ACTION REQUIRED TO MEET STATEWIDE SCHEMA

ATTRIBUTES

✔ **PARCELID**
✔ **TAXPARCELID**
✱ **PARCELDATE**   • **PARCELDATE**: ~28700 records with value of 02/14/2002. Per note in submission form, this is from conversion to new tax system. Populate PARCELDATE with the date (MM/DD/YYYY) that best describes when the parcel geometry was last edited. With future data submissions, if date of last geometric edit is unknown, populate PARCELDATE with <Null>. For future updates to individual parcels, maintaining a modification date for the parcel geometry is advised.

✔ **TAXROLLYEAR**
✔ **OWNERNME1**
✔ **OWNERNME2**
✔ **PSTLADRESS**
✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**
✔ **SITEADRESS**
✔   **ADDNUMPREFIX**
✔   **ADDNUM**
✔   **ADDNUMSUFFIX**
✔   **PREFIX** – with standardized domains
✔   **STREETNAME**
✔   **STREETTYPE** – with standardized domains
✔   **SUFFIX**
✔   **LANDMARKNAME**
✔   **UNITTYPE**
✔   **UNITID**
✔ **PLACENAME**
✔ **ZIPCODE**
✔ **ZIP4**
✔ **STATE**
✔ **SCHOOLDIST** – with standardized domains
✔ **SCHOOLDISTNO** – with standardized domains
✔ **IMPROVED** – with standardized domains
✔ **CNTASSDVALUE**
✔ **LNDVALUE**
✔ **IMPVALUE**
✔ **FORESTVALUE**
✔ **ESTFMKVALUE**
✔ **NETPRPTA**
✔ **GRSPRPTA**
✔ **PROPCLASS** – with standardized domains
✔ **AUXCLASS** – with standardized domains
✔ **ASSDACRES**

✔ **GISACRES**
✔ **CONAME** – with standardized domains
✔ **PARCELFIPS** – with standardized domains
✔ **PARCELSRC** – with standardized domains

PARCEL FEATURE CLASS

✔ **Projection met statewide schema**
✔ **County parcel fabric was complete (lacked gaps)**
✔ **Condo modeling met statewide schema**

CO. ZONING DATA

✔ **County general** – with attributes
✔ **Farmland preservation** – with attributes
✔ **Shoreland** – with attributes
✔ **Floodplain** – with attributes
✔ **Airport protection** – with attributes

SUBMISSION FORM

✔ **Submission form provided with initial submission**

MISCELLANEOUS

• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET **STATEWIDE SCHEMA**

ATTRIBUTES

✔ **PARCELID**

✔ **TAXPARCELID**

✱ **PARCELDATE**   • **PARCELDATE**: Field with all the same date (March 7, 2016), which seems unlikely to be creation/edit date. Populate PARCELDATE with the date (MM/DD/YYYY) that best describes when the parcel geometry was last edited. With future data submissions, if date of last geometric edit is unknown, populate PARCELDATE with <Null>. For future updates to individual parcels, maintaining a modification date for the parcel geometry is advised.

✔ **TAXROLLYEAR**

✔ **OWNERNME1**

✔ **OWNERNME2**

✱ **PSTLADRESS**   • **PSTLADRESS**: ~2734 records with value = ' , '
    • Enter <Null> for parcels without a complete mailing address.

✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**

✔ **SITEADRESS**

✱   **ADDNUMPREFIX**   • **ADDNUMPREFIX**: This field contains a value of '4O.' The 'O' is a letter, not a numeric '0.' Make correction to this value and place in appropriate field.

✱   **ADDNUM**   • **ADDNUM**: ~1 record with 'J' in the field. It appears to be part of the STREETNAME. Please move to appropriate field.

✔   **ADDNUMSUFFIX**

✱   **PREFIX** – with standardized domains   • **PREFIX**: Standardize domains to statewide schema domains.
    • ~1 record with 'TN RD' in this field. This is not a statewide schema domain for this field, please move to STREETNAME field.

✔   **STREETNAME**

✔   **STREETTYPE** – with standardized domains

✔   **SUFFIX**

✔   **LANDMARKNAME**

✔   **UNITTYPE**

✔   **UNITID**

✱ **PLACENAME**   • **PLACENAME**: The values provided appears to be Postal placename. Replace with Jurisdictional placename.

✱ **ZIPCODE**   • **ZIPCODE**: ~52 records with SITEADRESS, but missing ZIPCODE value. Populate if zip code is available in land information system.

✔ **ZIP4**

✔ **STATE**

✔ **SCHOOLDIST** – with standardized domains

✱ **SCHOOLDISTNO** – with standardized domains   • **SCHOOLDISTNO**: 3 codes (170, 315, 840) are missing leading '0.' Leading zero needs to be added for these codes to conform to domains of the statewide schema.

✔ **IMPROVED** – with standardized domains

✔ **CNTASSDVALUE**

✔ **LNDVALUE**

✔ **IMPVALUE**

✔ **FORESTVALUE**

✔ **ESTFMKVALUE**

✔ **NETPRPTA**

✔ **GRSPRPTA**

✔ **PROPCLASS** – with standardized domains

✔ **AUXCLASS** – with standardized domains

✔ **ASSDACRES**

✔ **DEEDACRES**

✔ **GISACRES**

✱ **CONAME** – with standardized domains   • **CONAME**: ~762 records with PARCELD= ROW, UNASSIGNED, etc. These records have PARCELFIPS and PARCELSRC fields populated, but are missing the CONAME. Please populate CONAME field prior to submission.

✔ **PARCELFIPS** – with standardized domains

✔ **PARCELSRC** – with standardized domains

PARCEL FEATURE CLASS

✔ **Projection met statewide schema**

✔ **County parcel fabric was complete (lacked gaps)**

✔ **Condo modeling met statewide schema**

CO. ZONING DATA

✱ **County general** – with attributes   • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

✱ **Farmland preservation** – with attributes   • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

✱ **Shoreland** – with attributes   • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

✱ **Floodplain** – with attributes   • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

✱ **Airport protection** – with attributes   • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

SUBMISSION FORM

✔ **Submission form provided with initial submission**

MISCELLANEOUS

• Issues arose with the parsing of 'FOREST ROAD' and 'TOWN ROAD.' The values 'FOREST' and 'TOWN' ended up in STREETNAME field 'ROAD' ended up in STREETTYPE field and the associated number ended up in UNITID field. Please move all elements (e.g., 'FOREST ROAD ##') into the STREETNAME field.
• Delete the 'UNIQUE_IDENTIFIER' field from the parcel dataset prior to submission.
• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

✔ **Farmland preservation** – with attributes
✔ **Shoreland** – with attributes
✔ **Floodplain** – with attributes
◆ **Airport protection** – with attributes   • (Not administered by county)

SUBMISSION FORM

✔ **Submission form provided with initial submission**

MISCELLANEOUS

• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET **STATEWIDE SCHEMA**

ATTRIBUTES

✔ **PARCELID**	
✔ **TAXPARCELID**	
✱ **PARCELDATE**	• **PARCELDATE**: Replace '-' in date provided with '/'
✱ **TAXROLLYEAR**	• **TAXROLLYEAR**: ~246 records with a value of '2016.' Based off the PARCELDATE values, we are assuming that these are new parcels in 2015/2016. Populate TAXROLLYEAR according to statewide schema specifications for future data submissions.
✔ **OWNERNME1**	
✔ **OWNERNME2**	
✱ **PSTLADRESS**	• **PSTLADRESS**: ~1900ish records with 'UNKNOWN, , ' or 'UNKNOWN, UNKNOWN, WI, 00000,' etc. Most look to be USA (federally-owned), few STATE of WISCONSIN-owned land, etc. • Enter <Null> for parcels without a complete mailing address.
✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**	
✔ **SITEADRESS**	
✔ **ADDNUMPREFIX**	
✔ **ADDNUM**	
✔ **ADDNUMSUFFIX**	
✔ **PREFIX** – with standardized domains	
✱ **STREETNAME**	• **STREETNAME**: Field contains 'ST HWY ##' for ~504 records. These values should be placed in the PREFIX field and standardized to 'STH' domains for future data submissions. • Handful of street names and street types still exist within this field. Search for these and move to appropriate field.
✔ **STREETTYPE** – with standardized domains	
✔ **SUFFIX**	
✔ **LANDMARKNAME**	
✔ **UNITTYPE**	
✱ **UNITID**	• **UNITID**: ~3 records with unit type still attached to unit ID. Separate and place in appropriate field.
✔ **PLACENAME**	
✔ **ZIPCODE**	
✔ **ZIP4**	
✔ **STATE**	
✔ **SCHOOLDIST** – with standardized domains	
✔ **SCHOOLDISTNO** – with standardized domains	
✔ **IMPROVED** – with standardized domains	
✔ **CNTASSDVALUE**	
✔ **LNDVALUE**	
✔ **IMPVALUE**	
✔ **FORESTVALUE**	
✔ **ESTFMKVALUE**	
✔ **NETPRPTA**	
✔ **GRSPRPTA**	
✔ **PROPCLASS** – with standardized domains	
✱ **AUXCLASS** – with standardized domains	• **AUXCLASS**: All domains match statewide schema, except for 'S1.' Populate AUXCLASS field according to statewide schema specifications for future data submissions.
✔ **ASSDACRES**	
✔ **DEEDACRES**	
✔ **GISACRES**	
✔ **CONAME** – with standardized domains	
✔ **PARCELFIPS** – with standardized domains	
✔ **PARCELSRC** – with standardized domains	

PARCEL FEATURE CLASS

✱ **Projection met statewide schema**	• Parcel feature class defined as required statewide schema projection, but upon initial inspection, parcels showed up in Lake Michigan. It is suspected data was pushed into statewide schema template with out re-projecting. • Reproject parcels from native projection to statewide schema projection, prior to field mapping or pushing into the provided statewide schema template.
✔ **County parcel fabric was complete (lacked gaps)**	
✔ **Condo modeling met statewide schema**	

CO. ZONING DATA

✱ **County general** – with attributes	• Push final version of GENERAL zoning into statewide schema template to remove excess fields.
✱ **Farmland preservation** – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
✱ **Shoreland** – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
✱ **Floodplain** – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
✱ **Airport protection** – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)

SUBMISSION FORM

✔ **Submission form provided with initial submission**	

MISCELLANEOUS

• ~865 records without any values for any attributes. Could be Hydro or ROW?
• For records such as these, please fill out the PARCELSRC, PARCELFIPS, and CONAME fields. Also note that if the attribute element's geometry is not a parcel, then the PARCELID field should contain a label of the non-parcel feature (e.g., 'ROW' — see schema specifications)
• We observed instances where UNITTYPE and UNITID fields are populated, but those values do not exist within the SITEADRESS field.
• Remove excess fields that do not exist within the statewide schema for future data submissions to allow for a more seamless merging of multiple county data submissions.
• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA

ATTRIBUTES

✔ **PARCELID**

✔ **TAXPARCELID**

✔ **PARCELDATE**

✔ **TAXROLLYEAR**

✔ **OWNERNME1**

✔ **OWNERNME2**

✱ **PSTLADRESS**
- **PSTLADRESS**: ~14 records with values of '00000'
- Enter <Null> for parcels without a complete mailing address.

✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**

✔ **SITEADRESS**

✱ **ADDNUMPREFIX**
- **ADDNUMPREFIX**: Inconsistencies in the parsed elements provided. A re-parse with the tools created for the Parcel Initiative would help remove extraneous data get data closer to statewide schema standards.

✱ **ADDNUM**
- **ADDNUM**: Inconsistencies in the parsed elements provided. A re-parse with the tools created for the Parcel Initiative would help remove extraneous data get data closer to statewide schema standards.
- ~1928 records with 'BLOCK' after number. Determine if number is true address number, not range number, and remove 'BLOCK' from field.
- ~6602 records containing address number range. Select primary number and remove remaining range values.

✱ **ADDNUMSUFFIX**
- **ADDNUMSUFFIX**: Inconsistencies in the parsed elements provided.

✱ **PREFIX** – with standardized domains
- **PREFIX**: Inconsistencies in the parsed elements provided.

✱ **STREETNAME**
- **STREETNAME**: Inconsistencies in the parsed elements provided.
- Field contains state highway numbers and county highway letters, but the 'CTH,' 'STH,' etc. value is missing from the PREFIX and STREETNAME field entirely. Populate STREETNAME according to statewide schema specifications for future data submissions.

✱ **STREETTYPE** – with standardized domains
- **STREETTYPE**: Inconsistencies in the parsed elements provided.
- Spell out all values, in order to populate STREETTYPE according to statewide schema specifications.

✱ **SUFFIX**
- **SUFFIX**: Inconsistencies in the parsed elements provided.

✱ **LANDMARKNAME**
- **LANDMARKNAME**: Inconsistencies in the parsed elements provided.

✱ **UNITTYPE**
- **UNITTYPE**: Inconsistencies in the parsed elements provided.

✱ **UNITID**
- **UNITID**: Inconsistencies in the parsed elements provided.

✔ **PLACENAME**

✱ **ZIPCODE**
- **ZIPCODE**: ~101608 records with SITEADRESS, but missing ZIPCODE value. Populate if zip code is available in land information system.

✔ **ZIP4**

✔ **STATE**

✔ **SCHOOLDIST** – with standardized domains

✱ **SCHOOLDISTNO** – with standardized domains
- **SCHOOLDISTNO**: Code '182' is missing leading '0.' Leading zero needs to be added for this value to conform to domains of the statewide schema.

✔ **IMPROVED** – with standardized domains
- **IMPROVED**: Has the value of 'YES,' but does not contain 'NO.' Values of '0' in the IMPVALUE field should result in a value of 'NO' in the IMPROVED field, not <Null>

✔ **CNTASSDVALUE**

✔ **LNDVALUE**

✔ **IMPVALUE**

✔ **FORESTVALUE**

✔ **ESTFMKVALUE**

✔ **NETPRPTA**

✔ **GRSPRPTA**

✔ **PROPCLASS** – with standardized domains

✱ **AUXCLASS** – with standardized domains
- **AUXCLASS**: No domain value mapping was provided in submission form, so codes were left as is for statewide V2 database. Populate AUXCLASS field according to statewide schema specifications for future data submissions.

✔ **ASSDACRES**

✔ **DEEDACRES**

✔ **GISACRES**

✔ **CONAME** – with standardized domains

✔ **PARCELFIPS** – with standardized domains

✔ **PARCELSRC** – with standardized domains

PARCEL FEATURE CLASS

✔ **Projection met statewide schema**

✔ **County parcel fabric was complete (lacked gaps)**

✔ **Condo modeling met statewide schema**

CO. ZONING DATA

◆ **County general** – with attributes
- (Not administered by county)

◆ **Farmland preservation** – with attributes
- (Not administered by county)

✔ **Shoreland** – with attributes

✔ **Floodplain** – with attributes

✔ **Airport protection** – with attributes

SUBMISSION FORM

✔ **Submission form provided with initial submission**

MISCELLANEOUS

- Remove excess fields that do not exist within the statewide schema for future data submissions to allow for a more seamless merging of multiple county data submissions.
- Your efforts to standardize your data to the statewide schema are appreciated.
- Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA

ATTRIBUTES

✔ **PARCELID**
✔ **TAXPARCELID**
✔ **PARCELDATE**
✔ **TAXROLLYEAR**
✔ **OWNERNME1**
✔ **OWNERNME2**
✔ **PSTLADRESS**
✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**
✔ **SITEADRESS**
✔   **ADDNUMPREFIX**
✱   **ADDNUM**   • **ADDNUM**: ~1 record with 'L,' that appears to be part of the street name. Move value to the appropriate field.
✔   **ADDNUMSUFFIX**
✔   **PREFIX** – with standardized domains
✔   **STREETNAME**
✔   **STREETTYPE** – with standardized domains
✔   **SUFFIX**
✔   **LANDMARKNAME**
✱   **UNITTYPE**   • **UNITTYPE**: Field contains some non-UNITTYPE information such as (PUBLIC RIGHT OF WAY, PLAT OF SURVEY PARCEL, PARK, OUTLOT, LOT, etc.). Remove extraneous data from this field.
✱   **UNITID**   • **UNITID**: Clean 3 records with a value of '35.' This appears to actually be part of the street name 'OLD STATE ROAD 35.'
✔ **PLACENAME**
✱ **ZIPCODE**   • **ZIPCODE**: ~11 records with SITEADRESS, but missing ZIPCODE value. Populate if zip code is available in land information system.
✔ **ZIP4**
✔ **STATE**
✔ **SCHOOLDIST** – with standardized domains
✱ **SCHOOLDISTNO** – with standardized domains   • **SCHOOLDISTNO**: The values provided in this field are 6 digits long, but should be 4 digits to conform to the domains of the statewide schema. Strip first 2 digits off the front of the code.
✔ **IMPROVED** – with standardized domains
✔ **CNTASSDVALUE**
✔ **LNDVALUE**
✔ **IMPVALUE**
✔ **FORESTVALUE**
✔ **ESTFMKVALUE**
✔ **NETPRPTA**
✔ **GRSPRPTA**
✔ **PROPCLASS** – with standardized domains
✔ **AUXCLASS** – with standardized domains
✔ **ASSDACRES**
✔ **DEEDACRES**
✔ **GISACRES**
✔ **CONAME** – with standardized domains
✔ **PARCELFIPS** – with standardized domains
✔ **PARCELSRC** – with standardized domains

PARCEL FEATURE CLASS

✔ **Projection met statewide schema**
✱ **County parcel fabric was complete (lacked gaps)**   • County parcel fabric contains gaps.
✱ **Condo modeling met statewide schema**   • Condos not modeled. Please model condos according to statewide schema (Appendix A in the V2 Submission Documentation).

