Subject: LION Support of Data Collection

Hello LIOs,

Earlier this morning you should have received a request for data layers from LTSB. Along with the standard requested data layers, there are a few additional data layers that would support the Wisconsin Department of Military Affairs' (DMA) upcoming NG-911 Gap Analysis. The purpose of the Gap Analysis is for DMA to gain a detailed picture of the state of NG-911 related datasets in Wisconsin. These additional data layers were not included in the DOA-WLIP Annual Call for Data, however, both LION and WLIA want to limit the number of data requests, and leverage existing data collection systems in order to aid in DMA's efforts. The LTSB has offered to assist in this additional data collection with their WISE-Decade platform, and will forward the unaltered data to the Robinson Map Library to hold until DMA selects a consultant to perform the Gap Analysis.

The requested data layers are:

- PSAP Boundaries
 - 911 service boundaries. If countywide, then provide the county boundary and name the data layer as 'PSAP'
 - Naming convention: COUNTYNAME_**PSAP**_YEAR
- Fire response districts
 - Fire District service boundaries
 - Naming convention: COUNTYNAME_**FIRE**_YEAR
- EMS responses districts:
 - EMS service boundaries
 - Naming convention: COUNTYNAME_**EMS**_YEAR
- Law Enforcement districts
 - Police department service boundaries
 - Naming convention: COUNTYNAME_**LAW**_YEAR

This is a one-time **voluntary** submission in support of DMA's NG-911 Gap Analysis project and is **not** mandated by any statute. The data is being requested 'as-is' and no data needs to be created or any modifications made. Please submit any data you have by March 31st, which coincides with end of the WLIP collection of parcel.

In order to submit the additional requested data layers:

1. Log on to LTSB's WISE-Decade platform: <https://wisedecade.legis.wisconsin.gov/>
 - *Please contact LTSB if you do not have your county credentials*
2. On the main page, click 'Foundational Layers'
3. Fill in the requested information. Select 'PSAP Boundaries' as the data type (even if they are only the response districts).
4. Zip **ALL** of the above requested data layers that have into a **SINGLE** zip file. Then click 'Browse' and navigate to that zip file to upload.
5. The file should automatically upload.
 - *Please contact LTSB with any issues or questions:*
 - (608) 283-1830
 - GIS@legis.wisconsin.gov

LION would like to encourage all LIOs to participate in this voluntary data collection.

Thank you to everyone for participating.
