taxing jurisdictions applies to their fiscal year that ends on December 31. Therefore, part of the March distribution represents an expense of the State in Fiscal Year 2018, while the remaining portion represents advanced payments. The resulting deferred outflow of resources reported within the Lottery Fund totals \$43.5 million at June 30, 2018.

State Aid for Exempt Computers

The Aid for Exempt Computers compensates local governments for tax base lost due to the property tax exemption for computers, software and related equipment. Aid payments are calculated using a procedure that results in an aid amount equal to the amount of taxes that would be paid if the property were taxable. Payments to local governments are made on the fourth Monday in July.

At June 30, 2018, the State was liable to various local governments and other taxing jurisdictions for unpaid exempt computer aid payments of \$65.7 million.

State Aid for Exempt Personal Property

2017 Wis. Act 59 (the Budget Act) exempted machinery, tools, and patterns, not including such items considered manufacturing property under current law, from the property tax effective with property assessed as of January 1, 2018 (the 2018(19) property tax levy). The Act also created a state aid program administered by DOR to make payments to each local taxing jurisdiction, including tax increment districts, that imposed property taxes on those items that were not manufacturing property in 2017(18). Upon certification by DOR, payments will be made to local taxing jurisdictions on or before the first Monday in May. Under the Act, the first aid payment is scheduled to be made in May 2019.

10. Long-term Debt Obligations

In the government-wide financial statements, and proprietary fund types in the fund financial statements, long-term debt is reported as a liability net of the applicable bond premium or discount. Bond premiums and discounts are deferred and amortized using the

effective interest rate method on a prospective basis beginning in Fiscal Year 2004, except for the annual appropriation bonds that are amortized ratably over the life of the obligations to which they relate.

In the fund financial statements, governmental fund types recognize flows for bond premiums and discounts, as well as issuance costs, during the current period. The face amount of the debt issued is reported as other financing sources. Premiums and discounts are reported as other financing sources and other financing uses, respectively. Issuance costs are reported as other debt service expenditures for governmental fund types, and non-operating expenses for proprietary fund types.

On the government-wide financial statements, bond premiums and discounts related to the Transportation Revenue Bonds and the Petroleum Inspection Fee Obligation Revenue Bonds (which finance programs in a capital projects fund and a special revenue fund, respectively) are amortized ratably over the life of the obligations to which they relate. Results from the use of this method do not vary materially from those that would be obtained by use of the effective interest rate method.

11. Compensated Absences

Consistent with the compensated absences reporting standards of GASB Statement No. 16, *Accounting for Compensated Absences*, an accrual for certain salary-related payments associated with annual leave and an accrual for a certain portion of sick leave is included in the compensated absences liability at year end.

Annual Leave

Full-time employees' annual leave days are credited on January 1 of each calendar year in general at a minimum of 15 or 13 days per year, depending on Fair Labor Standards Act (FLSA) status. There is no requirement to use annual leave. However, unused leave is lost unless approval to carry over the unused portion is obtained from the employing agency. In general, each full-time employee is eligible for four and one-half personal holidays each calendar year, provided the employee is in pay status for at least one day in the year. If a holiday occurs on a Saturday, employees receive leave time proportional to their working status to use at their discretion.

The State's compensated absence liability at June 30 consists of accumulated unpaid annual leave, personal holiday hours, and Saturday/legal hours earned and vested during January through June. The liability is reported in the government-wide, proprietary fund types and fiduciary funds.

Sick Leave

Full-time employees earn sick leave at a rate of five hours per pay period. Unused sick leave is accumulated from year to year without limit until termination or retirement. Accumulated sick leave is not paid. However, at employee retirement the accumulated sick leave

may be converted to pay for the retiree's health insurance premiums. The State accumulates resources to pay for the expected health insurance premiums of retired employees. The portion of the health insurance obligation funded through the sick leave conversion and accumulated resources are presented in the Accumulated Sick Leave Fund, a pension and other employee benefit trust fund.

12. Unearned Revenue

In both the government-wide and fund financial statements unearned revenue represents amounts for which asset recognition criteria have been met, but not revenue recognition criteria. Unearned revenue arises when resources are received by the State before it has a legal claim to them, such as when grant moneys are received prior to the incurrence of qualifying expenditures. In subsequent periods, when revenue recognition criteria are met, or when the State has a legal claim to the resources, the liability for unearned revenue is removed and revenue is recognized.

Unearned revenue of the University of Wisconsin System consists of payments received but not earned at June 30, 2018, primarily for summer session tuition, tuition and room deposits for the next fall term, advance ticket sales for upcoming intercollegiate athletic events, and amounts received from grant and contract sponsors that have not yet been earned under the terms of the agreement.

13. Self-Insurance

Consistent with the requirements of GASB Statement No. 10, *Accounting and Financial Reporting for Risk Financing and Related Insurance Issues*, the State's risk management activities are reported in an internal service fund, and the claims liabilities associated with that fund are reported therein.

The State's policy is generally not to purchase commercial insurance for the risk of losses to which it is exposed. Instead, State management believes it is more economical to manage its own risks internally. The Risk Management Fund, an internal service fund, is used to pay for losses incurred by any State agency and for administrative costs incurred to manage a state-wide risk management program. These losses include damage to property owned by the agencies, personal injury or property damage liabilities incurred by a State officer, agent or employee, and worker's compensation costs for State employees. A limited amount of insurance is purchased to limit the exposure to catastrophic losses. Annually, a charge is allocated to each agency for its proportionate share of the estimated cost attributable to the program per Wis. Stat. Sec. 16.865(8).

14. Deferred Outflows of Resources and Deferred Inflows of Resources

Deferred outflows of resources are a consumption of net position by the government that is applicable to a future reporting period. Deferred inflows of resources are an acquisition of net position by the government that is applicable to a future reporting period. The events associated with the outflows and inflows of resources have already occurred. Under GASB standards, however, the recognition of those outflows and inflows as expenses or expenditures and revenues are deferred until the future periods to which the outflows and inflows are applicable. GASB standards identify circumstances under which deferred outflows of resources and deferred inflows of resources must be reported. The reporting of deferred inflows and outflows are only allowable under those circumstances.

As applicable, the State reports deferred outflows of resources or deferred inflows of resources in the Statement of Net Position for governmental activities and business-type activities and for proprietary and fiduciary fund types as follows:

A decrease or increase in the fair value of derivative instruments classified as effective hedges is presented as a deferred outflow or deferred inflow of resources, respectively, with an off-setting liability or asset, as applicable.

Gains on refunded debt (i.e. the reacquisition price is less than the net carrying amount of the old debt) are reported as deferred inflows, while losses on refunded debt (i.e. the reacquisition price is greater than the net carrying amount of the old debt) are reported as deferred outflows. Both are amortized to interest expense over the remaining life of the old bonds or the life of the new bonds, whichever is shorter.

Differences between expected and actual experience with regard to economic and demographic factors in the measurement of the pension and OPEB liabilities for the State's proportionate share are reported as deferred inflows or deferred outflows of resources. They are amortized using a systematic and rational method over a closed period equal to the average of the expected remaining service lives of all active and inactive employees provided with pensions or OPEBs through the applicable plans.

Changes of assumptions about future economic or demographic factors, or of other inputs in the measurement of the pension or OPEB liabilities for the State's proportionate share, are reported as deferred inflows or deferred outflows of resources. They are amortized using a systematic and rational method over a closed period equal to the average of the expected remaining service lives of all active and inactive employees provided with pensions or OPEBs through the applicable plans.

Differences between projected and actual earnings on the State's proportionate share of pension or OPEB plan investments, if any,

are reported as deferred inflows or deferred outflows of resources and amortized using a systematic and rational method over a closed five-year period.

Changes in the State's proportionate share of the pension or OPEB liabilities since the prior measurement date, and differences between actual and proportionate share of contributions are reported as deferred inflows or deferred outflows of resources. They are amortized using a systematic and rational method over a closed period equal to the average expected remaining service lives of all active and inactive employees provided with pensions or OPEBs through the applicable plans.

Contributions to the pension or OPEB plans from the State subsequent to the measurement date of the pension or OPEB liabilities and before the end of the State's fiscal year end are reported as deferred outflows of resources.

State resources transmitted to an entity before time requirements are met, but after all other eligibility requirements have been met, are reported as a deferred outflow of resources.

Federal or other entities' resources transmitted to the State before time requirements are met, but after all other eligibility requirements have been met, are reported as deferred inflows of resources.

Further, governmental fund types may report deferred inflows of resources for unavailable revenue, such as derived nonexchange revenue transactions (e.g. sales tax, income tax, assessments on earnings and consumption, etc.). These inflows are not deferred in the government-wide financial statements; rather, they are recognized as revenue.

15. Fund Balance Classification and Restricted Net Position**Fund Balance Classification**

In the fund financial statements, governmental funds report fund balance classifications that comprise a hierarchy based primarily on the extent to which the state is bound to honor constraints on the specific purposes for which amounts in those funds can be spent. Fund balance is reported as restricted when constraints placed on the use of the resources are either externally imposed by creditors, grantors, contributors, or laws or regulations of other governments; or, imposed by law through constitutional provisions or enabling legislation.

Amounts that may be used only for specific purposes, pursuant to constraints imposed by passage of a bill by both houses of the legislature that is signed into law by the governor, are reported as committed fund balance. Those committed amounts cannot be used for any other purpose unless a bill passes both houses of the legislature and is signed by the governor to remove or change the specified use. Passage of a bill by both houses of the legislature and signing of the bill by the governor is the highest level action that results in committed fund balance.

Amounts that are constrained by the state's intent to be used for specific purposes, but are neither restricted nor committed, are classified as assigned fund balances. Intent is expressed by state officials to whom the state has delegated the authority to assign amounts to be used for specific purposes. Unassigned fund balance represents fund balance that has not been assigned to other funds and that has not been restricted, committed, or assigned to specific purposes within the general fund. Nonspendable fund balances include amounts that cannot be spent because they are either not in spendable form or are legally or contractually required to be maintained intact.

When both restricted and unrestricted resources are available for use it is the State's policy to use restricted resources first, and then unrestricted as they are needed. The state has not established a policy for use of unrestricted fund balance. Under the provisions of GASB Statement No. 54, *Fund Balance Reporting and Governmental Fund Type Definitions*, if a government does not establish a policy for its use of unrestricted fund balance amounts, committed amounts would be reduced first, followed by assigned amounts, and then unassigned amounts.

Restricted Net Position

Restricted Net Position, presented in the government-wide and proprietary funds statement of net position are reported when constraints placed on use are either (1) externally imposed by creditors (such as through debt covenants), grantors, contributors, or laws or regulations of other governments, or (2) imposed by law through constitutional provisions or enabling legislation. Enabling legislation authorizes the government to assess, levy, charge, or

otherwise mandate payment of resources (from external resource providers) and includes a legally enforceable requirement that those resources be used only for the specific purposes stipulated in the legislation. Unrestricted net position may be used at the State's discretion but may have limitations on use based on State statutes.

This page left intentionally blank.

NOTE 2. DETAILED RECONCILIATION OF THE GOVERNMENT-WIDE AND FUND STATEMENTS**A. Explanation of Differences Between the Balance Sheet – Governmental Funds and the Statement of Net Position**

During the year ended June 30, 2018, the following adjustments and reclassifications were necessary to reconcile the information from the fund-based Balance Sheet – Governmental Funds to the amounts presented in the governmental activities section of the Statement of Net Position (in thousands). The differences result primarily from the long-term economic focus of the Statement of Net Position compared to the current financial focus of the Balance Sheet – Governmental Funds.

	Total Governmental Funds	Long-term Assets and Liabilities (1)	Internal Service Funds (2)	Reclassifications and Eliminations (3)	Total Amount for Statement of Net Position
Assets:					
Cash and Cash Equivalents	\$ 1,647,198	\$ -	\$ 48,285	\$ -	\$ 1,695,483
Investments	631,343	-	-	-	631,343

Total Liabilities	6,303,500	12,282,081	611,054	(235,967)	18,960,669
Deferred Inflows of Resources	278,425	520,116	15,565	-	814,106
Fund Balances/Net Position	1,341,812	12,572,441	16,838	-	13,931,092
Total Liabilities, Deferred Inflows, and Fund Balances/Net Position	\$ 7,923,737	\$ 25,374,639	\$ 643,458	\$ (235,967)	\$ 33,705,867

- (1) Long-term asset and liability differences arise because governmental funds focus only on short-term financing (that is, resources that will be available to pay for current period expenditures). In contrast, the Statement of Net Position has a long-term economic focus and reports on all capital and financial resources.
- (2) The adjustment for internal service funds reflects the reclassification of these funds for the government-wide statement. The assets and liabilities of these funds are reported as proprietary activities on the fund statements, but are included as governmental activities on the Statement of Net Position.
- (3) Various reclassifications are necessary due to the differing level of detail needed on each of the statements. Eliminations are done on the Statement of Net Position to minimize the grossing-up effect on assets and liabilities within the governmental and business-type activities columns of the primary government. The net residual amounts due between governmental and business-type activities are shown as internal balances.

B. Explanation of Differences Between the Statement of Revenues, Expenditures, and Changes in Fund Balances – Governmental Funds and the Statement of Activities

During the year ended June 30, 2018, the following adjustments and reclassifications were necessary to reconcile the information from the fund-based Statement of Revenues, Expenditures, and Changes in Fund Balances – Governmental Funds to the amounts presented in the governmental section of the Statement of Activities (in thousands). The differences result primarily from the long-term economic focus of the Statement of Activities compared to the current financial focus of the Statement of Revenues, Expenditures, and Changes in Fund Balance – Governmental Funds.

	Total Governmental Funds	Long-term Revenues and Expenses (1)	Capital-Related Items (2)
Revenues:			
Taxes			
Income Taxes	\$ 9,444,927	\$ 5,731	\$ -

Capital Outlay	537,336	-	(536,276)
Debt Service:			
Principal	605,401	-	-
Interest and Other Charges	518,449	3,445	-
Total Expenditures/Expenses	28,920,940	81,563	(343,352)
Excess of Revenues Over (Under) Expenditures/Expenses	1,084,731	(66,256)	343,532
Other Financing Sources (Uses):			
Net Transfers	(1,015,445)	-	972
Long-term Debt Issued	1,572,543	-	-
Premium/Discount on Bonds	301,018	-	-
Payments for Refunded Bonds	-	-	-
Payments to Refunding Bond Escrow Agent	(1,014,508)	-	-
Capital Lease Acquisitions	1,817	(1,817)	-
Total Other Financing Sources (Uses)	(154,575)	(1,817)	972
Net Change in Fund Balance/Net Position	930,155	\$ (68,073)	\$ 344,504
Change in Inventories	(2,715)		
Net Change for the Year	\$ 927,440		

- (1) Long-term revenue differences arise because governmental funds report revenues only when they are considered "available," while government-wide statements report revenues when earned. Long-term expense differences arise because governmental funds report operating expenses (including interest) using the modified accrual basis of accounting, while government-wide statements report using the accrual basis of accounting.
- (2) Capital-related adjustments consist of the difference between proceeds for the sales of capital assets and the gain or loss from the sales of capital assets, and from the difference between capital outlay expenditures recorded in the governmental funds and depreciation expense recorded in the government-wide statements.
- (3) The adjustment for internal service funds reflects the elimination of these funds from the government-wide statement, which is accomplished by charging/refunding additional amounts to participating governmental activities to completely offset the internal service funds' cost for the year.

	Internal Service Funds (3)	Long-term Debt Transactions (4)	Eliminations (5)	Revenue/Expense Reclassifications (6)	Total Amount for Statement of Activities

\$	9,276	\$	0	(2,715)	1,055,434
				2,715	-
				\$	(0) \$
					1,055,434

- (4) Long-term debt transaction differences consist of bond proceeds and principal repayments reported as other financing sources and expenditures in governmental funds, but as increases and decreases in liabilities in the government-wide statements.
- (5) Intra-entity activity within the same function is eliminated to remove the grossing up of both direct expenses and program revenues within that category.
- (6) Revenue and expense reclassifications are necessary due to the differing level of detail needed on each of the statements. In addition, the Statement of Activities focuses on program revenue, which has been redefined from the traditional revenue source categories.

NOTE 3. BUDGETARY CONTROL

The legal level of budgetary control for Wisconsin is at the function, agency, program, appropriation-level. Supplemental appropriations require the approval of the Joint Finance Committee of the Legislature. Routine adjustments, such as pay plan supplements and rent increases, are distributed by the Division of Executive Budget and Finance from non-agency specific appropriations authorized by the Legislature. Various supplemental appropriations were approved during the year and have been incorporated into the budget figures.

The budgetary comparison schedule and related disclosures for the General and Transportation funds are reported as Required Supplementary Information. This schedule presents the original budget, the final budget and actual data of the current period. The related disclosures describe the budgetary practices of the State, as well as, provide a detailed reconciliation between the General and Transportation funds' equity balance on the budgetary basis compared to the GAAP basis as shown on the governmental fund statements.

NOTE 4. DEFICIT FUND BALANCE/FUND NET POSITION, RESTRICTED NET POSITION, BUDGET STABILIZATION ARRANGEMENT, MINIMUM FUND BALANCE POLICY, AND FUND BALANCE OF GOVERNMENTAL FUNDS

A. Deficit Fund Balance/Fund Net Position

In addition to the General and Capital Improvement Funds, funds reporting a deficit fund balance or net position at June 30, 2018 are (in thousands):

Special Revenue:	
Dry Cleaner Environmental Response	\$ 5,843
Enterprise:	
Northern Developmental Disabilities Center	11,088
Central Developmental Disabilities Center	819
Local Government Property Insurance	833
Internal Service:	
Risk Management	100,654

B. Restricted Net Position

GASB Statement No. 46, *Net Assets Restricted by Enabling Legislation*, which amends GASB Statement No. 34, *Basic Financial Statements – and Management’s Discussion and Analysis – for State and Local Governments*, provides guidance for determining when net assets have been restricted to a particular use by the passage of enabling legislation and how those net assets should be reported in financial statements when there are changes in the circumstances surrounding such legislation. Net position restricted by enabling legislation was as follows on June 30, 2018 (in thousands):

Governmental Activities:	
Net Position Restricted by Enabling Legislation	\$ 442,760
Business-type Activities:	
Net Position Restricted by Enabling Legislation	882,751

C. Budget Stabilization Arrangement

Wisconsin Statutes 25.60 establishes a stabilization arrangement for monies to be set aside for use if General Fund revenues are less than projected and expenditures exceed budgeted amounts. Wisconsin Statutes 16.518 provides for the automatic transfer of 50.0 percent of the excess of General Fund tax revenues over tax estimates to be deposited into a stabilization appropriation. However, the transfer may not be made if the stabilization balance is at least equal to 5.0 percent of estimated General Fund expenditures for the fiscal year. Further, the transfer may not reduce the General Fund balance below the required statutory balance. In addition to the transfer described, under Wisconsin Statutes 16.72(4) net proceeds from the sale of supplies, materials and equipment are also to be deposited into the stabilization appropriation except as otherwise provided by law.

Wisconsin Statutes 16.50(7) provides that if the secretary of the Department of Administration determines that previously authorized expenditures under the biennial budget act will exceed revenues in the current or forthcoming fiscal year by more than one-half of one percent of the estimated general purpose revenue appropriations for that fiscal year, he or she shall immediately notify the governor, the presiding officers of each house of the legislature and the joint committee on finance. Following such notification, the governor shall submit a bill containing recommendations for correcting the imbalance between projected revenues and authorized expenditures, including a recommendation as to whether moneys should be transferred from the budget stabilization appropriation to the General Fund.

The balance of the budget stabilization arrangement as of June 30, 2018 was \$320.1 million.

D. Minimum Fund Balance

Wisconsin Statutes 20.003(4) establishes a minimum General Fund balance. Under the statutes, no bill directly or indirectly affecting general purpose revenues as defined in Wisconsin Statutes 20.001(2)(a) may be enacted by the legislature if the bill would cause the estimated General Fund balance on June 30 of any fiscal year to be an amount equal to or less than the amount specified for that fiscal year. The minimum required balance for the fiscal year ending June 30, 2018 was \$70.0 million.

E. Fund Balance for Governmental Funds

Governmental funds reported the following categories of fund balance as of June 30, 2018 (in thousands):

	General	Transportation	Capital Improvement	Nonmajor Governmental	Total Governmental
Nonspendable for:					
Inventory, Prepaid and Long-term Receivables	18,576	18,188	-	12,247	49,011
Legal or Contractual Purposes (Permanent Fund Principal)	-	-	-	1,109,534	1,109,534
Restricted for:					
Commerce	34,448	-	-	33	34,480
Education	9,741	-	-	54,839	64,581
Transportation	-	637,693	-	-	637,693
Environmental Resources	5,511	-	-	145,538	151,049
Human Relations and Resources	72,707	-	-	37,010	109,717
General Executive	134,718	-	-	11,506	146,223
Judicial	44	-	-	-	44
Tax Relief and Other General Expenditures	408	-	-	-	408
Intergovernmental - Shared Revenue	-	-	-	4,154	4,154
Debt Service	-	-	-	543,197	543,197
Capital Projects	-	-	-	37,247	37,247
Committed to:					
Commerce	-	-	-	63,402	63,402
Education	-	-	-	477	477
Environmental Resources	-	-	-	92,984	92,984
Human Relations and Resources	-	-	-	22,121	22,121
General Executive	-	-	-	20,327	20,327
Judicial	-	-	-	97	97
Tax Relief and Other General Expenditures	320,054	-	-	-	320,054
Capital Projects	-	-	-	28,785	28,785
Unassigned	(1,849,733)	-	(238,196)	(5,844)	(2,093,773)
Total Fund Balance	(1,253,527)	655,881	(238,196)	2,177,653	1,341,812

NOTE 5. DEPOSITS AND INVESTMENTS

The State maintains a short-term investment "pool", the State Investment Fund, for the State, its agencies and departments, and certain other public institutions which elect to participate. The investment "pool" is managed by the State of Wisconsin Investment Board (the Board) which is further authorized to carry out investment activities for certain enterprise, trust and agency funds. A small number of State agencies also carry out investment activities separate from the Board.

The State of Wisconsin Investment Board also issues separate financial reports for the investments they manage, including the State Investment Fund, and the Wisconsin Retirement System. Copies of the separately issued financial reports may be obtained at www.swib.state.wi.us or by writing to:

State of Wisconsin Investment Board
P.O. Box 7842
Madison, WI 53707-7842

A. Deposits

Deposits include cash and cash equivalents on deposit in banks or other financial institutions, and nonnegotiable certificates of deposit. The majority of the State's deposits are under the control of the Department of Administration. The Department of Administration maintains multiple accounts with an agreement with the bank that allows an overdraft in one account if the overdraft is offset by balances in other accounts.

Custodial credit risk is the risk that in the event of a bank failure, the government's deposits may not be returned to it. The State's policy regarding custodial credit risk is detailed in Chapter 34 of the State Statutes. In brief, any federal or state bank, credit union or savings bank may be designated a public depository. A surety bond may be required. The State's insured deposits are covered by the Federal Deposit Insurance Corporation (FDIC) and an appropriation for losses on public deposits. In the event of loss, the division of banking makes payments up to \$400,000 per depositor for the excess of the payments made by the Federal Deposit Insurance Corporation or the Wisconsin Credit Union Savings Insurance Corporation. Payments are made, until the funds available in the appropriation are exhausted, in the order in which satisfactory proofs of loss are received by the State's Department of Financial Institutions.

1. Primary Government

As of June 30, 2018, \$158.6 million of the primary government's bank balance of \$135.0 million was exposed to custodial credit risk as follows (in millions):

Uninsured and uncollateralized	\$ 135.0
--------------------------------	----------

Foreign currency risk is the risk that changes in exchange rates will adversely affect the fair value of a deposit. Deposits in foreign currency at June 30, 2018 are immaterial. The primary government does not have a formal policy specifically related to foreign currency risk.

The State's Unemployment Reserve Fund had \$1.6 billion on deposit with the U.S. Treasury. This amount is presented as Cash and Cash Equivalents and is not included in the carrying amount of deposits nor is it categorized according to risk because it is neither a deposit with a financial institution nor an investment.

Certificates of Deposit are carried at cost as they are considered nonparticipating interest-earning investment contracts. Because they are valued at cost, they are not included in the fair value hierarchy established by GASB Statement 72, Fair Value Measurement and Application.

2. Wisconsin Retirement System (WRS)

As of December 31, 2017, WRS cash deposits totaled \$1,900.1 million. Of the total deposits, \$1,512.1 million was collateralized by the securities borrowed. Depository insurance covered another \$24.9 million of the total. Additionally, a portion of the total deposits were uninsured and uncollateralized. These represented balances held in foreign currencies in the custodian's nominee name, cash posted as collateral for derivatives transactions and cash collateral posted in excess of the market value of securities borrowed for short sales. The sum of uninsured and uncollateralized deposits amounted to \$363.1 million at December 31, 2017. In addition to cash deposits, the WRS also held \$57.8 million in certificates of deposit, all of which were covered by depository insurance.

3. State Investment Fund

As of June 30, 2018, the SIF held Certificates of Deposit (CDs) with a value of \$42.5 million invested pursuant to the Wisconsin Certificate of Deposit Program, all of which is insured through FDIC insurance. Investment guidelines provide that to be accepted into this program, banks must accept deposits in Wisconsin and meet credit-screening criteria designed to assure the safety of the deposits.

B. Investments

1. Primary Government

Wisconsin Statutes, program policy provisions, appropriate governing boards, and general resolutions contained in revenue bond indenture documents define the types of securities authorized as appropriate investments and the conditions for making investment transactions.

Investments of the State are managed by various portfolios. For disclosure purposes, the following investment portfolios are discussed separately:

- Primary government, excluding the Wisconsin Retirement System and the State Investment Fund. The primary government portfolios include Various Funds managed by the State of Wisconsin Investment Board consisting of the following:
 - The University of Wisconsin System (UWS)
 - Local Government Property Insurance Fund (LGPIF)
 - State Life Insurance Fund (SLF)
 - Injured Patients and Families Compensation Fund (IPFCF)
 - Historical Society Fund
 - Tuition Trust Fund
- Wisconsin Retirement System (WRS)
- State Investment Fund (SIF) -- functions as the State's cash management fund by "pooling" the idle cash balances of all State funds and other public institutions. Investments of the SIF are discussed in section B2 of this note disclosure.

Primary Government (excluding the Wisconsin Retirement System (WRS), and the State Investment Fund (SIF))

For the primary government, except for the Various Funds discussed later, permitted investments include: direct general obligations of the United States of America and obligations (including obligations of any federal agency or corporation) for which the payment of the principal and interest are unconditionally guaranteed by the full faith and credit of the United States; bonds or other obligations of any state or the United States of America or of any agency, instrumentality or local governmental unit of any such state including the State of Wisconsin; bonds, debentures, participation certificates, notes or similar evidences of indebtedness of any of the Federal Financing Bank, Federal Home Loan Bank System, Federal Farm Credit Bank, Federal National Mortgage Association, Federal Home Loan Mortgage Corporation, Resolution Funding Corporation, Government National Mortgage Association, Student Loan Marketing Association or Tennessee Valley Authority; public housing bonds issued by public agencies or municipalities; commercial paper; interest-bearing time deposits, certificates of deposit or other similar banking arrangements; shares of a diversified open-end management investment company; repurchase agreements; common and preferred stock; bankers acceptances; corporate commercial paper; bonds issued by a local district created under

Wisconsin Act 229; and investment agreements with a bank, bank holding company, insurance company or other financial institution.

The State of Wisconsin Investment Board (SWIB or the Board) has control of the investment and collection of principal, interest, and dividends of all monies invested of the University of Wisconsin System (UWS), Local Government Property Insurance Fund (LGPIF), the State Life Insurance Fund (SLF), the Injured Patients and Families Compensation Fund (IPFCF), the Historical Society Trust Fund, and the Tuition Trust Fund, which are collectively known as the "Various Funds".

The UWS Board of Regents authorize and govern the UWS investment policies and guidelines. The UWS Board of Regents has delegated investment management authority to SWIB and is responsible for monitoring its delegation of this investment management authority. SWIB determines and sets UWS asset allocation targets which are reviewed quarterly.

Wisconsin Statutes allow investments of the LGPIF in direct obligations of the United States and Canada, securities guaranteed by the United States, unsecured notes of financial and industrial issuers, Yankee/Euro dollar issues, and certificates of deposit issued by banks in the United States, including solvent financial institutions in Wisconsin.

Permitted classes of investments of the SLF and the IPFCF include bonds of government units or of corporations, loans secured by mortgages, preferred or common stocks, real property and other investments not specifically prohibited by statute.