CO. ZONING DATA

✔ **County general** – with attributes
◆ **Farmland preservation** – with attributes   • (Not administered by county)
✱ **Shoreland** – with attributes   • Submit zoning data as a GIS layer according to statewide schema (lowest priority)
◆ **Floodplain** – with attributes   • (Not administered by county)
◆ **Airport protection** – with attributes   • (Not administered by county)

SUBMISSION FORM

✔ **Submission form provided with initial submission**

MISCELLANEOUS

• There appears to be ~6 phantom geometries (shape_area = 0 and shape_length = 0). Please address.
• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET **STATEWIDE SCHEMA**

ATTRIBUTES

✔ **PARCELID**
✔ **TAXPARCELID**
✱ **PARCELDATE**   • **PARCELDATE**: Replace '-' in date provided with '/'
✔ **TAXROLLYEAR**
✔ **OWNERNME1**
✔ **OWNERNME2**
✱ **PSTLADRESS**   • **PSTLADRESS**: ~67 records with values of ', ,' or ', , 00000' etc. Enter <Null> for parcels without a complete mailing address.
✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**
✔ **SITEADRESS**
✔   **ADDNUMPREFIX**
✔   **ADDNUM**
✔   **ADDNUMSUFFIX**
✔   **PREFIX** – with standardized domains
✔   **STREETNAME**
✔   **STREETTYPE** – with standardized domains
✔   **SUFFIX**
✔   **LANDMARKNAME**
✔   **UNITTYPE**
✔   **UNITID**
✔ **PLACENAME**

✔ **AUXCLASS** – with standardized domains
✔ **ASSDACRES**
✔ **DEEDACRES**
✔ **GISACRES**
✔ **CONAME** – with standardized domains
✔ **PARCELFIPS** – with standardized domains
✔ **PARCELSRC** – with standardized domains

PARCEL FEATURE CLASS

✔ **Projection met statewide schema**
✱ **County parcel fabric was complete (lacked gaps)**   • County parcel fabric contains gaps.
✔ **Condo modeling met statewide schema**

CO. ZONING DATA

✔ **County general** – with attributes
✱ **Farmland preservation** – with attributes   • Per discussion with County, alterations to LINK field were made and ZONINGCLASS field was converted to <Null>. Note alterations and populate LINK field for future data submissions.
✱ **Shoreland** – with attributes   • Per discussion with County, alterations to LINK field were made and ZONINGCLASS field was converted to <Null>. Note alterations and populate LINK field for future data submissions.
✱ **Floodplain** – with attributes   • Per discussion with County, alterations to LINK field were made and ZONINGCLASS field was converted to <Null>. Note alterations and populate LINK field for future data submissions.
✱ **Airport protection** – with attributes   • Per discussion with County, alterations to LINK field were made and ZONINGCLASS field was converted to <Null>. Note alterations and populate LINK field for future data submissions.

SUBMISSION FORM

✔ **Submission form provided with initial submission**

MISCELLANEOUS

• There appears to be ~1 phantom geometry (shape_area = 0 and shape_length = 0). Please address.
• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET **STATEWIDE SCHEMA**

ATTRIBUTES

✔ **PARCELID**	
✔ **TAXPARCELID**	
✴ **PARCELDATE**	• **PARCELDATE**: Replace '-' in date provided with '/'
✔ **TAXROLLYEAR**	
✔ **OWNERNME1**	
✔ **OWNERNME2**	
✔ **PSTLADRESS**	
✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**	
✔ **SITEADRESS**	
✔ **ADDNUMPREFIX**	
✔ **ADDNUM**	
✔ **ADDNUMSUFFIX**	
✔ **PREFIX** – with standardized domains	
✔ **STREETNAME**	
✔ **STREETTYPE** – with standardized domains	
✴ **SUFFIX**	• **SUFFIX**: ~2 records populated, containing 'NORTH,' not the statewide schema domains. Standardize values in SUFFIX field to statewide schema domains.
✔ **LANDMARKNAME**	
✔ **UNITTYPE**	
✔ **UNITID**	
✔ **PLACENAME**	
✴ **ZIPCODE**	• **ZIPCODE**: This field appears to contain the ZIPCODE associated with the PSTLADRESS, as opposed to the SITEADRESS. Populate with zip code associated with the SITEADRESS if available in land information system, otherwise populate with <Null>
✔ **ZIP4**	
✴ **STATE**	• **STATE**: This field appears to contain the state associated with the PSTLADRESS as opposed to the SITEADRESS. Populate this field for all records according to statewide schema specifications.
✔ **SCHOOLDIST** – with standardized domains	
✴ **SCHOOLDISTNO** – with standardized domains	• **SCHOOLDISTNO**: 2 codes (147 and 658) are missing leading '0.' Leading zero needs to be added for these codes to conform to domains of the statewide schema.
✔ **IMPROVED** – with standardized domains	
✔ **CNTASSDVALUE**	
✔ **LNDVALUE**	
✔ **IMPVALUE**	
✔ **FORESTVALUE**	
✔ **ESTFMKVALUE**	
✔ **NETPRPTA**	
✔ **GRSPRPTA**	
✴ **PROPCLASS** – with standardized domains	• **PROPCLASS**: Field contains duplicate PROPCLASS values, as well as AUXCLASS values. Remove AUXCLASS values and ensure that PROPCLASS values are not duplicated within a single record.
✔ **AUXCLASS** – with standardized domains	
✔ **ASSDACRES**	
✔ **DEEDACRES**	
✔ **GISACRES**	
✔ **CONAME** – with standardized domains	
✔ **PARCELFIPS** – with standardized domains	
✔ **PARCELSRC** – with standardized domains	

PARCEL FEATURE CLASS

✔ **Projection met statewide schema**	
✔ **County parcel fabric was complete (lacked gaps)**	
✔ **Condo modeling met statewide schema**	

CO. ZONING DATA

✔ **County general** – with attributes	
✴ **Farmland preservation** – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
✴ **Shoreland** – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
✴ **Floodplain** – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
◆ **Airport protection** – with attributes	• (Not administered by county)

SUBMISSION FORM

✔ **Submission form provided with initial submission**	

MISCELLANEOUS

• FYI, there appears to be ~194 records with SITEADDRESS only containing PREFIX, STREETNAME, STREETTYPE. Please ensure SITEADDRESS is appropriately populated across all elements.
• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET **STATEWIDE SCHEMA**

ATTRIBUTES

✔ **PARCELID**

✔ **TAXPARCELID**

✔ **PARCELDATE**

✔ **TAXROLLYEAR**

✔ **OWNERNME1**

✔ **OWNERNME2**

✱ **PSTLADRESS** — • **PSTLADRESS**: Field appears to contain information that is not PSTLADRESS (e.g., SINCE 1970 DOC #348566, WIS CENTRAL LTD). Clean excess information out of this field.

✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**

✔ **SITEADRESS**

✔   **ADDNUMPREFIX**

✔   **ADDNUM**

✔   **ADDNUMSUFFIX**

✔   **PREFIX** – with standardized domains

✱   **STREETNAME** — • **STREETNAME**: Field contains some elements that should be standardized and placed in PREFIX field (e.g., CTY HWY (4), US HWY (9)). Move these elements to appropriate field and standardize to statewide schema domains.
• Few building descriptors still attached to STREETNAME field. Identify these records and remove from field.

✱   **STREETTYPE** – with standardized domains — • **STREETTYPE**: Standardize a few street types to statewide schema (e.g., 'CIR' and 'STREETSTREET').

✔   **SUFFIX**

✔   **LANDMARKNAME**

✔   **UNITTYPE**

✔   **UNITID**

✔ **PLACENAME**

✱ **ZIPCODE** — • **ZIPCODE**: This field appears to contain the ZIPCODE associated with the PSTLADRESS, as opposed to the SITEADRESS. Populate with zip code associated with the SITEADRESS if available in land information system, otherwise populate with <Null>

✱ **ZIP4** — • **ZIP4**: This field appears to contain the zip4 associated with the PSTLADRESS, as opposed to the SITEADRESS. Populate with zip4 associated with the SITEADRESS.

✔ **STATE**

✔ **SCHOOLDIST** – with standardized domains

✔ **SCHOOLDISTNO** – with standardized domains

✔ **IMPROVED** – with standardized domains

✔ **CNTASSDVALUE**

✔ **LNDVALUE**

✔ **IMPVALUE**

✔ **FORESTVALUE**

✔ **ESTFMKVALUE**

✔ **NETPRPTA**

✔ **GRSPRPTA**

✱ **PROPCLASS** – with standardized domains — • **PROPCLASS**: Field contains some duplicate values (i.e., '1,1,' '1,4,5,1,4,5,' '4,5m,4,5m,' etc.). Remove duplicate PROPCLASS values if they occur within a single record.

✔ **AUXCLASS** – with standardized domains

✔ **ASSDACRES**

✔ **DEEDACRES**

✔ **GISACRES**

✔ **CONAME** – with standardized domains

✔ **PARCELFIPS** – with standardized domains

✔ **PARCELSRC** – with standardized domains

PARCEL FEATURE CLASS

✔ **Projection met statewide schema**

✔ **County parcel fabric was complete (lacked gaps)**

✔ **Condo modeling met statewide schema**

CO. ZONING DATA

✔ **County general** – with attributes

✱ **Farmland preservation** – with attributes — • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

✱ **Shoreland** – with attributes — • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

♦ **Floodplain** – with attributes — • (Not administered by county)

♦ **Airport protection** – with attributes — • (Not administered by county)

SUBMISSION FORM

✔ **Submission form provided with initial submission**

MISCELLANEOUS

• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA

ATTRIBUTES

✔	**PARCELID**	
✔	**TAXPARCELID**	
✳	**PARCELDATE**	• **PARCELDATE**: Field with all the same date (12/20/2015), we assume this is the data cut date. Populate PARCELDATE with the date (MM/DD/YYYY) that best describes when the parcel geometry was last edited. With future data submissions, if date of last geometric edit is unknown, populate PARCELDATE with <Null>. For future updates to individual parcels, maintaining a modification date for the parcel geometry is advised.
✔	**TAXROLLYEAR**	
✔	**OWNERNME1**	
✔	**OWNERNME2**	
✔	**PSTLADRESS**	
✔	**SITEADRESS – PARSED ADDRESS COMPONENTS?**	
✔	**SITEADRESS**	
✔	**ADDNUMPREFIX**	
✳	**ADDNUM**	• **ADDNUM**: ~264 records w/ '0,' but SITEADD field contains 'NONE.' If address number does not exist, this field should be populated with <Null> for those records. • ~101 records w/ 'N/A' in the SITEADD field, but '0' in this field. If these are not the true address numbers, they should be replaced with <Null> for all applicable records.
✔	**ADDNUMSUFFIX**	
✔	**PREFIX** – with standardized domains	
✳	**STREETNAME**	• **STREETNAME**: Few instances of value being '0' or '00' (numbers). These should be corrected to 'O' or 'OO' (alpha characters).
✳	**STREETTYPE** – with standardized domains	• **STREETTYPE**: Standardize street types to statewide schema requirements (fully spelled out, not abbreviations).
✔	**SUFFIX**	
✔	**LANDMARKNAME**	
✔	**UNITTYPE**	
✳	**UNITID**	• **UNITID**: ~5 records with '1/2.' Based on element location within the SITEADRESS field, these are ADDNUMSUFFIX elements, and should be moved to that attribute field.
✔	**PLACENAME**	
✳	**ZIPCODE**	• **ZIPCODE**: ~49 records with SITEADRESS, but missing ZIPCODE value. Populate if zip code is available in land information system.
✔	**ZIP4**	
✔	**STATE**	
✔	**SCHOOLDIST** – with standardized domains	
✔	**SCHOOLDISTNO** – with standardized domains	
✔	**IMPROVED** – with standardized domains	• **IMPROVED**: Field currently only contains values of 'YES' and <Null>. If a property is known to contains no improvements, the IMPVALUE should be annotated with a value of '0' if possible. • <Null> should only be used if the improvement value is not known or not applicable. This will result in the IMPROVED attribute being populated with a 'NO' as opposed to a <Null>.
✔	**CNTASSDVALUE**	
✔	**LNDVALUE**	
✔	**IMPVALUE**	
✔	**FORESTVALUE**	
✔	**ESTFMKVALUE**	
✔	**NETPRPTA**	
✔	**GRSPRPTA**	
✳	**PROPCLASS** – with standardized domains	• **PROPCLASS**: Remove leading ','s and 'GL' from front of numeric values
✳	**AUXCLASS** – with standardized domains	• **AUXCLASS**: Remove leading ','s
✔	**ASSDACRES**	
✔	**DEEDACRES**	
✔	**GISACRES**	
✔	**CONAME** – with standardized domains	
✔	**PARCELFIPS** – with standardized domains	
✔	**PARCELSRC** – with standardized domains	

PARCEL FEATURE CLASS

✳	**Projection met statewide schema**	• Submission projection was in NAD_1983_2011_Wisconsin_TM. Projection needs to be NAD 1983 HARN Wisconsin TM (Meters) to meet statewide schema requirements.
✔	**County parcel fabric was complete (lacked gaps)**	
✳	**Condo modeling met statewide schema**	• Condos not modeled. Please model condos according to statewide schema (Appendix A in the V2 Submission Documentation).

CO. ZONING DATA

⬥	**County general** – with attributes	• (Not administered by county)
⬥	**Farmland preservation** – with attributes	• (Not administered by county)
✳	**Shoreland** – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)

ACTION REQUIRED TO MEET STATEWIDE SCHEMA

ATTRIBUTES

✔ PARCELID	
✔ TAXPARCELID	
✱ PARCELDATE	• **PARCELDATE**: Field with all the same date (03/21/2016), we assume this is the data cut date. Populate PARCELDATE with the date (MM/DD/YYYY) that best describes when the parcel geometry was last edited. With future data submissions, if date of last geometric edit is unknown, populate PARCELDATE with <Null>. For future updates to individual parcels, maintaining a modification date for the parcel geometry is advised.
✱ TAXROLLYEAR	• **TAXROLLYEAR**: Missing value for 81,181 records (mostly City of Madison). Populate this field when feasible for future data submissions. City of Madison data should be integrated for future data submissions.
✔ OWNERNME1	
✔ OWNERNME2	
✱ PSTLADRESS	• **PSTLADRESS**: ~35 records with just city, state, zip code. Enter <Null> for parcels without a complete mailing address.
✔ SITEADRESS – PARSED ADDRESS COMPONENTS?	
✔ SITEADRESS	
✔ ADDNUMPREFIX	
✱ ADDNUM	• **ADDNUM**: ~52 records with ADDNUMSUFFIX still attached. Remove these values from ADDNUM field and place in appropriate field for future data submissions.
✔ ADDNUMSUFFIX	
✔ PREFIX – with standardized domains	
✔ STREETNAME	
✱ STREETTYPE – with standardized domains	• **STREETTYPE**: Standardize street types to statewide schema requirements (fully spelled out, not abbreviations).
✔ SUFFIX	
✔ LANDMARKNAME	
✔ UNITTYPE	
✔ UNITID	
✔ PLACENAME	
✱ ZIPCODE	• **ZIPCODE**: ~24617 records with SITEADRESS, but missing ZIPCODE value. Populate if zip code is available in land info system.
✔ ZIP4	
✔ STATE	
✱ SCHOOLDIST – with standardized domains	• **SCHOOLDIST**: ~522 records without any value. Populate for future data submission if feasible.
✱ SCHOOLDISTNO – with standardized domains	• **SCHOOLDISTNO**: ~522 records without any value. Populate for future data submission if feasible.
✔ IMPROVED – with standardized domains	
✱ CNTASSDVALUE	• **CNTASSDVALUE**: ~4244 records with value = '0' (and AUXCLASS is <Null>). Not sure if these are new parcels in 2016? • ~4776 records with value = '<Null>' (and AUXCLASS & PROPCLASS is <Null>). Not sure if these are new parcels in 2016? • Upon correspondence between SCO/DOA and Dane County, this is likely the result of "assessed-with" type parcels—where the assessment of many parcels, held by one owner—are grouped together, thus making it not possible to disambiguate the values to particular parcels. Take whatever action is feasible to disambiguate these values for future data submissions.
✱ LNDVALUE	• **LNDVALUE**: ~6016 records with value = '0' (and AUXCLASS is <Null>). ~4776 records with value = '<Null>' (and AUXCLASS & PROPCLASS is <Null>). • See note above in CNTASSDVALUE. Although not straightforward to quantify within the IMPVALUE field, this IMPVALUE is likely subject to the same issue. Take whatever action is feasible to disambiguate these values for future data submissions.
✔ IMPVALUE	
✔ FORESTVALUE	
✱ ESTFMKVALUE	• **ESTFMKVALUE**: ~4300 records with value = 0 or value = <Null> (AUXCLASS is <Null>, PROPCLASS does not = 4 and parcels within the City of Madison excluded). Integrate City of Madison data for future data submissions. • See note above. Take whatever action is feasible to disambiguate these values for future data submissions.
✱ NETPRPTA	• **NETPRPTA**: ~4079 records with value = 0 or value = <Null> (AUXCLASS is <Null>, PROPCLASS does not = 4 and parcels within the City of Madison excluded). Integrate City of Madison data for future data submissions. • See note above. Take whatever action is feasible to disambiguate these values for future data submissions.
✔ GRSPRPTA	
✔ PROPCLASS – with standardized domains	
✱ AUXCLASS – with standardized domains	• **AUXCLASS**: Current submission only contains values of 'W' or 'X.' Populate AUXCLASS field according to statewide schema specifications for future data submissions.
✔ ASSDACRES	
✔ DEEDACRES	
✔ GISACRES	
✔ CONAME – with standardized domains	
✔ PARCELFIPS – with standardized domains	
✔ PARCELSRC – with standardized domains	

PARCEL FEATURE CLASS

✱ **Projection met statewide schema**	• Submission was in NAD 1983 HARN WISCRS Dane County Feet. Re-project from native projection to statewide schema projection (NAD 1983 HARN Wisconsin TM (Meters)) before submitting.
✔ **County parcel fabric was complete (lacked gaps)**	
✔ **Condo modeling met statewide schema**	

CO. ZONING DATA

✔ **County general** – with attributes	
✔ **Farmland preservation** – with attributes	
✱ **Shoreland** – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
◆ **Floodplain** – with attributes	• (Not administered by county)
✱ **Airport protection** – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)

SUBMISSION FORM

✱ **Submission form provided with initial submission**	• Submission form was provided upon follow-up request from DOA

MISCELLANEOUS

• Parcels submitted are stacked by SITEADRESS. Recommend dissolving on PARCELID for future submissions or some other method that will result in one parcel polygon per PARCELID.
• Integrate City of Madison tax roll data for future data submissions.
• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACCTION REQUIRED TO MEET STATEWIDE SCHEMA

ATTRIBUTES

✔ **PARCELID**
✔ **TAXPARCELID**
✱ **PARCELDATE**　　• **PARCELDATE**: Per discussion with County, dates provided was reflective of when parcel was loaded into tax system. Populate PARCELDATE with the date (MM/DD/YYYY) that best describes when the parcel geometry was last edited. With future data submissions, if date of last geometric edit is unknown, populate PARCELDATE with <Null>. For future updates to individual parcels, maintaining a modification date for the parcel geometry is advised.

MISCELLANEOUS

• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET **STATEWIDE SCHEMA**

ATTRIBUTES

✔ **PARCELID**

✔ **TAXPARCELID**

✱ **PARCELDATE**
· **PARCELDATE**: Field with all the same date (01/01/2016), we assume this is the data cut date. Populate PARCELDATE with the date (MM/DD/YYYY) that best describes when the parcel geometry was last edited. With future data submissions, if date of last geometric edit is unknown, populate PARCELDATE with <Null>. For future updates to individual parcels, maintaining a modification date for the parcel geometry is advised.

✔ **TAXROLLYEAR**

✔ **OWNERNME1**

✔ **OWNERNME2**

✔ **PSTLADRESS**

✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**

✔ **SITEADRESS**

✔ **ADDNUMPREFIX**

✔ **ADDNUM**

✔ **ADDNUMSUFFIX**

✱ **PREFIX** – with standardized domains
· **PREFIX**: When directional values are part of a street name (e.g., NORTH, SOUTH, etc.) and spelled out, they should be included in the STREETNAME field. Directional abbreviations (i.e., N, S, E, W) part of the SITEADRESS should be included in the PREFIX field. Move elements to the appropriate fields (NORTH = 417 Records, SOUTH = 514 Records, EAST = 212 Records, WEST = 260 Records).

