Ch. 236, Wis. Stats. “Professional Land Surveyor” (Effective 8/1/14)

“Licensed Land Surveyor” and “Registered Land Surveyor” has been replaced with “Professional Land Surveyor” throughout the chapter.

s. 236.025 Ordinary high water marks – relating to monuments and meander lines. (Effective 8/1/14)

An ordinary high water mark shown on a plat, map or survey may be determined by the Department of Natural Resources/pursuant to law or may be shown as “approximate” on the plat, map or survey. If the ordinary high water mark is ‘approximated’ – the location shall be a point on the bank to which the presence and action of the water is so continuous as to leave a distinct mark. Such ‘approximate’ ordinary high water marks must be labeled “for reference only.”

s. 236.11 & s. 236.12 Submitting plats for local approval and state certification. (Effective 8/1/14)

These sections were revised to streamline the plat submittal process and reflect the process that is currently being used. There are no longer two different submittal processes in the statute. Electronic submittals are now specifically allowed by statute. The review time limits remain the same.

The subdivider or their agent (surveyor) submits a copy of the plat to the approving authorities (town/county or village/city) and to DOA. DOA then transmits copies of the plat to the objecting review authorities (DOT/county planning agency). After reviewing and coordinating the objecting authority’s reviews, DOA certifies ‘no objection’ on the recordable document. The recordable document is then presented to the approving authorities for their final approval and signature. After acquiring all of the required signatures, the plat is filed/recorded with the Register of Deeds.

s. 236.13 (2) (a) (1) Security required by local governments for public improvements. (Effective 8/1/14)

The developer decides if the security will be a performance bond or a letter of credit. The amount of security shall not be more than 120 percent of the estimated total cost of the improvements. The security may not be required for more than 14 months after the improvements are ‘substantially completed’. Thereafter, any withheld security may not be more than the cost to finish the uncompleted improvements plus 10 percent of the total cost of the already completed improvements.

s. 236.20 (a) Margins for subdivision plats. (Effective 8/1/14)

Subdivision plats have a 1 inch margin on all sides.

s. 236.20 (4) (b) Land dedicated to the public on subdivision plats. (Effective 8/1/14)

All land that is dedicated to the public on a plat must be clearly marked “Dedicated to the Public” – including roads/streets.

s. 236.20 (6) Public trust information required on subdivisions and CSMs. (Effective 8/1/14)

Any final plat or CSM which includes lots/outlots that go to the water’s edge must include the following statement:

“Any land below the ordinary high water mark of a lake or a navigable stream is subject to the public trust in navigable waters that is established under article IX, section 1 of the state constitution.”

s. 236.21 (1) (b) 2. Description of the land surveyed in the Surveyor's Certificate. (Effective 8/1/14)

If the land is in a recorded subdivision plat, a recorded addition to a subdivision plat **or** a recorded certified survey map that has been previously tied to a monumented line of the PLSS; the description **shall** be by lot/outlot number and plat name or lot/outlot number and the certified survey map number. (see also s. 236.34 (1m) (d) 2. for same requirement on CSMs)

s. 236.25 (a) Recording a plat. (Effective 8/1/14)

Subdivision plats shall be on durable white media with a permanent, nonfading black image, or on "other media that is acceptable to the register of deeds." This enables electronic recording if the process for such recording is in place.

s. 236.34 (1) (ar) Expanded use of Certified Survey Maps (Effective 4/18/14)

A local unit of government, that has established a planning agency, may enact an ordinance or adopt a resolution in accordance with this section that specifies the number of parcels, greater than 4, that can be included on a certified survey map. The use of these CSMs are limited to land zoned commercial, industrial or mixed use.

s. 236.34 (1) (em) & (er) State level review of expanded CSMs per s. 236.34 (1) (ar) (Effective 4/18/14)

Expanded CSMs reconfiguring lots/outlots in a recorded subdivision plat, assessor's plat or CSM (meaning no additional lots/outlots are being created) are **not** reviewed by DOA. Expanded CSMs that are used to create additional parcels, in or out of a plat or map, are submitted to DOA for review.

If an expanded CSM is on a state trunk highway or connecting highway and it changes the exterior boundary of a recorded plat or CSM, then the CSM is submitted to DOT for review. If these CSMs are in the City of Milwaukee, there is no state level review.

s. 236.15 (1) (ac) Placement of monuments. (Effective 8/1/14)

When monuments fall within a street on a subdivision plat or certified survey map, the monument shall be placed in the side line of the street (at the right of way).

s. 236.34 (1m) (e) Dedicating land and granting easements with CSMs. (Effective 8/1/14)

A CSM can be used to dedicate land to the public and grant easements when they include signed owner's and mortgagee certificates and have been approved by the local unit of government in which the CSM is located.

s. 236.34 (4) Circuit court vacation of CSMs. (Effective 8/1/14)

A CSM may be vacated by the circuit court of the county in which it is located. Application of the vacation may be made by the owner of any lot/outlot in the CSM or the county board if they have acquired an interest by tax deed.

As a further condition of approval, the governing body of the town or municipality within which the subdivision lies may require that the subdivider make and install any public improvements reasonably necessary or that the subdivider ~~execute a surety bond or provide other~~ security to ensure that he or she will make those improvements within a reasonable time.