Funds available for the Historical Society Trust Fund are managed with an investment objective of maintaining a diversified portfolio of high quality publicly issued equities and fixed income obligations providing long-term growth in capital and income generation.

The Board is directed to invest moneys held in the Tuition Trust Fund in investments with maturities and liquidity that are appropriate for the needs of the fund as reported by the State Department of Administration.

The UWS also issues separate financial reports. Copies of these separately issued financial reports may be obtained at www.wisconsin.edu or by writing to:

Office of Financial Administration
780 Regent Street, Suite 255
Madison, WI 53715

Wisconsin Retirement System (WRS)

All assets of the WRS are invested by the State of Wisconsin Investment Board (the Board). The WRS consists of shares in the Core Retirement Investment Trust and the Variable Retirement Investment Trust.

The investments of the Core Retirement Investment Trust consist of a diversified portfolio of securities. Wis. Stat. Sec. 25.182 authorizes the Board to manage the Core Retirement Investment Trust in accordance with “prudent investor” standard of responsibility as described in Wis. Stat. Sec. 25.15(2) which requires that the Board manage the funds with the diligence, skill and care that a prudent person acting in a similar capacity and with the same resources would use in managing a large public pension fund.

Investments of the Variable Retirement Investment Trust are authorized under Wis. Stat. Sec. 25.15 and 25.17. Wis. Stat. Sec. 25.17(5) states assets of the Variable Retirement Investment Trust shall be invested primarily in equity securities which shall include common stocks, real estate or other recognized forms of equities whether or not subject to indebtedness, including securities convertible into common stocks and securities of corporations in the venture capital stage. The Variable Retirement Investment Trust consists primarily of common stock and bonds convertible into common stock, although, because of existing conditions in the securities market, there may temporarily be other types of investments.

Valuation

Investments of the State are reported at Fair Value as defined by GASB Statement Number 72 – Fair Value Measurement and Application and are categorized based on the investment valuation hierarchy established by GASB. The hierarchy is based on the valuation inputs used to measure the fair value of the assets. Level 1 Inputs are quoted prices in active markets for identical assets. Level 2 inputs are significant other observable inputs. Level 3 inputs are significant unobservable inputs.

The fair value of investments are obtained or estimated using information provided by custodial banks and brokerages. A variety of independent pricing sources are used to price assets based on type, class or issue, including published quotations from active markets, pricing models and other methods deemed acceptable by industry standards.

Primary Government (excluding the Wisconsin Retirement System (WRS), and the State Investment Fund (SIF)

The following tables present fair value measurements as of June 30, 2018, in millions.

	Fair Value	Measurement Using		
		Level 1 Inputs	Level 2 Inputs	Level 3 Inputs
Investments by Fair Value Level:				
U.S. Government & Agency Securities	\$ 573.6	\$ 291.6	\$ 282.1	\$ -

Total SLF	\$ 108.0	\$ 108.0	

Securities categorized as Level 1 are valued using prices quoted in active markets for those securities.

Debt securities categorized as Level 2 are valued by third party pricing services using a matrix-pricing technique that values securities based on their relationship to quoted market prices for securities with similar interest rates, maturities and credit ratings.

The University of Wisconsin System (UWS) holds an investment in the amount of \$64.9 million in a fund-of-funds private equity limited partnership. This investment is illiquid and is generally not resold or redeemed. Distributions from the fund will be received over the life of the investment as the underlying investments are liquidated. The estimated remaining life of the underlying investments are between 0-11 years. The UWS has unfunded capital commitments for private equity investments in the amount of \$23.6 million.

Securities categorized as Level 3 include certain Limited Partnership interests in the amount of \$3.4 million held by the Common School fund. These limited partnerships invest in small non-public companies. The Common School fund has committed to invest up to \$30.0 million in limited partnerships as of June 30, 2018.

The Injured Patients and Families Compensation fund holds Investments in the amount of \$8.4 million in the Short-Term Investment Fund, a short-term investment pool. Investments of the Short-Term Investment Fund are reported at net asset value (NAV).

Fair values of investments in equity and fixed income co-mingled index funds, mutual funds and money market funds are based on the investments' published NAV per share (or its equivalent) provided by the investee. These investments are considered Level 1 in the GASB fair value hierarchy.

Investments Valued at Cost or Amortized Cost — Certain investments are valued at cost or amortized cost. Investments valued at cost are not included in the GASB fair value hierarchy.

The Transportation Revenue Bond Debt Service fund holds investments in escrow in the amount of \$248.3 million in U.S. Treasury State and Local Government Series Certificates (SLGs). SLGs are special purpose securities issued to government entities to assist in compliance with certain Internal Revenue Service regulations. There is no secondary market for SLGs and these investments are valued at cost.

The College Savings Fund has a \$181.9 million investment in a Guaranteed Investment Contract, a non-participating interest earning contract which is valued at cost.

The Common School Fund holds investments issued by the Wisconsin Housing and Economic Development Authority (WHEDA) in the amount of \$25.5 million which are secured by revenues from certain WHEDA loans, and which are valued at cost. The investments were issued in a private placement transaction and are not marketable on a secondary market.

US Government Savings Bonds in the amount of \$0.2 million are held at amortized cost.

Wisconsin Retirement System (WRS)

Total (7)	<u>\$ 31,588.2</u>	<u>\$ 6,908.0</u>		

(1) This category consists of short term cash funds with the investment objective of safety of principal and liquidity while earning a competitive money market rate of return. The short-term cash funds have daily liquidity with same day notice.

(2) Corporate and government bond index funds make up a significant portion of this category (82%) and have the investment objective of approximating as closely as practicable the return of a given segment of the markets for publicly traded investments. The corporate and government index funds have daily liquidity with 2 days' notice. An additional 15% of this category represents long-only fixed income managers, which can invest across the credit quality spectrum, in varying geographies, and can include derivatives, high yield and structured securities. These long-only managers require a redemption notice period between one and two weeks and have daily or monthly liquidity. One of these funds also has an investor level gate, limiting daily withdrawals to \$2 million per day or 5% of the portfolio's net asset value. The remaining 3% of this category includes LLCs which invest in private real estate debt. The majority of these LLC investments distribute earnings over the life of the investment and have an average remaining life of less than 5 years. The private real estate debt LLC's that do not distribute earnings over the life of the fund permit quarterly redemptions with 90 days' notice.

(3) Private Equity Limited Partnerships include direct, co-investments with existing SWIB general partners, direct secondary investments and fund of funds. These investments are illiquid and are generally not resold or redeemed. Distributions from each fund will be received as the underlying investments are liquidated.

(4) This category includes emerging markets equity index funds (54%) with an investment strategy designed to track the return of the given segment of the emerging equity markets. These investments can be redeemed daily with 2 days' notice. An additional 46% of this category represents long-only equity managers with various fundamental, quantitative and other approaches spanning various styles, geographies and market cap weights. These long-only manager investments can be redeemed monthly, with between 10 and 30 days' notice.

(5) This category includes funds that invest directly in real estate and real estate related assets. Approximately 68% of these investments are generally not resold or redeemed. Distributions from each fund will be received as the underlying investments are liquidated. The remaining 32% of this category consists of open-ended funds that invest directly in real estate and real estate related assets. Such investments can be redeemed quarterly with between 30 and 90 days' notice.

(6) Hedge Fund investments are private investment funds that seek to produce absolute returns using a broad range of strategies. In certain instances, Hedge fund investments are structured as limited partnerships, whereby participants receive distributions over the life of the fund. Estimated remaining life of funds structured as limited partnerships is estimated to be between 5-10 years. Additional information relating to Hedge Funds can be found in Note 4(D).

(7) SWIB had additional unfunded commitments of approximately \$10.2 million, relating to assets not valued using NAV.

(8) Redemption terms described for NAV investments reflect contractual agreements and assume withdrawals are made without adverse market impact and under normal market conditions.

The Board has entered into a number of agreements that commit the WRS to make investment purchases up to predetermined amounts over certain investment time periods. The unfunded capital commitments for private equity, real estate and multi-asset investments not reported on the Statement of Fiduciary Net Position total \$6.9 billion as of December 31, 2017.

Private Equity and Real Estate Limited Partnerships

Limited partnerships are generally structured to provide distributions to participants of the fund as the holdings of the partnership are liquidated over time. In general, the Private Equity Limited Partnerships participated in the following investment strategies at December 31, 2017:

Buyout – This strategy acquires shares of a private company to gain a controlling interest.

Mezzanine – Provides mezzanine debt to finance leveraged buyouts, recapitalizations, and corporate acquisitions.

Special Situations – This strategy can invest in public and private companies undergoing financial distress, a turnaround in business operations, or which are believed to be undervalued because of a discrete extraordinary event.

Venture Capital – This strategy invests in companies with potential for significant growth (generally small to early stage emerging firms).

The Real Estate Limited Partnerships generally consisted of the following investment strategies at December 31, 2017:

Core – Core investments are expected to deliver a significant percentage of their return from income and should demonstrate lower volatility than Opportunistic and Value investments due to lower leverage, higher occupancy, and asset location.

Value – Value investments typically have significant near-term leasing, repositioning, and/or renovation risk. This strategy is expected to have modest initial operating revenues with potential for substantial income growth and will likely encounter greater volatility than Core strategies, but lower volatility than Opportunistic strategies.

Opportunistic – Opportunistic investments usually have significant development, lease-up, financial restructuring, and/or liquidity risk with little or no initial operating income. This strategy typically uses the highest leverage, is expected to achieve most of its return from future capital gains, and is likely to encounter greater volatility than Core and Value strategies.

Hedge Funds

Hedge Fund investments are private investment funds that seek to produce absolute returns using a broad range of strategies. When redeeming Hedge Fund investments, the agreements governing the investment vehicle oftentimes require advanced notice and may restrict the timing of withdrawals. Hedge Fund agreements can also include “lock-up” periods, which restrict investors from redeeming their investment during a specified time frame. The lock-up period helps portfolio managers avoid liquidity problems. Lock-ups can be “hard,” where redemptions are not permitted for a specified time period, or “soft,” where redemptions are permitted provided the investor pays a penalty. In certain instances, a fund may have both hard and soft lock-up restrictions in place. In addition, hedge fund managers can also institute a “rolling” lock-up. A fund with a rolling lock-up period requires

investors to commit to an initial lock-up period, and, if the investor does not submit a redemption notice within a set time prior to expiration of the lock-up, the lock-up is reset.

The Retirement Funds participated in the following Hedge Fund strategies at December 31, 2017:

Equity Long-Short – This strategy invests both long and short in publicly-traded stocks. These managers vary in their use of short selling and leverage.

Event-Driven – The funds in this strategy seek to gain an advantage from pricing inefficiencies that may occur before or after a corporate action or related event, such as a merger, spinoff, earnings call, bankruptcy, or restructuring.

Global Macro – The funds in this category invest their holdings in indexes, commodities, interest rate instruments, and currencies as a result of relative value or directional forecasts from a systematic or discretionary approach.

Market Neutral/Arbitrage – This strategy uses a range of fixed income, convertible instruments, and/or statistical arbitrage strategies that seek to hedge market-related risks to earn consistent returns.

Multistrategy – The funds in this category employ a wide range of strategies and instruments in managing assets.

Credit Risk

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations.

Primary Government (excluding the Wisconsin Retirement System (WRS), and the State Investment Fund (SIF))

The primary government, except for the Various Funds discussed later, follows Wisconsin Statutes, program policy provisions, appropriate governing boards, and general resolutions contained in revenue bond indenture documents limits investments in public housing bonds issued by public agencies or municipalities, the State of Wisconsin, interest-bearing time deposits, certificates of deposit or other similar banking arrangement, shares of a diversified open-end management investment company repurchase agreements and investment agreements to a rating no lower than the rating assigned to the bonds. Investments in all other permitted debt securities are required to bear the highest rating available from each nationally recognized rating agency. In addition, credit risk of certain funds such as the Retiree Life Insurance Fund is minimized by monitoring portfolio diversification by asset class, creditor and industry and by complying with investment limitations governed by insurance laws and regulations.

Regarding the Various Funds, investment guidelines require that the bond portfolios shall maintain an average quality rating of A- or better at time of purchase, using the lower of split ratings at the time of purchase.

Investment credit quality ratings as of June 30, 2018, from Standard and Poor's, Moody's Investors Service, and Fitch Ratings are presented below using the Standard and Poor's rating scale (in millions):

Primary Government (excluding the Various Funds, WRS and SIF)	
Credit Quality Ratings	Fair Value
AAA	\$ 189.0
AA	537.6
A	22.0
Not Rated	1,914.7
Total	\$ 2,663.2

The following schedule displays the credit ratings at June 30, 2018, for the Various Funds (fair values in millions):

	Various Funds				
	UW System	IPFCF	Historical Society	Tuition Trust	SLF
AAA	\$ -	\$ 27.4	\$ -	\$ 1.1	\$ 1.1
AA		631.5			50.5
A		121.8			30.8
BBB		275.0			23.9
BB		31.9			1.7
Short-term Investment Fund (Not Rated)		8.4			
Bond Fund (Not Rated)	141.3		3.7		
Totals	\$ 141.3	\$ 1,096.1	\$ 3.7	\$ 1.1	\$ 108.0

Wisconsin Retirement System (WRS)

With the exception of derivative instrument credit risk, there are no fund-wide or system-wide investment guidelines related to credit risk exposures for investments of the WRS. Fixed income credit risk investment guidelines outline the minimum ratings required at the time of purchase by individual portfolios, or groups of portfolios, based on the portfolios' investment objectives. In addition, some fixed income portfolios are required to carry a minimum weighted average rating at all times.

The following schedule displays the lowest credit rating assigned by nationally recognized statistical rating organizations on debt securities held as of December 31, 2017 (in millions).

WRS	
Rating	Fair Value
F1/A-1	\$ 0.1
AAA/Aaa	259.9
AA/Aa	17,397.5
A	1,872.7
P-2/A-2	328.6
BBB/Baa	2,090.0
BB/Ba	925.5
B	824.4
CCC/Caa or below	310.5
Commingled Fixed Income Funds	7,633.1
Not Rated	790.4
Total	\$ 32,433.3

Reverse Repurchase Agreements

Wisconsin Retirement System (WRS)

SWIB held \$6.1 billion in reverse repurchase agreements at December 31, 2017. Investment guidelines permit certain

portfolios to enter into reverse repurchase agreements, which are a sale of securities with a simultaneous agreement to repurchase the securities in the future at the same price plus a stated rate of interest. The market value of the securities underlying reverse repurchase agreements exceeds the cash received, providing the counterparty a margin against a decline in market value of the securities. If the counterparty defaults on their obligations to sell these securities back to SWIB or provide cash of equal value, SWIB could suffer an economic loss equal to the difference between the market value of the underlying securities plus accrued interest and the agreement obligation, including accrued interest. This credit exposure at December 31, 2017 was \$87.8 million.

SWIB enters into reverse repurchase agreements with various counterparties and such transactions are governed by Master Repurchase Agreements (MRA). MRAs are negotiated contracts and contain terms in which SWIB seeks to minimize counterparty credit risk. SWIB also controls credit exposures by limiting trades with any one counterparty to stipulated amounts. The counterparty credit exposure is monitored daily and managed through the transfer of margin, in the form of cash or securities, between SWIB and the counterparty.

The cash proceeds from reverse repurchase agreements are reinvested by the Board. The maturities of the purchases made with the proceeds of reverse repurchase agreements are not necessarily matched to the maturities of the agreements. The agreed-upon yields earned by the counterparty were between 1.18 percent and 1.82 percent. Portfolio guidelines require agreements to mature between one and 90 days.

Custodial Credit Risk

Custodial credit risk is the risk that, in the event of a failure of the counterparty, the State will not be able to recover the value of the investment or collateral securities that are in the possession of an outside party.

Primary Government (excluding the Wisconsin Retirement System (WRS), and the State Investment Fund (SIF))

The primary government, including the Various Funds, does not have an investment policy specifically for custodial credit risk. As of June 30, 2018, the primary government did not have any direct investment securities exposed to custodial credit risk.

Wisconsin Retirement System (WRS)

The WRS's custodial credit risk policy addresses the primary risks associated with safekeeping and custody. It requires that custodial institutions be selected through a competitive bid process and that the institution be designated a 'Systemically

Important Financial Institution' by the U.S. Federal Reserve. The policy also requires that the WRS be reflected as beneficial owner on all securities entrusted to the custodian and that the WRS have access to safekeeping and custody accounts. The custodian is also required to be insured for errors and omissions and must provide the WRS with an annual report on internal controls. The WRS's current custodial bank was selected in accordance with these guidelines and meets all requirements stipulated in the custodial credit risk policy.

As of December 31, 2017, the WRS held 2 repurchase agreements totaling \$14.2 million. All of these repurchase agreements were tri-party agreements held in short-term cash management portfolios managed by SWIB's custodian. The underlying securities for these repurchase agreements were held by the tri-party agent, not in SWIB's name.

Concentration of Credit Risk

Concentration of credit risk is the risk of loss attributed to the magnitude of a government's investment in a single issuer.

Primary Government (excluding the Wisconsin Retirement System (WRS), and the State Investment Fund (SIF))

Although the primary government, except for the Various Funds discussed later, does not have a formal policy on limiting the exposure to concentrations of credit risk, it is the primary government's policy to comply with the provisions contained within the general resolutions of revenue bond indentures and other program policy investment criteria.

Debt securities issued by the State of Wisconsin represent the largest concentration of investments in a single issuer. In total \$138.9 million of the reported investments of the non-major governmental funds were issued by the State of Wisconsin which represents 12.1 percent of total investments.

The Various Funds' investment guidelines limit concentrations of credit risk by establishing maximum issuer and/or sector exposure limits. Generally, the guidelines require that no single issuer may exceed 5 percent of the fund investments, with the exception of U.S. Government and its Agencies, whose exposure is unlimited. The LGPIF further limits AAA-rated U.S. mortgage-backed, AAA-rated asset-backed and individual corporate issuers to 3 percent of the market value of the fund investments. No investments from these issuers were owned at fiscal year-end.

Excluding investments issued or explicitly guaranteed by the U.S. government and pooled investments, as of June 30, 2018, none of the Various Funds had more than 5 percent of their total investments in a single issuer.

Wisconsin Retirement System (WRS)

For investments of the WRS, concentration of credit risk is limited by establishing investment guidelines for individual portfolios or groups of portfolios that generally restrict issuer concentrations in any one company or Rule 144A securities to less than 5 percent of the portfolio's market value.

The WRS did not hold any investments with a single issuer, exclusive of investments issued or explicitly guaranteed by the U.S. government, representing 5% or more of the value of the total WRS investments' value at December 31, 2017.

Interest Rate Risk

Interest rate risk is the risk that changes in interest rates of debt investments will adversely affect the fair value of an investment.

Primary Government (excluding the Wisconsin Retirement System (WRS), and the State Investment Fund (SIF))

Although the primary government, except for the Various Funds discussed later, does not have a formal policy on limiting the exposure to changes in interest rates, it is the primary government's policy to comply with the provisions contained

within the general resolutions of revenue bond indentures and other program policy investment criteria. For example, the Lottery Fund acquires investments with maturity dates that significantly coincide with scheduled payment dates of prize annuities. Investments are held to maturity unless an annuitant requests premature termination of an annuity, then any loss or gain due to market fluctuations are passed through to the redeeming annuitant. Therefore, the Lottery Fund has minimal interest rate risk exposure. Further, as a means of limiting its exposure to interest rate risks, certain funds are required to limit at least half of the fund's investment portfolio to maturities of less than one year. In addition, interest rate risk of certain other funds such as the Retiree Life Insurance Fund is minimized by maintaining a diversified portfolio of investments and monitoring cash flow patterns in order to approximately match the expected maturity of liabilities.

The following table provides information about the interest rate risks associated with the primary government's investments, except those of the Various Funds. The investments include certain short-term cash equivalents, and various long-term items. At June 30, 2018, the primary government's investments were (in millions):

Primary Government (excluding the Various Funds, WRS, SIF, and investments in an external investment pool)

Investment Type	Investment Maturities				Fair Value
	Less Than 1 Year	1 to 5 Years	6 to 10 years	More Than 10 Years	
U.S. Government and U.S. agency holdings	\$ 287.2	\$ 257.0	\$ 3.8	\$ 274.0	\$ 822.0
State and municipal bonds and notes	4.0	4.5	67.8	186.2	262.5
Money market funds	235.2	--	--	--	235.2
Mutual funds – open ended	0.1	638.4	1,181.9	--	1,820.4
Private Placement	0.4	1.8	3.0	20.3	25.5
Guaranteed Investment Contracts	--	181.9	--	--	181.9
Total	\$ 527.0	\$ 1,083.6	\$ 1,256.5	\$ 480.6	\$ 3,347.7

The Various Funds, which are managed by the Board, use the duration method to identify and manage interest rate risk. Three of the Various Funds have investment guidelines relating to interest rate risk. The LGPIF guidelines require that a bond's maturity must not exceed ten years. The SLF guidelines require the Weighted Average Maturity (WAM) of the portfolio, including cash, to be a minimum of ten years. The IPFCF guidelines require that effective duration of the bond portfolio shall remain within 15% of the assigned benchmark's duration.

As of June 30, 2018, the Various Funds had interest rate risk statistics as detailed below (in millions):

Investment Type	Various Funds									
	Duration or WAM (in years) for Fixed Income Securities									
	<u>UW System</u>		<u>IPFCF</u>		<u>Historical Society</u>		<u>Tuition Trust</u>		<u>SLF</u>	
	Fair	Fair	Fair	Fair	Fair	Fair	Fair	Fair	Fair	Fair
	<u>Value</u>	<u>Duration</u>	<u>Value</u>	<u>Duration</u>	<u>Value</u>	<u>Duration</u>	<u>Value</u>	<u>Duration</u>	<u>Value</u>	<u>WAM</u>
Govt/Agency	\$ -		\$ 597.9	5.33	\$ -		\$ 1.1	0.41	\$ 45.5	14.24

Foreign Bonds (Govt/Agency)			40.6	4.49						
Bond Fund	141.3	7.01			3.7	6.35				
Short-Term Investment Fund			8.4	0.13						
Total	\$141.3		\$1,096.1		\$ 3.7		\$ 1.1		\$108.0	

External Investment Pools

The Injured Patients and Families Compensation Fund, has investments totaling \$8.4 million at June 30th, 2017 in the Short-Term Investment Fund, a pooled short-term investment fund. This balance is reported as cash and cash equivalents on the Statement of Net Position.

Investments for the Retiree Life Fund and Local Retiree Life Fund are held with the insurance carrier. Interest is calculated and credited to the Retiree Life Insurance Funds based on the rate of return for a segment of the insurance carrier's general fund, specifically 10 Year A- Bonds (as a proxy and not tied to any specific investments). The funds invested during the year earn interest based on that year's rate of return for 10 Year A- Bonds. The overall aggregate interest rate is calculated using a tiered approach based on the year the funds were invested and the rate of return for that year. Investment interest is credited based on the aggregate rate of return and assets are not adjusted to fair market value. Furthermore, the insurance carrier guarantees the principal amounts of the reserves, including all interest previously credited thereto.

Wisconsin Retirement System (WRS)

Generally, analysis of long or intermediate term portfolios' interest rate risk is performed using various duration calculations. Modified duration, which is stated in years, is the measure of price sensitivity of a fixed income security to an interest rate change of 100 basis points. The calculation is based on the weighted average of the present values for all cash flows. Some pooled investments are analyzed using an option adjusted duration calculation which is similar to the modified duration method.

Option adjusted duration incorporates the duration shortening effect of any embedded call provisions in the securities.

Short term portfolios' interest rate risk is analyzed using the weighted average maturity to next reset. Weighted average maturity is the maturity of each position in a portfolio weighted by the dollar value of the position to compute an average maturity for the portfolio as a whole. This measure indicates a portfolio's sensitivity to interest rate changes: a longer weighted average maturity implies greater volatility in response to interest rate changes.

SWIB's investment guidelines related to interest rate risk vary by portfolio. Some fixed income portfolios are required to be managed within a range of a targeted duration, while others are required to maintain a weighted average maturity at or below a specified number of days or years.

Aggregated interest rate risk exposure as of December 31, 2017, stated in terms of modified duration (for long term instruments) and weighted average maturity (for repurchase agreements and short term pooled investments), is presented below (in millions):

Investment Type*	WRS	
	Fair Value	Modified Duration (Years)
Asset Backed Securities	\$ 71.8	4.1
Corporate Bonds & Private Placements	4,985.2	6.3
Foreign Government / Agency Bonds	2,511.5	8.0

Total	<u>\$ 32,433.3</u>	

*Excludes Derivatives which are separately disclosed

Foreign Currency Risk

Foreign currency risk is the risk that changes in exchange rates will adversely impact the fair value of an investment.

Primary Government (excluding the Wisconsin Retirement System (WRS), and the State Investment Fund (SIF))

The primary government, except for the Various Funds discussed later, does not have a formal policy to limit foreign currency risk, however, certain funds such as the Environmental Improvement Fund are not permitted to invest in foreign currency based on provisions contained in its bond indenture general resolution. However, foreign currency risk of the Retiree Life Insurance Fund is minimized by utilizing short-duration spot forward contracts to minimize the adverse impact of foreign currency exchange rate risks inherent in the elapsed time between trade processing and trade settlement. At June 30, 2018, the primary government, excluding the Various Funds, did not own any issues denominated in a foreign currency.

The Various Funds' investment guidelines do not specifically address foreign currency risk with the exception that the SLF only allows investments in U.S. dollar denominated instruments. As of June 30, 2018, the Various Funds did not directly own any issues denominated in a foreign currency.

Wisconsin Retirement System (WRS)

The WRS held foreign currency denominated cash and securities directly in designated actively managed portfolios and indirectly through its investment in certain commingled invest funds. As of December 31, 2017, the WRS had the following currency exposure (all assets stated in millions of United States Dollars):

Currency	Currency Exposures by Investment Type								Total
	Cash & Cash Equivalents	Stocks	Fixed Income	Limited Partnerships	Preferred Securities	Short Sales	Futures & Options

Securities Lending Transactions**Wisconsin Retirement System (WRS)**

Securities Lending Transactions – State statutes and Board policies permit the use of investments of the WRS to enter into securities lending transactions. These transactions involve the lending of securities to broker-dealers and other entities in exchange for collateral, in the form of cash or securities, with the simultaneous agreement to return the collateral for identical securities in the future. The securities custodian is an agent in lending the domestic and international securities. When securities are delivered to a borrower as part of a securities lending agreement, the borrower is required to place collateral equal to 102 percent of the loaned securities' fair value, including interest accrued, as of the delivery date with the lending agent. In the event that securities are loaned against collateral denominated in a different currency, the borrower is required to place collateral totaling 105 percent of the loaned securities' fair value, including interest accrued, as of the delivery date with the lending agent. Collateral is marked to market daily and adjusted as needed to maintain the required minimum level. On December 31, 2016, the fair value of the securities on loan to counterparties was approximately \$10.8 billion.

Cash collateral is reinvested by the lending agent in two separate pools, a U.S. dollar cash collateral pool and a pool denominated in Euros, in accordance with contractual investment guidelines, which are designed to minimize the risk of principal loss and provide a modest rate of return. Investment guidelines limit credit and liquidity risk by restricting new investments to overnight repurchase agreements collateralized with high quality U.S. government, U.S. government agencies, and sovereign debt securities. The earnings generated from the collateral investments, plus or minus the rebates received from or paid to the dealers and less fees paid to agents, results in the net earnings from lending activities, which are then split on a percentage basis with the lending agent.

At December 31, 2017, minimal credit risk exposure to borrowers existed because loans are collateralized in excess of 100%. The contract with the lending agent requires it to indemnify the WRS if the borrowers fail to return the loaned securities and the collateral is inadequate to replace the securities lent. Losses resulting from violations of investment guidelines are also indemnified.

The majority of security loans are open-ended and can be terminated on demand. The risk that SWIB would be unable to return collateral to securities borrowers upon termination of the loan is mitigated by the highly liquid nature of investments held in the collateral reinvestment pools. The average maturities of the loans and the average maturity of the assets held in collateral reinvestment pools were similar at December 31, 2017.

Securities lending is allowed in certain commingled fund investments. All earnings of these funds are reported in the Statement of Changes in Fiduciary Net Position.

Derivative Instruments**Wisconsin Retirement System (WRS)**

Derivatives may be used to implement investment strategies for the Core and Variable Funds. All derivative instruments are subjected to risk analysis and monitoring processes at the portfolio, asset class and fund levels. Investment guidelines define allowable derivative activity for each portfolio and are based on the investment objectives which have been approved by the Board. Where derivatives are permitted, guidelines stipulate allowable instruments and the manner and degree to which they are to be used.