✔ **STREETNAME**

✔ **STREETTYPE** – with standardized domains

✱ **SUFFIX**
· **SUFFIX**: Values of NORTH, WEST, EAST should be standardized to statewide schema domains (N, W, E).

✔ **LANDMARKNAME**

✔ **UNITTYPE**

✔ **UNITID**

✱ **PLACENAME**
· **PLACENAME**: To maintain data format consistency across statewide parcel attributes, placenames should be altered from 'EGG HARBOR TOWN' to 'TOWN OF EGG HARBOR' for example.

✔ **ZIPCODE**

✔ **ZIP4**

✔ **STATE**

✔ **SCHOOLDIST** – with standardized domains

✔ **SCHOOLDISTNO** – with standardized domains

✔ **IMPROVED** – with standardized domains

✔ **CNTASSDVALUE**

✔ **LNDVALUE**

✔ **IMPVALUE**

✔ **FORESTVALUE**

✱ **ESTFMKVALUE**
· **ESTFMKVALUE**: Per discussion with County, values of 'USE VALUE ASSESSED' are replaced with '0' since this field is cast into a numeric field in final dataset. For future data submissions, please populate these records with '0.'

✔ **NETPRPTA**

✔ **GRSPRPTA**

✔ **PROPCLASS** – with standardized domains

✔ **AUXCLASS** – with standardized domains

✔ **ASSDACRES**

✔ **DEEDACRES**

✔ **GISACRES**

PARCEL FEATURE CLASS

✔ **Projection met statewide schema**

✔ **County parcel fabric was complete (lacked gaps)**

✔ **Condo modeling met statewide schema**

CO. ZONING DATA

✱ **County general** – with attributes
· Map data to statewide zoning schema template, to remove excess fields and allow for seamless integration at statewide level.
· Also note the presence of ~10 records not containing any attribute information. Remove these records for future data submissions.

✱ **Farmland preservation** – with attributes
· Map data to statewide zoning schema template, to remove excess fields and allow for seamless integration at statewide level.

✱ **Shoreland** – with attributes
· Map data to statewide zoning schema template, to remove excess fields and allow for seamless integration at statewide level.

✱ **Floodplain** – with attributes
· Map data to statewide zoning schema template, to remove excess fields and allow for seamless integration at statewide level.

✱ **Airport protection** – with attributes
· Map data to statewide zoning schema template, to remove excess fields and allow for seamless integration at statewide level.

SUBMISSION FORM

✱ **Submission form provided with initial submission**
· Submission form was provided upon follow-up request from DOA

MISCELLANEOUS

· ~1341 records (mainly GAP, ROW, OVERLAP, COMMON, etc.) without CONAME and PARCELSRC. These two fields (CONAME and PARCELSRC) along with PARCELFIPS should always be populated for every record in the county. This will assist in asynchronous updates in the future.
· Your efforts to standardize your data to the statewide schema are appreciated.
· Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA

ATTRIBUTES

✔ **PARCELID**

✔ **TAXPARCELID**

✱ **PARCELDATE** — • **PARCELDATE**: Field contains a value of '1/1/1900' for ~43662 records. Populate these records with a value of <Null> for future data submissions. With future data submissions, if date of last geometric edit is unknown, populate PARCELDATE with <Null>. For future updates to individual parcels, maintaining a modification date for the parcel geometry is advised.

✔ **TAXROLLYEAR**

✔ **OWNERNME1**

✔ **OWNERNME2**

✔ **PSTLADRESS**

✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**

✱ **SITEADRESS**
- **SITEADRESS**: In addition to the SITEADRESS this field also contains city, state, and zip. This field should only contain the street portion of the SITEADRESS. Remove excess information for future data submissions.
- In instances where SITEADRESS does not exist or is not known. Remove 'UNKNOWN ADDRESS' or 'VACANT' from this field and replace with <Null>

✔ **ADDNUMPREFIX**

✱ **ADDNUM** — • **ADDNUM**: ~192 records with '-' existing within this field (probably indicating multiple address numbers or an address range). Remove address range/multiple address numbers from this field and ensure it is populated with only a single address number.

✱ **ADDNUMSUFFIX** — • **ADDNUMSUFFIX**: Everything contained in this field appears to be 'PREFIX' directional. Populate these values in the appropriate field (PREFIX).

✱ **PREFIX** – with standardized domains — • **PREFIX**: Populate this field with directionals (i.e., values that currently appear to exist in the ADDNUMSUFFIX field), as well as highway prefixes (i.e., CTH, STH, USH, etc.) that currently appear to exist in the STREETNAME field. Ensure that these values conform to the acceptable statewide schema domains.

✱ **STREETNAME**
- **STREETNAME**: Remove 'NONE' and 'VACANT' from this field.
- Ensure that all iterations of COUNTY ROAD, STATE HIGHWAY, etc. are standardized to statewide schema domains, and moved into the PREFIX field.
- ~21+ records with STREETTYPE still attached to this field. Move street types to appropriate field and spell them out to conform to statewide schema domains.

✱ **STREETTYPE** – with standardized domains — • **STREETTYPE**: Standardize street types to statewide schema requirements (fully spelled out, not abbreviations).

✔ **SUFFIX**

✔ **LANDMARKNAME**

✔ **UNITTYPE**

✔ **UNITID**

✔ **PLACENAME**

✱ **ZIPCODE** — • **ZIPCODE**: ~2 records with SITEADRESS, but missing ZIPCODE value. Populate if zip code is available in land information system.

✔ **ZIP4**

✔ **STATE**

✔ **SCHOOLDIST** – with standardized domains

✔ **SCHOOLDISTNO** – with standardized domains

✔ **IMPROVED** – with standardized domains

✔ **CNTASSDVALUE**

✔ **LNDVALUE**

✔ **IMPVALUE**

✔ **IMPVALUE**
✔ **FORESTVALUE**
✱ **ESTFMKVALUE**   • **ESTFMKVALUE**: Field contains excess decimal places. Round these values to 2 decimal places for future data submissions.

✔ **NETPRPTA**
✔ **GRSPRPTA**
✔ **PROPCLASS** – with standardized domains
✔ **AUXCLASS** – with standardized domains
✔ **ASSDACRES**
✔ **DEEDACRES**
✔ **GISACRES**
✔ **CONAME** – with standardized domains
✔ **PARCELFIPS** – with standardized domains
✔ **PARCELSRC** – with standardized domains

PARCEL FEATURE CLASS

✱ **Projection met statewide schema**   • Parcel feature class defined as required statewide schema projection, but upon initial inspection, parcels showed up in Iowa. It is suspected data was pushed into statewide schema template with out re-projecting.
     • Reproject parcels from native projection to statewide schema projection, prior to field mapping or pushing into the provided statewide schema template.

✔ **County parcel fabric was complete (lacked gaps)**
✔ **Condo modeling met statewide schema**

CO. ZONING DATA

✔ **County general** – with attributes
✱ **Farmland preservation** – with attributes   • Submit zoning data as a GIS layer according to statewide schema (lowest priority)
✱ **Shoreland** – with attributes   • Submit zoning data as a GIS layer according to statewide schema (lowest priority)
✱ **Floodplain** – with attributes   • Submit zoning data as a GIS layer according to statewide schema (lowest priority)
◆ **Airport protection** – with attributes   • (Not administered by county)

SUBMISSION FORM

✔ **Submission form provided with initial submission**

MISCELLANEOUS

• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA

ATTRIBUTES

✔ **PARCELID**

✔ **TAXPARCELID**

✔ **PARCELDATE**

✔ **TAXROLLYEAR**

✔ **OWNERNME1**

✔ **OWNERNME2**

✔ **PSTLADRESS**

✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**

✱ **SITEADRESS** — • **SITEADRESS**: In addition to the SITEADRESS this field also contains city, state, and zip. This field should only contain the street portion of the SITEADRESS. Remove excess information for future data submissions.

  ✔ **ADDNUMPREFIX**

  ✔ **ADDNUM**

  ✔ **ADDNUMSUFFIX**

✱ **PREFIX** – with standardized domains — • **PREFIX**: Standardize domains to statewide schema domains.

  ✔ **STREETNAME**

✔ **STREETTYPE** – with standardized domains — • **STREETTYPE**: Standardize street types to statewide schema requirements (fully spelled out, not abbreviations).

✱ **SUFFIX** — • **SUFFIX**: ~2 records contains UNITIDs. Move these values to appropriate field.

  ✔ **LANDMARKNAME**

  ✔ **UNITTYPE**

  ✔ **UNITID**

✱ **PLACENAME** — • **PLACENAME**: All PLACENAME field was <Null>. Populate for future parcel submissions.

✱ **ZIPCODE** — • **ZIPCODE**: ~2 records with SITEADRESS, but missing ZIPCODE value. Populate if zip code is available in land information system.

✔ **ZIP4**

✔ **STATE**

✔ **SCHOOLDIST** – with standardized domains

✱ **SCHOOLDISTNO** – with standardized domains — • **SCHOOLDISTNO**: This field should only be 4 digits long to conform to domains of the statewide schema. Strip off trailing '0's to meet statewide schema domains.

✔ **IMPROVED** – with standardized domains

✔ **CNTASSDVALUE**

✔ **LNDVALUE**

✔ **IMPVALUE**

✔ **FORESTVALUE**

✔ **ESTFMKVALUE**

✔ **NETPRPTA**

✔ **GRSPRPTA**

✱ **PROPCLASS** – with standardized domains — • **PROPCLASS**: Replace value of 'M' with '5M'

✔ **AUXCLASS** – with standardized domains

✔ **ASSDACRES**

✔ **DEEDACRES**

✔ **GISACRES**

✱ **CONAME** – with standardized domains — • **CONAME**: ~13552 records without a value. This field along with PARCELSRC and PARCELFIPS, should always be populated for every polygon in a data submission. Populate entire CONAME field with 'EAU CLAIRE'

✔ **PARCELFIPS** – with standardized domains

✔ **PARCELSRC** – with standardized domains

PARCEL FEATURE CLASS

✔ **Projection met statewide schema**

✱ **County parcel fabric was complete (lacked gaps)** — • Integrate City of Eau Claire data into county dataset prior to submitting data for future data submissions.

✱ **Condo modeling met statewide schema** — • Stack condos according to statewide schema

CO. ZONING DATA

✔ **County general** – with attributes

✔ **Farmland preservation** – with attributes

✱ **Shoreland** – with attributes — • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

✱ **Floodplain** – with attributes — • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

✱ **Airport protection** – with attributes — • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

SUBMISSION FORM

✱ **Submission form provided with initial submission** — • Submission form was provided upon follow-up request from DOA

MISCELLANEOUS

• Your efforts to standardize your data to the statewide schema are appreciated.

• Thank you for sharing your data to help make the V2 Project a success!

SUBMISSION FORM

✔ **Submission form provided with initial submission**

MISCELLANEOUS

• Join success (PARCELS to ATTR table): (11742/11742 = 100%)
• Ensure that submitted layers schema matched statewide schema (e.g., field names match specs exactly, field length and field types match).
• We encourage pushing your data into a blank copy of parcel and zoning feature classes, in order to ensure schema specs are met. This allows us to seamlessly merge county data across the state.
• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA

ATTRIBUTES

✔ **PARCELID**

✔ **TAXPARCELID**

✔ **PARCELDATE**

✔ **TAXROLLYEAR**

✔ **OWNERNME1**

✔ **OWNERNME2**

✱ **PSTLADRESS** — • **PSTLADRESS**: ~104 records with just city, state, zip code. Enter <Null> for parcels without a complete mailing address.

✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**

✱ **SITEADRESS** — • **SITEADRESS**: ~18 records with value = 'NONE NONE.' For these records, ADDNUM = '0' and STREETNAME = 'NONE.' Populate field with <Null> for these records and do the same for ADDNUM and STREETNAME.

✔   **ADDNUMPREFIX**

✱   **ADDNUM** — • **ADDNUM**: ~3 records containing '&' and ADDNUMSUFFIX containing second address number. Remove '&' from this field, as well as removing second address number from ADDNUMSUFFIX field.

✔   **ADDNUMSUFFIX**

✱   **PREFIX** – with standardized domains — • **PREFIX**: ~1 records with '#1' in this field. Move to appropriate field prior to submission (probably UNITID).

✱   **STREETNAME** — • **STREETNAME**: ~108 records with street type still attached to streetname. Remove street types from this field where they exist, place in STREETTYPE field and spell out to meet statewide schema domains.

✱   **STREETTYPE** – with standardized domains — • **STREETTYPE**: Some street types still in abbreviated format. Spell out all street types to meet statewide schema domains.

✔   **SUFFIX**

✔   **LANDMARKNAME**

✱   **UNITTYPE** — • **UNITTYPE**: ~2 records with 'RD' in this field. Move 'RD' to appropriate field.

✱   **UNITID** — • **UNITID**: ~2 records containing both unit type and unit ID in this field. Move unit type elements to appropriate field.

✔ **PLACENAME**

✱ **ZIPCODE** — • **ZIPCODE**: ~5755 records with SITEADRESS, but missing ZIPCODE value. Populate if zip code is available in land information system.

✔ **ZIP4**

✔ **STATE**

✔ **SCHOOLDIST** – with standardized domains

✔ **SCHOOLDISTNO** – with standardized domains

✔ **IMPROVED** – with standardized domains — • **IMPROVED**: Field exists, but is all 'NULL'
• Populate IMPROVED field for future data submissions.

✔ **CNTASSDVALUE**

✔ **LNDVALUE**

✔ **IMPVALUE**

✔ **FORESTVALUE**

✔ **ESTFMKVALUE**

✔ **NETPRPTA**

✔ **GRSPRPTA**

✔ **PROPCLASS** – with standardized domains

✔ **AUXCLASS** – with standardized domains

✔ **ASSDACRES**

✔ **DEEDACRES**

✔ **GISACRES**

✔ **CONAME** – with standardized domains

✔ **PARCELFIPS** – with standardized domains

✔ **PARCELSRC** – with standardized domains

PARCEL FEATURE CLASS

✱ **Projection met statewide schema** — • Submission was in NAD 1983 Wisconsin TM (Meters). Needs to be in the projection of the statewide schema (NAD 1983 HARN Wisconsin TM (Meters)).

✔ **County parcel fabric was complete (lacked gaps)**

✱ **Condo modeling met statewide schema** — • Condos not modeled. Please model condos according to statewide schema (Appendix A in the V2 Submission Documentation).

CO. ZONING DATA

✱ **County general** – with attributes — • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

✔ **Farmland preservation** – with attributes

✱ **Shoreland** – with attributes — • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

✱ **Floodplain** – with attributes — • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

✱ **Airport protection** – with attributes — • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

SUBMISSION FORM

✱ **Submission form provided with initial submission** — • Submission form was provided upon follow-up request from DOA

MISCELLANEOUS

• ~211 records without PARCELID values. Populate CONAME, PARCELFIPS, PARCELSRC for these records. Every submitted record in a dataset should, at a minimum, have these three fields populated. Also note that if the attribute element's geometry is not a parcel, then the PARCELID field should contain a label of the non-parcel feature (e.g., 'ROW' — see schema specifications)

• Your efforts to standardize your data to the statewide schema are appreciated.

• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA

ATTRIBUTES

✔ PARCELID	
✔ TAXPARCELID	
✱ PARCELDATE	• **PARCELDATE**: Field with all the same date '03/22/2016,' we assume this is the data cut date. Populate PARCELDATE with the date (MM/DD/YYYY) that best describes when the parcel geometry was last edited. With future data submissions, if date of last geometric edit is unknown, populate PARCELDATE with <Null>. For future updates to individual parcels, maintaining a modification date for the parcel geometry is advised.
✱ TAXROLLYEAR	• **TAXROLLYEAR**: ~338 records with value = <Null>, but have parcel ID. If these are newly-created parcels, please annotate as the appropriate year ('2016') in this field.
✔ OWNERNME1	
✔ OWNERNME2	
✔ PSTLADRESS	
✔ SITEADRESS – PARSED ADDRESS COMPONENTS?	
✔ SITEADRESS

✱ **SITEADRESS** — • **SITEADRESS**: See Appendix for potential issues across multiple address element fields.

✔ **ADDNUMPREFIX**

✱ **ADDNUM** — • **ADDNUM**: Field still contains a directional value of some sort (address number suffix or prefix). Ensure that this field only contains numeric values.
• ~65 records contain what appears to be address number range. Remove second address numbers and '-' from this field.

✱ **ADDNUMSUFFIX** — • **ADDNUMSUFFIX**: Values present in this field appear to be prefix directionals and the extensive presence in this field leads us to believe this value has been misplaced (possibly a result of placement within the SITEADRESS field).

✱ **PREFIX** – with standardized domains — • **PREFIX**: Values present meet statewide schema domains. See note in Miscellaneous field for potential issues across multiple address element fields.

✱ **STREETNAME** — • **STREETNAME**: Instances of address number suffix, secondary portion of address range, street type and suffix directional present in this field. Identify and move these elements to the appropriate field and standardize domains when required by statewide schema.

✱ **STREETTYPE** – with standardized domains — • **STREETTYPE**: Standardize street types to statewide schema requirements (fully spelled out, not abbreviations).

✱ **SUFFIX** — • **SUFFIX**: Some values present within the STREETNAME field. Move appropriate values to this field and standardize to statewide schema domains

✔ **LANDMARKNAME**

✔ **UNITTYPE**

✱ **UNITID** — • **UNITID**: ~6 records with unit type still attached. Move unit type elements to the appropriate field.

✔ **PLACENAME**

✱ **ZIPCODE** — • **ZIPCODE**: ~4199 records with SITEADRESS, but missing ZIPCODE value. Populate if zip code is available in land information system.

✔ **ZIP4**

✔ **STATE**

✔ **SCHOOLDIST** – with standardized domains

✔ **SCHOOLDISTNO** – with standardized domains

✔ **IMPROVED** – with standardized domains

✔ **CNTASSDVALUE**

✔ **LNDVALUE**

✔ **IMPVALUE**

✔ **FORESTVALUE**

✔ **ESTFMKVALUE**

✔ **NETPRPTA**

✔ **GRSPRPTA**

✔ **PROPCLASS** – with standardized domains

✱ **AUXCLASS** – with standardized domains — • **AUXCLASS**: No domain value mapping provided in submission form. Please provide mappings/definitions of AUXCLASS values in future submissions. Populate AUXCLASS field according to statewide schema specifications for future data submissions.

✔ **ASSDACRES**

✔ **DEEDACRES**

✔ **GISACRES**

✔ **CONAME** – with standardized domains

✔ **PARCELFIPS** – with standardized domains

✔ **PARCELSRC** – with standardized domains

PARCEL FEATURE CLASS

✱ **Projection met statewide schema** — • Submission was in Custom Transverse_Mercator. Re-project from native projection to statewide schema projection (NAD 1983 HARN Wisconsin TM (Meters)) before submitting.

