## Introduction

### Summary

- Overall contracting totaled \$790.6 million in FY19.
- State agency contracting totaled \$598.6 million in FY19.
- University of Wisconsin System, including UW Madison, contracting totaled \$192 million in FY19.
- State agencies produced 376 cost-benefit analyses in FY19.

### Statutory Background

**Contractual Service Procurements.** §16.705 (8), Wis. Stats., provides that DOA "shall, annually on or before October 15, submit to the governor, the joint committee on finance, the joint legislative audit committee and the chief clerk of each house of the legislature for distribution to the appropriate standing committees under s. 13.172 (3), a report concerning the number, value and nature of contractual service procurements authorized for each agency during the preceding fiscal year."

**Cost-Benefit Analyses.** §16.705 (8), Wis. Stats., provides that "the report shall also include, with respect to contractual service procurements by agencies for the preceding fiscal year:

(a) A summary of the cost-benefit analyses completed by agencies in compliance with rules promulgated by the department under sub. (2).

(b) Recommendations for elimination of unneeded contractual service procurements and for consolidation or resolicitation of existing contractual service procurements."

**Division of Legal Services.** Pursuant to §16.004 (15)(bm), Wis. Stats., the DOA Division of Legal Services assists in efforts to reduce the state's use of contracted employees. In order to meet this mission, the Division of Legal Services meets weekly with the State Bureau of Procurement to review and discuss enterprise-wide contracts and DOA contracts and provides consultation to the State Bureau of Procurement on CBA issues. The Division of Legal Services also provides direct assistance to executive branch agencies on contract matters to help agencies negotiate, amend, consolidate or terminate contractual services to gain efficiencies and lower state costs.

### Data Sources

The State transitioned to a new accounting system, the State Transforming Agency Resources (STAR) system, during FY16. The contractual services expenditure data was extracted from STAR and uniform account codes are used for all agencies. For UW System campuses, who do not use STAR, information was provided by UW System Administration. Account Code detail starts on page 4.

Report data exclude spending authorized outside of §16.75, Wis. Stats., such as interagency or municipal spend, conservation, fellowships and scholarships, legal settlement fees, services provided in conjunction with building projects (§16.855, Wis. Stats.), road construction projects (Chapter 84, Wis. Stats.), academic research or instructional services (Chapter 36, Wis. Stats.), exempted grant spending and payments made pursuant to statute, and spend covered by other subchapters such as Chapter 40, Wis. Stats.

# Summary of Fiscal Year 2019 Cost-Benefit Analyses and Recommendations

## Background

§16.705(2)(a), Wis. Stats., requires agencies, including University of Wisconsin System, to conduct a uniform cost-benefit analysis of each proposed contractual service procurement involving an estimated expenditure of more than \$50,000 in accordance with standards prescribed by rule. To that end, DOA published administrative rules— Wis. Adm. Code Chapter Adm. 10.035, 10.037, 10.038—that specify the manner and form of cost-benefit analyses (CBA) that must be conducted by agencies prior to entering into service contracts greater than \$50,000.

In addition to requiring the completion of CBAs, statutes require DOA to report certain information as part of its annual contractual services report to the Legislature. Specifically:

- §16.705 (8) (a), Wis. Stats., requires that DOA submit a “summary of the cost–benefit analyses completed by agencies in compliance with rules promulgated by the department.”
- §16.705 (8) (b), Wis. Stats., requires that DOA provide "recommendations for elimination of unneeded contractual service procurements and for consolidation or resolicitation of existing contractual service procurements.”

Act 89 CBAs are used by agencies to compare the estimated costs of contracting for services with the estimated costs of using state employees to perform a specific task. Agencies complete CBAs prior to contracting for services. In some cases, agencies have used CBA results to determine it is not appropriate to contract out. ***As such, the reader is cautioned that the production of a CBA does not mean a contract was eventually issued for the contemplated service.***

## Summary and Analysis of FY19 Cost-Benefit Analyses

Agencies completed 376 CBAs and 454 continued appropriateness analyses (CA) during FY19. The Department of Administration (50), Department of Corrections (43) and the Department of Health Services and the Department of Transportation (both with 37) produced the highest volumes of CBAs. A complete listing of FY19 CBAs including agency, estimated total state cost and estimated total contractor cost appears on page 15. A listing of CAs by agency appears on page 25. Readers should contact the agency responsible for the CBA or CA for more information.

By statute, CBAs include narrative descriptions of quality, technical expertise, and timeliness considerations. CBAs also provide total estimated costs of service delivery through state employees and contractors. Estimated state employee costs include estimated wage and salary, fringe benefits, administrative overhead and other operating costs. Estimated contracting costs include estimated contract price, contract development and monitoring and one-time conversion costs. Statutes do not require agencies to complete a CBA for the following contractual services:

- Services that federal or state law requires to be performed by contract.
- Services that must be provided per a contract, license or warranty, by the original equipment manufacturer or publisher.
- Services that cannot be performed by state employees because the state lacks the required infrastructure.
- Web-based software application services that are delivered and managed remotely.

The following table provides dollar ranges of the listed amounts of state employee and contracting costs for all FY19 CBAs:

**FY19 Cost-Benefit Analyses, by dollar range**

Common services sought among agencies included information technology initiatives, health, environmental and social services. In most cases, however, services related to the particular mission of an agency or campus.

**Recommendations**

1. **Information Technology Services Provider Contract.** Agencies should continue to examine the availability of state employees before contracting for information technology services providers. The State Bureau of Procurement will continue to examine the appropriateness and breadth of services available on information technology services provider contracts.
2. **Inter-Agency Solicitations.** FY19 CBA data indicates that agencies tend to contract for services that advance their individual missions. However, agencies are encouraged to examine the data to determine whether other agencies are contracting for similar services. Significant cost savings may be available by combining volume. The State Bureau of Procurement is available to advise on or, in some cases, lead solicitations that cross multiple agencies.
3. **Intra-Agency Solicitations.** Large agencies should determine whether similar service solicitations will be issued by different programs within the agency. In those cases, effort should be undertaken to issue a single solicitation to combine volume and generate optimum cost savings.