Gains and losses for all derivative instruments are reported in the Statement of Changes in Fiduciary Net Position.

SWIB seeks to mitigate counterparty credit risk through counterparty credit evaluations and approvals, counterparty credit limits, and exposure monitoring techniques. Additionally, policies have been established which seek to implement master netting arrangements with counterparties that permit the closeout and netting of transactions with the same counterparty. Agreements may also require daily collateral postings to further mitigate credit risk.

As of December 31, 2017, there were 12 counterparties making up the WRS's exposure to counterparty credit risk for uncleared OTC derivative contracts. The exposure of the WRS to counterparty credit risk relating to these was as follows (in millions of United States Dollars):

OTC Derivatives Subject to Counterparty Credit Risk

	Counterparty Credit Rating	
FX Receivables:	AA	\$ 0.7
	A	2,002.5
	BBB	479.6
To Be Announced Securities	A	0.2
Warrants	Not Rated	3.9
Total		2,486.9
Less Collateral and MNA Offsets		2,482.8
Total OTC Counterparty Credit Risk		\$ 4.2

Foreign Currency Spot and Forward Contracts — Foreign Currency Spot and Forward contracts are OTC agreements between two counterparties to exchange designated currencies at a specific time in the future. No cash is exchanged when a foreign exchange spot or forward contract is initiated. Amounts due are paid or received on the contracted settle date.

Currency exposure management is permitted through the use of currency derivative instruments. Direct hedging of currency exposure back to the U. S. dollar is permitted when consistent with the strategy of the portfolio. Cross-currency exposure management to transfer out of an exposed currency and into a benchmark currency is permitted. In some portfolios, currencies of non-benchmark countries may be held through the use of forward contracts, provided that the notional value of any single non-benchmark currency does not exceed 5 percent of the market value of the portfolio. Discretionary currency overlay strategies at the total fund and asset class level may be employed when currency market conditions suggest such strategies are warranted.

The net receivable or payable for spot and forward contracts is included in Foreign Currency Contracts on the Statement of Fiduciary Net Position. Losses may arise from future changes in the value of the underlying currency, or if the counterparties do not perform under the terms of the contract. Spot and forward contracts are valued daily with the changes in fair value included in the Net Appreciation (Depreciation) in Fair Value of Investments on the Statement of Changes in Fiduciary Net Position.

During the year, currency exposure management involved the use of foreign currency spot and forward contracts. The following table presents the fair value of foreign currency spot and forward contract assets and liabilities held as of December 31, 2017 (in millions):

Foreign Currency Spot and Forward Contracts						
Currency	Foreign Currency Contract Receivables			Foreign Currency Contract Payables		
	Notional (local currency)	Fair Value \$US	Unrealized Gain/(Loss) \$US	Notional (local currency)	Fair Value \$US	Unrealized Gain/(Loss) \$US

Futures Contracts – A futures contract is an exchange-traded agreement to buy or sell a financial instrument, index or commodity at an agreed upon price and time in the future.

The fair value of futures contracts represents the unrealized gain/(loss) on the contracts, since trade inception, and is reflected as a portion of Financial Futures Contracts and Swaps on the Statement of Fiduciary Net Position. Futures contracts are marked to market daily, based upon the closing market price of the contract at the board of trade or exchange on which they are traded. Gains and losses resulting from investments in futures contracts are included in the Net Appreciation (Depreciation) in the Fair Value of Investments on the Statement of Changes in Fiduciary Net Position.

The following table presents the investments in futures contracts as of December 31, 2017 (in millions).

Futures Contracts			
Futures Contract Description	Expiration	Notional Amount	Fair Value *
Long Positions:			
Commodity	Jan - Dec 18	\$ 2,045.2	\$ 67.9
Currency	Mar-18	13.6	0.1
Equity	Jan - Mar 18	1,374.2	7.7
Fixed Income	Mar-18	9,561.2	(19.2)
Short Positions:			
Commodity	Jan - Dec 18	\$ (44.3)	\$ 0.3
Currency	Jan - Mar 18	(96.0)	(1.2)
Equity	Mar 18	(752.4)	(8.9)
Fixed Income	Mar-18	(147.5)	0.2
Total		<u>\$ 11,954.0</u>	<u>\$ 47.1</u>

* Fair Value includes foreign currency gains/(losses).

Futures contracts involve, to varying degrees, risk of loss in excess of margin deposited with the broker. Losses may arise from future changes in the value of the underlying instrument.

Futures contracts may be entered into to efficiently gain or adjust market exposures for purposes that include trust fund rebalancing, sector, interest rate, or duration types of exposure

adjustments; the securitization of cash or as a substitute for cash market transactions.

Swap Contracts - Swaps are negotiated contractual agreements between two counterparties which can be cleared on uncleared OTC investments.

As is specified in SWIB's investment guidelines, swaps, may be used as an alternative to physical securities when it is deemed advantageous for portfolio construction. In addition, swaps may be used to adjust asset class exposures for the Retirement Funds. Guideline limits and soft risk parameters for each portfolio are applied to the aggregate exposures which includes both physical and synthetic securities. A synthetic security is created by combining securities to mirror the properties of another security.

Throughout the year, the WRS held positions in Total Return Swaps and Credit Default Swaps (CDS). The following table presents the investments in open Swap Positions as of December 31, 2017 (in millions).

Open Swap Positions			
Description / Reference Rates	Maturity Date	Notional Amount	Fair Value
Credit Default Bond Index	Dec 2022	\$ 175.0	\$ 4.2

The open CDS contracts at December 31, 2017 represent cleared OTC positions where SWIB sold credit protection. Under the terms of the contracts, the WRS receives periodic payments and, in exchange agrees to pay a formula-determined amount to counterparties for losses incurred if stipulated credit events occur. CDS spreads are sensitive to credit spread and interest rate changes.

The fair value of swaps represents the unrealized gain/(loss) on the contracts, since trade inception, and is reflected in "Financial Futures Contracts and Swaps" on the Statement of Fiduciary Net Position.

Gains and losses resulting from investments in all swap are included in the Net Increase (Decrease) in the Fair Value of Investments on the Statement of Changes in Fiduciary Net Position.

Options – An option contract gives the purchaser of the contract the right, but not the obligation, to buy (call) or sell (put) the security or index underlying the contract at an agreed upon price

on or before the expiration of the option contract. The seller of the contract is subject to market risk, while the purchaser is subject to credit risk and market risk, to the extent of the premium paid to enter into the contract.

Rebalancing policies and portfolio investment guidelines permit the use of exchange-traded and over-the-counter options. Options may be used to improve market exposure efficiency, enhance expected returns, or provide market exposure hedges. Exchange rules require that the seller of exchange-traded call option contracts cover these positions either by collateral deposits in the form of cash or securities or by pledging, in escrow, the

actual securities that would be transferred to the option purchaser in the event the option contract were exercised.

The fair value of option contracts is based upon the closing market price of the contract and is reflected as Options on the Statement of Fiduciary Net Position. Gains and losses as a result of investments in option contracts are included in the Net Appreciation (Depreciation) in the Fair Value of Investments on the Statement of Changes in Fiduciary Net Position.

The table below presents the fair value of option contracts as of December 31, 2017 (in millions):

Option Contracts							
Security Description	Contract Type	Position	Exchange-Traded vs. OTC	Expiration	Notional	Fair Value	Unrealized Gain (Loss)
Currency	Call	Short	Exchange	Jan 18	\$ (0.2)	\$ -	\$ -
Equity	Call	Long	Exchange	Mar 18 - Apr 18	2.7	0.1	(0.2)
	Call	Short	Exchange	Jan 18 - Mar 18	(71.9)	(2.6)	(1.2)

To Be Announced Securities — In 2017, the WRS began trading to be announced mortgage-backed (TBA) securities. These commitments are uncleared OTC forward contracts consisting of mortgage-backed securities (MBS) issued by Government National Mortgage Association, a government entity, and by government-sponsored enterprises such as, the Federal National Mortgage Association or the Federal Home Loan Mortgage Corp. The term TBA is derived from the fact that the actual MBS that will be delivered to fulfill a TBA trade is not designated at the time the trade is made. Instead, the specific pool of mortgages making up the MBS is announced 48 hours prior to the established trade settlement date. Eligibility rules and standards for MBS pools deliverable into TBA contracts ensure that delivered MBS pools are fungible. Payment for TBA securities is not made until the settlement date.

Certain portfolio investment guidelines allow for both long and short TBA positions. To mitigate counterparty credit risk, guidelines establish minimum credit ratings and require master netting agreements which include provisions for collateral exchanges.

TBAs, much like their underlying MBS securities, may be highly sensitive to interest rate changes. This is because the MBS pool on which these forward contracts are based can be subject to early payment in a period of declining interest rates. The price of TBAs can fluctuate as the marketplace predicts changes in timing, or possible reductions in expected cash flows, associated with a change in interest rates.

The table below presents the fair value of TBA securities as of December 31, 2017 (in millions):

TBA Contracts			
Position / Maturity	Fair Value	Unrealized Gain / (Loss)	Weighted Average Duration (Years)
Long Jan 18	\$ 239.2	\$ -	4.8
Short Jan 18	(143.7)	(0.2)	3.6
Total	<u>\$ 95.5</u>	<u>\$ (0.2)</u>	

The fair value of TBAs is reflected in “To Be Announced Securities” on the Statement of Fiduciary Net Position. The unrealized gain/loss associated with these contracts is included within the “Net Increase (Decrease) in the Fair Value of Investments” on the Statement of Changes in Fiduciary Net Position.

Warrants — A warrant is a contract that entitles the holder to buy the underlying stock of the issuing company at a specified price. Warrants and options are similar in that the two instruments allow the holder special rights to buy securities. However, warrants differ from options in that they provide additional financing to the issuing company when exercised.

As of December 31, 2017, SWIB held warrant contracts giving SWIB the right to purchase 190,780 shares of preferred stock at a price of 1 Euro per share. SWIB was issued these warrants in 2017 in conjunction with an investment in a privately held company. The \$4.2 million fair value of these warrants is based upon third-party valuations and is included in the “Equities” section on the Statement of Fiduciary Net Position. The associated unrealized gain of \$3.9 million is included in the “Net Increase (Decrease) in the Fair Value of Investments” on the Statement of Changes in Fiduciary Net Position.

Short Sell Obligations

Wisconsin Retirement System (WRS)

The WRS may sell a security it does not own in anticipation of purchasing the security later at a lower price. This is known as a short sale transaction. For the duration of the short sale transaction, a liability is recorded under “Short Sales of Securities”

on the Statement of Fiduciary Net Position. The liability presented represents the fair value of the shorted securities necessary for delivery to the purchaser and is marked-to-market daily. Realized and unrealized gains and losses associated with short sales are recorded on the Statement of Changes in Fiduciary Net Position within the “Net Appreciation (Depreciation) in Fair Value of Investments” category. While the transaction is open, the WRS incurs expenses for securities borrowing costs. In addition, as a security borrower, the WRS may incur dividend and interest expense as such payments must be remitted to the security lender during the course of the loan. Such expenses are included in “Investment Expense” on the Statement of Changes in Fiduciary Net Position.

Risks arise from short sales due to the possible illiquidity of the securities markets and from potential adverse movements in security values. The cost to acquire the securities sold short may exceed the amount of proceeds initially received, as well as the amount of the liability recorded as “Short Sales of Securities” in the Statement of Fiduciary Net Position. Short sales expose the short seller to potentially unlimited liability because there is no upward limit on the price a shorted security could attain. Certain portfolio guidelines permit short sales and, to mitigate risks in various ways, such as: limiting the total value of short sales as a percentage of portfolio value, establishing portfolio vs. benchmark tracking error limits, and monitoring other statistical and economic risk measures of the portfolio. Investment performance and risk associated with each portfolio is measured against benchmarks and monitored by management.

When a short sale occurs, the shorting portfolio must borrow the security and deliver it to the buyer. If the shorted security is owned by another WRS portfolio, investment policies allow the borrowing of the shorted securities from other WRS portfolios.

Except in the case of borrowings within the same trust fund, the WRS is required to post collateral to the lender, at the required rate of 102% for in-currency loans and 105% for cross-currency loans. At December 31, 2017, the WRS posted \$1,556.1 million in cash and \$410.9 million in securities as collateral to security lenders. This represented \$64.6 million in excess of the fair market value of the securities borrowed. If the security lender recalled the security and SWIB was not able to supply the lender with the security, the lender would be permitted to use SWIB’s collateral to fund the purchase of the security.

2. State Investment Fund

The State Investment Fund (SIF) functions as the State's cash management fund by "pooling" the idle cash balances of all State funds and other public institutions. In the State's Comprehensive Annual Financial Report, the SIF is not reported as a separate fund; rather, each State fund's share in the "pool" is reported on the balance sheet as "Cash and Cash Equivalents." Shares of the SIF belonging to other participating public institutions are presented in the Local Government Pooled Investment Fund, an investment trust fund.

Wis. Stat. Secs. 25.17(3)(b), (ba), (bd) and (dg) enumerate the various types of securities in which the SIF can be invested, which include obligations of the United States or its agencies, corporations wholly owned by the United States or chartered by an act of Congress, securities guaranteed by the United States, the unsecured notes of financial and industrial issuers, direct obligations of or guaranteed by the government of Canada, certificates of deposit issued by banks in the United States including solvent financial institutions in Wisconsin and bankers acceptances. The State of Wisconsin Investment Board's (the Board) Board of Trustees may specifically approve other prudent legal investments.

For financial statement purposes, the carrying value of securities depends on asset class. Repurchase Agreements and non-negotiable Certificates of Deposit are valued at cost because they are nonparticipating contracts that do not capture interest rate changes in their value.

All remaining short-term debt investments (U.S. Government/Agency securities, Banker's Acceptances, Commercial Paper, and negotiable Certificates of Deposit) are carried at fair value. Because quoted market prices for SIF securities are often not available at month end, BNY Mellon, as SWIB's custodial bank, compiles fair values from third party pricing services which use matrix pricing models to estimate a security's fair value.

For purposes of calculating earnings to each participant, all investments are valued at amortized cost. Specifically, income is distributed to pool participants monthly, based on their average daily share balance. Distributions include interest income based on stated rates (both paid and accrued), amortization of discounts and premiums on a straight-line basis, realized investment gains and losses calculated on an amortized cost basis, and investment expenses. This method does not distribute to participants any unrealized gains and losses generated by the pool's investments.

SIF pool shares are bought and redeemed at \$1.00 based on the amortized cost of the investments in the SIF. The State of Wisconsin does not provide any legally binding guarantees to support the value of pool shares.

Fair Value Reporting

The SIF categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets, Level 2 inputs are significant other observable inputs, and Level 3 inputs are significant unobservable inputs. Investments held at cost or amortized cost are not reported within the fair value hierarchy.

The following table presents the recurring fair value measurements as of June 30, 2018 (in millions).

	Fair Value	Fair Value Measurement Using		
		Level 1 Inputs	Level 2 Inputs	Level 3 Inputs
Investments by Fair Value Level:				
Government & Agencies	\$ 5,246.2	\$ 668.1	\$ 4,578.2	\$ --
Commercial Paper	364.6		364.6	
Certificates of Deposit (negotiable)	80.0		80.0	
Banker's Acceptances	19.8			19.8
Total By Fair Value Level	\$ 5,710.7	\$ 668.1	\$ 5,022.8	\$ 19.8
Short-Term Reported at Cost or Amortized Cost:				
Repurchase Agreements	\$ 3,725.7			
Certificates of Deposit	42.5			
Total	\$ 9,478.8			

Debt securities categorized as Level 2 are valued by third party pricing services using a matrix-pricing technique that values securities based on their relationship to quoted market prices for securities with similar interest rates, maturities, and credit ratings. The majority of debt securities are classified as Level 2 because they are generally traded using a dealer market, with lower trading volumes than Level 1 securities.

Level 3 investments are generally valued using significant inputs that are unobservable to the marketplace. Banker's Acceptances included in Level 3 represent securities that derive their fair value from cost. Typically, due to their short-term nature, cost approximates fair value for these investments. Investments held at cost (Repurchase Agreements and non-negotiable Certificates of Deposit) are not reported within the fair value hierarchy.

Custodial Credit Risk

The custodial credit risk for investments is the risk that, in the event of the failure of the counterparty to a transaction, the Board

will not be able to recover the value of investments or collateral securities that are in the possession of an outside party. Investments are exposed to custodial credit risk if the securities are uninsured and unregistered and are either held by the counterparty or by the counterparty's trust department or agent but not in the name of the Board. The SIF held six repurchase agreements totaling \$3.7 billion as of June 30, 2018. Five of the repurchase agreements totaling \$2.1 billion, were tri-party agreements. The underlying securities (collateral) for these repurchase agreements were held by the tri-party's agent, not in SWIB's name. The remaining repurchase agreement, totaling 1.6 billion, was a related-party, bilateral agreement with the WRS. The underlying securities for this repurchase agreement were held by SWIB's custodian, in SWIB's name.

The related party repurchase transaction with the WRS was an overnight agreement collateralized with U.S. Treasury securities. The WRS is also a participant in the SIF, with an investment totaling 2.0 billion at June 30, 2018.

The SIF's custodial credit risk policy addresses the primary risks associated with safekeeping and custody. It requires that custodial institutions be selected through a competitive bid process and that the institution be designated a 'Systemically Important Financial Institution' by the U.S. Federal Reserve. The policy also requires that the SIF be reflected as beneficial owner on all securities entrusted to the custodian and that the SIF have access to safekeeping and custody accounts. The custodian is also required to be insured for errors and omissions and must provide the SIF with an annual report on internal controls. The SIF's current custodial bank was selected in accordance with these guidelines and meets all requirements stipulated in the custodial credit risk policy.

Concentration of Credit Risk

Concentration of credit risk is the risk of loss attributed to the magnitude of an organization's investment in a single issuer. The SIF's investment guidelines limit concentrations of credit risk by establishing maximum issuer and/or issue exposure limits based on credit rating. These guidelines do not place a limit on maximum exposure for any U.S. Treasury or Agency discount notes. As of June 30, 2018, the SIF has more than five percent of its investments in FNMA (15.6 percent), FHLB (17.6 percent), FHLMC (11.1 percent), U.S. Treasury (11.0 percent) and Repurchase Agreement collateral (39.3 percent) consisting of various securities issued by these same U.S. Agencies. Since the Repurchase Agreements generally mature each day, new collateral, consisting of a different blend of U.S. Treasury and Agency securities, is assigned each night.

Credit Quality Risk

Credit risk is the risk that an issuer or other counterparty to an investment will not fulfill its obligations. The Board established investment guidelines with maximum exposure limits by security type based on the minimum credit ratings as issued by Nationally Recognized Statistical Rating Organizations (NRSROs).

The following table presents these credit ratings and aggregate exposures by investment type as of June 30, 2018 (in millions):

Investment Type	Ratings	Fair Value
Repurchase Agreements (Collateral):		
U.S. Government Debt & Agencies	AA	3,725.7
U.S. Treasury:		
Short-Term (Bills)	A-1+	867.7
Long Term (Note)	AA	179.3
Government Sponsored Entity		
U.S. Agency:		
Federal Home Loan Bank (FHLB)	A-1+	1,673.8
Federal Home Loan Mortgage Corporation (FHLMC)	A-1+	1,024.7
Federal Home Loan Mortgage Corporation (FHLMC)	AA	25.0
Federal National Mortgage Association (FNMA)	A-1+	1,475.6
Certificates of Deposit:		
Negotiable	A-1+	55.0
Negotiable	A-1	25.0
Non-Negotiable (Wisc. CD program)	NR	42.5
Banker's Acceptances	A-1+	19.8
Commercial Paper	A-1+	310.7
Commercial Paper	A-1	53.9
Total Investments		<u>\$ 9,478.8</u>

Interest Rate Risk

Interest rate risk is the risk that changes in interest rates will adversely affect the fair value of an investment. The Weighted Average Maturity (WAM) method is used to analyze interest rate risk. Investment guidelines mandate that the WAM for the entire portfolio will not exceed one year.

At June 30, 2018, the following table shows the investments by investment type, amount and the weighted average maturities (in millions):

Investment Type	Fair Value	Weighted Average Maturity (Days)
Repurchase Agreements	\$ 3,725.7	2
Government & Agencies	5,246.2	32
Certificates of Deposit	122.5	70
Banker's Acceptances	19.8	67
Commercial Paper	364.6	19
Total Investments	<u>\$ 9,478.8</u>	
Portfolio Weighted Average Maturity (Days)		20

Foreign Currency Risk

Foreign currency risk is the risk that changes in exchange rates will adversely impact the fair value of an investment. SIF guidelines allow the investment in U.S. dollar denominated issues only.

3. Lottery Investments and Related Future Prize Obligations

Investments of the State Lottery Fund totaling \$19.0 million are held to finance grand prizes payable over a 20-year, 25-year or 30-year period. The investments in prize annuities are debt obligations of the U.S. government backed by its full faith and credit as to both principal and interest. Liabilities related to the future prize obligations are presented at their present value and included in Accounts Payable and Other Accrued Liabilities.

The following is a schedule of future prize obligations (in millions):

Fiscal Year	Amount
2019	4.6
2020	4.1
2021	3.7
2022	2.7
2023	2.4
Thereafter	<u>3.2</u>
Total future value	20.8
Less: Present value adjustment	<u>(3.1)</u>
Present value of payments	<u>\$ 17.7</u>

Projects with allotments totaling less than \$10 million:				
University of Wisconsin System		129,557,336		
Other projects with allotments totaling less than \$10 million		25,148,504		
Total construction and software in progress – business type		\$516,227,692		

Construction and software in progress of the University of Wisconsin System and of the other business-type activities as reported in the financial statements totaled \$483.4 million and \$32.9 million, respectively.

Beginning in Fiscal Year 2018, DOT capital projects are reported as completed infrastructure when the project is 100 percent complete. Prior to Fiscal Year 2018, DOT capital projects were reported as completed infrastructure when the project was estimated to be 80 percent complete. Construction in progress and infrastructure are both reported as non-depreciable capital assets. As a result, the impact on CAFR reporting is limited to the timing of when assets move from the Nondepreciable Other account to the Nondepreciable Infrastructure account in the Statement of Net Position.

Beginning in Fiscal Year 2018, University of Wisconsin System library holdings are reported as depreciable capital assets with applicable depreciation expense reflected in the financial statements. A prior period adjustment was made to reflect the reduction in beginning equity for the University of Wisconsin System fund related to the change.

NOTE 8. ENDOWMENTS**Primary Government****University of Wisconsin System**

Through March 2018, the University of Wisconsin System invested its trust funds, principally gifts and bequests designated as endowments or quasi-endowments, in two of its own investment pools: the Long Term Fund and the Intermediate Term Fund. Effective April 1, 2018, the University of Wisconsin System transferred its investment management responsibilities to the State of Wisconsin Investment Board (SWIB). As a result of this transfer, the Intermediate Term Fund was eliminated as a separate investment pool. Benefiting University of Wisconsin System entities receive quarterly distributions from the Long Term Fund, principally endowed assets, based on an annual spending rate applied to a 12-quarter moving average market value of the fund. The annual spending rate is currently 4.0 percent. Distributions that occurred in 2018 from the Intermediate Term Fund, principally quasi-endowments and unspent income distributions, consisted of interest earnings distributed quarterly. Spending rate and interest distributions from both of these funds are transferred to the State Investment Fund, pending near-term expenditures. At June 30, 2018, net appreciation of \$141.9 million was available to meet spending rate distributions, of which \$16.7 million was actually authorized for expenditure.

For University of Wisconsin System-controlled, donor-restricted endowments, the Uniform Prudent Management of Institutional Funds Act as adopted, permits the Board of Regents of the University of Wisconsin System to appropriate for current spending, an amount of realized and unrealized endowment appreciation as they determine to be prudent. Realized and unrealized appreciation in excess of that amount appropriated for current spending is retained by the endowments.

University of Wisconsin System investment policies and guidelines are governed and authorized by the Board of Regents. The approved asset allocation for the new SWIB-managed Long Term Fund has a target to public markets of the following: 57.0 percent public equities, 20.0 percent fixed income, and 23.0 percent inflation sensitive securities. Private markets are not included in the target asset allocation. The legacy private markets investments will self-liquidate as distributions are made from existing funds with no new commitments intended.

The fair value of Endowments as of June 30, 2018 was \$419.6 million including an unrealized gain of \$2.6 million when fair values as of June 30, 2018 are compared to asset acquisition costs.

The calculation of realized gains and losses is independent of a calculation of the net change in the fair value of investments since realized gains and losses are based on the difference between

the selling price and the acquisition cost of the asset. Therefore, when assets are reported at fair value much of the realized gain or loss may have already been included in prior years as part of the overall change in the fair value of investments.

At June 30, 2018, the book value and fair value of principal funds under control of the University of Wisconsin System was (in millions):

Original Contributions and Distributed Net Gains	\$ 279.6
Realized Gains – Undistributed	137.4
Book Value	417.0
Unrealized Net Gains/Losses - Undistributed	2.6
Fair Value	<u>\$ 419.6</u>

On June 30, 2018, the portfolio at market, for the Long Term Fund, contained 40.7 percent in global equities, 16.9 percent in Treasury Inflation Protection Securities (TIPS), 16.7 percent in investment grade government/credit, 5.2 percent in hedged non-U.S. equities, 2.7 percent in real estate investment trusts, 2.3 percent in emerging markets equities, and 15.5 percent in private markets. The total return on the Long Term Fund including capital appreciation was 8.10 percent for the year. The total return on the Intermediate fund, including capital appreciation, was 1.2% for the nine months ending March 31, 2018, when the fund was liquidated. As of April 2018, all funds are externally managed, compared to 89.8% in fiscal year 2017.

For fiscal year 2017, \$488.2 million of endowment investments were reported. A large portion of the decline in the total value of investments is due to the elimination and liquidation of the of the former Intermediate Term Fund as of March 31, 2018. The proceeds from the liquidation of these investments (\$86.2 million) were transferred to the SIF, holdings of which are not classified as investments in the above table.

NOTE 9. INTERFUND RECEIVABLES, PAYABLES, AND TRANSFERS

Interfund balances as of or for the year ended June 30, 2018 consists of the following (in thousands):

A. Due from/to Other Funds:

Due from Other Funds and the Due to Other Funds represent short-term interfund accounts receivable and payable. The balances in these accounts at June 30, 2018 were as follows (in thousands):

Due to Other Funds:												
	General	Transportation	Capital Improvement	Nonmajor Governmental	Injured Patients and Families Compensation	Environmental Improvement	University of Wisconsin System	Unemployment Reserve	Nonmajor Enterprise	Internal Service	Fiduciary	Total
Due from Other Funds:												
General	\$ -	\$ 15,989	\$ 2	\$ 3,082	\$ 69	\$ 3,003	\$ 37,804	\$ 2,065	\$ 1,573	\$ 1,048	\$ 69,431	\$ 134,065
Transportation	41,164	-	3,620	31,995	-	-	-	-	-	119	-	76,897
Capital Improvement	-	-	-	-	-	-	-	-	4,619	806	-	5,426
Nonmajor Governmental	20,495	11,862	-	2,090	-	1,281	-	1	2,019	-	-	37,748
Environmental Improvement	37	-	6,834	64	-	-	-	-	-	-	-	6,935
University of Wisconsin System	16,465	799	65	2,265	-	48	-	-	1	50	1	19,693
Unemployment Reserve	248	-	-	-	-	-	-	-	-	-	-	248
Nonmajor Enterprise	5,105	-	-	-	-	-	-	-	1,221	-	12,816	19,142
Internal Service	9,621	4,378	-	1,111	-	-	1,120	-	286	25	248	16,788
Fiduciary	10,160	1,291	-	849	2	4	26,063	-	24,510	195	6,328	69,402
Total	\$ 103,295	\$ 34,319	\$ 10,520	\$ 41,455	\$ 71	\$ 4,336	\$ 64,987	\$ 2,066	\$ 34,228	\$ 2,244	\$ 88,823	\$ 386,344

The balances in the Due from Other Funds and Due to Other Funds accounts typically result from the time lag between the dates that (1) interfund goods and services were provided and when the payments occurred, and (2) interfund transfers were accrued and when the liquidations occurred.

Most of the State's funds are presented on a fiscal year ended June 30. However, some funds are presented on a fiscal year ended December 31. As a result, inconsistencies may occur in amounts reported as interfund receivables or payables between funds with different fiscal year ends.