✔ **County parcel fabric was complete (lacked gaps)**

✔ **Condo modeling met statewide schema**

CO. ZONING DATA

✱ **County general** – with attributes — • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

✱ **Farmland preservation** – with attributes — • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

✱ **Shoreland** – with attributes — • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

✱ **Floodplain** – with attributes — • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

✱ **Airport protection** – with attributes — • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

SUBMISSION FORM

✔ **Submission form provided with initial submission**

MISCELLANEOUS

• Based on address elements provided and element positioning in site address field, we are concerned about error that could potentially exist across address element fields. Please see Appendix for further explanation.
• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET **STATEWIDE SCHEMA** 🔗

ATTRIBUTES

✔ **PARCELID**

✔ **TAXPARCELID**

✱ **PARCELDATE**
- **PARCELDATE**: Field with all the same date (04/26/2016), we assume this is the data cut date. Populate PARCELDATE with the date (MM/DD/YYYY) that best describes when the parcel geometry was last edited. With future data submissions, if date of last geometric edit is unknown, populate PARCELDATE with <Null>. For future updates to individual parcels, maintaining a modification date for the parcel geometry is advised.

✔ **TAXROLLYEAR**

✔ **OWNERNME1**

✔ **OWNERNME2**

✱ **PSTLADRESS**
- **PSTLADRESS**: ~1436 records without a value. Some appear to be state, federal, or locally-owned land, but also appear to be private land owners in some cases. Populate the missing values in this field where possible for future data submissions.

✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**

✔ **SITEADRESS**

✔   **ADDNUMPREFIX**

✔   **ADDNUM**

✔   **ADDNUMSUFFIX**

✔   **PREFIX** – with standardized domains

✔   **STREETNAME**

✔   **STREETTYPE** – with standardized domains

✔   **SUFFIX**

✔   **LANDMARKNAME**

✔   **UNITTYPE**

✱   **UNITID**
- **UNITID**: 'I' from 'OLD COUNTY ROAD I' ended up in this field. Move this value to STREETNAME field for appropriate records.

✱ **PLACENAME**
- **PLACENAME**: Some values got truncated in this field (i.e., CITY OF BLACK RIV*, TOWN OF GARDEN VA*, etc.). Ensure for future submission that values are complete and not truncated.

✱ **ZIPCODE**
- **ZIPCODE**: ~10048 records with SITEADRESS, but missing ZIPCODE value. Populate if zip code is available in land information system.

✔ **ZIP4**

✔ **STATE**

✔ **SCHOOLDIST** – with standardized domains

✔ **SCHOOLDISTNO** – with standardized domains

✔ **IMPROVED** – with standardized domains

✱ **CNTASSDVALUE**
- **CNTASSDVALUE**: Values of '0' exist for ~1698 records (both AUXCLASS and PROPCLASS are <Null> for these records). Please populate CNTASSDVALUE for these records where feasible.

✔ **LNDVALUE**

✔ **IMPVALUE**

✔ **FORESTVALUE**

✔ **ESTFMKVALUE**

✱ **NETPRPTA**
- **NETPRPTA**: Per discussion with County, we established where decimal point should be placed. Ensure decimal is in place prior to submitting data in the future.

✱ **GRSPRPTA**
- **GRSPRPTA**: Per discussion with County, we established where decimal point should be placed. Ensure decimal is in place prior to submitting data in the future.

✱ **PROPCLASS** – with standardized domains
- **PROPCLASS**: 'G' present in front of all values. Strip out 'G' for future data submissions, so values are only numeric and separated by commas.

✔ **AUXCLASS** – with standardized domains

✔ **ASSDACRES**

✔ **DEEDACRES**

✔ **GISACRES**

✔ **CONAME** – with standardized domains

✔ **PARCELFIPS** – with standardized domains

✔ **PARCELSRC** – with standardized domains

PARCEL FEATURE CLASS

✔ **Projection met statewide schema**

✔ **County parcel fabric was complete (lacked gaps)**

✱ **Condo modeling met statewide schema**
- Condos not modeled. Please model condos according to statewide schema (Appendix A in the V2 Submission Documentation).

CO. ZONING DATA

✱ **County general** – with attributes
- General Zoning should be submitted as a stand alone layer, even if geometries are coincident with parcel layer to allow for seamless integration at statewide level

✱ **Farmland preservation** – with attributes
- Farmland Zoning should be submitted as a stand alone layer, even if geometries are coincident with parcel layer to allow for seamless integration at statewide level

✱ **Shoreland** – with attributes
- Remove excess fields not within statewide zoning schema to allow for seamless integration at statewide level
- Set DESCRIPTION field = Concatenate 'BODYOFWATER' field + 'SETBACK' field + " ft"

✱ **Floodplain** – with attributes
- Remove excess fields not within the statewide zoning schema to allow for seamless integration at statewide level
- Set DESCRIPTION field = Concatenate "ZONE -" + 'ZONE' field + "RECURRENCE INTERVAL: " + 'RECURRENCEINTERVAL' field

✱ **Airport protection** – with attributes
- Remove excess fields not within the statewide zoning schema to allow for seamless integration at statewide level
- Set DESCRIPTION field = "Height Limitation: " + 'HEIGHTLIMITATION' field + " FT"

SUBMISSION FORM

✱ **Submission form provided with initial submission**
- Submission form was provided upon follow-up request from DOA

MISCELLANEOUS

- Your efforts to standardize your data to the statewide schema are appreciated.
- Thank you for sharing your data to help make the V2 Project a success!

✔ **County parcel fabric was complete (lacked gaps)**	
✔ **Condo modeling met statewide schema**	

CO. ZONING DATA

✱ **County general** – with attributes	• Projection should be NAD 1983 HARN Wisconsin TM (Meters), not NAD 1983 Wisconsin TM (Meters).
✱ **Farmland preservation** – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
✱ **Shoreland** – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
✱ **Floodplain** – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
✱ **Airport protection** – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)

SUBMISSION FORM

✔ **Submission form provided with initial submission**	

MISCELLANEOUS

• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA

ATTRIBUTES

✔ PARCELID	
✔ TAXPARCELID	
✱ PARCELDATE	• **PARCELDATE**: No field exists in submission. Include dates within PARCELDATE field wherever possible. With future data submissions, if date of last geometric edit is unknown, populate PARCELDATE with <Null>. For future updates to individual parcels, maintaining a modification date for the parcel geometry is advised.
✔ TAXROLLYEAR	
✔ OWNERNME1	
✔ OWNERNME2	
✱ PSTLADRESS	• **PSTLADRESS**: ~33 records with just city, state, zip or just state. Enter <Null> for parcels without a complete mailing address.
✔ SITEADRESS – PARSED ADDRESS COMPONENTS?	
✔ SITEADRESS	
✔ ADDNUMPREFIX	
✔ ADDNUM	
✔ ADDNUMSUFFIX	
✱ PREFIX – with standardized domains	• **PREFIX**: Standardize domains to statewide schema domains.
✔ STREETNAME	
✔ STREETTYPE – with standardized domains	
✱ SUFFIX	• **SUFFIX**: Values should be standardized to statewide schema domains
✔ LANDMARKNAME	
✔ UNITTYPE	
✱ UNITID	• **UNITID**: ~3 records with value = 'N,' but based on SITEADRESS these appear to be PREFIX values. Move these values to appropriate field for future data submissions.
✱ PLACENAME	• **PLACENAME**: Indicated field does not exist in the submission form, but the field to use is the MUNINAME field. Map MUNINAME field values to PLACENAME field for future data submissions.
✱ ZIPCODE	• **ZIPCODE**: ~1 records with SITEADRESS, but missing ZIPCODE value. Populate if zip code is available in land information system.
✔ ZIP4	
✔ STATE	
✱ SCHOOLDIST – with standardized domains	• **SCHOOLDIST**: Field does not exist in submission. Field can be populated using processed SCHOOLDISTNO field (strip first 2 digits) and domains of the statewide schema. Populate this field for future data submissions.
✱ SCHOOLDISTNO – with standardized domains	• **SCHOOLDISTNO**: The values provided in this field are 6 digits long, but should be 4 digits to conform to the domains of the statewide schema. Strip first 2 digits off the front of the code.
✔ IMPROVED – with standardized domains	• **IMPROVED**: Field does not exist in data submission. Populate IMPROVED field for future data submissions.
✔ CNTASSDVALUE	
✔ LNDVALUE	
✔ IMPVALUE	
✔ FORESTVALUE	
✔ ESTFMKVALUE	
✱ NETPRPTA	• **NETPRPTA**: See Appendix for explanation
✱ GRSPRPTA	• **GRSPRPTA**: See Appendix for explanation
✔ PROPCLASS – with standardized domains	
✔ AUXCLASS – with standardized domains	
✔ ASSDACRES	
✔ DEEDACRES	
✔ GISACRES	
✔ CONAME – with standardized domains	
✱ PARCELFIPS – with standardized domains	• **PARCELFIPS**: Mapped field provided/exists, but the values provided are more granular jurisdiction FIPS codes. This field should contain the FIPS code of the county, in which the parcel resides. Populate this field for future data submissions.
✱ PARCELSRC – with standardized domains	• **PARCELSRC**: Mapped field provided/exists, but the values provided are more granular jurisdiction names. This field should contain the name of the county, in which the parcel resides. Populate this field for future data submissions.

PARCEL FEATURE CLASS

✱ Projection met statewide schema	• Submission was in NAD_1983_HARN_WISCRS_Juneau_County_Feet. Re-project from native projection to statewide schema projection (NAD 1983 HARN Wisconsin TM (Meters)) before submitting.
✔ County parcel fabric was complete (lacked gaps)	
✔ Condo modeling met statewide schema	

CO. ZONING DATA

✱ County general – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
✱ Farmland preservation – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
✱ Shoreland – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
✱ Floodplain – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
✱ Airport protection – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)

SUBMISSION FORM

✔ Submission form provided with initial submission	

MISCELLANEOUS

• Push final processed dataset to statewide schema template schema to remove excess fields and allow for seamless aggregation at the statewide level.
• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA

ATTRIBUTES

✔	**PARCELID**	
✔	**TAXPARCELID**	
✱	**PARCELDATE**	• **PARCELDATE**: Field with all the same date (03/15/2016), we assume this is the data cut date. Populate PARCELDATE with the date (MM/DD/YYYY) that best describes when the parcel geometry was last edited. With future data submissions, if date of last geometric edit is unknown, populate PARCELDATE with <Null>. For future updates to individual parcels, maintaining a modification date for the parcel geometry is advised.
✔	**TAXROLLYEAR**	
✔	**OWNERNME1**	
✔	**OWNERNME2**	
✔	**PSTLADRESS**	
✔	**SITEADRESS – PARSED ADDRESS COMPONENTS?**	
✱	**SITEADRESS**	• **SITEADRESS**: Field does not exist in submission. We created it from address elements provided after standardization was complete. Provide SITEADRESS field with future data submissions.
✔	**ADDNUMPREFIX**	
✔	**ADDNUM**	
✔	**ADDNUMSUFFIX**	
✔	**PREFIX** – with standardized domains	
✱	**STREETNAME**	• **STREETNAME**: Field contains some elements that should be standardized and placed in PREFIX field (i.e., 'HWY'). Move these elements to appropriate field and standardize to statewide schema domains. • For ~118 records, it appears that the associated HWY letter/number got placed in the STREETTYPE field. Move these elements to the appropriate field.
✱	**STREETTYPE** – with standardized domains	• **STREETTYPE**: Standardize street types to statewide schema requirements (fully spelled out, not abbreviations). • Field also contains SUFFIX values, UNITIDs, and additional descriptor information. Move these elements to their appropriate fields and standardize when necessary.
✔	**SUFFIX**	
✔	**LANDMARKNAME**	
✱	**UNITTYPE**	• **UNITTYPE**: Some of these elements exist within other address sub-element fields. Ensure that the appropriate values are populated in this field.
✱	**UNITID**	• **UNITID**: Some of these elements exist within other address sub-element fields. Ensure that the appropriate values are populated in this field.
✔	**PLACENAME**	
✱	**ZIPCODE**	• **ZIPCODE**: All records with value = '00000.' Please populate if available in land information system, otherwise replace '00000' with <Null>
✔	**ZIP4**	
✔	**STATE**	
✔	**SCHOOLDIST** – with standardized domains	
✔	**SCHOOLDISTNO** – with standardized domains

✔	**LNDVALUE**	
✔	**IMPVALUE**	
✔	**FORESTVALUE**	
✔	**ESTFMKVALUE**	
✔	**NETPRPTA**	
✔	**GRSPRPTA**	
✔	**PROPCLASS** – with standardized domains	
✔	**AUXCLASS** – with standardized domains	
✱	**ASSDACRES**	• **ASSDACRES**: Currently contains a value of 'None.' Replace with '0' or <Null> for future data submissions.
✱	**DEEDACRES**	• **DEEDACRES**: Currently contains a value of 'None.' Replace with '0' or <Null> for future data submissions.
✔	**GISACRES**	
✔	**CONAME** – with standardized domains	
✔	**PARCELFIPS** – with standardized domains	
✔	**PARCELSRC** – with standardized domains	

PARCEL FEATURE CLASS

✔	**Projection met statewide schema**
✔	**County parcel fabric was complete (lacked gaps)**
✔	**Condo modeling met statewide schema**

CO. ZONING DATA

✔	**County general** – with attributes	
✔	**Farmland preservation** – with attributes	• Farmland preservation zoning is currently a zoning code within GENERAL zoning class. For future data submissions, please make an explicit note if zoning types are submitted in the same feature class.
✔	**Shoreland** – with attributes	
✔	**Floodplain** – with attributes	
◆	**Airport protection** – with attributes	• (Not administered by county)

SUBMISSION FORM

✔	**Submission form provided with initial submission**

MISCELLANEOUS

• Join success (PARCELS to XML table): (67590/67604 = 99.97%)
• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET **STATEWIDE SCHEMA** ⚲

ATTRIBUTES

✔ **PARCELID**

✔ **TAXPARCELID**

✔ **PARCELDATE**

✔ **TAXROLLYEAR**

✔ **OWNERNME1**

✔ **OWNERNME2**

✔ **PSTLADRESS**

✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**

✔ **SITEADRESS**

✱ **ADDNUMPREFIX** — • **ADDNUMPREFIX**: ~5283 records with ADDNUMPREFIX value present in SITEADRESS field, but not populated in the appropriate sub-address element field. Ensure that this field is populated appropriately for future data submissions.

✱ **ADDNUM** — • **ADDNUM**: ~97 records containing an address range in this field. Select the primary address number and remove all secondary address numbers from this field for future data submissions.

✱ **ADDNUMSUFFIX** — • **ADDNUMSUFFIX**: ~3 records with values in this field that are part of multiple address numbers. Remove these secondary address number values from this field for future data submissions.

✱ **PREFIX** – with standardized domains — • **PREFIX**: ~10 records with value = 'E N.' For records such as these, the 'N' should be spelled out and part of the STREETNAME (i.e., NORTH WATER) and the 'E' should remain in the PREFIX field.
• ~32 records with value = A, B, C, D, etc. These do not match the statewide schema domains for the PREFIX field. They should be moved to either the ADDNUMSUFFIX field or the UNITID field as appropriate.

✱ **STREETNAME** — • **STREETNAME**: Records where value = 'W,' 'E,' 'S,' and PREFIX is not populated (i.e., not a CTH), the values in this field should be spelled out (i. e. 'WEST,' 'EAST,' 'SOUTH') since they are the actual street names.

✱ **STREETTYPE** – with standardized domains — • **STREETTYPE**: Spelled out two values to meet statewide schema required domains ('TR' and 'LA').

✔ **SUFFIX**

✔ **LANDMARKNAME**

✱ **UNITTYPE** — • **UNITTYPE**: Majority of values in this field are some type of property/structure descriptor. Remove this excess information for future data submissions.

✱ **UNITID** — • **UNITID**: This field requires a variety of cleanup tasks including removing property/structure descriptors, moving UNITTYPE values (e.g., 'Unit') to the appropriate field, and removing additional excess information that does not meet the statewide schema definition for this field.

✔ **PLACENAME**

✱ **ZIPCODE** — • **ZIPCODE**: ~9 records with SITEADRESS, but missing ZIPCODE value. Populate if zip code is available in land information system.

✔ **ZIP4**

✔ **STATE**

✔ **SCHOOLDIST** – with standardized domains

✔ **SCHOOLDISTNO** – with standardized domains

✔ **IMPROVED** – with standardized domains — • **IMPROVED**: Field exists, but is all 'NULL'
• Populate IMPROVED field for future data submissions.

✔ **CNTASSDVALUE**

✔ **LNDVALUE**

✔ **IMPVALUE**

✔ **FORESTVALUE**

✔ **ESTFMKVALUE**

✔ **NETPRPTA**

✔ **GRSPRPTA**

✔ **DEEDACRES**

✔ **GISACRES**

✔ **CONAME** – with standardized domains

✔ **PARCELFIPS** – with standardized domains

✔ **PARCELSRC** – with standardized domains

PARCEL FEATURE CLASS

✱ **Projection met statewide schema** — • NAD 1983 StatePlane Wisconsin Central FIPS 4802 Feet. Re-project from native projection to statewide schema projection (NAD 1983 HARN Wisconsin TM (Meters)) before submitting.

✔ **County parcel fabric was complete (lacked gaps)**

✔ **Condo modeling met statewide schema**

CO. ZONING DATA

◆ **County general** – with attributes — • (Not administered by county)

◆ **Farmland preservation** – with attributes — • (Not administered by county)

✱ **Shoreland** – with attributes — • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

◆ **Floodplain** – with attributes — • (Not administered by county)

◆ **Airport protection** – with attributes — • (Not administered by county)

SUBMISSION FORM

✱ **Submission form provided with initial submission** — • Submission form was provided upon follow-up request from DOA

MISCELLANEOUS

• Data submitted in shapefile format. Please submit in file geodatabase format for future data submissions to allow for seamless integration with other datasets.
• ~216 records without values for PARCELFIPS, PARCELSRC and CONAME field. At a minimum, these 3 fields should be populated for every submitted record (even ROW, new parcels, hydro, etc.).
• Also note that if the attribute element's geometry is not a parcel, then the PARCELID field should contain a label of the non-parcel feature (e.g., 'ROW' — see schema specifications)
• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

✳ **Shoreland** – with attributes — • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

◆ **Floodplain** – with attributes — • (Not administered by county)

✳ **Airport protection** – with attributes — • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

SUBMISSION FORM

✔ **Submission form provided with initial submission**

MISCELLANEOUS

• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA

ATTRIBUTES

✔ **PARCELID**

✔ **TAXPARCELID**

✔ **PARCELDATE**

✔ **TAXROLLYEAR**

✔ **OWNERNME1**

✔ **OWNERNME2**

✔ **PSTLADRESS**

✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**

✱ **SITEADRESS**   • **SITEADRESS**: In addition to the SITEADRESS this field also contains city, state, and zip. This field should only contain the street portion of the SITEADRESS. Remove excess information for future data submissions.

✔   **ADDNUMPREFIX**

✱   **ADDNUM**   • **ADDNUM**: ~1 records with ADDNUMPREFIX still attached, ~2 records where value is actually PREFIX, but just in incorrect field. Make corrections to these records for future data submissions.

✱   **ADDNUMSUFFIX**   • **ADDNUMSUFFIX**: Field contains secondary address numbers in some cases. Remove secondary address numbers from this field for future data submissions.

✱   **PREFIX** – with standardized domains   • **PREFIX**: Values currently exist within the STREETNAME field. See STREETNAME for notes.

✱   **STREETNAME**   • **STREETNAME**: This field contains values (i.e., CTY, HWY, N, S, etc.) that should be populated in the PREFIX field. Move these values ('E' = ~152 records, 'N' = ~164 records, 'S' = ~95 records, 'W' = ~150 records, 'CTY' = ~1524 records, 'HWY' = ~727 records) to the prefix field and standardize to statewide schema domains where necessary.

✱   **STREETTYPE** – with standardized domains   • **STREETTYPE**: Some records with values that are UNITID, have portions of STREETNAME attached, or still need to be spelled out to meet statewide schema domains. Move elements to correct fields when necessary and spell out values where needed.

✔   **SUFFIX**

✔   **LANDMARKNAME**

✔   **UNITTYPE**

✔   **UNITID**

✔ **PLACENAME**

✱ **ZIPCODE**   • **ZIPCODE**: ~22 records with SITEADRESS, but missing ZIPCODE value. Populate if zip code is available in land information system.

✔ **ZIP4**

✔ **STATE**

✔ **SCHOOLDIST** – with standardized domains

✔ **SCHOOLDISTNO** – with standardized domains

✱ **IMPROVED** – with standardized domains

✱ **CNTASSDVALUE**   • **CNTASSDVALUE**: Leading '00000's for most records. Remove leading zeroes for future data submissions.

✱ **LNDVALUE**   • **LNDVALUE**: Leading '00000's for most records. Remove leading zeroes for future data submissions.

✱ **IMPVALUE**   • **IMPVALUE**: Leading '00000's for most records. Remove leading zeroes for future data submissions.

✱ **FORESTVALUE**   • **FORESTVALUE**: Leading '00000's for most records. Remove leading zeroes for future data submissions.

✱ **ESTFMKVALUE**   • **ESTFMKVALUE**: Leading '00000's for most records. Remove leading zeroes for future data submissions.

✱ **NETPRPTA**   • **NETPRPTA**: Leading '00000's for most records. Remove leading zeroes for future data submissions.

✱ **GRSPRPTA**   • **GRSPRPTA**: Leading '00000's for most records. Remove leading zeroes for future data submissions.

✱ **PROPCLASS** – with standardized domains   • **PROPCLASS**: Few records with leading commas. Remove leading commas for future data submissions.

✔ **AUXCLASS** – with standardized domains

✔ **ASSDACRES**

✱ **DEEDACRES**   • **DEEDACRES**: Leading '00000's for most records. Remove leading zeroes for future data submissions.

✔ **GISACRES**

✔ **CONAME** – with standardized domains

✔ **PARCELFIPS** – with standardized domains

✔ **PARCELSRC** – with standardized domains

PARCEL FEATURE CLASS

✔ **Projection met statewide schema**

✱ **County parcel fabric was complete (lacked gaps)**   • County parcel fabric contains gaps.

✔ **Condo modeling met statewide schema**

CO. ZONING DATA

✔ **County general** – with attributes

✔ **Farmland preservation** – with attributes

✱ **Shoreland** – with attributes   • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

✔ **Floodplain** – with attributes

✱ **Airport protection** – with attributes   • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

SUBMISSION FORM

✔ **Submission form provided with initial submission**

MISCELLANEOUS

• Join success (PARCELID to TRCLID(tax roll)): (21920/223258 = 98.0%)
• Integrate City of Antigo parcels into Langlade's parcel submission for future data submissions.
• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET **STATEWIDE SCHEMA** 🔗

ATTRIBUTES

✔ **PARCELID**

✔ **TAXPARCELID**

✔ **PARCELDATE**

✔ **TAXROLLYEAR**

✔ **OWNERNME1**

✔ **OWNERNME2**

✱ **PSTLADRESS**
- **PSTLADRESS**: ~371 records with value = 'TOWN 35 RANGE 08 E SECTION 05,QUARTER SE QUARTERQUARTER SE,HARRISON,WI,00000 '
- For records such as these, convert this field to <Null> for future data submissions.

✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**

✔ **SITEADRESS**

✔   **ADDNUMPREFIX**

✱   **ADDNUM**
- **ADDNUM**: For records where SITEADRESS is <Null> and ADDNUM is populated with a '0,' convert ADDNUM value of '0' to <Null> for future data submissions.

✔   **ADDNUMSUFFIX**

✔   **PREFIX** – with standardized domains

✔   **STREETNAME**

✔   **STREETTYPE** – with standardized domains

✔   **SUFFIX**

✔   **LANDMARKNAME**

✔   **UNITTYPE**

✔   **UNITID**

✱ **PLACENAME**
- **PLACENAME**: The values provided appears to be Postal placename. Replace with Jurisdictional placename.

✱ **ZIPCODE**
- **ZIPCODE**: Numerous records with value = '00000.' Please populate if available in land information system, otherwise replace '00000' with <Null>
- Few values with ZIP4 still attached. Remove ZIP4 from this field and place in appropriate field for future data submissions.

✱ **ZIP4**
- **ZIP4**: ~19886 records with value = '0000.' Populate zip4 for these records when feasible. If zip4 is unknown, populate with <Null>

✱ **STATE**
- **STATE**: This field appears to contain the state associated with the PSTLADRESS as opposed to the SITEADRESS. Populate this field for all records in the dataset you submit.

✱ **SCHOOLDIST** – with standardized domains
- **SCHOOLDIST**: Field exists in submission, but is not populated. Field can be populated using processed SCHOOLDISTNO field (strip first 2 digits) and domains of the statewide schema. Populate this field for future data submissions.

✱ **SCHOOLDISTNO** – with standardized domains
- **SCHOOLDISTNO**: The values provided in this field are 6 digits long, but should be 4 digits to conform to the domains of the statewide schema. Strip first 2 digits off the front of the code.

✔ **IMPROVED** – with standardized domains

✔ **CNTASSDVALUE**

✔ **LNDVALUE**

✔ **IMPVALUE**

✔ **FORESTVALUE**

✔ **ESTFMKVALUE**

✱ **NETPRPTA**
- **NETPRPTA**: Replace records with value = '.00' with <Null>

✱ **GRSPRPTA**
- **GRSPRPTA**: Replace records with value = '.00' with <Null>

✔ **PROPCLASS** – with standardized domains

✔ **AUXCLASS** – with standardized domains

✔ **ASSDACRES**

✔ **DEEDACRES**

✔ **GISACRES**

✔ **CONAME** – with standardized domains

✔ **PARCELFIPS** – with standardized domains

✔ **PARCELSRC** – with standardized domains

PARCEL FEATURE CLASS

✔ **Projection met statewide schema**

✔ **County parcel fabric was complete (lacked gaps)**

✔ **Condo modeling met statewide schema**

CO. ZONING DATA

✔ **County general** – with attributes

◆ **Farmland preservation** – with attributes
- (Not administered by county)

✔ **Shoreland** – with attributes

✔ **Floodplain** – with attributes

◆ **Airport protection** – with attributes
- (Not administered by county)

SUBMISSION FORM

✔ **Submission form provided with initial submission**

MISCELLANEOUS

- All records in submitted dataset should have CONAME, PARCELFIPS, and PARCELSRC populated (even ROW, HYDRO, GAP, etc.).
- Your efforts to standardize your data to the statewide schema are appreciated.
- Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET **STATEWIDE SCHEMA**

ATTRIBUTES

✔ **PARCELID**

✔ **TAXPARCELID**

✱ **PARCELDATE** — • **PARCELDATE**: ~5503 records with value = '00/00/0000.' With future data submissions, if date of last geometric edit is unknown, populate PARCELDATE with <Null>. For future updates to individual parcels, maintaining a modification date for the parcel geometry is advised.

✔ **TAXROLLYEAR**

✔ **OWNERNME1**

✔ **OWNERNME2**

✔ **PSTLADRESS**

✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**

✱ **SITEADRESS** — • **SITEADRESS**: ~134 records with value = 'VACANT LAND 'or 'VACANT LOT,' ensure for future data submissions that these values are removed from the STREETNAME field.

✔ **ADDNUMPREFIX**

✔ **ADDNUM**

✱ **ADDNUMSUFFIX** — • **ADDNUMSUFFIX**: Field contains secondary address numbers in some cases. Remove secondary address numbers from this field for future data submissions.

✔ **PREFIX** – with standardized domains

✱ **STREETNAME** — • **STREETNAME**: See note in SITEADRESS field.
• ~5 records contain a '&' within STREETNAME and these appear intersections (not true elements of a SITEADRESS). Remove these values or pare down to be a single street name.

✔ **STREETTYPE** – with standardized domains

✔ **SUFFIX**

✔ **LANDMARKNAME**

✔ **UNITTYPE**

✔ **UNITID**

✔ **PLACENAME**

✱ **ZIPCODE** — • **ZIPCODE**: ~6349 records with SITEADRESS, but missing ZIPCODE value. Populate if zip code is available in land information system.

✔ **ZIP4**

✔ **STATE**

✔ **SCHOOLDIST** – with standardized domains

✔ **SCHOOLDISTNO** – with standardized domains

✱ **IMPROVED** – with standardized domains

✔ **CNTASSDVALUE**

✔ **LNDVALUE**

✱ **IMPVALUE** — • **IMPVALUE**: Values provided for City of Two Rivers appear incorrect. Ensure field is accurately calculated for entire county-wide dataset for future data submissions.

✔ **FORESTVALUE**

✔ **ESTFMKVALUE**

✔ **NETPRPTA**

✔ **GRSPRPTA**

✔ **PROPCLASS** – with standardized domains

✱ **AUXCLASS** – with standardized domains — • **AUXCLASS**: Mappings of AUXCLASS were missing. Populate AUXCLASS field according to statewide schema specifications for future data submissions.

✔ **ASSDACRES**

✔ **DEEDACRES**

✔ **GISACRES**

✔ **CONAME** – with standardized domains

✔ **PARCELFIPS** – with standardized domains

✱ **PARCELSRC** – with standardized domains — • **PARCELSRC**: Populate this field with the name of the County submitting data for the Parcel Initiative for all records for future data submissions.

PARCEL FEATURE CLASS

✔ **Projection met statewide schema**

✔ **County parcel fabric was complete (lacked gaps)**

✔ **Condo modeling met statewide schema**

CO. ZONING DATA

✔ **County general** – with attributes

✔ **Farmland preservation** – with attributes

✱ **Shoreland** – with attributes — • Per discussion with County, alterations to LINK field and DESCRIPTION field were made. Note alterations and populate LINK and DESCRIPTION field for future data submissions.

✱ **Floodplain** – with attributes — • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

✱ **Airport protection** – with attributes — • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

SUBMISSION FORM

✔ **Submission form provided with initial submission**

MISCELLANEOUS

• All records in submitted dataset should have CONAME, PARCELFIPS, and PARCELSRC populated (even ROW, UNKNOWN, PIN PENDING, OVERLAP, etc.). Populate these values for future submission for all records.
• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA

ATTRIBUTES

✔ **PARCELID**

✔ **TAXPARCELID**

✱ **PARCELDATE**
- **PARCELDATE**: Field with all the same date (01/14/2016), we assume this is the data cut date. Populate PARCELDATE with the date (MM/DD/YYYY) that best describes when the parcel geometry was last edited. With future data submissions, if date of last geometric edit is unknown, populate PARCELDATE with <Null>. For future updates to individual parcels, maintaining a modification date for the parcel geometry is advised.

✔ **TAXROLLYEAR**

✔ **OWNERNME1**

✔ **OWNERNME2**

✔ **PSTLADRESS**

✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**

✔ **SITEADRESS**

✔ **ADDNUMPREFIX**

✱ **ADDNUM**
- **ADDNUM**: ~350 records with ADDNUMPREFIX still attached. Remove these values from ADDNUM field and place in appropriate field for future data submissions.

✔ **ADDNUMSUFFIX**

✔ **PREFIX** – with standardized domains

✔ **STREETNAME**

✔ **STREETTYPE** – with standardized domains

✔ **SUFFIX**

✔ **LANDMARKNAME**

✔ **UNITTYPE**

✔ **UNITID**

✱ **PLACENAME**
- **PLACENAME**: The values provided appears to be Postal placename. Replace with Jurisdictional placename.

✱ **ZIPCODE**
- **ZIPCODE**: ~2 records with SITEADRESS, but missing ZIPCODE value. Populate if zip code is available in land information system.
- ~70 records with ZIP4 still attached. Remove ZIP4 from this field and place in appropriate field for future data submissions.

✱ **ZIP4**
- **ZIP4**: Lots of values of '0000'
- SCO populated with <Null> in processing.
- ~54387 records with value = '0000.' Populate ZIP4 for these records when feasible. If zip4 is unknown, populate with <Null>

✱ **STATE**
- **STATE**: ~24522 records without this field populated. Populate STATE field for all records in the dataset you submit.

✔ **SCHOOLDIST** – with standardized domains

✔ **SCHOOLDISTNO** – with standardized domains

✔ **IMPROVED** – with standardized domains
- **IMPROVED**: Values of 'YES' are correct, but value of '0' is incorrect, should be 'NO'
- Populate IMPROVED field with statewide schema domains for future data submissions.

✔ **CNTASSDVALUE**

✔ **LNDVALUE**

✔ **IMPVALUE**

✔ **FORESTVALUE**

✔ **ESTFMKVALUE**

✱ **NETPRPTA**
- **NETPRPTA**: Replace records with value = '.00' with <Null>

✱ **GRSPRPTA**
- **GRSPRPTA**: Replace records with value = '.00' with <Null>

✔ **PROPCLASS** – with standardized domains

✔ **AUXCLASS** – with standardized domains

✔ **ASSDACRES**

✔ **DEEDACRES**

✔ **GISACRES**

✱ **CONAME** – with standardized domains
- **CONAME**: ~2547 records without this field populated, they appear to be GAP, UNK, CE, ROW, etc. This field (CONAME) along with PARCELSRC and PARCELFIPS should always be populated to every record submitted in a dataset. Ensure this field is populated for all records for future data submissions.

✔ **PARCELFIPS** – with standardized domains

✔ **PARCELSRC** – with standardized domains

PARCEL FEATURE CLASS

✔ **Projection met statewide schema**

✔ **County parcel fabric was complete (lacked gaps)**

✔ **Condo modeling met statewide schema**

CO. ZONING DATA

✱ **County general** – with attributes
- Remove excess fields not within the statewide zoning schema to allow for seamless integration at statewide level.

✱ **Farmland preservation** – with attributes
- Remove excess fields not within the statewide zoning schema to allow for seamless integration at statewide level.

✱ **Shoreland** – with attributes
- Populate ZONINGCLASS field with '<DISTANCE>' field + 'FT DISTANCES.'
- Alos remove excess fields not within the statewide zoning schema to allow for seamless integration at statewide level.

✱ **Floodplain** – with attributes
- Populate DESCRIPTION field with '<FLD_ZONE>' field + "-" + '<FLOODWAY>'
- Also, remove excess fields not within the statewide zoning schema to allow for seamless integration at statewide level

✱ **Airport protection** – with attributes
- Populate ZONINGCLASS field with '<ELEVATION>' field + "FT ELEVATION"
- Also, remove excess fields not within the statewide zoning schema to allow for seamless integration at statewide level.

SUBMISSION FORM

ACTION REQUIRED TO MEET **STATEWIDE SCHEMA**

ATTRIBUTES

✔ **PARCELID**	
✔ **TAXPARCELID**	
✱ **PARCELDATE**	• **PARCELDATE**: Remove time stamp from this field for all applicable records and ensure that field type is text, not date type. With future data submissions, if date of last geometric edit is unknown, populate PARCELDATE with <Null>. For future updates to individual parcels, maintaining a modification date for the parcel geometry is advised.
✔ **TAXROLLYEAR**	
✔ **OWNERNME1**	
✔ **OWNERNME2**	
✱ **PSTLADRESS**	• **PSTLADRESS**: ~19 records with just city, state, zip code. Enter <Null> for parcels without a complete mailing address.
✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**	
✔ **SITEADRESS**	
✱ **ADDNUMPREFIX**	• **ADDNUMPREFIX**: Almost all addresses have an ADDNUMPREFIX in SITEADRESS field, but this value is missing from the individual address element field. Populate this field with appropriate values for future data submissions.
✱ **ADDNUM**	• **ADDNUM**: ~5 records containing an address range in this field. Select the primary address number and remove all secondary address numbers from this field for future data submissions.
✱ **ADDNUMSUFFIX**	• **ADDNUMSUFFIX**: ~4 records containing an address range in this field. Select the primary address number and remove all secondary address numbers from this field for future data submissions.
✱ **PREFIX** – with standardized domains	• **PREFIX**: ~28 records with value = 'W N.' 'W' belongs in this field (PREFIX), but the 'N' needs to be place in STREETNAME field and spelled out along with additional portion of the street name (e.g., 'NORTH SHORE')
✱ **STREETNAME**	• **STREETNAME**: ~1521 records with 'CO RD' in this field. Move these values to the PREFIX field and standardized to statewide schema domains (i.e., 'CTH'). • Value of 'S' in this field should be spelled out to 'SOUTH' as it is in the SITEADRESS field. • ~1 records with 'STH' in this field and '22' in STREETTYPE field. Move these values to the appropriate fields. • Few values with street types still attached (2nd AVE, FOX DR). Place values other than street name into appropriate fields.
✱ **STREETTYPE** – with standardized domains	• **STREETTYPE**: Handful of street types that need to be spelled out to meet statewide schema domains (e.g., 'TR,' 'SH,' 'CR'). Spell out these street types for future data submissions.
✔ **SUFFIX**	
✔ **LANDMARKNAME**	
✱ **UNITTYPE**	• **UNITTYPE**: ~1 record contains what appears to be a secondary address number in this field. Remove this value for future data submissions.
✱ **UNITID**	• **UNITID**: ~15 records that contain something other than unit ids, most appear to be secondary address numbers. Remove these values from field for future data submissions.
✔ **PLACENAME**	
✱ **ZIPCODE**	• **ZIPCODE**: ~307 records with SITEADRESS, but missing ZIPCODE value. Populate if zip code is available in land information system.
✔ **ZIP4**	
✔ **STATE**	
✔ **SCHOOLDIST** – with standardized domains	
✔ **SCHOOLDISTNO** – with standardized domains	
✔ **IMPROVED** – with standardized domains	• **IMPROVED**: Field exists, but is all 'NULL' • Populate IMPROVED field for future data submissions.
✔ **CNTASSDVALUE**	
✔ **LNDVALUE**	
✔ **IMPVALUE**	
✔ **FORESTVALUE**	
✔ **ESTFMKVALUE**	
✔ **NETPRPTA**	
✔ **GRSPRPTA**	
✔ **PROPCLASS** – with standardized domains	
✔ **AUXCLASS** – with standardized domains	
✔ **ASSDACRES**	
✔ **DEEDACRES**	
✔ **GISACRES**	
✔ **CONAME** – with standardized domains	
✔ **PARCELFIPS** – with standardized domains	
✔ **PARCELSRC** – with standardized domains	

PARCEL FEATURE CLASS

✔ **Projection met statewide schema**	
✱ **County parcel fabric was complete (lacked gaps)**	• County parcel fabric contains gaps.
✱ **Condo modeling met statewide schema**	• Condos not modeled. Please model condos according to statewide schema (Appendix A in the V2 Submission Documentation).