B. Interfund Receivables/Payables

Interfund Receivables/Payables represent short-term loans from one fund to another to cover cash overdrafts. Interfund receivables/payables at June 30, 2018 were as follows (in thousands):

	Interfund Receivable:				
	General	Injured Patients and Families Compensation	Nonmajor Enterprise	Fiduciary	Total
Interfund Payables:					
Nonmajor					
Governmental	\$ 2,121	\$ 50	\$ -	\$ -	\$ 2,171
Nonmajor					
Enterprise	25,266				25,266
Internal Service	47,346		-		47,346
Fiduciary	-	-	54	290,222	290,276
Total	\$74,732	\$ 50	\$ 54	\$290,222	\$365,058

C. Advances to/from Other Funds

Advances to/from Other Funds represent long-term loans to one fund from another fund. Advances at June 30, 2018 were as follows (in thousands):

	Advances from Other Funds (liability):		
	General	Nonmajor Governmental	Total
Advances to Other Funds (asset)			
Environmental Improvement	\$ -	\$ 6,352	\$ 6,352
Nonmajor Enterprise	759	-	759
Total	\$ 759	\$ 6,352	\$ 7,111

D. Interfund Transfers

Interfund Transfers in and out that occurred during Fiscal Year 2018 were as follows (in thousands):

Transfers In:

	General	Transportation	Capital Improvement	Nonmajor Governmental	Environmental Improvement	University of Wisconsin System	Nonmajor Enterprise	Internal Service	Total
Transfers Out:									
General	\$ -	\$ 43,435	\$ 83,411	\$ 700,037	\$ -	\$ 859,091	\$ 101,198	\$ 4,706	\$ 1,791,877
Transportation	1,761	-	8,198	163,665	-	-	-	-	173,623
Capital Improvement	-	-	-	-	17,880	142,360	8,684	1,283	170,207
Nonmajor Governmental	19,044	30,259	3,489	84,093	-	2,646	46	1,263	140,841
Injured Patients and Families Compensation	-	-	-	14	-	-	-	-	14
Environmental Improvement	-	-	-	8,011	-	-	-	-	8,011
University of Wisconsin System	13,266	-	302	67,715	-	-	-	-	81,283
Unemployment Reserve	9	-	-	-	-	-	-	-	9
Nonmajor Enterprise	23,390	-	7	8,597	-	-	14,734	-	46,728
Internal Service	1,096	-	34	1,713	-	20	-	697	3,560
Fiduciary	5	-	-	526	-	-	-	-	531
Total	\$ 58,571	\$ 73,693	\$ 95,441	\$ 1,034,370	\$ 17,880	\$ 1,004,117	\$ 124,663	\$ 7,949	\$ 2,416,683

Transfers are typically used to move: (1) revenues from the fund that statute or budget requires to collect them to the fund that statute or budget requires to expend them, (2) receipts restricted to debt service from the funds collecting the receipts to the debt service fund as debt service payments become due, (3) unrestricted revenues collected in one fund to finance various programs accounted for in other funds in accordance with statute or budgetary authorizations, and (4) accumulated surpluses from other funds to the General Fund when authorized by statute.

Most of the State's funds are presented on a fiscal year ended June 30. However, some funds are presented on a fiscal year ended December 31. As a result, inconsistencies may occur in amounts reported as interfund transfers between funds with different fiscal year ends. In addition, the transfer of capital assets between governmental and enterprise funds will result in an inconsistency.

Nonroutine and Other Transfers

Transfers considered non-routine or inconsistent with the fund making the transfer included the following (in thousands):

Transfer out from the General Fund:

Funds Reporting the Transfer In	Amount
Transportation	\$ 42,965
Environmental	7,990
Local Government Property Insurance	5,200

Transfers in to the General Fund:

Funds Reporting the Transfer Out	Amount
University of Wisconsin System	\$ 3,809
Local Government Property Insurance	13,136

Transfers out from the Petroleum Inspection Fund:

Fund Reporting the Transfer In	Amount
Transportation	\$ 24,000

NOTE 10. CHANGES IN LONG-TERM LIABILITIES

During the year ended June 30, 2018, the following changes occurred in long-term liabilities (in thousands):

Primary Government

Governmental Activities	Balance July 1, 2017	Additions	Reductions	Balance June 30, 2018	Amounts Due Within One Year
Bonds and Long Term Notes Payable:					
General Obligation Bonds & Notes for:					
Governmental Funds	\$ 5,486,525	\$ 1,203,948	\$ 1,132,043	\$ 5,558,430	\$ 538,914

Other Postemployment Benefits	474,509	40,656	22,898	492,267	-
Claims, Judgments and Commitments	556	-	77	479	-
Pollution Remediation Obligations	7,982	-	2,257	5,725	225
Total Governmental Activities Long-term Liabilities	\$ 12,573,138	\$ 2,225,821	\$ 2,030,656	\$ 12,768,303	\$ 892,417

Repayment of the general obligation bonds and notes is made from the Bond Security and Redemption Fund. The amount presented in this fund represents the liability to be paid from resources accumulated to provide debt service payments in Fiscal Year 2018. Repayment of the revenue bonds principal and interest is made from the appropriate debt service fund with payments secured by registration and inspection fees collected by the appropriate program. Most of the compensated absences, pension and other postemployment benefits liabilities are attributed to the General, Transportation and Conservation funds. Long-term liabilities for claims, judgments and commitments are generally liquidated with resources of the governmental activities.

Business-type Activities	Balance July 1, 2017	Additions	Reductions	Balance June 30, 2018	Amounts Due Within One Year

Business-type Activities:

General Obligation Bonds and Notes:		
University of Wisconsin System		1,618.7
Other Business-type		66.7
Revenue Bonds:		
Environmental Improvement		265.0
Total Business-type Activities		<u>1,950.4</u>
Total Primary Government	\$	<u>13,859.2</u>

A. General Obligation Bonds

The State of Wisconsin Building Commission, an agency of the State, is empowered by law to consider, act upon, authorize, issue and sell all debt obligations of the State. To date, the Commission has authorized and issued general obligation bonds and notes primarily to provide funds for the acquisition or improvement of land, water, property, highways, buildings, equipment or facilities for public purposes. Occasionally, general obligation bonds are also issued for the purpose of providing funds for veterans housing loans and to refund general obligation bonds. All general obligation bonds and notes authorized and issued by the State are secured by a pledge of the full faith, credit and taxing power of the State of Wisconsin and are customarily repaid over a period of twenty to thirty years.

Article VIII of the Wisconsin Constitution and Wis. Stat. Section 18.05 set limits on the amount of debt that the State can contract in total and in any calendar year. In total, debt outstanding cannot exceed five percent of the value of all taxable property in the State. Annual debt issued cannot exceed the lesser of three-quarters of one percent or five percent of the value of all taxable property in the State less net indebtedness at January 1.

At June 30, 2018, \$4.0 billion of general obligation bonds were legislatively authorized but unissued.

General obligation bonds issued and outstanding as of June 30, 2018 were as follows (in thousands):

Fiscal Year Issued	Series	Dates	Interest Rates	Maturity Through	Amount Issued	Amount Outstanding
2001	2001 Series A	2/01	7.0	5/31	\$ 15,000	\$ 1,095

Qualified Build America Bonds

The State has issued four series of general obligation bonds, in the aggregate amount of \$769.2 million, that are "qualified Build America Bonds" pursuant to Section 54AA of the Internal Revenue Code of 1986, as amended (Code). Based on the credit allowed for "qualified Build America Bonds", the State has elected to receive from the United States Treasury on each payment date a direct payment in the amount of 35 percent of the interest payable by the State with respect to such date, and the credit will not be allowed to the taxpayers holding the bonds.

With respect to the direct payments the State expects to receive, since such payments are not program Income and not pledged to the payment on the Bonds, there is no direct impact on the Bonds with these direct payments being subject to the mandated across-the-board cuts to the Federal budget for the federal fiscal year that started October 1, 2017 and ends September 30, 2018. The impact of these cuts for the current federal fiscal year is a 6.6% reduction in the direct payment amount that the State expected to receive.

- The interest rates on the 2009 Series B bonds, in the amount of \$54.5 million, range from 5.15 percent to 5.40 percent payable semiannually on May 1 and November 1 beginning with the first interest payment date of November 1, 2009. These bonds are callable at par on May 1, 2019 or any date thereafter. The bonds mature beginning May 1, 2023 through 2030.
- The interest rates on the 2009 Series D bonds, in the amount of \$225.8 million, range from 4.9 percent to 5.9 percent payable semiannually on May 1 and November 1 beginning with the first interest payment date of May 1, 2010. These

bonds are callable at par on May 1, 2020 or any date thereafter. The bonds mature beginning May 1, 2023 through 2040.

- The interest rates on the 2010 Series B bonds, in the amount of \$179.1 million, range from 4.3 percent to 5.65 percent payable semiannually on May 1 and November 1 beginning with the first interest payment date of November 1, 2010. These bonds are callable at par on May 1, 2020 or any date thereafter. The bonds mature beginning May 1, 2020 through 2030.
- The interest rates on the 2010 Series D bonds, in the amount of \$309.7 million, range from 3.45 percent to 5.1 percent payable semiannually on May 1 and November 1 beginning with the first interest payment date of May 1, 2011. These bonds are callable at par on May 1, 2021 or any date thereafter. The bonds mature beginning May 1, 2020 through 2041.

In November 2017, the State issued General Obligation Refunding Bonds (2017 Series 2), which included a crossover refunding of certain outstanding general obligation bonds that are "qualified Build America Bonds". A portion of the proceeds of the bonds were deposited in escrow to provide for future interest payments on the 2017 Series 2 bonds until the crossover dates (May 1, 2019 and May 1, 2020), at which time the escrow resources to retire \$46.5 million of 2009 Series B bonds, \$128.2 million of 2009 Series D Bonds, and \$119.1 million of 2010 Series B Bonds. Until the respective crossover dates, the refunded bonds are not considered defeased, and both the 2017 Series 2 Bonds and refunded bonds are reported as liabilities of the State.

B. General Obligation Long-term Notes

In April 2015, the State issued \$279.8 million of General Obligation Long-term Notes Payable for the purpose of refunding General Obligation Bonds. These notes were issued pursuant to a Term Loan Agreement with JPMorgan Chase Bank, NA. Pursuant to provisions of the Term Loan Agreement, interest rates on the outstanding maturities were increased effective January 1, 2018 as a result of the enactment on December 22, 2017 of the Federal Tax Cuts and Jobs Act (which decreased the federal corporate tax rate).

The face value of the notes are reported as part of General Obligation Bonds and Notes in the Statements of Net Position and bear interest at rates from 1.94 percent to 4.17 percent, payable semi-annually on each May 1 and November 1 until their maturity dates. Principal outstanding at year end totaled \$121.0 million.

As of June 30, 2018, long-term general obligation note debt service requirements for principal and interest for governmental activities and business-type activities are as follows (in thousands):

Fiscal Year Ended June 30	Governmental Activities		Business-Type Activities	
	Principal	Interest	Principal	Interest
2019	\$ 34,241	\$ 3,985	\$ 5,079	\$ 631
2020	45,387	2,820	6,073	459
2021	24,983	1,056	5,262	222
Total	\$ 104,611	\$ 7,861	\$ 16,414	\$ 1,312

C. Annual Appropriation Bonds

2003 Annual Appropriation Bonds

In December 2003, the State issued \$1.8 billion of General Fund Annual Appropriation Bonds consisting of Series A (Taxable Fixed Rate) and Series B (Taxable Auction Rate Certificates). These appropriation obligations were authorized by Wisconsin Statutes to obtain proceeds to pay the State’s anticipated unfunded accrued prior service (pension) liability under Wis. Stat. Section 40.05(2)(b) and its unfunded accrued liability for sick leave conversion credits under Wis. Stat. Section 40.05(4)(b), (bc), and (bw) and Subchapter IX of Chapter 40. In April and June 2008, the State issued \$1.0 billion of General Fund Annual Appropriation Refunding Bonds to refund the Series B (Taxable Auction Rate Certificates) that were issued in 2003. The 2008 issuance consisted of Series A (Taxable Fixed Rate) and Series B and C (Taxable Floating Rate Notes). In November 2012, the State issued \$251.6 million bonds to refund a portion of the 2003 Series A bonds. In August 2016, the State issued \$400.1 million of General Fund Annual Appropriation Refunding Bonds (Taxable) to refund the May 2018 maturities of the 2008 Series A Bonds.

debt service on such obligations, expresses in Wis. Stat. Section 16.527(10) its expectation and aspiration that it will do so. The Legislature’s recognition of a moral obligation, however, does not create a legally enforceable obligation.

The General Fund Annual Appropriation Bonds of 2003, Series A (Taxable Fixed Rate) in the outstanding principal amount of \$500.0 million (“2003 Series A Bonds”), bear interest at a rate of 5.70 percent computed on the basis of a 30-day month and a 360-day year, payable semiannually on each May 1 and November 1 until their maturity dates.

The General Fund Annual Appropriation Bonds of 2008, Series B (Taxable Floating Rate Notes), in the outstanding principal amount of \$300.0 million, bear interest at rates 120 basis points over the one-month LIBOR, computed on the basis of a 360-day year and for the number of days actually elapsed, payable monthly on the first business day of the month.

The General Fund Annual Appropriation Bonds of 2008, Series C (Taxable Floating Rate Notes), (“2008 Series C Bonds”) in the outstanding principal amount of \$185.0 million, bear interest at rates 110 basis points over the one-month LIBOR computed on the basis of a 360-day year and for the number of days actually elapsed, payable monthly on the first business day of the month.

The General Fund Annual Appropriation Refunding Bonds of 2012, Series A (Taxable Fixed Rate) in the outstanding principal amount of \$113.6 million (“2012 Series A Bonds”), bear interest at rates from 3.669 percent to 4.019 percent computed on the basis of a 30-day month and a 360-day year, payable semiannually on May 1 and November 1 until their maturity dates.

These appropriation obligations are not general obligations of the State, and do not constitute “public debt” of the State as that term is used in the Constitution and in the State Statutes. The payment of the principal of, and premium, if any, and interest on the obligations is subject to annual appropriation; that is, payments due in any fiscal year of the State will be made only to the extent sufficient amounts are appropriated by the Legislature. The State is not legally obligated to appropriate any amounts for payment of debt service. The Legislature, recognizing its moral obligation to make timely appropriations from the General Fund sufficient to pay

The General Fund Annual Appropriation Refunding Bonds of 2016, Series A (Taxable) in the outstanding principal amount of \$400.1 million (2016 Series A Bonds), bear interest at rates from 1.45 percent to 2.48 percent computed on the basis of a 30-day month and a 360-day year and for the number of days actually elapsed, payable semiannually on May 1 and November 1 until their maturity dates.

As of June 30, 2018, the debt service requirements for principal and interest on these bonds are as follows (in millions):

Fiscal Year Ended June 30	Principal	Interest
2019	\$ 41.0	\$ 72.2
2020	99.0	70.0

Total, net	<u>\$ 1,498.2</u>	<u>\$ 564.5</u>

Derivatives

The State has entered into interest rate exchange agreements, or swap agreements, to modify interest rates for nearly all of the 2008 Series B bonds and 2008 Series C bonds. All interest rate agreements at June 30, 2018, are classified as effective cash flow hedges. Since the interest rate exchange agreements qualify as an effective hedge, changes to fair value are not reported in the Statement of Activities. The State has contracted with a third-party advisor to provide estimates of the fair value of the aggregate swap agreements as of June 30, 2018.

Objective – In December 2003, the State entered into four interest rate exchange agreements with four different counterparties in order to reduce the interest rate risk in connection with \$595.2 million of the Series B (Taxable Auction Rate Certificates) issued in 2003. In June 2005, the State entered into four additional interest rate exchange agreements with three counterparties in order to reduce the interest rate risk on the balance of the Series B (Taxable Auction Rate Certificates) issued in 2003, (\$349.7 million). In April and June 2008, the State issued \$509 million of annual appropriation refunding bonds as floating rate notes having variable interest rate set every month (2008 Series B Bonds and 2008 Series C Bonds). In conjunction with issuance in April 2008, at its option the State terminated and made corresponding termination payments in the aggregate amount of \$40.0 million on some, and a portion of other, interest rate exchange agreements previously entered into in December 2003 and June 2005. As of June 30, 2018, interest rate exchange

agreements remain to reduce the interest rate risk in connection with \$477.0 million in floating rate notes.

Terms – Nearly all of the outstanding 2008 Series B Bonds and 2008 Series C Bonds are subject to the interest rate exchange agreements with a notional amount totaling \$477.0 million as of June 30, 2018. 2008 Series B Bonds and Series C Bonds mature and a related notional amount of the related interest rate exchange agreements decline from May 1, 2016 through 2032. Based on the interest rate exchange agreements, the State owes to the counterparties an amount calculated at fixed rates ranging from 4.661 percent to 5.47 percent and the counterparties owe the State interest on an amount based on a variable rate, which is the one-month LIBOR. The net amount is paid monthly.

Fair Value – As of June 30, 2018, the aggregate fair value of the interest exchange agreements was negative \$107.9 million, an improvement of \$42.6 million compared to the aggregate fair value of negative \$150.5 million reported as of June 30, 2017. Since the interest rate exchange agreements qualify as effective cash flow hedges, a deferred outflow of resources and a liability are reported in the statement of net position for the fair value of the swap agreements. Changes in the fair value are not reported in the statement of activities.

The fair value was determined by a third party consultant based on information contained in the broker Interest Rate Swap Confirmations supplied by the three counterparties -- JP Morgan Chase, Citigroup N.A. New York, and UBS AG. The fair value takes into consideration the prevailing interest rate environment and the specific terms and conditions of the interest rate exchange agreement. The fair value was estimated using the zero-coupon discounting method. This method calculates the future payments required by the interest rate exchange agreements, assuming that the current forward rates implied by the yield curve are the market's best estimate of future spot interest rates. These payments are then discounted using the spot rates implied by the current yield curve for a hypothetical zero-coupon rate bond due on the date of each future net settlement payment on the interest rate exchange agreements. The fair value may vary throughout the life of the swap agreements due to any changes in fixed swap interest rates and swap market conditions.

Associated Debt – Using rates as of June 30, 2018, debt service requirements are presented for the 2008 Series B Bonds and 2008 Series C Bonds that are subject to the interest rate exchange agreements and the net swap payments assuming that interest rates remain the same for their term. As rates vary, interest payments on the floating rate notes and net swap payments will vary.

(in millions)

Fiscal Year Ended June 30	Interest Rate			
	Principal	Interest	Swaps, Net	Totals
2019	\$ 1.1	\$ 15.7	\$ 15.6	\$ 32.4
2020	1.1	15.7	15.5	32.3
2021	8.5	15.6	15.4	39.6
2022	10.1	15.3	15.2	40.7
2023	10.1	15.0	15.0	40.1
2024 – 2028	211.1	64.3	64.7	340.0
2029 – 2032	235.0	17.1	17.3	269.4
	<u>\$ 477.0</u>	<u>\$ 158.8</u>	<u>\$ 158.7</u>	<u>\$ 794.5</u>

Interest Rate Risk – Currently, the State does not have interest rate risk because it is paying a fixed-rate of interest on the interest rate exchange agreements. However, if for some unforeseen reason any of the swap agreements are terminated prior to maturity; the State will have interest rate risk associated with the outstanding 2008 Series B Bonds and 2008 Series C Bonds until their maturity.

Credit Risk – As of June 30, 2018, the State was exposed to only a minimal amount of credit risk, as the fair values of all of the four interest rate exchange agreements were negative. Should rates change, the State could have increased exposure in the future. The State has entered into four interest rate agreements with three different counterparties. The lowest rating assigned to these counterparties is, as of June 30, 2018, A1 by Moody's, A+ by Standard & Poor's, and A+ by Fitch Ratings. Under the interest rate exchange agreements and to mitigate the potential for credit risk, if any of the counterparties' credit quality falls below A2 by Moody's Investors Service or A- by either Standard & Poor's or Fitch Ratings, the fair value of the interest rate exchange agreement for that respective counterparty will be fully collateralized by that counterparty. In addition, an event of termination occurs if any of the counterparties' credit quality falls below Baa2 by Moody's Investors service or BBB by either Standard & Poor's or Fitch Ratings.

Basis Risk – The interest rate exchange agreements expose the State to basis risk (i.e., a shortfall or surplus between the variable interest rate received on the interest rate exchange agreements and the interest rate paid on the floating rate notes), however this risk is fixed at the spreads for the respective series.

Termination Risk – The interest rate exchange agreements may be terminated by the State, upon two business days' written notice,

designating to the counterparty the termination date. In addition, the State or the counterparties may terminate the interest rate exchange agreements if the other party fails to perform under the terms of the interest rate exchange agreements or if other various events occur. As of June 30, 2018, there have not been any such events. If any interest rate exchange agreement is terminated, the State would be unhedged and exposed to additional interest rate risk on the 2008 Series B Bonds and the 2008 Series C Bonds. In addition, if the interest rate exchange agreement has a negative fair value at the time of termination, the State would incur a loss and would be required to make a settlement payment to the related counterparty. Actual termination payments, if required to be made, can be made, at the State's discretion, from the Stabilization Fund, or delayed until funds are available in the Subordinated Payment Obligations Fund or until the next biennium when appropriations can be made in the biennial budget for the termination payments.

Market-Access Risk and Rollover Risk – The State's swap agreements are for the term (maturity) of the 2008 Series B-Bonds and the 2008 Series C Bonds and, therefore, there is no market-access risk or rollover risk.

Foreign Currency Risk – The State's swap agreements are not subject to foreign currency risk.

2009 Annual Appropriation Bonds

In April 2009, the State issued \$1.5 billion of General Fund Annual Appropriation Bonds. These appropriation obligations were authorized by Wisconsin Statutes for the purpose of purchasing the tobacco settlement revenues that had been sold by the Secretary of Administration to the Badger Tobacco Asset Securitization Corporation pursuant to Wis. Stat. Section 16.63. In August 2016, January 2017, and May 2017, the State issued an aggregate \$1.1 billion of General Fund Annual Appropriation Refunding Bonds (Taxable and Tax Exempt) to refund a portion of the appropriation obligations issued in 2009.

The 2009 General Fund Annual Appropriation Bonds bear interest rates from 4.60 percent to 6.25 percent computed on the basis of a 30-day month and a 360-day year, payable semiannually on each May 1 and November 1, until their maturity dates.

The 2016 Series B (Taxable) General Fund Annual Appropriation Bonds bear interest rates from 1.45 percent to 3.29 percent computed on the basis of a 30-day month and a 360-day year, payable semiannually on each May 1 and November 1, until their maturity dates.

The 2017 Series A Taxable General Fund Annual Appropriation Bonds bear interest rates from 1.87 percent to 3.95 percent computed on the basis of a 30-day month and a 360-day year,

payable semiannually on each May 1 and November 1, until their maturity dates.

The 2017 Series B General Fund Annual Appropriation Bonds bear interest rates from 4.00 percent to 5.00 percent computed on the basis of a 30-day month and a 360-day year, payable semiannually on each May 1 and November 1, until their maturity dates.

The 2017 Series C (Taxable) General Fund Annual Appropriation Bonds bear interest rates from 1.52 percent to 3.15 percent computed on the basis of a 30-day month and a 360-day year, payable semiannually on each May 1 and November 1, until their maturity dates.

These appropriation obligations are not general obligations of the State, and do not constitute “public debt” of the State as that term is used in the Constitution and in the State Statutes. The payment of the principal of, and premium, if any, and interest on the obligations is subject to annual appropriation; that is, payments due in any fiscal year of the State will be made only to the extent sufficient amounts are appropriated by the Legislature. The State is not legally obligated to appropriate any amounts for payment of debt service. The Legislature, recognizing its moral obligation to make timely appropriations from the General Fund sufficient to pay debt service on such obligations, expresses in Wis. Stat. Section 16.527(10) its expectation and aspiration that it will do so. The Legislature’s recognition of a moral obligation, however, does not create a legally enforceable obligation.

As of June 30, 2018, the debt service requirements for principal and interest on these bonds are as follows (in millions):

Fiscal Year Ended June 30	Principal	Interest
2019	\$ 2.5	\$ 62.2
2020	36.9	62.2

D. Revenue Bonds

Chapter 18, Wisconsin Statutes, authorizes the State to issue revenue obligations secured by a pledge of revenues or property derived from the operation of a program funded by the issuance

of these obligations. The resulting bond obligations are not general obligations of the State.

Transportation Revenue Bonds

Transportation Revenue Bonds are issued to finance part of the costs of certain transportation facilities and major highway projects. Chapter 18, Subchapter II of the Wisconsin Statutes as amended, Wis. Stat. Sec. 84.59 and a general bond resolution and series resolutions authorize the issuance of these bonds.

The Department of Transportation is authorized to issue a total of \$4.1 billion of revenue bonds. Presently, there are fourteen issues of Transportation Revenue Bonds outstanding totaling \$2.1 billion. Debt service payments are secured by driver and vehicle registration fees and the program resolution provides for a reserve fund, which if funded, will be used in the event that a deficiency exists in the redemption fund.

The Transportation Revenue Bonds issued and outstanding as of June 30, 2018 were as follows (in thousands):

Issue	Issue Date	Interest Rates	Maturity Through	Issued	Outstanding
2017 2	12/17	5.0	7/32	\$ 368,595	\$ 368,595

Petroleum Inspection Fee Revenue Bonds

Petroleum Inspection Fee (PIF) Revenue Bonds are issued to finance claims made under the Petroleum Environmental Cleanup Fund Award (PECFA) Program for reimbursement of cleanup costs to soil and groundwater contamination. The program reimburses owners for 75 percent to 99 percent of cleanup costs associated with soil and groundwater contamination. As of June 30, 2018, PIF Bonds outstanding are \$55.1 million. Debt service payments are secured by petroleum inspection fees.

The PIF revenue bonds issued and outstanding as of June 30, 2018 were as follows (in thousands):

Issue	Issue Date	Interest Rate	Maturity Through	Issued	Outstanding
2016-1	10/16	4.0 to 5.0	7/19	\$ 62,445	\$ 55,130

Total					<u>\$ 56,071</u>

Environmental Improvement Fund Revenue Bonds

The Environmental Improvement Fund (the Fund) provides loans and grants to local municipalities to finance wastewater treatment planning and construction. The Fund is authorized to issue Clean Water Revenue Bonds and Environmental Improvement Fund Revenue Bonds up to an amount of \$2.5 billion in total.

Environmental Improvement Fund revenue bonds are payable only from revenues derived from 1) pledged loan amounts, 2) amounts in the Loan Fund, Reserve Fund (if any), and 3) all other pledged receipts.

The Environmental Improvement Fund has pledged future loan revenues, net of specified operating expenses, to repay outstanding revenue bonds. Proceeds from the bonds provided financing for loans to municipalities to construct or improve water and wastewater projects.

At June 30, 2018, there were two issues of Environmental Improvement Fund Revenue Bonds outstanding totaling \$237.9 million.

Bonds issued and outstanding for the Environmental Improvement Fund as of June 30, 2018 were as follows (in thousands):

Issue	Issue Date	Interest Rates	Maturity Through	Issued	Outstanding
2017-A	6/17	3.0 to 5.0	6/35	218,705	202,415

Qualified Build America Bonds

The State has issued three series of revenue bonds, in the aggregate amount of \$320.8 million, that are "qualified Build America Bonds" pursuant to Section 54AA of the Internal Revenue Code of 1986, as amended (Code). Based on the credit allowed for "qualified Build America Bonds", the State has elected to receive

from the United States Treasury on each payment date a direct payment in the amount of 35 percent of the interest payable by the State with respect to such date, and the credit will not be allowed to the taxpayers holding the bonds.

With respect to the direct payments the State expects to receive, since such payments are not Program Income and not pledged to

the payment on the Bonds, there is no direct impact on the Bonds with these direct payments being subject to the mandated across-the-board cuts to the Federal budget for the federal fiscal year that started October 1, 2017 and ends September 30, 2018. The impact of these cuts for the current federal fiscal year is a 6.6% reduction in the direct payment amount that the State expected to receive.

The interest rates on the 2009 Series B (taxable) Transportation Revenue Bonds in the amount of \$127.2 million range from 4.44 percent to 5.84 percent payable semiannually on January 1 and July 1 beginning with the first interest payment date of July 1, 2010. These bonds are callable at par on July 1, 2019 or any date thereafter. The bonds mature beginning July 1, 2015 through 2030.

The interest rates on the 2010 Series B (taxable) Transportation Revenue Bonds in the amount of \$123.9 million range from 4.7 percent to 6.0 percent payable semiannually on January 1 and July 1 beginning with the first interest payment date of July 1, 2011. These bonds are callable at par on July 1, 2020 or any date thereafter. The bonds mature beginning July 1, 2022 through 2031.