CO. ZONING DATA

✔ **County general** – with attributes	
◆ **Farmland preservation** – with attributes	• (Not administered by county)
✱ **Shoreland** – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
✱ **Floodplain** – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
◆ **Airport protection** – with attributes	• (Not administered by county)

SUBMISSION FORM

✔ **Submission form provided with initial submission**	

MISCELLANEOUS

• ~587 records without any attribute information at all. At a minimum, all records in submitted dataset should have CONAME, PARCELFIPS, and PARCELSRC populated (even ROW, HYDRO, GAP, unknown, etc.). Populate these values for future data submissions.
• There appears to be ~11 phantom geometries (shape_area = 0 and shape_length = 0). Please address.
• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA 🔗

ATTRIBUTES

✔ PARCELID	
✱ TAXPARCELID	• **TAXPARCELID**: The PARCELID field provided has a leading '0' on it, that would not result in a successful join to tax roll. SCO stripped off the leading '0' and used these modified values to join to the tax roll.
✔ PARCELDATE	
✱ TAXROLLYEAR	• **TAXROLLYEAR**: SCO populated this field with '2015' for current data submission. Populate TAXROLLYEAR field according to statewide schema specifications for future data submissions.
✔ OWNERNME1	
✔ OWNERNME2	
✱ PSTLADRESS	• **PSTLADRESS**: Concatenate all elements into single field containing PSTLADRESS for future data submissions.
✱ SITEADRESS – PARSED ADDRESS COMPONENTS?	• **PARSED ADDRESES**: Parse site addresses for future data submissions
✔ SITEADRESS	
✱ ADDNUMPREFIX	• **ADDNUMPREFIX**: Populate (as component of parsed addresses)
✱ ADDNUM	• **ADDNUM**: Populate (as component of parsed addresses)
✱ ADDNUMSUFFIX	• **ADDNUMSUFFIX**: Populate (as component of parsed addresses)
✱ PREFIX – with standardized domains	• **PREFIX**: Populate (as component of parsed addresses)
✱ STREETNAME	• **STREETNAME**: Populate (as component of parsed addresses)
✱ STREETTYPE – with standardized domains	• **STREETTYPE**: Populate (as component of parsed addresses)
✱ SUFFIX	• **SUFFIX**: Populate (as component of parsed addresses)
✱ LANDMARKNAME	• **LANDMARKNAME**: Populate (as component of parsed addresses)
✱ UNITTYPE	• **UNITTYPE**: Populate (as component of parsed addresses)
✱ UNITID	• **UNITID**: Populate (as component of parsed addresses)
✔ PLACENAME	
✱ ZIPCODE	• **ZIPCODE**: ~4143 records with SITEADRESS, but missing ZIPCODE value. Populate if zip code is available in land information system.
✱ ZIP4	• **ZIP4**: Zip code missing for 100% of records with a SITEADRESS. Provide Zip4 associated with SITEADRESS for future data submissions, if available in land information system.
✱ STATE	• **STATE**: Populate this field for future data submissions.
✱ SCHOOLDIST – with standardized domains	• **SCHOOLDIST**: Field does not exist in submission. Field can be populated using SCHOOLDISTNO field and domains of the statewide schema. Populate this field for future data submissions.
✔ SCHOOLDISTNO – with standardized domains	
✔ IMPROVED – with standardized domains	• **IMPROVED**: Populate
✱ CNTASSDVALUE	• **CNTASSDVALUE**: Populate
✔ LNDVALUE	
✔ IMPVALUE	
✔ FORESTVALUE	
✔ ESTFMKVALUE	
✔ NETPRPTA	
✔ GRSPRPTA	
✱ PROPCLASS – with standardized domains	• **PROPCLASS**: Populate
✱ AUXCLASS – with standardized domains	• **AUXCLASS**: Populate
✔ ASSDACRES	
✔ DEEDACRES	
✔ GISACRES	
✱ CONAME – with standardized domains	• **CONAME**: Populate
✱ PARCELFIPS – with standardized domains	• **PARCELFIPS**: Populate
✱ PARCELSRC – with standardized domains	• **PARCELSRC**: Populate

PARCEL FEATURE CLASS

✱ **Projection met statewide schema**	• Submission was in NAD 1983 HARN WISCRS Menominee County Feet. Re-project from native projection to statewide schema projection (NAD 1983 HARN Wisconsin TM (Meters)) before submitting.
✔ **County parcel fabric was complete (lacked gaps)**	
✱ **Condo modeling met statewide schema**	• Condos not modeled. Please model condos according to statewide schema (Appendix A in the V2 Submission Documentation).

CO. ZONING DATA

✱ **County general** – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
✔ **Farmland preservation** – with attributes	
✔ **Shoreland** – with attributes	
✔ **Floodplain** – with attributes	
✔ **Airport protection** – with attributes	

SUBMISSION FORM

✔ **Submission form provided with initial submission**	• Submission form was not provided. Provide for future data submissions.

MISCELLANEOUS

- Submission form was not submitted.
- We were provided with general zoning, but it was in CAD format and could not be georectified well, so we did not include for V2.
- Your efforts to standardize your data to the statewide schema are appreciated.
- Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET **STATEWIDE SCHEMA**

ATTRIBUTES

✔	**PARCELID**	
✔	**TAXPARCELID**	
✱	**PARCELDATE**	• **PARCELDATE**: All records with a value of 'N/A.' Populate PARCELDATE with the date (MM/DD/YYYY) that best describes when the parcel geometry was last edited. With future data submissions, if date of last geometric edit is unknown, populate PARCELDATE with <Null>. For future updates to individual parcels, maintaining a modification date for the parcel geometry is advised.
✱	**TAXROLLYEAR**	• **TAXROLLYEAR**: ~99% of records with value = '2014,' not 2015 as would be expected, but per discussion with County this is accurate. For future data submissions, note that the schema calls for the most *current* data.
✔	**OWNERNME1**	
✔	**OWNERNME2**	
✔	**PSTLADRESS**	
✔	**SITEADRESS – PARSED ADDRESS COMPONENTS?**	
✱	**SITEADRESS**	• **SITEADRESS**: For records with both ADDNUMSUFFIX as well as UNITID field populated, it appears that UNITIDs were duplicated in this field (e.g., '1411 X W EDGERTON AVE X,' '5209 K S 13TH ST K,' etc.) and the subsequent parsing resulted in these values being populated in both fields. • Ensure that values are in the appropriate sub-address element field and not duplicated in multiple fields.
✱	**ADDNUMPREFIX**	• **ADDNUMPREFIX**: Values of 'N/A' should be populated with <Null> for future data submissions.
✱	**ADDNUM**	• **ADDNUM**: Few corrections needed including placing the 'S' of 'S41' in ADDNUMPREFIX field and removal of 'ONE' from this field for future data submissions.
✱	**ADDNUMSUFFIX**	• **ADDNUMSUFFIX**: See comment in SITEADRESS and note that most values in this field are probably considered unit IDs. Move these values to the appropriate field for future data submissions. • Note the presence of some values in this field (e.g., 'WEST,' 'Ln,' etc.) that belong in different attribute fields. Identify these values and move to the appropriate field for future data submissions.
✔	**PREFIX** – with standardized domains	
✔	**STREETNAME**	
✔	**STREETTYPE** – with standardized domains	
✱	**SUFFIX**	• **SUFFIX**: ~91 records with values not equal to directionals (e.g., 'A,' 'B,' 'C,' 'D,' etc.). Move these values to the appropriate field (probably unit ID field) for future data submissions.
✱	**LANDMARKNAME**	• **LANDMARKNAME**: Values of 'N/A' should be populated with <Null> for future data submissions.
✱	**UNITTYPE**	• **UNITTYPE**: Values of 'N/A' should be populated with <Null> for future data submissions.
✔	**UNITID**	
✱	**PLACENAME**	• **PLACENAME**: To maintain consistency across statewide parcel attributes, placenames should be altered from 'SHOREWOOD VILLAGE' to 'VILLAGE OF SHOREWOOD,' or 'MILWAUKEE CITY' to 'CITY OF MILWAUKEE' for future data submissions.
✱	**ZIPCODE**	• **ZIPCODE**: ~1112 records with SITEADRESS, but missing ZIPCODE value. Populate if zip code is available in land info system.
✔	**ZIP4**	
✔	**STATE**	
✔	**SCHOOLDIST** – with standardized domains	
✔	**SCHOOLDISTNO** – with standardized domains	
✔	**IMPROVED** – with standardized domains	• **IMPROVED**: SCO replaced string <Null> with true <Null> when processing • ~1785 records with a string value of <Null> • Replace this string <Null> with a true SQL <Null> for future data submissions
✔	**CNTASSDVALUE**	
✔	**LNDVALUE**	
✔	**IMPVALUE**	
✱	**FORESTVALUE**	• **FORESTVALUE**: Values of 'N/A' should be populated with <Null> for future data submissions.
✔	**ESTFMKVALUE**	
✔	**NETPRPTA**	
✔	**GRSPRPTA**	
✔	**PROPCLASS** – with standardized domains	
✔	**AUXCLASS** – with standardized domains	
✱	**ASSDACRES**	• **ASSDACRES**: Values of 'N/A' should be populated with <Null> for future data submissions.
✔	**DEEDACRES**	
✔	**GISACRES**	
✔	**CONAME** – with standardized domains	
✱	**PARCELFIPS** – with standardized domains	• **PARCELFIPS**: Field currently contains two values '079' and '53000.' This field should reflect the FIPS of the data submitter (i.e., '079'). Populate PARCELFIPS field accordingly for future data submissions.
✱	**PARCELSRC** – with standardized domains	• **PARCELSRC**: Field currently contains two values 'MILWAUKEE COUNTY' and 'CITY OF MILWAUKEE.' This field should reflect the name of the data submitter (i.e., 'MILWAUKEE COUNTY'). Populate PARCELSRC field accordingly for future data submissions.

PARCEL FEATURE CLASS

✔	**Projection met statewide schema**
✔	**County parcel fabric was complete (lacked gaps)**
✔	**Condo modeling met statewide schema**

CO. ZONING DATA

◆	**County general** – with attributes	• (Not administered by county)
◆	**Farmland preservation** – with attributes	• (Not administered by county)
◆	**Shoreland** – with attributes	• (Not administered by county)
◆	**Floodplain** – with attributes	• (Not administered by county)
◆	**Airport protection** – with attributes	• (Not administered by county)

SUBMISSION FORM

✱	**Submission form provided with initial submission**	• Submission form was provided upon follow-up request from DOA

MISCELLANEOUS

• Address the issue of submitting more current year's tax roll information for future data submissions.
• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA 🔗

ATTRIBUTES

✔ **PARCELID**

✔ **TAXPARCELID**

✔ **PARCELDATE**

✔ **TAXROLLYEAR**

✔ **OWNERNME1**

✔ **OWNERNME2**

✔ **PSTLADRESS**

✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**

✸ **SITEADRESS** — • **SITEADRESS**: In addition to the SITEADRESS this field also contains city, state, and zip. This field should only contain the street portion of the SITEADRESS. Remove excess information for future data submissions.

✔ ADDNUMPREFIX

✔ ADDNUM

✸ **ADDNUMSUFFIX** — • **ADDNUMSUFFIX**: ~3 records appear to contain a portion of an address range (i.e., '-510,' '-1118,' '-1112'). Remove all secondary address numbers from this field for future data submissions.

✔ **PREFIX** – with standardized domains

✔ **STREETNAME**

✸ **STREETTYPE** – with standardized domains — • **STREETTYPE**: Standardize street types to statewide schema requirements (fully spelled out, not abbreviations).

✔ **SUFFIX**

✔ **LANDMARKNAME**

✸ **UNITTYPE** — • **UNITTYPE**: ~21 records contain a value of '#' in this field. Assuming this is part of the UNITID, concatenate this value with the value in the UNITID field for future data submissions.

✔ **UNITID**

✔ **PLACENAME**

✸ **ZIPCODE** — • **ZIPCODE**: ~1 records with a value of '64619.' We assume based off values present for surrounding parcels, we believe this should be corrected to '54619.' Please note change and correct for future data submissions.

✔ **ZIP4**

✔ **STATE**

✔ **SCHOOLDIST** – with standardized domains

✸ **SCHOOLDISTNO** – with standardized domains — • **SCHOOLDISTNO**: The values provided in this field are 6 digits long, but should be 4 digits to conform to the domains of the statewide schema. Strip first 2 digits off the front of the code.

✔ **IMPROVED** – with standardized domains

✔ **CNTASSDVALUE**

✔ **LNDVALUE**

✔ **IMPVALUE**

✔ **FORESTVALUE**

✔ **ESTFMKVALUE**

✔ **NETPRPTA**

✔ **GRSPRPTA**

✔ **PROPCLASS** – with standardized domains

✔ **AUXCLASS** – with standardized domains

✔ **ASSDACRES**

✔ **PARCELSRC** – with standardized domains

PARCEL FEATURE CLASS

✔ **Projection met statewide schema**

✔ **County parcel fabric was complete (lacked gaps)**

✔ **Condo modeling met statewide schema**

CO. ZONING DATA

✔ **County general** – with attributes

✔ **Farmland preservation** – with attributes

✸ **Shoreland** – with attributes — • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

✔ **Floodplain** – with attributes

✸ **Airport protection** – with attributes — • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

SUBMISSION FORM

✔ **Submission form provided with initial submission**

MISCELLANEOUS

• There is an outlier polygon far northeast of the county (looks to be on north eastern boundary of Oconto County). Remove for future data submissions.
• Push final processed dataset to statewide schema template schema to remove excess fields and allow for seamless aggregation at the statewide level.
• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA

ATTRIBUTES

✔ **PARCELID**

✔ **TAXPARCELID**

✔ **PARCELDATE**

✔ **TAXROLLYEAR**

✔ **OWNERNME1**

✔ **OWNERNME2**

✱ **PSTLADRESS**
- **PSTLADRESS**: ~637 records with value = '00000', ~111 records with value = 'OCONTO WI 54153', ~14 records with value = 'prop descriptor, 00000'
- Enter <Null> for parcels without a complete mailing address.

✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**

✔ **SITEADRESS**

✔   **ADDNUMPREFIX**

✔   **ADDNUM**

✔   **ADDNUMSUFFIX**

✔   **PREFIX** – with standardized domains

✱   **STREETNAME**
- **STREETNAME**: Values for streetnames pertaining to CTH or STH currently annotate concurrently running highways as ('22 32,' '41 141,' 'G M' etc.). For future data submissions, please include '/' between highway values.

✱   **STREETTYPE** – with standardized domains
- **STREETTYPE**: Two values ('ANX' and 'TR') in this field did not get spelled out to statewide schema domains. Ensure all street types get fully spelled out for future data submissions.

✔   **SUFFIX**

✔   **LANDMARKNAME**

✔   **UNITTYPE**

✱   **UNITID**
- **UNITID**: ~454 records with values = 'PRV,' 'PRVT,' 'ISLAND,' etc. Remove values such as this from UNITID field for future data submissions.

✔ **PLACENAME**

✱ **ZIPCODE**
- **ZIPCODE**: ~20173 records with SITEADRESS, but missing ZIPCODE value. Populate if zip code is available in land information system.

✔ **ZIP4**

✔ **STATE**

✔ **SCHOOLDIST** – with standardized domains

✔ **SCHOOLDISTNO** – with standardized domains

✔ **IMPROVED** – with standardized domains
- **IMPROVED**: Field exists, but is all 'NULL'
- Populate IMPROVED field for future data submissions.

✔ **OWNERNME1**

✔ **OWNERNME2**

✔ **PSTLADRESS**

✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**

✔ **SITEADRESS**

   ✔ **ADDNUMPREFIX**

✳ **ADDNUM** — • **ADDNUM**: Field exists, but is all <Null>. We suspect that this was an error in processing or field mapping. Ensure this field is populated where appropriate for future data submissions.

   ✔ **ADDNUMSUFFIX**

✔ **PREFIX** – with standardized domains

✳ **STREETNAME** — • **STREETNAME**: Field contains some elements that should be standardized and placed in PREFIX field (i.e., COUNTY (~1739 records), HWY (~1766 records)). Move these elements to appropriate field and standardize to statewide schema domains.

✔ **STREETTYPE** – with standardized domains

   ✔ **SUFFIX**

   ✔ **LANDMARKNAME**

   ✔ **UNITTYPE**

   ✔ **UNITID**

✔ **PLACENAME**

✳ **ZIPCODE** — • **ZIPCODE**: This field appears to contain the ZIPCODE associated with the PSTLADRESS, as opposed to the SITEADRESS. Populate with zip code associated with the SITEADRESS if available in land information system, otherwise replace with <Null>

✳ **ZIP4** — • **ZIP4**: This field appears to contain the zip4 associated with the PSTLADRESS, as opposed to the SITEADRESS. Populate with zip4 associated with the SITEADRESS.

✳ **STATE** — • **STATE**: This field appears to contain the state associated with the PSTLADRESS as opposed to the SITEADRESS. Populate this field for all records in the dataset you submit.

✔ **SCHOOLDIST** – with standardized domains

✳ **SCHOOLDISTNO** – with standardized domains — • **SCHOOLDISTNO**: The values provided in this field are 6 digits long, but should be 4 digits to conform to the domains of the statewide schema. Strip first 2 digits off the front of the code.

✔ **IMPROVED** – with standardized domains — • **IMPROVED**: Field exists, but is unpopulated. Populate IMPROVED field for future data submissions.

✔ **CNTASSDVALUE**

✔ **LNDVALUE**

✔ **IMPVALUE**

✔ **FORESTVALUE**

✔ **ESTFMKVALUE**

✔ **NETPRPTA**

✔ **GRSPRPTA**

✔ **PROPCLASS** – with standardized domains

✔ **AUXCLASS** – with standardized domains

✔ **ASSDACRES**

✔ **DEEDACRES**

✔ **GISACRES**

✳ **CONAME** – with standardized domains — • **CONAME**: Field should only contain the name of the county in which a parcel resides (i.e., 'ONEIDA'—not 'ONEIDA COUNTY').

✳ **PARCELFIPS** – with standardized domains — • **PARCELFIPS**: Field currently contains the county FIPs as well as the more granular jurisdiction FIPs code. This field should be populated with the FIPs code of the county.

✳ **PARCELSRC** – with standardized domains — • **PARCELSRC**: Field currently contains the county name as well as the more granular jurisdiction name. This field should be populated with the county name of the county.

PARCEL FEATURE CLASS

✔ **Projection met statewide schema**

✔ **County parcel fabric was complete (lacked gaps)**

✔ **Condo modeling met statewide schema**

CO. ZONING DATA

✔ **County general** – with attributes

✳ **Farmland preservation** – with attributes — • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

✔ **Shoreland** – with attributes

✳ **Floodplain** – with attributes — • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

✳ **Airport protection** – with attributes — • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

SUBMISSION FORM

✔ **Submission form provided with initial submission**

MISCELLANEOUS

• ~704 records with PARCELID = 'ROW,' 'GAP,' 'OVERLAP, etc. Populate CONAME, PARCELFIPS, PARCELSRC for these records. Every submitted record in a dataset should, at a minimum, have these three fields populated.
• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA 🔗

ATTRIBUTES

✔ **PARCELID**

✔ **TAXPARCELID**

✳ **PARCELDATE** · **PARCELDATE**: Field contains a value of '1/1/1900' for ~89700 records. With future data submissions, if date of last geometric edit is unknown, populate PARCELDATE with <Null>. For future updates to individual parcels, maintaining a modification date for the parcel geometry is advised.
· Remove time stamp from this field for all applicable records and ensure that field type is text, not date type.

✔ **TAXROLLYEAR**

MISCELLANEOUS

· Your efforts to standardize your data to the statewide schema are appreciated.
· Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA

ATTRIBUTES

✔ **PARCELID**	
✔ **TAXPARCELID**	
✱ **PARCELDATE**	• **PARCELDATE**: Field was blank. Populate PARCELDATE with the date (MM/DD/YYYY) that best describes when the parcel geometry was last edited. With future data submissions, if date of last geometric edit is unknown, populate PARCELDATE with <Null>. For future updates to individual parcels, maintaining a modification date for the parcel geometry is advised.
✔ **TAXROLLYEAR**	
✔ **OWNERNME1**	
✔ **OWNERNME2**	
✱ **PSTLADRESS**	• **PSTLADRESS**: ~332 records with value = ' , ' • ~8 records with value = 'CITY, ST, ZIP'. Enter <Null> for parcels without a complete mailing address.
✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**	
✱ **SITEADRESS**	• **SITEADRESS**: ~5 records with values like '014-09-00 VACANT A/W,' '10 LOT,' '1 LOT,' '47 LOT,' etc. These are not considered site addresses. Remove these values and individual address elements associated with these records.
✱ **ADDNUMPREFIX**	• **ADDNUMPREFIX**: All values still attached to the ADDNUM field
✱ **ADDNUM**	• **ADDNUM**: ~952 records with multiple address numbers or indicating address range. Select the primary address number and remove all secondary address numbers from this field for future data submissions. • This field currently contains the address number prefix for applicable records. For future data submissions, ensure that address number prefix in place in the appropriate field (ADDNUMPREFIX).
✔ **ADDNUMSUFFIX**	
✔ **PREFIX** – with standardized domains	
✱ **STREETNAME**	• **STREETNAME**: Field contains some elements that should be standardized and placed in PREFIX field (i.e., 'COUNTY ROAD (~1728 records), 'STATE ROAD' (~367 records)). Move these elements to appropriate field and standardize to statewide schema domains. • Some street types exist in this field for some records. Move these elements to appropriate field and standardize to statewide schema domains. • Remove values of 'VACANT' from this field for future data submissions.
✱ **STREETTYPE** – with standardized domains	• **STREETTYPE**: Standardize street types to statewide schema requirements (fully spelled out, not abbreviations).
✔ **SUFFIX**	• **SUFFIX**: Values should be standardized to statewide schema domains. • Values such as '21W,' '18W,' '5E,' '89W,' etc. should be removed from this field for future data submissions.
✔ **LANDMARKNAME**	
✔ **UNITTYPE**	
✱ **UNITID**	• **UNITID**: ~385 records that contain values such as 'SUITE' or 'UNIT.' Move these values to the appropriate field (UNITTYPE) for future data submissions.
✱ **PLACENAME**	• **PLACENAME**: All PLACENAME field was <Null>. Populate for future parcel submissions.
✱ **ZIPCODE**	• **ZIPCODE**: ~15708 records with SITEADRESS, but missing ZIPCODE value. Populate if zip code is available in land info system.
✔ **ZIP4**	
✔ **STATE**	
✔ **SCHOOLDIST** – with standardized domains	
✔ **SCHOOLDISTNO** – with standardized domains	
✔ **IMPROVED** – with standardized domains	
✔ **CNTASSDVALUE**	
✔ **LNDVALUE**	
✔ **IMPVALUE**	
✔ **FORESTVALUE**	
✱ **ESTFMKVALUE**	• **ESTFMKVALUE**: Field does not exist in submitted data. Include this field in future data submissions.
✔ **NETPRPTA**	
✔ **GRSPRPTA**	
✱ **PROPCLASS** – with standardized domains	• **PROPCLASS**: Field contains a value of '8' for ~90 records, which is does not match the statewide schema domains. Based on comparisons with the V1 dataset, it appears that this value was mistakenly placed in this field. It should exist in the AUXCLASS field and be annotated as 'W8'. Ensure that values get annotated correctly and placed in appropriate field.
✔ **AUXCLASS** – with standardized domains	
✔ **ASSDACRES**	
✔ **DEEDACRES**	
✔ **GISACRES**	
✔ **CONAME** – with standardized domains	
✔ **PARCELFIPS** – with standardized domains	
✔ **PARCELSRC** – with standardized domains	

PARCEL FEATURE CLASS

✱ **Projection met statewide schema**	• Submission was in NAD 1927 StatePlane Wisconsin South FIPS 4803. Re-project from native projection to statewide schema projection (NAD 1983 HARN Wisconsin TM (Meters)) before submitting.
✔ **County parcel fabric was complete (lacked gaps)**	
✱ **Condo modeling met statewide schema**	• Condo model type not specified. Specify or note as N/A in submission form.

CO. ZONING DATA

✱ **County general** – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
✱ **Farmland preservation** – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
✱ **Shoreland** – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
✱ **Floodplain** – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
✱ **Airport protection** – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)

SUBMISSION FORM

✔ **Submission form provided with initial submission**	

MISCELLANEOUS

• ~2050 records without any attribute information. Populate CONAME, PARCELFIPS, PARCELSRC for these records. Every submitted record in a dataset should, at a minimum, have these three fields populated.
• Also note that if the attribute element's geometry is not a parcel, then the PARCELID field should contain a label of the non-parcel feature (e.g., 'ROW' — see schema specifications)
• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA 🔗

PARCEL FEATURE CLASS

✱ **Projection met statewide schema**	• PARCEL feature class and GENERAL zoning feature class defined as NAD 1983 Wisconsin TM (Meters), and upon initial inspection, parcels showed up in Lake Michigan. It is suspected data was pushed into statewide schema template with out re-projecting. • Reproject parcels from native projection to statewide schema projection (NAD 1983 HARN Wisconsin TM (Meters)), prior to field mapping or pushing into the provided statewide schema template.
✔ **County parcel fabric was complete (lacked gaps)**	
✱ **Condo modeling met statewide schema**	• Condos not modeled. Please model condos according to statewide schema (Appendix A in the V2 Submission Documentation).

CO. ZONING DATA

✱ **County general** – with attributes	• Remove excess fields not within the statewide zoning schema to allow for seamless integration at statewide level. See note on Projection issues.
◆ **Farmland preservation** – with attributes	• (Not administered by county)
◆ **Shoreland** – with attributes	• (Not administered by county)
◆ **Floodplain** – with attributes	• (Not administered by county)
◆ **Airport protection** – with attributes	• (Not administered by county)

SUBMISSION FORM

✔ **Submission form provided with initial submission**

MISCELLANEOUS

• ~1037 records with PARCELID = 'ROW,' 'GAP,' 'LAKE,' etc. Populate CONAME, PARCELFIPS, PARCELSRC for these records. Every submitted record in a dataset should, at a minimum, have these three fields populated.
• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA 🔗

ATTRIBUTES

✔ **PARCELID**

✔ **TAXPARCELID**

✳ **PARCELDATE** · **PARCELDATE**: Field contains multiple values, but all between 20015 and 2016. It seems unlikely that this is the parcel creation/edit date for all parcels in the county. Populate PARCELDATE with the date (MM/DD/YYYY) that best describes when the parcel geometry was last edited. With future data submissions, if date of last geometric edit is unknown, populate PARCELDATE with <Null>. For future updates to individual parcels, maintaining a modification date for the parcel geometry is advised.

✔ **TAXROLLYEAR**

✔ **OWNERNME1**

✔ **OWNERNME2**

✳ **PSTLADRESS** · **PSTLADRESS**: ~47665 records containing ', ,' somewhere with in this field. Replace ', ,' with single ',' for future data submissions.

✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**

✔ **SITEADRESS**

✔ **ADDNUMPREFIX**

✳ **ADDNUM** · **ADDNUM**: ~91 records that contain a string in this field. The string present appears to be a duplication of the street name values. Convert these values to <Null> for future data submissions.

✔ **ADDNUMSUFFIX**

✔ **PREFIX** – with standardized domains

✔ **STREETNAME**

✳ **STREETTYPE** – with standardized domains · **STREETTYPE**: Few values not spelled out ('TR,' 'CLB'). Spell out street types to statewide schema domains for future data submissions.

✔ **SUFFIX**

✔ **LANDMARKNAME**

✔ **UNITTYPE**

✔ **UNITID**

✔ **PLACENAME**

✳ **ZIPCODE** · **ZIPCODE**: ~30031 records with SITEADRESS, but missing ZIPCODE value. Populate if zip code is available in land information system.
· ~3 records with a value in this field that are not WI zip codes ('43105,' '60603,' '83185'). Resolve issue for future data submissions.

✔ **ZIP4**

✔ **STATE**

✔ **SCHOOLDIST** – with standardized domains

✳ **SCHOOLDISTNO** – with standardized domains · **SCHOOLDISTNO**: Code '777' is missing leading '0.' Leading zero needs to be added for this value to conform to domains of the statewide schema.

✔ **IMPROVED** – with standardized domains

✔ **CNTASSDVALUE**

✔ **LNDVALUE**

✔ **IMPVALUE**

MISCELLANEOUS

· Your efforts to standardize your data to the statewide schema are appreciated.
· Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA

ATTRIBUTES

✔ PARCELID	
✔ TAXPARCELID	
✳ PARCELDATE	• **PARCELDATE**: Field contains a value of '01000101' for ~20268 records. With future data submissions, if date of last geometric edit is unknown, populate PARCELDATE with <Null>. For future updates to individual parcels, maintaining a modification date for the parcel geometry is advised.
✔ TAXROLLYEAR	
✔ OWNERNME1	
✔ OWNERNME2	
✔ PSTLADRESS	
✔ SITEADRESS – PARSED ADDRESS COMPONENTS?	
✔ SITEADRESS	
✔ ADDNUMPREFIX	
✳ ADDNUM	• **ADDNUM**: ~7 records with values that are not address numbers (e.g., 'OFF,' 'END,' 'CORNR'). These values should be converted to <Null> for future data submissions. • ~4 records with address number prefix value still attached to the address number. Move values to appropriate field. • ~9 records with '-' existing within the field. Most often this indicates an address range or multiple address numbers (which does not meet the statewide schema). Select the primary address number and remove all secondary address numbers from this field for future data submissions.
✳ ADDNUMSUFFIX	• **ADDNUMSUFFIX**: ~10 records with value = 'BLK.' Remove these values for future data submissions.
✔ PREFIX – with standardized domains	
✳ STREETNAME	• **STREETNAME**: Field contains some elements that should be standardized and placed in the PREFIX or STREETTYPE fields. Move these elements to appropriate field and standardize to statewide schema domains.
✳ STREETTYPE – with standardized domains	• **STREETTYPE**: Few values to spell out and a few values to move to other fields (e.g., 'S' moved to SUFFIX field). Make corrections for future data submissions.
✳ SUFFIX	• **SUFFIX**: ~1 record of 'ST' needs to be moved to STREETTYPE field and spelled out.
✔ LANDMARKNAME	
✳ UNITTYPE	• **UNITTYPE**: ~5 records that are street types exist in this field. Move to appropriate field for future data submissions.
✳ UNITID	• **UNITID**: Field contains some extraneous data in a few records. Remove extraneous data for future data submissions.
✔ PLACENAME	
✳ ZIPCODE	• **ZIPCODE**: ~198 records with SITEADRESS, but missing ZIPCODE value. Populate if zip code is available in land info system.
✔ ZIP4	
✔ STATE	
✔ SCHOOLDIST – with standardized domains	
✔ SCHOOLDISTNO – with standardized domains	
✔ IMPROVED – with standardized domains	
✔ CNTASSDVALUE	
✔ LNDVALUE	
✔ IMPVALUE	
✳ FORESTVALUE	• **FORESTVALUE**: Values of 'N/A' should be populated with <Null> for future data submissions.
✔ ESTFMKVALUE	
✔ NETPRPTA	
✔ GRSPRPTA	
✔ PROPCLASS – with standardized domains	
✳ AUXCLASS – with standardized domains	• **AUXCLASS**: Few records containing codes that pertain to personal property (e.g., 'P2,' 'P3,' 'P4B'). Remove these values for future data submissions.
✔ ASSDACRES	
✔ DEEDACRES	
✔ GISACRES	
✔ CONAME – with standardized domains	
✔ PARCELFIPS – with standardized domains	
✔ PARCELSRC – with standardized domains	

PARCEL FEATURE CLASS

✳ Projection met statewide schema	• Submission was in NAD 1983 HARN WISCRS Richland_County_Feet. Re-project from native projection to statewide schema projection (NAD 1983 HARN Wisconsin TM (Meters)) before submitting.
✔ County parcel fabric was complete (lacked gaps)	
✳ Condo modeling met statewide schema	• Condos not modeled. Please model condos according to statewide schema (Appendix A in the V2 Submission Documentation or contact SCO for assistance).

CO. ZONING DATA

✳ County general – with attributes	• Remove excess fields not within the statewide zoning schema to allow for seamless integration at statewide level. • Re-project data to statewide schema specification to allow for seamless integration at statewide level.
✳ Farmland preservation – with attributes	• Remove excess fields not within the statewide zoning schema to allow for seamless integration at statewide level. • Re-project data to statewide schema specification to allow for seamless integration at statewide level.
✳ Shoreland – with attributes	• Remove excess fields not within the statewide zoning schema to allow for seamless integration at statewide level. • Re-project data to statewide schema specification to allow for seamless integration at statewide level.
✳ Floodplain – with attributes	• Remove excess fields not within the statewide zoning schema to allow for seamless integration at statewide level. • Re-project data to statewide schema specification to allow for seamless integration at statewide level.
✳ Airport protection – with attributes	• Remove excess fields not within the statewide zoning schema to allow for seamless integration at statewide level. • Re-project data to statewide schema specification to allow for seamless integration at statewide level.

SUBMISSION FORM

✔ Submission form provided with initial submission	

MISCELLANEOUS

• ~91 records without a PARCELID value. Populate CONAME, PARCELFIPS, PARCELSRC for these records. Every submitted record in a dataset should, at a minimum, have these three fields populated.
• Also note that if the attribute element's geometry is not a parcel, then the PARCELID field should contain a label of the non-parcel feature (e.g., 'ROW' — see schema specifications)
• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET **STATEWIDE SCHEMA**

ATTRIBUTES

✱ PARCELID	• **PARCELID**: County noted in submission form to use PARCEL_ID field, but the PARCELID field actually contained info about GAP, HYDRO, ALLEY, etc. that are useful when creating STATEID. SCO used the PARCELID field instead (no difference between the two except for these non-tax parcel descriptors). For future data submissions, follow the schema definition for PARCELID.
✔ TAXPARCELID	
✱ PARCELDATE	• **PARCELDATE**: Field with two different dates '2015-12-31' and '2016-01-01,' as well as having timestamp attached. We assume this is the data cut date. Populate PARCELDATE with the date (MM/DD/YYYY) that best describes when the parcel geometry was last edited. With future data submissions, if date of last geometric edit is unknown, populate PARCELDATE with <Null>. For future updates to individual parcels, maintaining a modification date for the parcel geometry is advised.
✔ TAXROLLYEAR	
✱ OWNERNME1	• **OWNERNME1**: Note instances of this field only containing the last name and OWNERNAME2 field containing first name. Avoid splitting names across multiple fields for future data submissions.
✔ OWNERNME2	
✔ PSTLADRESS	
✔ SITEADRESS – PARSED ADDRESS COMPONENTS?	
✔ SITEADRESS	
✔ ADDNUMPREFIX	
✔ ADDNUM	
✔ ADDNUMSUFFIX	
✱ PREFIX – with standardized domains	• **PREFIX**: Some current values need to be standardized to statewide schema domains (i.e., COUNTY RD (~1701 records) -- 'CTH,' US HWY (~348 records) -- 'USH,' STATE RD (~702 records) -- 'STH').
✔ STREETNAME	
✱ STREETTYPE – with standardized domains	• **STREETTYPE**: Standardize street types to statewide schema requirements (fully spelled out, not abbreviations).
✱ SUFFIX	• **SUFFIX**: ~1 record with value = 'NE NE.' Appears to just be a simple case of duplication of this value, correct for future data submissions.
✔ LANDMARKNAME	
✔ UNITTYPE	
✔ UNITID	
✔ PLACENAME	
✱ ZIPCODE	• **ZIPCODE**: ~35083 records with SITEADRESS, but missing ZIPCODE value. Populate if zip code is available in land information system.
✔ ZIP4	
✱ STATE	• **STATE**: Populate this field for all records in the dataset you submit.
✔ SCHOOLDIST – with standardized domains	
✱ SCHOOLDISTNO – with standardized domains	• **SCHOOLDISTNO**: 4 codes (63, 413, 422, and 700) are missing leading '0's. Leading zeroes needs to be added for these codes to conform to domains of the statewide schema.
✔ IMPROVED – with standardized domains	
✔ CNTASSDVALUE	
✔ LNDVALUE	
✔ IMPVALUE	
✔ FORESTVALUE	
✔ ESTFMKVALUE	
✔ NETPRPTA	
✔ GRSPRPTA	
✔ PROPCLASS – with standardized domains	
✔ AUXCLASS – with standardized domains	
✔ ASSDACRES	
✔ DEEDACRES	
✔ GISACRES	
✔ CONAME – with standardized domains	
✔ PARCELFIPS – with standardized domains	
✔ PARCELSRC – with standardized domains	