In December 2017, the State issued Transportation Revenue Refunding Bonds (2017 Series 2), which included a crossover refunding of certain outstanding transportation revenue bonds that are "qualified Build America Bonds". A portion of the proceeds of the bonds were deposited in an escrow to provide for future interest payments on the 2017 Series 2 bonds until the crossover dates (July 1, 2019 and July 1, 2020), at which time the escrow has resources to retire \$112.6 million of 2009 Series B bonds and \$123.9 million of 2010 Series B bonds. Until the respective crossover dates, the refunded bonds are not considered to be defeased, and both the 2017 Series 2 bonds and refunded bonds are reported as liabilities of the State.

E. Refundings, Exchanges and Early Extinguishments

Refunding Provisions of GASB Statement No. 23

The State implemented the provisions of GASB Statement No. 23. *Accounting and Financial Reporting for Refunding of Debt Reported by Proprietary Activities* beginning with Fiscal Year 1996. This Statement requires proprietary activities to adopt certain accounting and reporting changes for both current refunding and advance refunding resulting in defeasance of debt. GASB Statement No. 23 permits, but does not require, retroactive application of its provisions. The State has chosen not to apply the provisions retroactively to previously issued financial statements.

Current Fiscal Year Refundings/General Obligation Bonds

In July 2017, the State issued \$345.3 million of general obligation refunding bonds (2017 Series 1), the proceeds of \$422.4 million were deposited in an escrow account to provide for future debt service payments and redemption of \$374.9 million of various general obligation bonds outstanding at the time of the refunding. As a result of the advance refunding, the \$374.9 million of various general obligation bonds for which future debt service payments and redemption are paid from the escrow account are considered defeased and the associated liability removed from the financial statements. The refunding resulted in a decrease in total debt service payments by \$34.9 million and an economic gain of \$25.0 million.

In December 2017, the State issued \$382.7 million of General Obligation Refunding Bonds (2017 Series 2), which was a combination advance refunding and crossover refunding. The proceeds of 462.6 million were deposited in an escrow account to provide for (i) future debt service and redemption of \$135.7 million of various general obligation bonds outstanding at the time of the refunding, resulting in the \$135.7 million of various general obligation bonds being considered defeased and the associated liability removed from the financial statements, and (ii) future interest payments on the 2017 Series 2 bonds until the crossover dates (May 1, 2019 and May 1, 2020), at which time the escrow has resources to retire \$293.9 million of various general obligation bonds that are NOT considered to be defeased until the respective crossover refunding date, with both the 2017 Series 2 bonds and crossover refunded bonds reported as liabilities of the State until such date. The refunding resulted in a decrease in total debt service payments by \$32.1 million and an economic gain of \$27.9 million.

In December 2017, the State issued \$347.0 million of general obligation refunding bonds (2017 Series 3), the proceeds of \$416.7 million were deposited in an escrow account to provide for future debt service payments and redemption of \$365.9 million of various general obligation bonds outstanding at the time of the refunding. As a result of the advance refunding, the \$365.9 million of various general obligation bonds for which future debt service payments and redemption are paid from the escrow account are considered defeased and the associated liability removed from the financial statements. The refunding resulted in a decrease in total debt service payments by \$31.7 million and an economic gain of \$21.6 million.

Prior Year Refundings/General Obligation Bonds

Government Accounting Standards Board Statement No. 7 *Advance Refundings Resulting in Defeasance of Debt*, provides that refunded debt and assets placed in escrow for the payment of related debt service be excluded from the financial statements. At

June 30, 2018, \$1,571.4 million of general obligation bond principal has been defeased.

Current Fiscal Year Refundings/Revenue Bonds

In December 2017, the State issued \$368.6 million of Transportation Revenue Refunding Bonds (2017 Series 2), which was a combination advance refunding and crossover refunding. The proceeds of \$439.6 million were deposited in an escrow account to provide for (i) future debt service payments and redemption of \$169.5 million of various transportation revenue bonds outstanding at the time of the refunding, resulting in the \$169.5 million of various transportation revenue bonds being considered defeased and the associated liability removed from the financial statements, and (ii) future interest payments on the 2017 Series 2 bonds until the crossover dates (July 1, 2019 and July 1, 2020), at which time the escrow has resources to retire \$236.5 million of various transportation revenue bonds that are NOT considered to be defeased until the respective crossover refunding date, with both the 2017 Series 2 bonds and crossover refunded bonds reported as liabilities of the State until such date.. The refunding resulted in a decrease in total debt service payments by \$22.5 million and an economic gain of \$21.3 million.

Prior Year Refundings/Revenue Bonds

For financial reporting purposes, the following primary government revenue bonds have been defeased, and therefore, removed as a liability from the balance sheet:

- Environmental Improvement Fund revenue bonds – At June 30, 2018, revenue bonds outstanding of \$646.7 million have been defeased.
- Transportation Revenue Bonds – At June 30, 2018, revenue bonds outstanding of \$561.9 million have been defeased.

F. Short-term Financing

The State of Wisconsin Building Commission, an agency of the State, is empowered by law to consider, authorize, issue, and sell debt obligations of the State. To date, the Commission has authorized the issuance of notes. When this short-term debt does not meet long-term financing criteria, it is classified among fund liabilities.

General Obligation Commercial Paper Notes

The State has authorized General Obligation Commercial Paper Notes for the acquisition, construction, development, extension, enlargement, or improvement of land, waters, property, highway, buildings, equipment or facilities. Periodically, additional commercial paper notes are issued to pay for maturing commercial paper notes.

The State intends to make annual May 1 payments on the outstanding commercial paper notes that reflect principal amortization of the notes. The State also intends to make regular payments to the issuing and paying agent that will be used to pay interest due on maturing notes. On June 30, 2018, the amount of commercial paper notes outstanding was \$181.9 million which had interest rates ranging from 1.12 percent to 1.66 percent and maturities ranging from July 2, 2018 to September 6, 2018.

Short-term debt activity for the year ended June 30, 2018 for general obligation commercial paper notes was as follows (in millions):

Balance		Balance	
July 1, 2017	Additions	Reductions	June 30, 2018
\$ 218.7	\$ --	\$ 36.8	\$ 181.9

General Obligation Extendible Municipal Commercial Paper

The State has authorized General Obligation extendible municipal commercial paper for the acquisition, construction, development, extension, enlargement, or improvement of land, waters, property, highway, buildings, equipment or facilities. Periodically, additional extendible municipal commercial papers are issued to pay for maturing extendible municipal commercial paper. The State intends to make annual May 1 payments on the outstanding commercial paper notes that reflect principal amortization of the paper. The State also intends to make regular payments to the issuing and paying agent that will be used to pay the interest due on the maturing notes. At June 30, 2018, the amount of extendible municipal commercial paper outstanding was \$223.7 million which had interest rates ranging from 1.38 percent to 1.72 percent and maturities from July 9, 2018, to August 6, 2018.

Short-term debt activity for the year ended June 30, 2018 for general obligation extendible municipal commercial paper was as follows (in millions):

Balance		Balance	
July 1, 2017	Additions	Reductions	June 30, 2018
\$ 288.2	\$ --	\$ 64.5	\$ 223.7

Transportation Revenue Commercial Paper Notes

The State authorized transportation revenue commercial paper notes to pay the costs of major highway projects and certain State transportation facilities. Periodically, additional commercial paper notes are issued to pay for maturing commercial paper notes. The State intends to make annual July 1 payments on the commercial paper notes that reflect principal amortization of the notes. The State also intends to make regular deposits to the issuing and paying agent that will be used to pay interest due on maturing notes. At June 30, 2018, the amount of transportation revenue commercial paper notes outstanding was \$58.8 million which carries interest rates ranging from 1.33 percent to 1.70 percent and maturities ranging from August 2, 2018 to September 6, 2018.

Short-term debt activity for the year ended June 30, 2018 for the transportation revenue commercial paper notes was as follows (in millions):

Balance					Balance	
July 1, 2017	Additions	Reductions			June 30, 2018	
\$ 88.7	\$ --	\$ 29.9			\$ 58.8	

G. Certificates of Participation

The State established a facility in 1992 that provides lease purchase financing for property and certain service items acquired by state agencies. This facility is the Third Amended and Restated Master Lease between the State acting by and through the Department of Administration and U.S. Bank National Association. Lease purchase obligations under the Master Lease are not general obligations of the State, but are payable from appropriations of State agencies participating in the Master Lease Program, subject to annual appropriation. The interest component of each lease/purchase payment is subject to a separate determination.

Pursuant to the terms and conditions of this agreement, the trustee for the facility issues parity Master Lease certificates of participation that evidence proportionate interest of the owners thereof in lease payments. A common pool of collateral ratably secures all Master Lease certificates. Title in the property and service items purchased under the facility remains with the State and the State grants to the Trustee, for the benefit of all Master Lease certificate holders, a first security interest in the leased items.

The outstanding balance as of June 30, 2018 was as follows:

Balance Due	Average Life (Weighted Term)
\$109.6 million	2.91 Years

At June 30, 2018, the following parity Master Lease certificates were outstanding:

- Master Lease Certificates of Participation of 2013, Series A (Revolving Credit Agreement – Taxable) in the amount of \$30.1 million. This Master Lease certificate evidences the State's obligation to repay advances under a Revolving Credit Agreement, dated September 1, 2013, as amended between U.S. Bank National Association (as trustee), the State of Wisconsin, acting by and through its Department of Administration, as lessee, and PNC Bank National Association. The scheduled termination date under the Revolving Credit Agreement, as amended, is September 1, 2018. This Master Lease certificate shall bear interest at the rates and mature on the dates provided for in the Revolving Credit Agreement. The balance of this Master Lease certificate may include some accrued interest that will be payable at the next semi-annual interest payment date.
- Master Lease Certificates of Participation of 2014, Series A, in the amount of \$17.2 million. This series of Master Lease certificates has interest rates ranging from 2.75 percent to 5.0 percent and matures semi-annually through March 1, 2023.
- Master Lease Certificates of Participation of 2014, Series B in the amount of \$19.4 million. This series of Master Lease certificates has interest rates ranging from 1.65 to 5.00 percent and matures semi-annually through March 1, 2023.
- Master Lease Certificates of Participation of 2015, Series A in the amount of \$24.3 million. This series of Master Lease certificates has interest rates ranging from 3.0 to 5.0 percent and matures semi-annually through March 1, 2023.
- Master Lease Certificates of Participation of 2016, Series A in the amount of \$18.6 million. This series of Master Lease certificates has interest rates ranging from 3.0 to 5.0 percent and matures semi-annually through March 1, 2023.

The Third Amended and Restated Master Lease 1992-1 provides that certain lease schedules to the facility can be terminated if the State deposits with the Trustee an amount that is equal to the outstanding amount of the lease schedule, or in amounts that are sufficient to purchase investments that mature on dates and in amounts to make the lease payments when due. At June 30, 2018,

the State has not deposited with the Trustee amounts, that when invested, will terminate lease schedules.

H. Arbitrage Rebate

The Tax Reform Act of 1986 requires that governmental entities issuing tax-exempt debt subsequent to August 1986, calculate and rebate arbitrage earnings to the federal government. Specifically, the excess of the aggregated amount earned on investments purchased with bond proceeds over the amount that would have been earned if the proceeds were invested at a rate equal to the bond yield, is to be rebated to the federal government. As of June 30, 2018, a liability for arbitrage rebate did not exist.

I. Moral Obligation Debt

Through legislation enacted in 1999, the State authorized the creation of local districts. These districts (Wisconsin Center District, Southeast Wisconsin Professional Baseball Park District, and the Green Bay/Brown County Professional Football Stadium District) are authorized to issue bonds for their respective purpose, and if the State determines that certain conditions are satisfied, the State may have a moral obligation to appropriate moneys to make up deficiencies in the districts' special debt service reserve funds. To date, the Wisconsin Center District has the authority to issue up to \$200.0 million in bonds and has issued one series with an outstanding balance of \$108.3 million that is subject to the moral obligation. The two other local districts each have authority to issue \$160.0 million of revenue obligations that, subject to the Secretary of Administration's determination that certain conditions have been met, could carry a moral obligation of the State. All the districts have issued revenue obligations that do not carry the moral obligation of the State.

Through legislation enacted in 1999, the State authorized the issuance of up to \$170.0 million principal amount of bonds to finance the development or redevelopment of sites and facilities to be used for public schools. If certain conditions are satisfied, and if a special debt service reserve fund is created for the bonds, the State will provide a moral obligation pledge, which would restore the special debt reserve fund established for the bonds to an amount not to exceed the maximum annual debt service on the bonds. One bond issue with an outstanding balance of \$29.1 million has been issued that have a special debt service reserve fund secured by the State's moral obligation.

Through legislation enacted in 2017, subject to the Secretary of Administration's designation and determination of certain conditions being met, the State may provide a moral obligation

pledge for up to 40% of a local governmental unit's aggregate municipal obligations issued to finance costs related to development occurring in, or for the benefit of, the electronics and information technology manufacturing zone. In October 2018, the Secretary of Administration designated the State's moral obligation pledge on \$120.0 million of Village of Mount Pleasant Tax Increment Revenue Bonds.

J. Credit Agreements

The State has entered into a credit agreement that provides the State a line of credit for liquidity support for up to \$275.0 million of general obligation commercial paper notes. As of June 30, 2018, \$275.0 million was unused and available. The line of credit expires in March 2019, but is subject to termination and renewal as provided for in the credit agreement. The cost of this line of credit is 0.225 percent per year.

The State has entered into a credit agreement to provide the State a line of credit for liquidity support for its transportation revenue commercial paper program. The amount of the line of credit is \$63.0 million. As of June 30, 2018, \$63.0 million was unused and available. This line of credit expires in April 2019, but is subject to termination and renewal as provided for in the credit agreement. The cost of this line of credit is 0.35 percent per year.

This page left intentionally blank.

**NOTE 12. LEASE COMMITMENTS AND
INSTALLMENT PURCHASES**

The State leases office buildings, space, and equipment under a variety of agreements that vary in lease term, many of which are subject to appropriation from the State Legislature to continue the lease commitment. If such funding, i.e., through legislative appropriation, is judged to be assured, and the likelihood of cancellation through exercise of the fiscal funding clause is remote, leases are considered non-cancelable and reported as either a capital lease or an operating lease.

A. Capital Leases

Primary Government

Capital lease commitments in the government-wide and proprietary funds statements are reported as liabilities at lease inception. The related assets along with the depreciation are also reported at that time. Lease payments are reported as a reduction of the liability.

For capital leases in governmental funds, "Other Financing Sources - Capital Lease Acquisitions" and expenditures are recorded at lease inception. Lease payments are recorded as expenditures.

The following is an analysis of the gross minimum lease payments along with the present value of the minimum lease payments as of June 30, 2018 for capital leases (in thousands):

Fiscal Year	Governmental Activities	
	Principal	Interest
2019	\$ 16,478	\$ 4,358
2020	13,431	3,612
2021	12,704	2,966
2022	10,596	2,393
2023	40,408	1,942
2024-2028	711	52
2029-2033	-	-
2034-2038	-	-
2039-2043	-	-
2044-2048	-	-
Total minimum future payments	94,328	-
Total minimum interest payments	\$ -	15,323

Fiscal Year	Business-type Activities	
	Principal	Interest
2019	\$ 1,147	\$ 2,162
2020	1,021	2,125
2021	881	2,078
2022	733	2,025
2023	706	1,973
2024-2028	4,179	9,067
2029-2033	4,872	7,492
2034-2038	6,985	5,379
2039-2043	10,766	2,356
2044-2048	-	-
Total minimum future payments	31,289	-
Total minimum interest payments	\$ -	34,656

Assets acquired through capital leases are valued at the lower of fair market value or the present value of minimum lease payments at the inception of the lease. The following is an analysis of capital assets recorded under capital leases as of June 30, 2018 (in thousands):

	Governmental Activities	Business-type Activities
Land and Land Improvements	\$ -	\$ -
Buildings and Improvements	-	29,287
Machinery and Improvements	176,377	3,029
Construction in Progress	-	-
Less: Accumulated Depreciation	(55,749)	(5,143)
Carrying Amount	\$ 120,628	\$ 27,172

B. Operating Leases

Operating leases, those leases not recorded as capital leases, are not recorded in the statement of net position. These leases contain various renewal options, the effect of which are reflected in the minimum lease payments only if it is considered that the option will be exercised. Certain other operating leases contain escalation clauses and contingent rentals which are not included in the calculation of the future minimum lease payments. Operating lease expenditures/expenses are recognized as incurred or paid over the lease term.

Governmental and business-type activities rental expenses under operating leases for Fiscal Year 2018 were \$92.9 million. Of this amount, \$92.8 million relates to minimum rental payments stipulated in lease agreements, and \$49.1 thousand pertains to contingent rental payments.

The following is an analysis of the future minimum rental payments due under operating leases (in thousands):

Fiscal Year	Governmental Activities	Business-type Activities
2019	\$ 40,702	\$ 25,213
2020	29,014	24,687
2021	22,895	21,635
2022	10,942	15,630
2023	7,445	14,318
2024 - 2028	11,400	63,037
2029 - 2033	1,077	54,932
2034 - 2038	848	39,150
2039 - 2043	733	24,721
2044- 2048	521	14,820
2049 - 2053	240	-
2054 - 2058	228	-
Thereafter	76	-
Minimum lease payments	\$ 126,120	\$ 298,144

C. Installment Purchases

The State has entered into installment purchase agreements. The following is an analysis of the gross minimum installment payments, along with the present value of the minimum installment payments, as of June 30, 2018 for installment purchases (in thousands):

Fiscal Year	Business-type Activities	
	Principal	Interest
2019	\$ 401	6
2020	401	5
2021	401	3
2022	-	-
2023	-	-
Total minimum future installment payments	\$ 1,203	-
Total interest payments	\$ -	13

NOTE 13. POLLUTION REMEDIATION OBLIGATIONS

Governmental Accounting Standards Board (GASB) Statement No. 49, *Accounting and Financial Reporting for Pollution Remediation Obligations*, establishes accounting and financial reporting standards for pollution remediation obligations. These are obligations to address the current or potential detrimental effects of existing pollution by participating in pollution remediation activities such as site assessments and cleanups. The scope of the standard excludes pollution prevention or control obligations with respect to current operations, and future pollution remediation obligations that are required upon retirement of an asset, such as landfill closure and post closure care and nuclear power plant decommissioning.

Measurement of Obligations

GASB Statement No. 49 requires the State to calculate pollution remediation obligations using the expected cash flow technique. These estimates are subject to change over time. Costs may vary due to price fluctuations, changes in technology, changes in potential responsible parties, results of environmental studies, changes to statutes or regulations and other factors. Recoveries from other responsible parties may reduce the State's obligation. In accordance with the standard, if the State cannot reasonably estimate a pollution remediation obligation, it does not report a liability. Under specific circumstances capital assets may be created when pollution remediation is performed. The State has adopted a minimum reporting threshold of \$1.0 million. Therefore, only remediation sites with outlays estimated to meet or exceed that amount are reported in the financial statements.

During the fiscal year, the State recognized \$(2.1) million of additional estimated liabilities for pollution remediation. The State expended \$0.2 million to clean up sites. Therefore, the beginning liability of \$8.0 million decreased to \$5.7 million. There were no recoveries received from other responsible parties during the fiscal year and none are expected for the identified obligations.

Identified Remediation Obligations

Pollution remediation liabilities are updated annually and are based on engineering studies and the judgment of agency officials. The following table shows liabilities included in the Statement of Net Position as of June 30, 2018 (in millions):

Nature and Source of Pollution	Estimated Liability	Estimated Recovery
Contract agreement with EPA to clean up Superfund site for former wood treatment facility	\$0.2	
Voluntary commencement by the State to clean up heavy metal contamination of canal near former industrial site	5.5	--
Total estimated obligations	\$5.7	--

In addition to the liability reported in the table above, the State expects to incur estimated costs of \$27,000 per year indefinitely to pump and treat contamination at a former chrome plating facility. The State also expects to incur estimated costs of \$70,000 per year indefinitely to operate and maintain a closed landfill. Both are Superfund sites and estimated total remediation costs for them cannot be reasonably determined. Therefore, a liability has not been reported in the Statement of Net Position for either site.

NOTE 14. RETIREMENT PLAN

The Wisconsin Retirement System (WRS) was established and is administered by the State of Wisconsin to provide pension benefits for State and local government public employees. The WRS consists of the Core Retirement Investment Trust, the Variable Retirement Investment Trust, and the Police and Firefighters Trust. Although separated for accounting purposes, the assets of these trust funds can be used to pay benefits for any member of the WRS, and are reported as one pension plan.

The WRS is considered part of the State of Wisconsin's financial reporting entity. Copies of the separately issued financial report that includes audited financial statements and required supplementary information for the year ending December 31, 2017, is available at www.etf.wi.gov.

Plan Description

The WRS, governed by Chapter 40 of the Wisconsin Statutes, is a cost-sharing multiple-employer defined benefit pension plan administered by the Department of Employee Trust Funds. Benefit terms may only be modified by the Legislature. It provides coverage to all eligible State of Wisconsin, local government and other public employees. All employees, initially employed by a participating WRS employer prior to July 1, 2011, expected to work at least 600 hours a year (440 hours for teachers and school district educational support employees) and expected to be employed for at least one year from employee's date of hire are eligible to participate in the WRS. All employees, initially employed by a participating WRS employer on or after July 1, 2011, and expected to work at least 1200 hours a year (880 hours for teachers and school district educational support employees) and expected to be employed for at least one year from employee's date of hire are eligible to participate in the WRS. Note: Employees hired to work nine or ten months per year, (e.g. teachers contracts), but expected to return year after year are considered to have met the one-year requirement.

As of December 31, 2017, the number of participating employers was:

State Agencies	57
Cities	152
Counties	71
4 th Class Cities	36
Villages	268
Towns	257
School Districts	422
Wisconsin Technical College System Board Districts	16
Cooperative Educational Service Agencies	12
Other	208
Total Employers	1,499

For employees beginning participation on or after January 1, 1990 and no longer actively employed on or after April 24, 1998, creditable service in each of five years is required for eligibility for a retirement annuity. Participants employed prior to 1990 and on or after April 24, 1998 and prior to July 1, 2011 are immediately vested. Participants who initially became WRS eligible on or after July 1, 2011 must have five years of creditable service to be vested. Employees who retire at or after age 65 (54 for protective occupation employees, 62 for elected officials and State executive participants) are entitled to receive an unreduced retirement benefit. The factors influencing the benefit are: (1) final average earnings, (2) years of creditable service, and (3) a formula factor.

Final average earnings is the average of the participant's three highest years' earnings. Creditable service is the creditable current and prior service expressed in years or decimal equivalents of partial years for which a participant receives earnings and makes contributions as required. The formula factor is a standard percentage based on employment category.

Vested employees may retire at age 55 (50 for protective occupation employees) and receive reduced benefits. Employees terminating covered employment before becoming eligible for a retirement benefit may withdraw their contributions and forfeit all rights to any subsequent benefits, or may leave contributions on deposit and defer application until eligible to receive a retirement benefit. The WRS also provides death and disability benefits for employees.

The Employee Trust Funds Board may periodically adjust annuity payments from the WRS based on annual investment performance in accordance with s. 40.27, Wis. Stat. An increase (or decrease) in annuity payment may result when investment gains (losses), together with other actuarial experience factors, create a surplus (shortfall) in the reserves, as determined by the WRS' consulting actuary. Annuity increases are not based on cost of living or other similar factors. For Core annuities, decreases may be applied only to previously granted increases. By law, Core Retirement Investment Trust fund annuities cannot be reduced to an amount below the original, guaranteed amount set at retirement.

Accounting Policies and Plan Asset Matters

The financial statements of the WRS have been prepared in accordance with generally accepted accounting principles, using the flow of economic resources measurement focus and a full accrual basis of accounting. Under the accrual basis of accounting, revenues are recorded when earned and expenses are recorded at the time the liabilities are incurred. Plan member contributions are recognized in the period in which contributions are paid. Employer contributions to the plan are recognized in the accounting period in which the underlying earnings on which the contributions are based are paid and the employer has made a formal commitment to provide contributions. Benefits and refunds are

recognized when due and payable in accordance with the terms of the plan.

All assets of the WRS are invested by the State of Wisconsin Investment Board. The retirement fund assets consist of shares in the Variable Retirement Investment Trust and the Core Retirement Investment Trust. The Variable Retirement Investment Trust consists primarily of equity securities. The Core Retirement Investment Trust is a balanced investment fund made up of fixed income securities and equity securities. Shares in the Core Retirement Investment Trust are purchased as funds are made available from retirement contributions and investment income, and sold when funds for benefit payments and other expenses are needed.

The assets of the Core and Variable Retirement Investment Trusts are carried at fair value with all market value adjustments recognized in current operations. Investments are revalued monthly to current market value. The resulting valuation gains or losses are recognized as income, although revenue has not been realized through a market-place transaction.

The WRS does not have any investments (other than those issued or guaranteed by the U.S. Government) in any one organization that represent 5.0 percent or more of plan net position.

Contributions Required

Required contributions are determined by an annual actuarial valuation in accordance with Chapter 40 of the Wisconsin Statutes. The employee required contribution is one-half of the actuarially determined contribution rate for general category employees, including teachers, and executives and elected officials. In 2016, executives & elected officials' contributions rates were changed to match General. Required contributions for protective contributions are the same rate as general employees. Employers are required to contribute the remainder of the actuarially determined contribution rate. The employer may not pay the employee required contribution unless provided for by an existing collective bargaining agreement. Contribution rates as of June 30, 2018 are:

	<u>Employee</u>	<u>Employer</u>
General (including teachers)	6.7%	6.7%
Executives & Elected Officials	6.7%	6.7%
Protective with Social Security	6.7%	10.7%
Protective without Social Security	6.7%	14.9%

Employers are required to contribute an actuarially determined amount necessary to fund the remaining projected cost of future benefits.

State of Wisconsin Net Pension Asset, Pension Contributions, Pension Expenses, and Deferred Outflows and Inflows of Resources

At June 30, 2018, the State reported a net pension asset of \$826.1 million for its proportionate share of the WRS' net pension asset. It is presented as a net pension asset on the Statement of Net Position for proprietary and fiduciary funds and on the government-wide Statement of Net Position.

The net pension asset was measured as of December 31, 2017, and the total pension asset was based on an actuarial valuation as of December 31, 2016. Update procedures were used to roll forward the total pension asset to the measurement date. No material changes in assumptions or benefit terms occurred between the actuarial valuation date and the measurement date.

The State's proportionate share of the net pension asset was determined based on the average of the State's contributions to the WRS over the three most recent calendar years relative to the average contributions of all employers for the same period. At December 31, 2017, the State's proportionate share was 27.8 percent, which is a decrease of 0.15 percent from its proportionate share as of December 31, 2016.

For calendar year 2017, State employers made \$280.5 million in contributions recognized by the WRS.

For the year ended June 30, 2018, the State recognized pension expense of \$357.0 million. At June 30, 2018, the State reported deferred outflows and inflows of resources related to pensions of \$1.22 billion and \$1.64 billion, respectively. More information about deferred outflows and inflows related to pensions, including the types and the amounts applicable to each type, can be found in Note 21.

A schedule presenting multi-year trend information of the State's proportionate share of the net pension liability or asset is presented as required supplementary information following the notes to the financial statements.

Actuarial Valuation

The pension measurements as of December 31, 2017 were based upon the following actuarial assumptions:

Actuarial Valuation Date	December 31, 2016
Measurement Date of Net Pension Asset	December 31, 2017
Actuarial Cost Method	Entry Age Normal
Asset Valuation Method	Fair Value
Long-Term Expected Rate of Return	7.20%
Discount Rate	7.20%
Salary Increases	
Inflation	3.20%
Seniority/Merit	0.2% - 5.6%
	Wisconsin 2012
Mortality	Mortality Table
Post-retirement Adjustments*	2.10%

* Post-retirement adjustments are not guaranteed. Actual adjustments are based on recognized investment return, actuarial experience, and other factors. The assumed annual adjustment based on the investment return assumption and the post-retirement discount rate is 2.1%.

Actuarial assumptions are based upon an experience study conducted in 2015 using experience from 2012-2014.

Long-Term Expected Return on Plan Assets

The long-term expected rate of return on WRS investments was determined using a building-block method in which best-estimate ranges of expected future real rates of return, net of WRS investment expense and inflation, are developed for each major asset class. The ranges are combined to produce the long-term expected rate of return by weighting the expected future real rates of return by the target asset allocation percentage and by adding expected inflation. The long-term expected rate of return is reviewed every three years in conjunction with the WRS experience study. For each major asset class that is included in the Core Retirement Investment Trust fund's target asset allocation as of December 31, 2017, these best estimates of geometric long-term real rates of return were used:

Asset Class	Target Allocation	Rate of Return
Global Equities	50.0%	5.3%
Fixed Income	24.5	1.4
Inflation Sensitive	15.5	1.0
Real Estate	8.0	3.6
Private Equity/Debt	8.0	6.5
Multi-asset	4.0	3.6

For each major asset class that is included in the Variable Retirement Investment Trust fund's target asset allocation as of December 31, 2017, these best estimates of geometric long-term real rates of return were used:

Asset Class	Target Allocation	Rate of Return
Domestic Equity	70.0%	4.6%
International Equity	30.0	4.9

The money-weighted rates of return on pension plan investment for the Core and Variable funds for the calendar year ended 2017 were 15.85% and 23.27%, respectively. The money-weighted rate of return expresses investment performance, net of pension plan expenses, adjusted for the changing amount actually invested.

Discount Rate

A single discount rate of 7.2% was used to measure the total pension liability. This rate was based on the expected rate of return of 7.2% and a long-term bond rate of 3.31%. Because of the unique structure of the WRS, the 7.2% expected rate of return implies that a dividend of approximately 2.1% will always be paid. For purposes of the single discount rate, it was assumed that the dividend would always be paid. The projection of cash flows used to determine this single discount rate assumed that plan member contributions will be made at the current contribution rate and that employer contributions will be made at rates equal to the difference between actuarially determined contribution rates and the member rate. Based on these assumptions, the pension plan's fiduciary net position was projected to be available to make all projected future benefit payments (including expected dividends) of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefit payments to determine the total pension liability.

The following presents the State's proportionate share of the net pension liability (asset), calculated using a single discount rate of 7.2%, as well as what the State's net pension liability (asset) would be if it were calculated using a single discount rate that is 1% lower or 1% higher:

	State's share of the net pension liability (asset)
1% Decrease (6.2%)	\$ 2,137,438,692
Current Rate (7.2%)	\$ (826,113,891)
1% Increase (8.2%)	\$ (3,078,505,537)

NOTE 15. MILWAUKEE RETIREMENT SYSTEM

The Milwaukee Retirement System (MRS) is reported as an Investment Trust Fund. MRS participants provide assets to the State of Wisconsin, Department of Employee Trust Funds (DETF) for investing in its Core Retirement Investment Trust Fund (Core Fund) and the Variable Retirement Investment Trust Fund (Variable Fund) of the Wisconsin Retirement System. Participation of the MRS in the Core Fund and Variable Fund is described in the DETF Administrative Code, Chapter 10.12. The State of Wisconsin Investment Board (SWIB) manages the Core Fund and Variable Fund with oversight by a Board of Trustees as authorized in Wis. Stat. 25.14 and 25.17. SWIB is not registered with the Securities and Exchange Commission as an investment company.

The investments of the Core Fund and Variable Fund consist of a highly diversified portfolio of securities. Wis. Stat. 25.17(3)(a) allows investments in loans, securities and any other investments as authorized by Wis. Stat. 620.22. Permitted classes of investments include bonds of governmental units or of private corporations, loans secured by mortgages, preferred or common stock, real property and other investments not specifically prohibited by statute.

Investments are revalued monthly to fair value, with unrealized gains and losses reflected in income.

Monthly, the DETF distributes a pro-rata share of the total Core Fund and Variable Fund earnings less administrative expenses to the MRS accounts. The MRS accounts are adjusted to fair value and gains/losses are recorded directly in the accounts per DETF Administrative Code, Chapter 10.12(2). Neither State statute, a legal provision nor a legally binding guarantee exists to support the value of shares.

Copies of the separately issued financial report that includes audited financial statements along with the accompanying footnote disclosures and supplementary information for the Core Fund and the Variable Fund is available at www.swib.state.wi.us or may be obtained upon request from:

State of Wisconsin Investment Board
P.O. Box 7842
Madison, Wisconsin 53707-7842

NOTE 16. OTHER POSTEMPLOYMENT BENEFIT (OPEB) PROGRAMS

Governmental Accounting Standards Board (GASB) Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions* establishes standards for recognizing and measuring liabilities, deferred outflows of resources, deferred inflows of resources, and expense/expenditures in financial reports of state and local governmental employers. GASB statement 74, *Financial Reporting for Postemployment Benefit Plans Other than Pension Plans*, establishes reporting standards for other postemployment benefits included in the general purpose external financial reports of state and local governmental OPEB plans.

Under Chapter 40 of Wisconsin Statutes, the Department of Employee Trust Funds (ETF) and Group Insurance Board (GIB) have statutory authority for program administration and oversight of post-employment benefits. ETF administers postemployment benefit plans other than pension plans for the Retiree Health Insurance and Retiree Life Insurance plans (for retired state employees). ETF also administers the Local Retiree Health Insurance and the Local Retiree Life Insurance plans (for retired local government employees). The plans are reported as fiduciary funds in the State's CAFR.

ETF's separately issued financial statements contain further information. ETF's report may be obtained at www.etf.wi.gov and on request from:

The Department of Employee Trust Funds
4822 Madison Yards Way
Madison, Wisconsin 53705-9100

Basis of Accounting

The OPEB plans are reported in accordance with GASB standards and accounted for using the flow of economic resources measurement focus and the accrual basis of accounting. The OPEB liability, deferred outflows of resources and deferred inflows of resources, OPEB expense, and fiduciary net position, if any, have been determined on the same basis. Benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments, if any, are reported at fair value.

Retiree Health Insurance Funds

The Retiree Health Insurance plans offer group health insurance to retired State of Wisconsin and local government employees. Retirees pay the full premium amount. The State Retiree Health Insurance Fund includes the State, the University of Wisconsin, and other component units of the State. The Local Government Retiree Health Insurance Fund includes 354 local government

employers. The plans are not administered through a trust. The Retiree Health Insurance Funds contain certain non-OPEB components relating to post-Medicare pharmacy and health insurance benefits. ETF and the GIB have statutory authority for program administration and oversight under Wisconsin Statutes Chapters 15.165 (2) and 40.03 (6).

State of Wisconsin and local government employees participating in the State Health Insurance Plan or the Wisconsin Public Employers Insurance Plan (local government plans) are eligible to continue their health insurance coverage after leaving covered employment. Membership as of December 31, 2017, included 26,692 former state employees or their beneficiaries and 1,987 former local government employees and beneficiaries.

Employees may choose between self-insured health plans and alternate health plans with specific provider networks (i.e., HMOs). The HMOs follow GIB guidelines for eligibility and program requirements. All HMOs offer a prescribed benefit package called Uniform Benefits and participate in a yearly competitive premium rate bid process. The Standard Plan and State Maintenance Plan are self-insured by the GIB and administered by WPS Health Insurance. Self-insured coverage for health insurance was discontinued as of December 31, 2017. The Standard Plan is a preferred provider plan. The pharmacy benefit is self-insured by the GIB and administered by Navitus Health Solutions.

Effective January 1, 2012, prescription drug coverage for Medicare eligible retirees enrolled in the State group health insurance program is provided by a self-funded Medicare Part D Employer Group Waiver Plan (EGWP). A Medicare "Wrap" product is also included to provide full coverage to members, as required by uniform benefits, when they reach the Medicare coverage gap, also known as the "donut hole."

Retiree Life Insurance Funds

The State Retiree Life Insurance Fund includes the State, the University of Wisconsin, and other component units of the State, and is considered a single-employer defined benefit OPEB plan. The Local Government Retiree Life Insurance Fund included 738 local government employers as of December 31, 2017 and is considered a cost-sharing multiple-employer defined benefit OPEB plan. The plans are administered through a trust.

The plans provide post-employment life insurance coverage to all eligible employees of participating employers. The plans are established by Wisconsin Statutes Chapter 40.70. ETF contracts with Securian Financial Group, Inc (Securian) as a third party administrator for the Retiree Life Insurance plans. Benefit terms may be modified by the GIB, subject to state and federal legislative constraints.

Generally, members may enroll during a 30-day enrollment period after their date of hire. Members may also enroll after the initial 30-day enrollment period with evidence of insurability. Members under evidence of insurability enrollment must enroll in group life insurance coverage before age 55 to be eligible for Basic or Supplemental coverage.

Contributions

The GIB approves contribution rates annually, based on recommendations from the insurance carrier. Recommended rates are based on an annual valuation, taking into consideration an estimate of the present value of future benefits and the present value of future contributions. A portion of employer contributions made during a member’s working lifetime funds a post-retirement benefit.

Employers are required to pay the following contributions for active members to provide them with basic coverage after age 65. There are no employer contributions for pre-65 annuitant coverage. All contributions are actuarially determined.

	State	Local
50 percent post retirement coverage	28 percent of the employee premium	40 percent of the employee premium
25 percent post retirement coverage	N/A	20 percent of employee premium

Employee contributions are based upon nine age bands through age 69 and an additional eight age bands for those age 70 and over. Participating employees must pay monthly contribution rates per \$1,000 of coverage until the age of 65 (age 70 if active). The employee contribution rates in effect for the year ended December 31, 2017 are as listed below:

Attained Age	State Basic	State Supplemental	Local Basic	Local Supplemental
Under 30	\$0.04	\$0.04	\$0.05	\$0.05
30-34	0.04	0.04	0.06	0.06
35-39	0.04	0.04	0.07	0.07
40-44	0.06	0.06	0.08	0.08
45-49	0.10	0.10	0.12	0.12
50-54	0.16	0.16	0.22	0.22
55-59	0.22	0.22	0.39	0.39
60-64	0.30	0.30	0.49	0.49
65-69	0.39	0.39	0.57	0.57

At retirement, the member must have active group life insurance coverage and satisfy one of the following:

- Wisconsin Retirement System (WRS) coverage prior to January 1, 1989, or
- At least one month of group life insurance coverage in each of five calendar years after 1989 and one of the following:
- Eligible for an immediate WRS benefit, or
- At least 20 years from their WRS creditable service as of January 1, 1990, plus their years of group life insurance coverage after 1989, or
- At least 20 years on the payroll of their last employer.

In addition, terminating members and retirees must continue to pay the employee premiums until age 65 (age 70 if active).

Benefits and Membership

After retirement, basic coverage is continued for life in amounts for the insurance in force before retirement:

Age	State	Local
Before age 65	100%	100%
While age 65	75%	75%
While age 66	50%	50%
After age 66	50%	50%/25% Employer Election

After retirement, supplemental and additional coverage may be continued until age 65 at 100 percent of the amount of the insurance in force before retirement at the employee’s expense, and spouse and dependent coverage is terminated.

Membership as of December 31, 2017, included:

	State	Local	Total
Active*	51,438	75,719	127,157
Inactive Pre-Age 65 Annuitants	7,032	10,195	17,227
Inactive Post-Age 64 Annuitants	24,973	33,644	58,617
Totals	83,443	119,558	203,001

* Active membership includes disabled

NOTE 17. OTHER POSTEMPLOYMENT BENEFIT PLANS**A. State Retiree Health Insurance OPEB**

The State Retiree Health Insurance program provides postemployment health insurance coverage to all eligible retired employees of the State, the University of Wisconsin, University of Wisconsin Hospital and Clinics Authority, Wisconsin Housing and Economic Development Authority and Wisconsin Economic Development Corporation. The employers do not directly pay any portion of the premium for participating retirees. However, because retirees pay the same premium rate set for active employees, an implicit rate subsidy exists for employers. This implicit rate subsidy is reported as an OPEB liability. At age 65, when eligible, retirees are required to enroll in Medicare. No assets have accumulated because there is no trust.

Retiree Health Insurance Plan Description

GASB standards classify the State Retiree Health Insurance program as a single employer defined benefit OPEB plan with multiple participating employers. Medical, prescription drug and dental benefits are provided to eligible retirees.

Retirees pay the full premium until age 65 directly to the plan either through "out-of-pocket" or from unused accumulated sick leave conversion credits. The value of the sick leave benefit is defined as compensated absences and reported under the provisions of GASB Statement No. 16, *Accounting for Compensated Absences*.

Contribution requirements are established and may be amended by the GIB. Premiums for non-Medicare retirees are based on an effective rate structure for the health care service provider selected. Monthly rates range from \$543 to \$1,400 for single coverage and \$1,331 to \$3,495 for family coverage.

As of January 1, 2017 (most recent actuarial valuation date), membership consisted of:

Member Type	Number
Retired members or beneficiaries receiving OPEB benefits	5,996
Vested terminated members not yet receiving OPEB benefits	1,537
Active members	61,952
Total	69,485

Inclusion of OPEB Information for Component Units

GASB standards require the presentation of OPEB related amounts and information in the State's financial statements for both the State of Wisconsin (the primary government) and the component units. The component units are responsible for their

share of the OPEB liabilities. Reported amounts related to the OPEB liability, OPEB expense and related deferred inflows and outflows for the OPEB plans may vary by an immaterial amount from the final amounts due to the timing of available information.

Total Retiree Health OPEB Liability

The actuarial valuation was based on the plan of retiree benefits and was made for purposes of fulfilling GASB accounting standards which require recognition of the employer cost of postemployment benefits over an employee's career. The total cost of providing postemployment benefits is projected, considering relevant assumptions, then discounted to determine the total OPEB liability.

To determine the total OPEB liability for the program, the actuary performed an actuarial valuation as of January 1, 2017 and adjusted for changes such as interest earned, contributions paid, and benefits paid through June 30, 2017. Based on this, the actuary determined the OPEB liability totaled \$719.3 million.

The total OPEB liability was allocated to participating employers based on their proportionate share of health insurance premiums contributed for active employees. Amounts by participating employers as of a June 30, 2018 reporting date, are indicated in the table below (in millions):

Participating Employer	OPEB Liability
Primary Government	
State of Wisconsin	\$ 326.0
University of Wisconsin System	315.7
Component Units	
UW Hospital and Clinics Authority	75.3
WI Housing & Economic Development Authority	1.4
WI Economic Development Corp.	0.9
Total OPEB Liability	\$719.3

Changes in the Total OPEB Liability

Changes to the total OPEB plan liability during the fiscal year include the following (in millions):

	Amount
Total OPEB Liability June 30, 2016	\$ 775.4
Changes for the Year	
Service cost	72.1
Interest	23.6
Difference between expected & actual experience	(4.1)
Changes of assumptions	(109.3)
Benefit payments*	(38.4)
Net Change in Total OPEB Liability	(56.0)
Total OPEB Liability June 30, 2017	\$719.3

* Employer benefit payments of \$38.4 million were actuarially determined and pertain to the implicit rate subsidy.

Actuarial Methods and Assumptions

Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. The actuarial methods and assumptions used include techniques that are designed to reduce short-term volatility in actuarial accrued liabilities and the actuarial value of assets, consistent with the long-term perspective of the calculations.

The total OPEB liability in the January 1, 2017 actuarial valuation was determined using the following actuarial assumptions and other inputs, applied to all periods included in the measurement unless otherwise specified:

Actuarial Valuation Date	January 1, 2017
Measurement Date of Total OPEB Liability	June 30, 2017
Actuarial cost method	Entry age level percent of pay
Asset Valuation Method	N/A
Inflation	3.2%
Salary increases	Vary by service and employee class, including inflation
Discount Rate	Discount rate was changed to 3.58% for the June 30, 2017 measurement from 2.85% for the June 30, 2016 measurement. The 2015 valuation used a discount rate of 3.56%
Health care cost trend rates (calendar year basis from January 1, 2017)	
Medical	2.33% for one year then 5.25% graded to 4.5% over three years
Prescription drug	-4.9% for one year then 8.5% graded to 4.5% over seven years
Dental	3.5% for one year then 4.0%
Administrative costs	4.8% for one year then 3.0%
Benefit Changes	None
Participation Rate	Decreased from 95% to 85%
Assumed Claims	Costs were changed to reflect the expected claims in effect for 2017
Disability Rates	Rates for General and Executive and Elected employees were changed to match the pension valuation as of December 31, 2014
Withdrawal Rate	Withdrawal rate for General female employees with 0 years of service was changed to match the pension valuation as of December 31, 2014
Trend Rates	Trend rates were re-established to adjust to the claims experience for 2018. Both medical and prescription coverages were assumed to have an ultimate trend of 4.50%
Benefit End Date	Benefits end when participants turn 65 years old

Actuarial assumptions are based on the Wisconsin Retirement System experience study conducted in 2015 using experience from 2012 to 2014. Valuation assumption changes decreased the liability by \$109.3 million due to raising the discount rate to 3.58 percent from 2.85 percent based on the Bond Buyer, 20-year, general obligation municipal bond index rate closest to the measurement date (but not beyond). In addition, the assumed participation rate was lowered from 95 percent to 85 percent to account for actual historic participation rates.

Sensitivity of the Total OPEB Liability to Changes in the Discount Rate

The following presents each employer's proportionate share of the total liability and what it would be if it were calculated using a discount rate that is 1-percentage-point lower or higher than the current discount rate (in millions):

	1% Decrease in Discount Rate (2.58%)	Current Discount Rate (3.58%)	1% Increase in Discount Rate (4.58%)
Primary Government			
State of Wisconsin	\$348.7	\$326.0	\$304.4
University of WI System	337.6	315.7	294.7
Component Units			
UW Hospital and Clinics	80.5	75.3	70.3
WI Housing & Economic Development Authority	1.5	1.4	1.3
WI Economic Development Corp.	1.0	0.9	0.9
Total OPEB Liability	\$769.3	\$719.3	\$671.6

Sensitivity of the Total OPEB Liability to Changes in the Healthcare Cost Trend Rates

The following presents each employer's proportionate share of the total liability and what it would be if it were calculated using a healthcare trend rate that is 1-percentage-point lower or higher than the current healthcare trend rate (in millions):

	1% Decrease in Healthcare Trend Rate	Current Healthcare Trend Rate	1% Increase in Healthcare Trend Rate
Primary Government			
State of Wisconsin	\$288.4	\$326.0	\$370.8
University of WI System	279.3	315.7	359.0
Component Units			
UW Hospital and Clinics	66.6	75.3	85.6
WI Housing & Economic Development Authority	1.2	1.4	1.6
WI Economic Development Corp.	0.8	0.9	1.1
Total OPEB Liability	\$636.3	\$719.3	\$818.1

OPEB Expense and Deferred Outflows of Resources and Deferred Inflows of Resources Related to OPEB

For the year ended June 30, 2018, OPEB expense of \$47.0 million was recognized by participating employers:

	Amount
Primary Government	
State of Wisconsin	\$21,087,125
University of WI System	19,869,251
Component Units	
UW Hospital and Clinics	5,856,688
WI Housing & Economic Development Authority	92,508
WI Economic Development Corp	61,944
Total	\$46,967,516

At June 30, 2018, deferred outflows of resources and deferred inflows of resources related to OPEB from the following sources were reported:

	Outflows	Inflows
Primary Government		
State of Wisconsin		
Difference between Expected and Actual Experience	-	\$ (1,671,562)

Thereafter	(60,208)

The Schedule of Changes in the Total OPEB Liability and Related Ratios is presented as required supplementary information following the notes to the financial statements.

B. State Retiree Life Insurance OPEB

The State Retiree Life Insurance program provides postemployment health insurance coverage to all eligible retired employees of the State, the University of Wisconsin, University of Wisconsin Hospital and Clinics Authority, Wisconsin Housing and Economic Development Authority and Wisconsin Economic Development Corporation. Each employer's proportionate share of the net OPEB liability and collective OPEB expense, deferred inflows and outflows is based on the employer's contribution for the most recent calendar year compared to the total contributions of all employers.

Inclusion of OPEB Information for Component Units

GASB standards require the presentation of OPEB related amounts and information in the State's financial statements for both the State of Wisconsin (the primary government) and the component units. The component units are responsible for their share of the OPEB liabilities. Reported amounts related to the OPEB liability, OPEB expense and related deferred inflows and outflows for the OPEB plans may vary by an immaterial amount from the final amounts due to the timing of available information.

OPEB Liabilities, OPEB Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to OPEB

At June 30, 2018, the State, including the University of Wisconsin System, reported a liability of \$447.9 million for its proportionate share of the net OPEB liability. The net OPEB liability was measured as of December 31, 2017 and the total OPEB liability used to calculate the net OPEB liability was determined by an actuarial valuation as January 1, 2017 rolled forward to December 31, 2017. The State's proportion of the net OPEB liability was based on the State's share of contributions to the OPEB plan relative to the contributions of all participating employers. At December 31, 2017, the State's proportion was 90.8 percent which was a decrease of 0.4 percent from its proportion of 91.2 percent measured as of December 31, 2016.

Net OPEB liability amounts, by participating employers as of a June 30, 2018 reporting date, are indicated in the table below (in millions):

Participating Employer	Net OPEB Liability
Primary Government	
State of Wisconsin	\$ 238.4
University of Wisconsin System	209.6
Component Units	
UW Hospital and Clinics Authority	43.7
WI Housing & Economic Development Authority	1.3
Wisconsin Economic Development Corporation	0.5
Total Net OPEB Liability	\$493.5

For the year ended June 30, 2018, OPEB expense of \$47.5 million was recognized by participating employers:

	Amount
Primary Government	
State of Wisconsin	\$23,772,096
University of WI System	19,135,391
Component Units	
UW Hospital and Clinics	4,443,657
WI Housing & Economic Development Authority	130,048
WI Economic Development Corp	57,350
Total	\$47,538,544

For the year ended June 30, 2018, contributions of \$1.4 million were recognized by the plan from participating employers:

	Amount
Primary Government	
State of Wisconsin	\$687,380
University of WI System	565,951
Component Units	
UW Hospital and Clinics	118,171
WI Housing & Economic Development Authority	3,545
WI Economic Development Corp	1,437
Total	\$1,376,484

Changes in the Net OPEB Liability

Changes to the total OPEB plan liability during the fiscal year include the following (in millions):

	Amount
Total OPEB Liability December 31, 2016	\$762.6
Changes for the Year	
Service cost	26.2
Interest	30.7
Difference between expected & actual experience	(5.3)
Changes of assumptions	49.0
Benefit payments	(17.7)
Net Change in Total OPEB Liability	82.9
Total OPEB Liability December 31, 2017	\$845.5
Plan Fiduciary Net Position December 31, 2016	\$357.4
Changes for the Year	
Contributions from employers	1.4
Net investment income	11.6
Administrative expense	(.7)
Benefit payments	(17.7)
Net change in Plan Fiduciary Net Position	(5.4)
Plan Fiduciary Net Position December 31, 2017	\$352.0
Collective Net OPEB Liability December 31, 2016	\$405.1
Net change in Collective Net OPEB Liability	88.4
Collective Net OPEB Liability December 31, 2017	\$493.5

At June 30, 2018, deferred outflows of resources and deferred inflows of resources related to OPEB from the following sources were reported:

	Outflows	Inflows
Primary Government		
State of Wisconsin		
Difference between Expected and Actual Experience	-	\$2,181,173
Changes of Assumptions	\$20,300,117	
Change in Proportion Share	4,875,029	
Net Difference Between Projected and Actual Earnings on OPEB Plan Investments	2,288,588	
Subtotal	\$27,463,734	\$2,181,173
University of WI System		
Difference between Expected and Actual Experience	-	\$1,917,278
Changes of Assumptions	\$17,844,053	
Change in Proportion Share	-	6,313,448
Net Difference Between Projected and Actual Earnings on OPEB Plan Investments	2,011,697	
Subtotal	\$19,855,750	\$8,230,726
Component Units		
UW Hospital and Clinics		
Difference between Expected and Actual Experience	-	\$400,328
Changes of Assumptions	\$3,725,842	
Change in Proportion Share	1,379,813	
Net Difference Between Projected and Actual Earnings on OPEB Plan Investments	420,043	
Subtotal	\$5,525,698	\$400,328
WI Housing & Economic Development Authority		
Difference between Expected and Actual Experience	-	\$12,009
Changes of Assumptions	\$111,764	
Change in Proportion Share	21,836	
Net Difference Between Projected and Actual Earnings on OPEB Plan Investments	12,600	
Subtotal	\$146,200	\$12,009
WI Economic Development Corp.		
Difference between Expected and Actual Experience	-	\$4,867
Changes of Assumptions	\$45,301	
Change in Proportion Share	36,771	
Net Difference Between Projected and Actual Earnings on OPEB Plan Investments	5,107	
Subtotal	\$87,179	\$4,867
Total All Employers	\$53,078,561	\$10,829,103

Amounts reported as deferred outflows of resources and deferred inflows of resources related to OPEB will be recognized in future OPEB expense as follows:

	Amount
Primary Government	
State of Wisconsin	
FY 2019	\$4,309,920
FY 2020	4,309,920
FY 2021	4,309,920

Total All Employers	\$42,249,458

Sensitivity of the Total OPEB Liability to Changes in the Discount Rate

The following presents participating employer’s proportionate share of the total OPEB liability and what the liability would be if it were calculated using a discount rate that is 1-percentage-point lower and 1-percentage-point higher than the current discount rate:

	1% Decrease in Discount Rate (2.6%)	Current Discount Rate (3.6%)	1% Increase in Discount Rate (4.6%)
Primary Government			
State of Wisconsin	\$324,570,627	\$238,395,161	\$171,508,313
University of WI System	285,301,586	209,552,288	150,757,923
Component Units			
UW Hospital and Clinics	59,571,031	43,754,562	31,478,286
WI Housing & Economic Development Authority	1,786,949	1,312,503	944,252
WI Economic Development Corp.	724,306	531,999	382,735
Total Net OPEB Liability	\$671,954,499	\$493,546,513	\$355,071,509

Single Discount Rate

A single discount rate of 3.60% was used to measure the total OPEB liability for the current year as opposed to 3.94% for the prior year. The Plan’s fiduciary net position was projected to be insufficient to make all projected future benefit payments of current active and inactive employees. Therefore, the discount rate for calculating the Total OPEB Liability is equal to the single equivalent rate that results in the same actuarial present value as the long-term expected rate of return applied to benefit payments, to the extent that the plan’s fiduciary net position is projected to be sufficient to make projected benefit payments, and the municipal bond rate applied to benefit payments to the extent that the plan’s fiduciary net position is projected to be insufficient. The source of the municipal bond rate used is the Bond Buyers GO Index. The plan’s fiduciary net position was projected to be available to make projected future benefit payments of current plan members through December 31, 2034. Therefore, the long-term expected rate of return on plan investments was applied through 2034 and the municipal bond index rate was applied for all remaining periods of projected benefit payments to determine the Total OPEB Liability.

Long-term expected Return on Plan Assets

The long-term expected rate of return is determined by adding expected inflation to expected long-term real returns and reflecting expected volatility and correlation. Investments for the retiree life insurance plans are held with Securian, the insurance carrier. Interest is calculated and credited to the plans based on the rate of return for a segment of the insurance carriers’ general fund, specifically 10-year A- Bonds (as a proxy, and not tied to any specific investments). The overall aggregate interest rate is calculated using a tiered approach based on the year the funds were originally invested and the rate of return for that year. Investment interest is credited based on the aggregate rate of return and assets are not adjusted to fair market value. Furthermore, the insurance carrier guarantees the principal amounts of the reserves, including all interest previously credited thereto.

Asset allocation targets and expected returns as of December 31, 2017 were:

Asset Class	Index	Target Allocation	Long-Term Expected Geometric Real Rate of Return
US Government Bonds	Barclays Government	1%	1.13%
US Credit Bonds	Barclays Credit	65%	2.61%
US Long Credit Bonds	Barclays Long Credit	3%	3.08%
US Mortgages	Barclays MB	31%	2.19%
Inflation			2.30%
Long-Term Expected Rate of Return			5.00%

Actuarial assumptions

Actuarial assumptions are based on the Wisconsin Retirement System experience study conducted in 2015 using experience from 2012 to 2014. The projections of cash flows used to determine the single discount rate assumed that employer contributions will be made according to the current employer contributions schedule and that contributions are made by plan members retiring prior to age 65. The total OPEB liability in the January 1, 2017, actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Actuarial Valuation Date:	January 1, 2017
Measurement Date of Net OPEB Liability:	December 31, 2017
Actuarial Cost Method:	Entry Age Normal
20 Year Tax-Exempt Municipal Bond Yield:	3.44%
Long-Term Expected Rate of Return:	5.00%
Discount Rate:	3.60%
Salary Increases	
Inflation:	3.20%
Seniority/Merit:	0.2% - 5.6%
Mortality:	WI 2012 Mortality Table

OPEB plan fiduciary net position. Detailed information about the OPEB plan's fiduciary net position is available in separately issued financial statements from ETF. The report can be obtained at www.etf.wi.gov and on request from:

The Department of Employee Trust Funds
4822 Madison Yards Way
Madison, Wisconsin 53705-9100

**NOTE 18. PUBLIC ENTITY RISK POOLS
ADMINISTERED BY THE
DEPARTMENT OF EMPLOYEE
TRUST FUNDS**

The Department of Employee Trust Funds operates four public entity risk pools: group health insurance, group income continuation insurance, duty disability insurance, and life insurance. ETF's separately issued financial statements, which contain historical trend, revenue, and claims development information, are available at www.etf.wi.gov and on request from:

Wisconsin Department of Employee Trust Funds

Madison, WI 53707-7931
1-877-533-5020

The information provided in this note applies to the period ending December 31, 2017.

A. Description of Funds

The Health Insurance Fund offers group health insurance for current employees of the State government and of participating local public employers. All public employers in the State are eligible to participate. Approximately 354 local employers plus the State currently participate. The State and local government portions of the fund are accounted for separately and have separate contribution rates, benefits, and actuarial valuations. The fund includes both a self-insured, fee-for-service plan as well as various prepaid plans, primarily Health Maintenance Organizations (HMO's) and a self-insured plan that provides for pharmacy benefits of covered members.

The Income Continuation Insurance Fund offers disability wage continuation insurance for current employees of the State government and of participating local public employers. All public employers in the State are eligible to participate. Approximately 219 local employers plus the State currently participate. The State and local government portions of the fund are accounted for separately and have separate contribution rates, benefits, and actuarial valuations. The plan is self-insured.

The Duty Disability Fund offers special disability insurance for State of Wisconsin and local WRS participants in protective occupations. Participation in the program is mandatory for all WRS employers with protective occupation employees. The State of Wisconsin and 494 local employers currently participate. The plan is self-insured, and the risk is shared between the State of Wisconsin and local government employers in the plan. Contributions are actuarially determined and are employer paid. Contributions are based on a graduated, experience-rated formula.

B. Accounting Policies for Risk Pools

Basis of Accounting - All Public Entity Risk Pools are accounted for in enterprise funds using the full accrual basis of accounting and the flow of economic resources measurement focus.

Valuation of Investments - Assets of the Health Insurance Fund Income Continuation Insurance and Duty Disability Insurance funds are invested in the Core Retirement Investment Trust. Investments are valued at fair value.

Unpaid Claims Liabilities - Claims liabilities are based on estimates of the ultimate cost of claims that have been reported but not settled, and of claims that have been incurred but not reported. The estimate includes the effects of inflation and other societal and economic factors. Adjustments to claims liabilities are charged or credited to expense in the periods in which they are made. Unpaid claims liability is presented at face value and is not discounted for health insurance. It is discounted using an interest rate of 7.2 percent for income continuation and duty disability insurance. The liabilities for income continuation, duty disability, and health insurance were determined by actuarial methods.

Administrative Expenses - All maintenance expenses are expensed in the period in which they are incurred. Acquisition costs are immaterial and are treated as maintenance expenses.

Reinsurance - Health insurance plans provided by HMO's and health insurance for local government annuitants are fully insured by outside insurers. All remaining risk is self-insured with no reinsurance coverage.

Risk Transfer - Participating employers are not subject to supplemental assessments in the event of deficiencies. If the assets of the fund were exhausted, participating employers would not be responsible for the fund's liabilities.

Premium Setting - Premiums are established by the GIB (Health Insurance and ICI) and ETF Board for Duty Disability in consultation with actuaries.

C. Unpaid Claims Liabilities

As discussed in Section B of this Note, each fund establishes a liability for both reported and unreported insured events, which is an estimate of future payments of losses. The following represents changes in those aggregate liabilities for the nonreinsured portion of each fund during Calendar Year 2017 (in millions):

	Income Continuation Insurance		Duty Disability Insurance **		Health Insurance		Pharmacy Benefits		Dental	
	2017	2016	2017	2016	2017	2016	2017	2016	2017	2016
Unpaid claims and claim adjustment expenses at beginning of the calendar year	\$ 93.5	\$ 87.1	\$ 453.4	\$ 418.9	\$ 2.0	\$ 1.9	\$ (15.0)	\$ (19.5)	\$ 1.9	\$ 0.0
Incurred claims and claim adjustment expenses:										
Provision for insured events of the current calendar year	17.7	20.7	19.2	11.9	16.0	15.1	164.5	156.0	44.4	44.1
Changes in provision for insured events of prior calendar years	1.1	6.8	27.2	57.0	(0.2)	(0.6)	(4.9)	14.4	(0.1)	0.0
Total incurred claims and claim adjustment expenses	18.8	27.5	46.4	68.9	15.8	14.5	159.6	170.4	44.3	44.1
Payments:										
Claims and claim adjustment expenses attributable to insured events of the current calendar year	4.6	5.6	0.0	0.1	14.2	13.1	183.3	171.0	43.4	42.2
Claims and claim adjustment expenses attributable to insured events of prior calendar years	15.0	15.6	35.0	34.3	1.8	1.3	(19.9)	(5.1)	1.8	0.0
Total payments	19.6	21.2	35.0	34.4	16.0	14.4	163.4	165.9	45.2	42.2
Total unpaid claims and claim adjustment expenses at end of the calendar year	\$ 92.7	\$ 93.4	\$ 464.8	\$ 453.4	\$ 1.8	\$ 2.0	\$ (18.8) *	\$ (15.0) *	\$ 1.0	\$ 1.9

* Total unpaid claims at the end of 2017 is the net of \$4.4 million in unpaid claims and \$23.2 million in rebates due from pharmaceutical companies; unpaid claims at the end of 2016 is the net of \$4.5 million in unpaid claims and \$19.5 million in rebates due from pharmaceutical companies.

** Prior to 2017, the Duty Disability fund was reported as a fiduciary fund rather than a proprietary (i.e. risk pool) fund. The beginning year value noted above was the result of a prior period adjustment to restate the Duty Disability fund as a risk pool.

NOTE 19. SELF-INSURANCE

It is the general policy of the State not to purchase commercial insurance for the risks of losses to which it is exposed. Instead, the State believes it is more economical to manage its risks internally and set aside assets for claim settlement in its internal service fund, the Risk Management Fund. The fund services most claims for risk of loss to which the State is exposed, including damage to State owned property, liability for property damages and injuries to third parties, and worker's compensation. All funds and agencies of the State participate in the Risk Management Fund.

State Property Damage

Property damages to State-owned properties are covered by the State's self-funded property program up to \$3.0 million per occurrence and \$5.0 million annual aggregate. When claims, which exceed \$100,000 per occurrence, total \$5.0 million, the State's private insurance becomes available. Losses to property occurring after the annual aggregate are first subject to a \$100,000 deductible. The amount of loss in excess of \$100,000 is covered by the State's private insurance company. During Fiscal Year 2018, the excess insurance limits were written to \$500 million.

The liabilities for State property damage are reported when it is probable that a loss has occurred and the amount of that loss can be reasonably estimated. The estimate for future benefits and loss liabilities is based on the reserves on open claims and paid claims. Losses incurred but not reported are expected to be immaterial. Claims incurred but not paid as of June 30, 2018 are estimated to total \$7.1 million.

Property Damages and Bodily Injuries to Third Parties

The State is self-funded for third party liability to a level of \$4.0 million per occurrence and purchases insurance in excess of this self-funded retention. The policy limit during Fiscal Year 2018 was \$49.0 million.

The liabilities for property damages and injuries to third parties are reported when it is probable that a loss has occurred and the amount of that loss can be reasonably estimated. The estimate for future benefits and loss liabilities for the prior fiscal year was the reserves on open claims. The estimate for future benefits and loss liabilities is calculated by an actuary based on the reserves on open claims and prior experience. No liability is reported for environmental impairment liability claims either incurred or incurred but not reported because existing case law makes it unlikely the State would be held liable for material amounts. Because actual claims liabilities depend upon complex factors such as inflation, changes in legal doctrines, and damage awards, the process used in computing claims liability does not necessarily result in an exact amount. Immaterial non-incremental claims adjustment expenses are not included as part of the liability. Claims incurred but not paid as of June 30, 2018 are estimated to total \$29.6 million.

Worker's Compensation

The Worker's Compensation Program was created by Wisconsin Statutes Chapter 102 to provide benefits to workers injured on the job. All employees of the State are included in the program. An injury is covered under worker's compensation if it is caused by an accident that arose out of and in the course of employment.

The responsibility for claiming compensation is on the employee. A claim must be filed with the program within two years from the date of injury; otherwise the claim is not allowable.

The worker's compensation liability has been determined by an actuary using paid claims and current claims reserves. Liabilities include an amount for claims that have been incurred but not reported. Because actual claims liabilities are affected by external factors, the process used in computing claims liabilities does not necessarily result in an exact amount. Claims incurred but not paid as of June 30, 2018 are estimated to total \$78.2 million.

Changes in the balances of claims liability for the Risk Management Fund during the current and prior fiscal years are as follows (in thousands):

	2018	2017
Beginning of fiscal year liability	\$ 112,920	\$ 99,377
Current year claims and changes in estimates	40,976	55,401
Claim payments	(38,977)	(32,745)
	<u>114,919</u>	<u>122,033</u>
Excess insurance reimbursable	(4,583)	(9,113)
Balance at fiscal year-end	<u>\$ 110,336</u>	<u>\$ 112,920</u>

Settlements have not exceeded coverages for each of the past three fiscal years.

Annuity Contracts

The Risk Management Fund purchased annuity contracts in various claimants' names to satisfy claim liabilities. The likelihood that the fund will be required to make future payments on those claims is remote and, therefore, the fund is considered to have satisfied its primary liability to the claimants. Accordingly, the annuity contracts are not reported in, and the related liabilities are removed from, the fund's balance sheet. The aggregate outstanding amount of liabilities removed from the financial statements at June 30, 2018 is \$5.5 million.

NOTE 20. INSURANCE FUNDS**A. Local Government Property Insurance Fund**

The purpose of the Local Government Property Insurance Fund is to provide property insurance coverage to tax-supported local government units such as counties, towns, villages, cities, school districts and library boards. Property insured includes government buildings, schools, libraries and motor vehicles. Coverage is available on an optional basis. As of June 30, 2018, the Local Government Property Insurance Fund insured 30 local governmental units. The total amount of insurance in force as of June 30, 2018 was \$.2 billion.

The dissolution of the fund was included in 2017 Wis. Act 59, the State's biennial budget act, enacted in September 2017. The fund will continue to provide coverage through December 31, 2018.

Valuation of Cash Equivalents and Investments - All investments of the Local Government Property Insurance Fund are managed by the State of Wisconsin Investment Board, as discussed in Note 5-B to the financial statements. At June 30, 2018, the fund had \$1.29 million shares in the State Investment Fund which are considered cash equivalents.

Premium - Unearned premium reported as unearned revenue represents the daily pro rata portion of premium written which is applicable to the unexpired terms of the insurance policies in force. Policies are generally written for annual terms.

Unpaid Loss Liabilities - The Local Government Property Insurance Fund establishes the unpaid loss liability titled future benefits and loss liabilities on the financial statements based on estimates of the ultimate cost of losses (including future loss adjustment expenses) that have been reported but not settled, and of losses that have been incurred but not reported. Estimated amounts of excess-of-loss insurance recoverable on unpaid losses are deducted from the liability for unpaid losses. Loss liabilities are recomputed periodically to produce current estimates that reflect recent settlements, loss frequency, and other economic factors. Adjustments to future benefits and loss liabilities are charged or credited to expense in the periods in which they are made.

Policy Acquisition Costs - Since the Local Government Property Insurance Fund has no marketing staff and incurs no sales commissions, acquisition costs are minimal and charged to operations as incurred.

Excess-of-Loss Insurance Coverage - The Local Government Property Insurance Fund purchases excess-of-loss insurance coverage, the operation of which is analogous to "reinsurance," to reduce its exposure to large losses on all types of insured events. Excess-of-loss insurance permits recovery of a portion of losses from the excess-of-loss insurers, although it does not discharge the primary liability of the fund as direct insurer of the risks reinsured. The fund does not report excess-of-loss insured risks as liabilities unless it is probable that those risks will not be covered by excess-of-loss insurers. As of June 30, 2018, the fund had a \$0.5 million combined single limit retention for each occurrence. Only loss occurrences over \$10.0 thousand are included in the recoverable calculation. Premiums ceded to excess-of-loss insurers, which is netted against premium revenue (charges for goods and services in the financial statements), amounted to \$261.0 thousand during the fiscal year. Excess-of-loss and adjusting expense recoveries earned would typically reduce claims paid (benefit expense on the financial statements). During the fiscal year the losses recovered through excess-of-loss insurance was \$(2.6) million.

Unpaid Loss Liabilities

As discussed above, the Local Government Property Insurance Fund establishes a liability for both reported and unreported insured events, which includes estimates of both future payments of losses and related loss expenses. The following represents changes in those aggregate liabilities for the fund during the past two fiscal years (in thousands):

	2018	2017
Unpaid loss liabilities		
at beginning of the year	\$7,184	\$12,037
Less: Excess-of-loss insurance recoverable	4,532	5,699
Net unpaid loss liabilities at beginning of year	2,652	6,338
Incurred losses and loss expenses:		
Provision for insured events of the current year	3,059	2,215
Increase (decrease) in provision for insured events of prior years	(276)	1,723
Total incurred losses and loss expenses	2,783	3,938
Payments:		
Losses and loss expenses attributable to insured events of the current year	2,064	574
Losses and loss expenses attributable to insured events prior years	2,701	7,050
Total payments	4,765	7,624
Net unpaid loss liabilities at end of year	670	2,652
Plus: Excess-of-loss liabilities recoverable	4,828	4,532
Total unpaid loss liabilities at end of year	\$5,498	\$7,184

Trend Information

Historical trend information showing revenue and claims development information is presented in the Office of the Commissioner of Insurance June 30, 2018 financial statements. Copies of these statements may be requested from:

Office of the Commissioner of Insurance
 125 South Webster Street
 Madison, Wisconsin 53703

B. State Life Insurance Fund

The State Life Insurance Fund was created under Chapter 607, Wisconsin Statutes, to offer life insurance to residents of Wisconsin in a manner similar to private insurers. This fund functions much like a mutual life insurance company and is subject to the same regulatory requirements as any life insurance company licensed to operate in Wisconsin.

Premiums are reported as earned when due. Benefits and expenses are associated with earned premiums so as to result in recognition of profits over the life of the contracts. This association is accomplished by means of the provision for liabilities for future benefits and the amortization of acquisition costs.

The State Life Insurance Fund does not pay commissions nor does it incur agent expenses.

Future benefits and loss liabilities have been computed by the net level premium method based upon estimated future investment yield and mortality. The composition of liabilities and the more material assumptions pertinent thereto are presented below (in thousands):

Issue Year	Ordinary Life Insurance in Force	Amount of Policy Liability
1913-1966	\$ 6,333	5,086
1967-1976	24,556	15,540
1977-1985	61,986	25,339

All of the State Life Insurance Fund's life insurance in force is participating. This Fund is required by statute to maintain surplus at a level between 7 percent and 10 percent of statutory admitted assets as far as practicably possible. All excess surplus is to be returned to the policyholders in the form of policyholder dividends. Policyholder dividends are declared each year in order to achieve the required level of surplus.

The statutory assets at December 31, 2017 were \$111.9 million and statutory capital and surplus was \$7.9 million. Fund equity at June 30, 2018 was \$19.5 million.

C. Injured Patients and Families Compensation Fund

The Injured Patients and Families Compensation Fund was created in 1975 for the purpose of providing excess medical malpractice coverage for claims exceeding the legal primary insurance limits prescribed in Wis. Stat. Section 655.23(4), or the maximum liability limit for which the health care provider is insured, whichever limit is greater. Management of the Fund is vested with a 13-member Board of Governors, which is chaired by the Commissioner of Insurance. Most health care providers permanently practicing or operating in the State of Wisconsin are required to pay Injured Patients and Families Compensation Fund assessment fees. Risk of loss is retained by the Fund.

The Future Benefits and Loss Liability account includes individual case estimates for reported losses and estimates for incurred but not reported losses based upon the projected ultimate losses recommended by a consulting actuary. The liability for incurred but not reported losses as of June 30, 2018, is determined by deducting individual case estimates of the liability for reported losses and net losses paid from inception of the Fund, and adding a risk margin to the projected ultimate loss liabilities, as follows (in thousands):

Projected ultimate loss liability	\$ 1,108,669
Less: Net loss paid from inception	(874,412)
Less: Liability for reported losses	(16,995)
Risk Margin	58,564
Liability for incurred but not reported losses	<u>\$ 275,826</u>

The Future Benefits and Loss Liability account also includes an estimate of the loss adjustment expense (LAE). Using the data available through September 30 of the fiscal year, the actuary estimated the liability for LAE as 34 percent of the estimated unpaid losses as of June 30, 2018. The percentage used in the financial statements was different, since the actuary's estimate was adjusted to reflect actual LAE payments. Specifically, the loss adjustment expenses paid from the inception of the Fund through June 30, 2018, are deducted from the projected ultimate LAE to determine the liability for LAE as June 30, 2018 as follows (in thousands):

Projected ultimate LAE liability	\$ 155,691
Less: LAE paid from inception	(103,001)
Risk Margin	13,173
Liability for LAE	<u>\$ 65,863</u>

In accordance with Section Ins. 17.27(3), Wis. Adm. Code, the liability for reported losses, liability for incurred but not reported losses, and liability for loss adjustment expense are maintained on a present value basis with the difference from full value being reported as a contra account to these estimated loss liabilities. These estimated loss liabilities are discounted only to the extent that they are matched by cash and invested assets. Using the actuarially determined discount factor of 0.9343, which is based on an investment yield assumption of 2.0 percent approved by the Board of Governors, the discounted loss liability would be as follows as of June 30, 2018 (in thousands):

Estimated liability for incurred but not reported losses	\$ 275,826
Estimated liability for reported losses	16,995
Estimated liability for loss adjustment expense	65,863
Total estimated loss liabilities	358,684
Less: Amount representing interest	(23,536)
Discounted loss liabilities	<u>\$ 335,148</u>

Included in the above estimates of loss liabilities, both undiscounted and discounted, is a 25 percent risk margin, which was recommended by the actuary and approved by the Board of Governors.

The Office of the Commissioner of Insurance contracts for periodic actuarial audits of the Fund. This audit includes a review by another actuary of the reasonableness of the actuarial methodology and assumptions used in developing estimates of the Fund's liabilities. The actuarial audits have concluded that the Fund's loss liability estimates are reasonable, although conservative. The Fund's contracted actuary has considered the recommendations made in the actuarial audits and appropriately incorporated any necessary changes based on those recommendations into the actuarial methodology and assumptions used to calculate the Fiscal Year 2018 liabilities estimate.

In addition to discounted loss liabilities, the Future Benefit and Loss Liabilities account also includes a future medical expenses liability and a contributions being held liability. The future medical expenses liability consists of those accounts required by Wis. Stat. Sec. 655.015 to be established if a settlement or judgment provides for future medical expense payments in excess of \$100,000. The accounts are managed by the Fund and earn a proportionate share of the Fund's interest. Any account balance remaining when a claimant dies reverts back to the Fund. The contributions being held liability consists of nonrefundable payments, generally in amounts equal to the primary coverage in effect for related claims, that primary insurers have voluntarily presented to the Fund and which are negotiable with the Fund in exchange for a release of payment for any future defense costs that may be incurred on the claim. This amount is held as a liability to the Fund until a payment on the claim is made.

The breakdown of Future Benefit and Loss Liabilities, including the portions that are estimated as current and noncurrent as of June 30, 2018 (in thousands), is as follows:

Discounted loss liabilities	\$ 335,148
Future medical expense liability	31,402
Total estimated loss liabilities	366,550
Current portion	(68,822)
Noncurrent portion	<u>\$ 297,728</u>

The uncertainties inherent in projecting the frequency and severity of large claims because of the Injured Patients and Families Compensation Fund's unlimited liability coverage and extended reporting and settlement periods makes it likely that the amounts ultimately paid will differ from the recorded estimated loss liabilities. These differences cannot be quantified.

The estimated amounts included in the balance of Future Benefits and Loss Liabilities are continually reviewed and adjusted as the Fund gains additional experience. Such adjustments are reflected in current operations. Because of the changes in these estimates, the benefit expense for the fiscal year is not necessarily indicative of the loss experience for the year.

The following is a reconciliation of the change in the balance of Future Benefits and Loss Liabilities during Fiscal Year 2018 (in thousands):

Liability at the beginning of the year	\$ 357,113
Incurred claims and related expenses for the current year and the change in estimated amounts for claims incurred in prior years	22,337
Less: current year payments attributable to claims incurred in current and prior years	(12,900)
Liability at the end of the year	<u>\$ 366,550</u>

NOTE 21. DEFERRED OUTFLOWS OF RESOURCES AND DEFERRED INFLOWS OF RESOURCES

Deferred outflows and resources and deferred inflows of resources at June 30, 2018 were as follows (in thousands):

Total Deferred Inflows of Resources	\$ 206	\$ 134	\$ 849,615	\$ -	\$ 95,402	\$ 945,357

The \$153,424 thousand in deferred outflows of resources resulting from contributions subsequent to the measurement date will be recognized as a decrease to the net pension liability in the year ended June 30, 2018. Other amounts reported as deferred outflows and inflows of resources related to pensions will be recognized as pension expenses as follows (in thousands):

Fiscal Year Ended June 30	Amount
2018	\$ 87,986
2019	(8,293)
2020	(283,258)
2021	(214,146)
2022	1,984
	<u>\$ (415,727)</u>

Additional detail for OPEB-related deferred outflows of resources and deferred inflows of resources is available in Note 17 Other Postemployment Benefit Plans.

NOTE 22. SEGMENT INFORMATION AND CONDENSED FINANCIAL DATA**Primary Government**

The State issues revenue bonds as a component of the total funding for the Direct Loan Portfolio, which is accounted for as part of the Environmental Improvement Fund. The Direct Loan Portfolio is also funded by grants from the U.S. Environmental Protection Agency (the "EPA"). Loans in this portfolio are made for water and wastewater projects. Repayments from loans in this portfolio, grants and revenue bond proceeds are used to fund new loans.

The Environmental Improvement Fund has pledged future loan revenues, net of specified operating expenses, to repay outstanding revenue bonds. Investors in these revenue bonds rely solely on the revenues generated from the loans within the Direct Loan Portfolio. Condensed financial statement information of the Direct Loan Portfolio as of and for the year ended June 30, 2018 is presented below (in thousands):

Effect of adjustments on the amount of net increase (decrease) in net positions of Fiscal Year 2017	\$ (223,759)	\$ (1,447,090)	\$ (1,670,849)

NOTE 25. LITIGATION, CONTINGENCIES AND COMMITMENTS**A. Litigation and Contingencies**

The State is a participant in various legal proceedings pertaining to matters incidental to the performance of routine governmental operations.

The State accrues liabilities related to legal proceedings, if a loss is probable and reasonably estimable. Such losses, totaling \$17.2 million on June 30, 2018 reported in the governmental activities, are discussed below:

The Work Injury Supplemental Benefit Fund, administered by the Department of Workforce Development, provides compensatory payments to survivors of fatally injured employees or disabled employees with work-related injuries. The liability for annuities to be paid totaled \$0.6 million at June 30, 2018.

In September 2008, the Internal Revenue Service (IRS) provided the State of Wisconsin Investment Board (SWIB) a Notice of Transferee Liability. This claim seeks taxes, penalties and interest relating to the sale of Shockley Communications Corporation (SCC) stock in 2001.

The IRS asserts that the shareholders' sale of SCC stock in 2001 should have been characterized as a sale of assets by SCC, on which SCC should have paid income taxes. SWIB filed a petition in the United States Tax Court contesting the proposed IRS assessment for the taxes, plus penalties and interest. In 2015, the Tax Court found that the principal shareholders of SCC were liable as putative transferees for the tax, penalties and interest owed by SCC related to its sale. In October 2017 the 11th Circuit Court of Appeals upheld the 2015 opinion.

Although SWIB plans to continue to aggressively contest the IRS' assertions, the estimated minimum possible loss of \$16.6 million has been accrued. The potential liability is estimated to be between \$16.6 million and \$53.8 million.

Other Claims, Judgments, and Contingencies

The State is also named as a party in other legal proceedings where the ultimate disposition and consequence are not presently determinable. The potential loss amount relating to an unfavorable outcome for certain of these proceedings could not be reasonably determined at this time. However, the ultimate dispositions and consequences of any single legal proceeding or all legal proceedings collectively should not have a material adverse effect on the State's financial position.

Volkswagen Group of America and certain related entities admitted to violating the federal Clean Air Act from 2009 through 2016.

Volkswagen partially settled its civil liability for these Clean Air Act violations by entering into judicial consent decrees. These judicial settlements require Volkswagen to pay more than \$2.9 billion into an Environmental Mitigation Trust Fund administered by Wilmington Trust, N.A. The State of Wisconsin is a designated beneficiary and will receive \$67.1 million over ten years.

2017 Wisconsin Act 59, appropriated \$42 million of Wisconsin's share of the Volkswagen trust funds for replacement of eligible state fleet vehicles and establishment of a transit capital assistance grant program. The Department of Administration created a competitive statewide grant program to award trust funds to eligible applicants for the replacement of public transit vehicles. Expenditures funded from the trust are first expected in FY 2019.

The University of Wisconsin Hospital and Clinics Authority (UWHCA) makes annual payments to the Department of Administration (DOA) for pension and sick leave conversion amounts for certain former state employees. UWHCA claims that DOA has charged too much and, since 2016, it has stop making payments. UWHCA claims it is entitled to a substantial refund. DOA asserts that UWHCA still must make annual payments through 2032. The parties will be mediating the dispute in December 2018.

In August 2018, the Department of Health Services (DHS) received notification from the U.S. Department of Health and Human Services (DHHS) recommending a \$27.6 million disallowance related to the Medicaid program. DHHS concluded DHS did not refund the full federal share of Medicaid-related settlements and judgements from October 2008 through September 2016. In September 2018, DHS asserted in a letter to DHHS the amount to be refunded is \$6.1 million.

B. Commitments

Primary Government

As of June 30, 2018, encumbrances of the General Fund totaled \$524.4 million, encumbrances of the Transportation Fund totaled \$1.6 billion, and encumbrances of other non-major governmental funds totaled \$192.8 million. Obligations at June 30, 2018 representing multi-year, long-term commitments included (in thousands):

Transportation Fund	\$ 277,729
Capital Improvement Fund – WisDOT Harbors, Rails and Highway Programs	15,900
Transportation Revenue Bonds Capital Projects Fund	22,138
General Fund – Housing Programs	23,715

The *Environmental Improvement Fund* (the Fund) was established to administer the Clean Water Fund Loan Program. Loans are made to local units of government for wastewater treatment projects for terms of up to 20 years. These loans are made at a number of prescribed interest rates based on environmental priority. The loans contractually are revenue obligations or general obligations of the local governmental unit. Additionally, various statutory provisions exist which provide further security for payment. The Fund has made financial assistance commitments of \$166.7 million as of June 30, 2018. These loan commitments are expected to be met through proceeds from issuance of revenue obligations and additional federal grants.

The *Injured Patients and Families Compensation Fund* may be required to purchase an annuity as a result of a claim settlement. Under specific annuity arrangements, the Fund may have ultimate responsibility for annuity payments if the annuity company defaults on annuity payments. The total estimated replacement value of the Fund’s annuities as of June 30, 2018 was \$32.8 million. The replacement value calculation includes only annuities where the Fund remains the owner. Annuities with qualified assignments are no longer included. The Fund reserves the right to pursue collection from State guarantee funds.

State Public Deposit Guarantee - As required by Wis. Stat. Sec. 34.08, the State is to make payments to public depositors for proofs of loss (e.g., loss resulting from a bank failure) up to \$400 thousand per depositor above the amount of federal insurance. This statutory requirement guarantees that the State will make payments in favor of the public depositor that has submitted a proof of loss. Payments would be made in the order in which satisfactory proofs of loss are received by the State’s Department of Financial Institutions, until the designated appropriation is exhausted. At June 30, 2018, the appropriation available totaled \$63.9 million. Losses become fixed as of the date of the loss. A public depositor experiencing a loss must assign its interest in the deposit, to the extent of the amount paid, to the Department of Financial Institutions. Any recovery made by the Department of Financial Institutions under the assignment is to be repaid to the appropriation. The possibility of a material loss resulting from payments to and recovery from public depositors is remote.

NOTE 26. Tax Abatements

Wisconsin statutes authorize tax abatements to encourage economic development and other actions beneficial to the State or its citizens resulting in a reduction in tax revenue the State would otherwise be entitled to collect. GASB Statement No. 77, *Tax Abatement Disclosures*, requires disclosure of tax abatement agreements entered into by a reporting government, along with agreements entered into by other governments, which reduce the reporting government’s tax revenues. Most tax abatement programs meeting the criteria for disclosure in the State’s CAFR are certified by the Wisconsin Economic Development Corporation (WEDC), a separate legal entity also reported as a component unit in the CAFR. WEDC enters into the abatement agreements and administers the programs. The Wisconsin Department of Revenue (DOR) is responsible for ensuring the certified tax abatements were properly applied when processing income tax returns filed by recipients. The table below describes abatement programs that impact tax revenues for the State of Wisconsin.

State Agency Programs	Authority	Purpose	Tax Abated	Primary Criteria	Mechanism	Abatement Calculation	Recapturing Abatements
Historical Homeowners Tax Credit - Administered by Wisconsin Historical Society	Wis. Stats. 44.02(24)	Preserving or rehabilitating historic property located in Wisconsin	Income Tax	Own and occupy as personal residence property Costs must relate only to preservation or rehabilitation work done Costs must be more than \$10,000	Nonrefundable state income tax credit	25% of qualified expenditures for the current year for individuals	DOR may recover all or a portion of the credit if the claimant has not complied with all requirements
WHEDA Programs	Authority	Purpose	Tax Abated	Primary Criteria	Mechanism	Abatement Calculation	Recapturing Abatements
Low Income Housing Tax Credit Administered by Wisconsin Housing and Economic Development Authority	Wis. Stats. 234.45	Low-income housing tax credits	Income Tax	Person has an ownership interest in the qualified development The tax credit is necessary for financial feasibility of the qualified development Maintenance and operation as a qualified development for the compliance period and in compliance with Title VIII of the federal Civil Rights Act of 1968, as amended The allocation certificate is issued in accordance with the qualified allocation plan	Nonrefundable state income tax credit	A claimant may claim as a credit against the taxes imposed, up to the amount of the tax, the amount allocated by the authority	DOR may recover the credit based on the amount determined under section 42(j) of the Internal Revenue Code

WEDC Programs	Authority	Purpose	Tax Abated	Primary Criteria	Mechanism	Abatement Calculation	Recapturing Abatements
Business Development Credit (also includes the Economic Development and Jobs Tax Credit programs)	Wis. Stats. 238.308	Provides incentives for job creation, capital investment, training, and corporate location or retention for new and current businesses in Wisconsin	Income Tax	Person increases net employment in the state from net employment in the state during the year before certification	Refundable state income tax credit or offset against economic development surcharge	<p>Up to 10% of eligible employee wages</p> <p>Up to 5% of additional eligible employee wages in economically distressed area</p> <p>Up to 50% of eligible training costs</p> <p>For investments of \$1.0 million or greater or investments of less than \$1.0 million but at least \$10,000 per eligible employee: Up to 3% of personal property investment and up to 5% of real property investment</p> <p>Certain percentage of wages paid to eligible headquarters employees</p>	WEDC may require repayment of tax benefits claimed for a year in which the person failed to employ an eligible employee required by the agreement
Development Opportunity Zone Tax Credit	Wis. Stats. 238.395	Incent new and expanding businesses in the cities of Beloit, Janesville, and Kenosha Incent the creation of jobs for target group members	Income Tax	Business located in or relocating to, Beloit, Janesville, or Kenosha	Nonrefundable state income tax credit	<p>Credits ranging from \$6,000 to \$8,000 per job for an FTE paying at least 150% of federal minimum wage</p> <p>Up to 3% of all eligible capital investments</p> <p>Up to 50% of eligible environmental remediation costs</p>	WEDC may revoke tax benefits if false or misleading information is provided, if the business ceases to operate in the zone or moves outside the development zone
Enterprise Zone Tax Credit	Wis. Stats. 238.399	Incent expansion of existing Wisconsin businesses or relocation of major business operations from other states to Wisconsin	Income Tax	<p>Businesses located in, or relocating to, an enterprise zone in Wisconsin</p> <p>Business that begins or expands operations in an enterprise zone</p> <p>Business makes a significant capital contribution</p> <p>Positions created as a result of tax credits must be maintained for at least five years</p>	Refundable state income tax credit	<p>WEDC determines the maximum amount of tax credits a business may claim</p> <p>Credit of up to 7% of the net increase in zone payroll less certain adjustments</p> <p>Credit up to 100% of job-related training costs</p> <p>Up to 10% of significant capital expenditures</p> <p>Up to 1% of amount paid for property, goods or services purchased from Wisconsin vendors</p>	<p>WEDC may require a business to repay tax benefits for which the business failed to maintain employment levels or a significant capital investment in property</p> <p>WEDC may revoke tax benefits if false or misleading information is provided, if the business ceases to operate in the zone or moves outside the development zone</p>
Electronics and Information Technology Manufacturing Zone Tax Credit	Wis. Stats. 238.396	Incent a project (Foxconn) involving the attraction of major business operations to Wisconsin to support the creation of jobs	Income Tax	<p>Business that begins operations in the zone</p> <p>Services must be performed in the state</p> <p>Business maintains job creation threshold and requirements as designated by WEDC</p> <p>Business makes a significant capital expenditure in the zone</p>	Refundable state income tax credit	<p>Job creation credit equal to no more than 17% of payroll within the state for the benefit of the operations within the zone</p> <p>Investment credit where the business may claim up to 15% of its significant capital expenditures</p>	WEDC may require the business to repay any tax benefits the business claims for a year in which the business failed to maintain employment levels or a significant capital investment in property

WEDC Programs, continued	Authority	Purpose	Tax Abated	Primary Criteria	Mechanism	Abatement Calculation	Recapturing Abatements
Qualified New Business Venture (Consists of Early Stage Seed Investment and Angel Investment Credits)	Wis. Stats. 238.15	Promote development of research and development and early-stage capital availability by providing tax credit incentives for private equity investment in technology-based Wisconsin businesses with significant long-term growth potential	Income Tax	Investor must keep investment in a certified business or with a certified fund manager for no less than 3 years unless the investment becomes worthless or the person has kept the investment for at least 12 months and a bona fide liquidity event occurs during the 3 year period Certified businesses are those headquartered in the State and engaged in innovation within certain sectors such as manufacturing, biotechnology, agriculture, etc. or that process or assemble items such as medical devices, pharmaceuticals, computer hardware or software, etc.	Nonrefundable state income tax credit	25% of the value of the investment made in the certified company	The certified business must pay a penalty ranging from 60% to 100% of the tax credit provided if it relocates out of state during the 3 years after it received an investment
Historical Preservation Tax Credit (Supplement to Federal Historic Rehabilitation Tax Credit)	Wis. Stats. 238.17	Incentive for businesses to rehabilitate historic structures in Wisconsin used for production of income	Income Tax	Must own the historic property Building must be depreciable property that is either nonresidential real property, residential rental property, or real property with a class life of more than 12.5 years Rehabilitation expenditures are more than the greater of \$50,000 or the adjusted basis Expenditure test must be met within a 24-month (or, for phased rehabilitation projects, a 60-month) period	Nonrefundable state income tax credit	20% of qualified rehabilitation expenditures for the current year The state credit must be claimed ratably over a five-year period beginning in the taxable year the building is placed in service effective for amounts paid or incurred after December 31, 2017 ¹	If sale or noncompliance occurs within 5 years then a prorated amount of the credit received will be added back to the individual's tax liability

¹ State law automatically adopted the provision in the federal Tax Cuts and Jobs Act signed into law on December 22, 2017. The federal law effectively modified the timing for claiming the state credit from one year to over five years with a transition rule in place that applies to projects contracted and completed prior to tax year 2021.

The gross dollar amount by which the State's tax revenues were reduced as a result of abatement agreements during the fiscal year ended June 30, 2018:

State Agency Administered Program	Amount
Historical Homeowners Tax Credit	\$ 1.2 million
WEDC Administered Programs	
Business Development Credit ²	13.1 million
Development Opportunity Zone Tax Credit	0.3 million
Enterprise Zone Tax Credit	42.6 million
Qualified New Business Venture	9.8 million
Historical Preservation Tax Credit	39.9 million
Total State Agency and WEDC:	\$106.9 million

² Includes Economic Development, Jobs Tax Credit and Business Development Credit abatements

Tax Abatement-related Commitments

2017 Wis. Act 58 created an electronics and information technology manufacturing zone in southeast Wisconsin (the Foxconn project). Subject to the Act, the state may contract public debt in an amount not to exceed \$252.4 million in general fund-supported general obligation bonds to be used for road expansion and improvements to the I-94 North-South corridor. The Act also recognized a moral obligation in which the legislature expresses its expectation and aspiration, if ever called upon to do so, to make an appropriation to pay no more than 40 percent of the principal and interest of a local governmental unit's municipal obligations used to finance costs related to the zone.

NOTE 27. SUBSEQUENT EVENTS**Primary Government****Long-term Debt**

General Obligation Bonds – In October 2018, the State issued \$259.0 million of 2018 Series B general obligation bonds to be used for the acquisition, construction, development, extension, enlargement or improvement of land, water, property, highways, buildings, equipment or facilities for public purposes. The interest rates associated with these bonds were set at 5.0 percent payable semiannually beginning May 1, 2019. The bonds mature annually beginning May 1, 2020 through May 1, 2039.

General Fund Annual Appropriation Bonds – In October 2018, the State entered into a forward delivery bond purchase agreement for the issuance of general fund annual appropriation refunding bonds. Subject to that agreement, the State expects to issue \$360.0 million of Series A general fund annual appropriation refunding bonds in January 2019 to be used for the current refunding on May 1, 2019 of general fund annual appropriation bonds previously issued. When issued, the interest rates are expected to be 5.0 percent payable semiannually beginning May 1, 2019 and maturing May 1, 2021 through 2029.

Environmental Improvement Revenue Bonds – In August 2018, the State issued \$92.1 million of 2018 Series A environmental improvement fund revenue bonds to make pledged loans for the program. The interest rate associated with these bonds was set at 5.0 percent payable semiannually beginning December 1, 2018. The bonds mature annually beginning June 1, 2020 through June 1, 2026.

Certificates of Participation

In August 2018, the State issued \$26.6 million of 2018 Series A master lease certificates of participation to fund Lease Schedules previously financed through a revolving credit facility, and financing an additional Lease Schedule. The interest rate associated with these bonds were set at 3.0 to 5.0 percent payable semiannually beginning March 1, 2019. The bonds mature semiannually beginning March 1, 2019 through March 1, 2023.

Moral Obligation Debt

In October 2018, the Secretary of Administration designated the State's moral obligation pledge on \$120.0 million of Village of Mount Pleasant Tax Increment Revenue Bonds. This pledge does not exceed the amount provided for in law for a local governmental unit's aggregate municipal obligations issued to finance costs related to development occurring in, or for the benefit of, the electronics and information technology manufacturing zone.

Injured Patients and Families Compensation Fund

Under Wis. Stats. 655.015, the Injured Patients and Families Compensation Fund is charged with: "crediting each claimant's account with a proportionate share of any interest earned by the fund, based on that account's proportionate share of the fund". Previously, the interest rate credited to claimants' accounts had been based on the interest earnings of the State Investment Fund. In December 2018, the Board of Governors voted to change the interest credited to the claimants' accounts to reflect the interest on the fixed income investment portfolio, or the State Investment Fund, whichever is greater, and to apply this change retroactively. The actual amount of earnings to be credited is unknown, but the initial estimated amount is approximately \$12.0 million.

Required Supplementary Information

Postemployment Benefits - State Health Insurance Program

Schedule of Changes to the Total OPEB Liability and Related Ratios (in millions)

As of the Measurement Date June 30

	2017
Total OPEB Liability	
Service cost	72.1
Interest	23.6
Difference between expected & actual experience	(4.1)
Changes of assumptions	(109.3)
Benefit payments	(38.4)
Net Change in Total OPEB Liability	(56.0)
Total OPEB Liability – Beginning	\$775.4
Total OPEB Liability – Ending	\$719.3
Covered-employee payroll	\$3,690.7
Total OPEB liability as a percentage of covered	19.49%

This schedule will be built prospectively until it contains ten years of data.

Notes to RSI

The State Health Insurance OPEB plan does not have assets in trust or equivalent arrangements and is funded on a pay-as-you-go basis. Potential factors that may significantly affect trends in amounts reported include changes to the discount rate, health care trend rates, and participation rate assumptions. Employer benefit payments were actuarially determined and pertain to the implicit rate subsidy.

Contributions in relation to the contractually required contribution	\$1.4
Contribution deficiency	\$0
Covered payroll	\$3,184.0
Contributions as a percentage of covered payroll	0.042%

This schedule will be built prospectively until it contains ten years of data.

Required Supplementary Information

State's Proportionate Share of the Net Pension Liability or Net Pension (Asset)

The State's proportionate share of the net pension liability (NPL) or net pension (asset) (NPA) of the Wisconsin Retirement System is provided below:

Fiscal Year*	State's Proportion of the NPL/(NPA) (a)	State's Proportionate Share of the NPL/(NPA) (b)	State's Covered Payroll (c)	State's Share of the NPL/(NPA) as a Percentage of Covered Payroll (b / c)	WRS' Net Position as a Percentage of the Total Pension Liability (d)
2018	(27.8%)	\$ (826,113,891)	\$3,867,555,186	(21.4%)	102.9%
2017	28.0%	\$ 232,791,419	\$3,806,871,835	6.1%	99.1%
2016	28.1%	\$ 455,475,378	\$3,790,475,424	12.0%	98.2%
2015	(28.0%)	\$ (686,873,469)	\$3,735,598,305	(18.4%)	102.7%

* The amounts presented were measured as of the calendar year-end or for the calendar year ended that occurred within the fiscal year listed.

GASB standards require the presentation of 10 years of information. Because fiscal year 2015 was the first year for reporting this information, a full 10-year schedule will not be available until fiscal year 2024.

Required Supplementary Information

State's Pension Contributions

The State's pension contributions to the Wisconsin Retirement System are provided below:

Fiscal Year*	State's Actuarially Determined Contributions (a)	State's Contributions Made (b)	Contribution Excess/ (Deficiency) (b - a)	State's Covered Payroll (c)	State's Contributions Made as a Percentage of Covered Payroll (b / c)
2018	\$280,500,929	\$280,500,929	\$ -	\$3,867,555,186	7.3%
2017	\$263,970,133	\$263,970,133	\$ -	\$3,806,871,835	6.9%
2016	\$270,985,300	\$270,985,300	\$ -	\$3,790,475,424	7.2%
2015	\$275,968,183	\$275,968,183	\$ -	\$3,735,598,305	7.4%

* The amounts presented were measured for the calendar year ended that occurred within the fiscal year listed.

GASB standards require the presentation of 10 years of information. Because fiscal year 2015 was the first year for reporting this information, a full 10-year schedule will not be available until fiscal year 2024.

Required Supplementary Information

Infrastructure Assets Reported Using the Modified Approach

The State has adopted the modified approach for reporting infrastructure assets. Under the modified approach, infrastructure assets are not depreciated as long as the State can demonstrate that these assets are properly managed and are being preserved at or above an established condition level. Instead of depreciation, the costs to maintain and preserve infrastructure assets are expensed, while additions and improvements are capitalized. The State owns approximately 11,200 centerline miles of road and 5,200 bridges.

Road Network

Condition assessments are completed on a two-year cycle with the most current results reported for each State road. The State completes the assessment of the Eastern half of the State in one year and the Western half of the State in the next. Numerous measures are used to assess the condition of the State's road network. The State has adopted the International Roughness Index (IRI), as defined by the Federal Highway Administration, as one of its condition measures. IRI is a direct measure of road roughness, with an IRI of 2.69 mm/m (170 inches/mile) or greater being defined as a "poor" ride. Roads with a "poor" IRI assessment may cause negative impacts for the traveling public by decreasing driver comfort and potentially increasing the damage to vehicles and goods. It is the State's policy to ensure no more than 15 percent of its roads receive a "poor" IRI assessment.

Recent condition assessment results are as follows:

Year Ended June 30	Miles of Road	Percent Rated "Poor"	Established Percent	Variance Favorable/ (Unfavorable)
2018	11,200	7.4	15.0	7.6
2017	11,200	7.4	15.0	7.6
2016	11,200	8.9	15.0	6.1
2015	11,200	7.3	15.0	7.7
2014	11,200	8.3	15.0	6.7
2013	11,200	6.2	15.0	8.8
2012	11,200	7.0*	15.0	8.0
2011	11,200	12.0**	15.0	3.0
2010	11,200	9.3**	15.0	5.7
2009	11,200	6.9	15.0	8.1

* The 2012 decrease in the percentage of roads rated poor is due to inclusion of new construction in the scope of the condition assessment. Without such inclusion, the percentage of poor roads would have been equivalent to the 2011 level. New construction was included because efficiencies were gained from a new van used to capture condition assessment data, resulting in new construction being included in the assessment closer to the completion date. In prior years, new construction was generally not included in condition assessments until the following year.

** The 2011 and 2010 increase in the percentage of roads rated poor compared to previous years is partially attributable to the new equipment used in assessing the IRI. For 2011, all of the miles were tested using the new equipment. For 2010, approximately half of the miles were tested using the new equipment. DOT officials believe the current data collection methods provide a more accurate view of existing ride quality because of improvements in equipment and methodology.

Each year the State estimates the costs to maintain and preserve the road network at, or above, the established condition level. Actual maintenance/preservation costs compare to estimates as follows:

Year Ended June 30	Estimated Costs (In millions)	Actual Costs (In millions)	Variance (In millions) Favorable/ (Unfavorable)
2018	\$748.0	\$616.7	\$ 131.3
2017	\$770.3	\$629.3	\$ 141.0
2016	\$617.6	\$564.7	\$ 52.9
2015	\$603.4	\$643.3	\$ (39.9)
2014	\$619.4	\$605.9	\$ 13.5
2013	580.9	561.8	19.1
2012	611.0	585.3	25.7
2011	606.7	705.7	(99.0)
2010	660.7	669.1	(8.4)
2009	647.7	624.4	23.3

Estimated costs are developed at the beginning of the fiscal year based on projects planned for the current and future years. The types of projects ultimately contracted and incurring costs during the year are often very different. In addition, the State of Wisconsin, Department of Transportation's multi-year contracting process, allowing encumbrances to carry forward, makes a comparison of actual to estimated amounts difficult since expenditures for the current year may have been budgeted and committed to a project in prior years.

Bridge Network

Condition assessments are completed on a two-year cycle, with more frequent inspections completed if warranted. The most current assessment results are reported for each State bridge, making the overall assessment a blend of measures completed in the current fiscal year and those completed in the prior year.

The structural condition rating is a broad measure of the condition of a bridge. Each bridge is rated using three National Bridge Inventory (NBI) condition codes and two NBI appraisal ratings. The three NBI condition codes are Deck Condition, Superstructure Condition, and Substructure Condition. The two NBI appraisal ratings are Structural Evaluation and Waterway Adequacy. The NBI uses a 10-point scale for condition codes and appraisal ratings. A bridge is considered "structurally deficient" if any condition code is 4 or less, or if either appraisal code is 2 or less.

"Structurally deficient" bridges cause negative impacts for the public by increasing the likelihood that heavy loads will need to be rerouted to less efficient routes, thus increasing logistic costs for State businesses. It is the State's policy to ensure no more than 15 percent of its bridges are "structurally deficient".

Recent condition assessment results are as follows:

Year Ended June 30	Number of Bridges	Percent Structurally Deficient	Established Percent	Variance Favorable/ (Unfavorable)
2018	5,200	3.0	15.0	12.0
2017	5,200	3.1	15.0	11.9
2016	5,200	3.1	15.0	11.9
2015	5,200	3.2	15.0	11.8
2014	5,100	3.3	15.0	11.7
2013	5,100	3.1	15.0	11.9
2012	5,100	3.3	15.0	11.7
2011	5,100	3.6	15.0	11.4
2010	5,000	4.1	15.0	10.9
2009	5,000	3.8	15.0	11.2

Each year, the State estimates the costs to maintain and preserve the bridge network at, or above, the established condition level. Actual maintenance/preservation costs compare to estimates as follows:

Year Ended June 30	Estimated Costs (In millions)	Actual Costs (In millions)	Variance (In millions) Favorable/ (Unfavorable)
2018	\$92.1	\$89.9	\$2.2
2017	\$56.9	\$59.3	\$(2.4)
2016	\$78.6	\$128.3	\$(49.7)
2015	57.1	164.4	(107.3)
2014	261.2	131.0	130.2
2013	123.2	115.3	7.9
2012	101.9	61.1	40.8
2011	42.4	64.2	(21.8)
2010	91.7	93.0	(1.3)
2009	55.9	56.9	(1.0)

Estimated costs are developed at the beginning of the fiscal year based on projects planned for the current and future years. The types of projects ultimately contracted and incurring costs during the year are often very different. The State of Wisconsin, Department of Transportation's multi-year contracting process, allowing encumbrances to carry forward, makes a comparison of actual to estimated amounts difficult since expenditures for the current year may have been budgeted and committed to a project in prior years. Estimated and actual costs for 2014 have been restated from amounts reported in prior years due to an error in classification of costs on a capital project as maintenance/preservation costs.

Notes To Required Supplementary Information

NOTE 1. BUDGETARY INFORMATION

A. Budgetary – GAAP Reporting Reconciliation

The accompanying Budgetary Comparison Schedule compares the legally adopted budget (more fully described in RSI Note 1-B) with actual data on a budgetary basis. Because accounting principles applied for purposes of developing data on the budgetary basis differ significantly from those used to present financial statements in conformity with generally accepted accounting principles (GAAP), a reconciliation of basis and perspective differences as of June 30, 2018 is presented below (in thousands):

	General Fund	Transportation Fund
Fund balance June 30, 2018 (budgetary basis – budgetary fund structure):		
General Purpose Revenue – fund balance per budgetary basis <i>Annual Fiscal Report</i>		
Undesignated fund balance	\$ 588,472	
Designated fund balance	238,549	
Total General Purpose Revenue fund balance	827,021	
Program Revenue – fund balance per budgetary basis <i>Annual Fiscal Report</i>	1,156,501	
Fund balance June 30, 2018 (budgetary basis – budgetary fund structure)		
as reported on the budgetary comparison schedule	1,983,522	\$(1,210,456)
Reclassifications:		
To eliminate encumbrances reported as expenditures under budgetary reporting (<i>basis difference</i>)	524,427	1,706,452
To include activities of funds such as the Medical Assistance Trust, Hospital Assessment, Critical Hospital Assessment, Budget Stabilization, and Permanent Endowment Funds (reported as special revenue funds under budgetary reporting) as part of the General Fund (<i>perspective difference</i>)	429,320	--
To remove activities reported in another GAAP fund type (<i>perspective differences</i>):		
Enterprise funds (except for the University of Wisconsin System)	(32,151)	--
University of Wisconsin System	(1,306,911)	--
Internal Service funds	(6,005)	--
Fiduciary funds	(4,066)	--
Transportation Revenue Bonds capital project fund	--	1,422
Fund balance June 30, 2018 (GAAP fund structure – budgetary basis, excluding encumbrances treated as expenditures at year end)	1,588,136	497,417
Adjustments (<i>basis differences</i>):		
To accrue receivables and establish payables for individual income taxes (net)	(884,330)	--
To defer revenues for gross receipts public utility taxes	(277,475)	--
To adjust revenues and expenditures for tax-related items and other tax credit/aid programs (net)	(472,705)	(7,310)
To adjust expenditures for the municipal and county shared revenue program	(507,375)	--
To adjust expenditures for State property tax credit program	(810,964)	--
To accrue unpaid Medicaid payments to providers (net of receivable from federal government)	(263,343)	--
To adjust revenues and expenditures for certain major Health Services, and Children and Families human services payments to local governments	(137,828)	--
To accrue receivable for Medicaid drug rebates (net of payable to federal government)	203,918	--
To adjust expenditures/revenues for other Health Services, Workforce Development, Children and Families, and Corrections accruals and deferrals	(62,520)	--
To recognize the tobacco settlement revenue receivable	75,761	--
To accrue State educational aids payments deferred until the subsequent year	(75,000)	--
To accrue receivables from the federal government for the Children’s Health Insurance Program	275,390	--
To adjust expenditures and revenues for State Energy Program and other revolving loan programs	5,453	--
To adjust revenues and expenditures for other items (net)	89,354	165,774
Fund balance June 30, 2018 (GAAP fund structure – GAAP basis) as reported on the governmental fund statements	\$(1,253,527)	\$655,881

B. Budgetary Basis of Accounting

The State's biennial budget is prepared using a modified cash basis of accounting. The final budget is primarily a general purpose revenue and expenditure budget. General purpose revenues consist of general taxes and miscellaneous receipts which are paid into the General Fund, lose their identity, and are then available for appropriation by the Legislature. The remaining revenues consist of program revenues, which are credited by law to an appropriation to finance a specified program or State agency, and segregated revenues which are paid into separate identifiable funds.

While State departments and agencies are required to submit estimates of expected revenues for program revenue and segregated revenue categories, these estimates are not formally incorporated into the adopted budget except for revenue estimates of the Lottery Fund. As a result, legally budgeted revenues for these categories are not available and, consequently, actual amounts are reported in the budget column of the Budgetary Comparison Schedules.

Expenditure budgeting differs for the various types of appropriations. For most appropriations, budgeted expenditures equal the amount from the adopted budget plus any subsequent legislative or administrative revisions. Various supplemental appropriations were approved during the year and have been incorporated into the budget figures.

While State statutes prohibit spending beyond budgetary authority, a provision is made to include the value of accounts receivable, inventories and work in process in identifying available revenues. The State also utilizes nonbudget accounts for which no budget is established but expenditures may be incurred. As a result, actual expenditures may exceed budgeted amounts in certain categories.

The budgetary basis of accounting required by State law differs materially from the basis used to report revenues and expenditures in accordance with GAAP. Other variances arise because the State's biennial budget is developed according to the statutory required fund structure which differs extensively from the fund structure used in the GAAP basis financial statements. This difference is primarily caused by the elimination of the University of Wisconsin System, and various fiduciary, proprietary and other governmental fund activities from the statutory General and Transportation funds. In addition, funds such as the Medical Assistance Trust, Hospital Assessment, Budget Stabilization and Permanent Endowment, special revenue funds under statutory reporting, are included as part of the General Fund under GAAP reporting. As a consequence of these differences, a reconciliation between budgetary basis and GAAP basis is provided in Note 1-A of the notes to the required supplementary information.

The Budgetary Comparison Schedules for the General and the Transportation Fund present both the original and final

appropriated budgets, as well as the actual inflows, outflows, and fund balance on the budgetary basis. The supplementary budget comparison schedule provides this same information (with the exception of the original budget data) for the nonmajor governmental funds with annual budgets. The capital project and debt service funds are excluded from this schedule because no comprehensive budget is approved for these funds. One special revenue fund, the Wisconsin Public Broadcasting Foundation, has been excluded from reporting because it is a blended component unit that is neither budgeted nor included under statutory reporting. Of the permanent funds, only the Historical Society Fund and a portion of the Common School and Normal School funds are budgeted.

The State's biennial budget was enacted on September 21, 2017 and published on September 22, 2017. This legislation is recognized by State officials as the original budget and is treated as such on the Budgetary Comparison Schedules.

While the legal level of budgetary control for the reported funds is maintained at the appropriation line as specified by the Legislature in Chapter 20 of the Wisconsin Statutes, this level of detail is impractical for inclusion in the Comprehensive Annual Financial Report. Accordingly, a supplementary report is available upon request which provides budgetary comparisons at the legal level of control.

Appropriation unexpended balances lapse at year-end or forward to the subsequent fiscal year depending on the type of appropriation involved:

- *Continuing* - unexpended balances automatically forward to ensuing years until fully depleted or repealed by subsequent action of the Legislature.
- *Annual*:
 - *General Purpose Revenue* - unencumbered balances lapse at year end.
 - *Program Revenue* - unexpended cash balances may be forwarded to the next fiscal year.
- *Biennial* - unexpended balances or deficits automatically forward to the second year. At the end of the second year all unencumbered general purpose revenue balances lapse.
- *Sum sufficient* - moneys are appropriated and expended in the amounts necessary to accomplish the purpose specified.

Encumbrances may be carried over to the next fiscal year as a revision to the budgetary appropriation with Department of Administration approval. Under budgetary reporting, encumbrances are treated like expenditures and are shown as a reduction of fund balance.