PARCEL FEATURE CLASS

✔ **Projection met statewide schema**
✔ **County parcel fabric was complete (lacked gaps)**
✔ **Condo modeling met statewide schema**

CO. ZONING DATA

◆ **County general** – with attributes	• (Not administered by county)
◆ **Farmland preservation** – with attributes	• (Not administered by county)
✔ **Shoreland** – with attributes	
✔ **Floodplain** – with attributes	
✔ **Airport protection** – with attributes	

SUBMISSION FORM

✔ **Submission form provided with initial submission**

MISCELLANEOUS

• ~79 records with PARCELID = 'EASEMENT,' 'ALLEY,' 'CLEAR LAKE,' 'DEDICATED,' etc. Populate CONAME, PARCELFIPS, PARCELSRC for these records. Every submitted record in a dataset should, at a minimum, have these three fields populated.
• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA

ATTRIBUTES

✔ **PARCELID**	
✔ **TAXPARCELID**	
✔ **PARCELDATE**	
✔ **TAXROLLYEAR**	
✔ **OWNERNME1**	
✔ **OWNERNME2**	
✱ **PSTLADRESS**	• **PSTLADRESS**: ~54 records with just city, state, zip code. Enter <Null> for parcels without a complete mailing address.
✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**	
✔ **SITEADRESS**	
✱ **ADDNUMPREFIX**	• **ADDNUMPREFIX**: This field should be populated, but the values do not exist. SCO populated in processing. • ~7978 records with a ADDNUMPREFIX present in SITEADRESS field, but this field is entirely blank. Populate ADDNUMPREFIX for future data submissions.
✱ **ADDNUM**	• **ADDNUM**: ~1 records with value = 'AIGD.' This field should only contain numeric values. Clean this field for future submissions.
✔ **ADDNUMSUFFIX**	
✔ **PREFIX** – with standardized domains	
✱ **STREETNAME**	• **STREETNAME**: ~1293 records containing 'CTY RD,' ~723 records containing 'HWY' in this field. Move these elements to PREFIX field and standardize to statewide schema domains. • STREETNAME 'E&M' was parsed incorrectly. Pull 'E' out of PREFIX field and concatenate with '&M' existing in this field. Populate STREETNAME field according to statewide schema specifications for future data submissions.
✱ **STREETTYPE** – with standardized domains	• **STREETTYPE**: Value of 'TR' in this field did not get spelled out to statewide schema domains. Ensure all street types get fully spelled out for future data submissions.
✱ **SUFFIX**	• **SUFFIX**: ~1 record of 'ST' needs to be moved to STREETTYPE field and spelled out.
✱ **LANDMARKNAME**	• **LANDMARKNAME**: Replace string of 'NULL' with true SQL <Null> for future data submissions.
✔ **UNITTYPE**	
✱ **UNITID**	• **UNITID**: 7 records with values in this field and these values are not UNITID. SCO populated with <Null> in processing.
✔ **PLACENAME**	
✱ **ZIPCODE**	• **ZIPCODE**: ~15 records with SITEADRESS, but missing ZIPCODE value. Populate if zip code is available in land info system.
✔ **ZIP4**	
✔ **STATE**	
✔ **SCHOOLDIST** – with standardized domains	
✔ **SCHOOLDISTNO** – with standardized domains	
✔ **IMPROVED** – with standardized domains	• **IMPROVED**: Field exists, but is all <Null> • Populate this field for future data submissions.
✱ **CNTASSDVALUE**	
✔ **LNDVALUE**	
✔ **IMPVALUE**	
✱ **FORESTVALUE**	• **FORESTVALUE**: Replace string of 'NULL' with true SQL <Null> for future data submissions.
✔ **ESTFMKVALUE**	
✔ **NETPRPTA**	
✔ **GRSPRPTA**	
✔ **PROPCLASS** – with standardized domains	
✔ **AUXCLASS** – with standardized domains	
✔ **ASSDACRES**	
✔ **DEEDACRES**	
✔ **GISACRES**	
✔ **CONAME** – with standardized domains	
✔ **PARCELFIPS** – with standardized domains	
✔ **PARCELSRC** – with standardized domains	

PARCEL FEATURE CLASS

✱ **Projection met statewide schema**	• Submission was in NAD 1983 HARN WISCRS Rusk County Feet. Re-project from native projection to statewide schema projection (NAD 1983 HARN Wisconsin TM (Meters)) before submitting.
✔ **County parcel fabric was complete (lacked gaps)**	
✱ **Condo modeling met statewide schema**	• Condos not modeled. Please model condos according to statewide schema (Apx A in the V2 Submission Documentation).

CO. ZONING DATA

✱ **County general** – with attributes	• Single zoning class provided. For future data submissions, break these classes out into a separate GENERAL ZONING feature class. Use number in parentheses as "ZONINGCLASS" field and following text as "DESCRIPTION" field, as in: (10)Resource Conservation District, (2)Commercial District, (3)Forestry District, (4)Industrial District, (5)Planned Unit Development District, (6)Residential-Recreational District, (7)Residential-Recreational District, (8)Residential-Recreational District
✱ **Farmland preservation** – with attributes	• No info provided in submission form. For future data submission, note whether zoning type is "Not administered by county" or "Administered by county but not in GIS format."
✱ **Shoreland** – with attributes	• Single zoning class provided. For future data submissions, break these classes out into a separate SHORELAND ZONING feature class. Use number in parentheses as "ZONINGCLASS" field and following text as "DESCRIPTION" field, as in: (9)Shoreland and Shoreland-Wetland District
✱ **Floodplain** – with attributes	• No info provided in submission form. For future data submission, note whether zoning type is "Not administered by county" or "Administered by county but not in GIS format."
✱ **Airport protection** – with attributes	• No info provided in submission form. For future data submission, note whether zoning type is "Not administered by county" or "Administered by county but not in GIS format."

SUBMISSION FORM

✱ **Submission form provided with initial submission**	• Submission form was provided upon follow-up request from DOA

MISCELLANEOUS

• Join success (PARCELS to ATTR table): (29248/29983 = 97.55%)
• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA

ATTRIBUTES

✔ **PARCELID**

MISCELLANEOUS

- Your efforts to standardize your data to the statewide schema are appreciated.
- Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA

ATTRIBUTES

✔ **PARCELID**	
✔ **TAXPARCELID**	
✱ **PARCELDATE**	• **PARCELDATE**: Replace '-' in date provided with '/'
✔ **TAXROLLYEAR**	
✔ **OWNERNME1**	
✔ **OWNERNME2**	
✱ **PSTLADRESS**	• **PSTLADRESS**: ~22 records with value = " , , " • Enter <Null> for parcels without a complete mailing address.
✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**	
✱ **SITEADRESS**	• **SITEADRESS**: See Appendix for potential issues across multiple address element fields.
✔ **ADDNUMPREFIX**	
✔ **ADDNUM**	
✱ **ADDNUMSUFFIX**	• **ADDNUMSUFFIX**: Values present in this field appear to be prefix directionals and the extensive presence in this field leads us to believe this value has been misplaced (possibly a result of placement within the SITEADRESS field).
✱ **PREFIX** – with standardized domains	• **PREFIX**: Values present meet statewide schema domains. See note in Miscellaneous field below for potential issues across multiple address element fields.
✔ **STREETNAME**	
✔ **STREETTYPE** – with standardized domains	
✔ **SUFFIX**	
✔ **LANDMARKNAME**	
✔ **UNITTYPE**	
✔ **UNITID**	
✔ **PLACENAME**	
✔ **ZIPCODE**	
✔ **ZIP4**	
✔ **STATE**	
✔ **SCHOOLDIST** – with standardized domains	
✔ **SCHOOLDISTNO** – with standardized domains	
✔ **IMPROVED** – with standardized domains

✔ **LNDVALUE**	
✔ **IMPVALUE**	
✔ **FORESTVALUE**	
✔ **ESTFMKVALUE**	
✔ **NETPRPTA**	
✔ **GRSPRPTA**	
✔ **PROPCLASS** – with standardized domains	
✱ **AUXCLASS** – with standardized domains	• **AUXCLASS**: Map current field values to statewide schema. Populate AUXCLASS field according to statewide schema specifications for future data submissions.
✔ **ASSDACRES**	
✔ **DEEDACRES**	
✔ **GISACRES**	
✔ **CONAME** – with standardized domains	
✔ **PARCELFIPS** – with standardized domains	
✔ **PARCELSRC** – with standardized domains	

PARCEL FEATURE CLASS

✔ **Projection met statewide schema**	
✱ **County parcel fabric was complete (lacked gaps)**	• County parcel fabric contains gaps.
✔ **Condo modeling met statewide schema**	

CO. ZONING DATA

✔ **County general** – with attributes	
✱ **Farmland preservation** – with attributes	• No info provided in submission form. For future data submission, note whether zoning type is "Not administered by county" or "Administered by county but not in GIS format."
✱ **Shoreland** – with attributes	• No info provided in submission form. For future data submission, note whether zoning type is "Not administered by county" or "Administered by county but not in GIS format."
✱ **Floodplain** – with attributes	• No info provided in submission form. For future data submission, note whether zoning type is "Not administered by county" or "Administered by county but not in GIS format."
✱ **Airport protection** – with attributes	• No info provided in submission form. For future data submission, note whether zoning type is "Not administered by county" or "Administered by county but not in GIS format."

SUBMISSION FORM

✔ **Submission form provided with initial submission**

MISCELLANEOUS

• Based on address elements provided and element positioning in site address field, there is a potential error that might exist across address element fields. Please see Appendix for further explanation.
• ~258 records without PARCELID values. Populate CONAME, PARCELFIPS, PARCELSRC for these records. Every submitted record in a dataset should, at a minimum, have these three fields populated.
• Also note that if the attribute element's geometry is not a parcel, then the PARCELID field should contain a label of the non-parcel feature (e.g., 'ROW' — see schema specifications)
• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA

ATTRIBUTES

✔ **PARCELID**

✔ **TAXPARCELID**

✱ **PARCELDATE** — • **PARCELDATE**: Field with all the same date (2/21/2016), we assume this is the data cut date. Populate PARCELDATE with the date (MM/DD/YYYY) that best describes when the parcel geometry was last edited. With future data submissions, if date of last geometric edit is unknown, populate PARCELDATE with <Null>. For future updates to individual parcels, maintaining a modification date for the parcel geometry is advised.

✔ **TAXROLLYEAR**

✔ **OWNERNME1**

✔ **OWNERNME2**

✱ **PSTLADRESS** — • **PSTLADRESS**: Some records with value = ' , ', 'WITTENBERG, WI 544990000', 'WIS BIBLE CAMP,,', 'WILDLIFE AREA, , ' etc.
• Enter <Null> for parcels without a complete mailing address.

✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**

✔ **SITEADRESS**

✔   **ADDNUMPREFIX**

✱   **ADDNUM** — • **ADDNUM**: ~1 record with value = '\W5098.' Remove '\' from record and place 'W' in ADDNUMPREFIX field for future data submissions.

✔   **ADDNUMSUFFIX**

✔   **PREFIX** – with standardized domains

✔   **STREETNAME**

✔   **STREETTYPE** – with standardized domains

✔   **SUFFIX**

✔   **LANDMARKNAME**

✔   **UNITTYPE**

✔   **UNITID**

✔ **PLACENAME**

✱ **ZIPCODE** — • **ZIPCODE**: ~7945 records with SITEADRESS, but missing ZIPCODE value. Populate if zip code is available in land information system.

✔ **ZIP4**

✔ **STATE**

✔ **SCHOOLDIST** – with standardized domains

✔ **SCHOOLDISTNO** – with standardized domains

✔ **IMPROVED** – with standardized domains

✔ **CNTASSDVALUE**

✔ **LNDVALUE**

✔ **IMPVALUE**

✔ **FORESTVALUE**

✔ **ESTFMKVALUE**

✔ **NETPRPTA**

✔ **GRSPRPTA**

✔ **PROPCLASS** – with standardized domains

✔ **AUXCLASS** – with standardized domains

✔ **ASSDACRES**

✔ **DEEDACRES**

✔ **GISACRES**

✔ **CONAME** – with standardized domains

✔ **PARCELFIPS** – with standardized domains

✔ **PARCELSRC** – with standardized domains

PARCEL FEATURE CLASS

✱ **Projection met statewide schema** — • Submission was in NAD 1983 HARN Adj WI Shawano Feet. Re-project from native projection to statewide schema projection (NAD 1983 HARN Wisconsin TM (Meters)) before submitting.

✔ **County parcel fabric was complete (lacked gaps)**

✔ **Condo modeling met statewide schema**

CO. ZONING DATA

✱ **County general** – with attributes — • Re-project data to statewide schema specification to allow for seamless integration at statewide level.

✱ **Farmland preservation** – with attributes — • Re-project data to statewide schema specification to allow for seamless integration at statewide level.

✱ **Shoreland** – with attributes — • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

✱ **Floodplain** – with attributes — • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

⬥ **Airport protection** – with attributes — • (Not administered by county)

SUBMISSION FORM

✔ **Submission form provided with initial submission**

MISCELLANEOUS

• ~111 records without PARCELID values. Populate CONAME, PARCELFIPS, PARCELSRC for these records. Every submitted record in a dataset should, at a minimum, have these three fields populated.
• Also note that if the attribute element's geometry is not a parcel, then the PARCELID field should contain a label of the non-parcel feature (e.g., 'ROW' — see schema specifications)
• Push final processed dataset to statewide schema template schema to remove excess fields and allow for seamless aggregation at the statewide level.
• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA

ATTRIBUTES

✔ PARCELID

✔ TAXPARCELID

✔ PARCELDATE

✳ TAXROLLYEAR — • **TAXROLLYEAR**: ~482 records with value = <Null> (excluding records we identified as ROW). If these are newly-created parcels, please annotate as the appropriate year ('2016') in this field.

✔ OWNERNME1

✔ OWNERNME2

✳ PSTLADRESS — • **PSTLADRESS**: Field provided only contains the street portion of the mailing address. For future data submissions, concatenate all components (street address through zip code) of the mailing address into this single field.
• Any values containing only 'city, state, zip' should be converted to <Null> if complete mailing address is not available.

✔ SITEADRESS – PARSED ADDRESS COMPONENTS? — • **PARSED ADDRESSES**: Parse site addresses for future data submissions

✔ SITEADRESS

✳ ADDNUMPREFIX — • **ADDNUMPREFIX**: Populate (as component of parsed addresses)

✳ ADDNUM — • **ADDNUM**: Populate (as component of parsed addresses)

✳ ADDNUMSUFFIX — • **ADDNUMSUFFIX**: Populate (as component of parsed addresses)

✳ PREFIX – with standardized domains — • **PREFIX**: Populate (as component of parsed addresses)

✳ STREETNAME — • **STREETNAME**: Populate (as component of parsed addresses)

✳ STREETTYPE – with standardized domains — • **STREETTYPE**: Populate (as component of parsed addresses)

✳ SUFFIX — • **SUFFIX**: Populate (as component of parsed addresses)

✳ LANDMARKNAME — • **LANDMARKNAME**: Populate (as component of parsed addresses)

✳ UNITTYPE — • **UNITTYPE**: Populate (as component of parsed addresses)

✳ UNITID — • **UNITID**: Populate (as component of parsed addresses)

✳ PLACENAME — • **PLACENAME**: Field mapped is associated with the Mailing Address, not the SITEADRESS. Provide jurisdictional placename associated with SITEADRESS for future data submissions.

✳ ZIPCODE — • **ZIPCODE**: Field mapped is associated with the Mailing Address, not the SITEADRESS. Provide zip code associated with SITEADRESS for future data submissions, if available in land information system.

✳ ZIP4 — • **ZIP4**: Provide zip4 associated with SITEADRESS for future data submissions, if available in land information system.

✳ STATE — • **STATE**: Populate this field for all records in the dataset you submit.

✳ SCHOOLDIST – with standardized domains — • **SCHOOLDIST**: Populate this field for all records in the dataset you submit.

✳ SCHOOLDISTNO – with standardized domains — • **SCHOOLDISTNO**: 1 code (910) is missing the leading '0.' Leading zero needs to be added for this code to conform to domains of the statewide schema.

✳ IMPROVED – with standardized domains — • **IMPROVED**: Field does not exist in data submission. Populate this field for future data submissions.

✳ CNTASSDVALUE — • **CNTASSDVALUE**: Remove ','s, and '.00' from future data submissions

✳ LNDVALUE — • **LNDVALUE**: Remove ','s, and '.00' from future data submissions

✳ IMPVALUE — • **IMPVALUE**: Remove ','s, and '.00' from future data submissions

✔ FORESTVALUE

✔ ESTFMKVALUE

✔ NETPRPTA

✔ GRSPRPTA

✳ PROPCLASS – with standardized domains — • **PROPCLASS**: Field contains a lot of trailing and leading ','s within this field. Remove trailing and leading commas for future data submissions.

✳ AUXCLASS – with standardized domains — • **AUXCLASS**: Field does not exist in V2 submission. Populate AUXCLASS field according to statewide schema specifications for future data submissions.

✔ ASSDACRES

✔ DEEDACRES

✔ GISACRES

✳ CONAME – with standardized domains — • **CONAME**: Field does not exist in V2 submission. Provide county name field for future data submissions.

✳ PARCELFIPS – with standardized domains — • **PARCELFIPS**: Field does not exist in V2 submission. Provide PARCELFIPS field for future data submissions.

✳ PARCELSRC – with standardized domains — • **PARCELSRC**: Field does not exist in V2 submission. Provide PARCELSRC field for future data submissions.

PARCEL FEATURE CLASS

✳ **Projection met statewide schema** — • Submission was in User_Defined_Transverse_Mercator. Re-project from native projection to statewide schema projection (NAD 1983 HARN Wisconsin TM (Meters)) before submitting.

✔ **County parcel fabric was complete (lacked gaps)**

✔ **Condo modeling met statewide schema**

CO. ZONING DATA

◆ **County general** – with attributes — • (Not administered by county)

✳ **Farmland preservation** – with attributes — • Re-project data to statewide schema specification to allow for seamless integration at statewide level.
• Include only records where 'FPA' field = 'yes.'
• Remove excess fields not within the statewide zoning schema to allow for seamless integration at statewide level.

✳ **Shoreland** – with attributes — • Re-project data to statewide schema specification to allow for seamless integration at statewide level.
• Remove excess fields not within the statewide zoning schema to allow for seamless integration at statewide level.

✳ **Floodplain** – with attributes — • Re-project data to statewide schema specification to allow for seamless integration at statewide level.
• Populate ZONINGCLASS field with '<DISTANCE>' field + 'FT DISTANCES.'
• Remove excess fields not within the statewide zoning schema to allow for seamless integration at statewide level.

◆ **Airport protection** – with attributes — • (Not administered by county)

SUBMISSION FORM

✔ **Submission form provided with initial submission**

MISCELLANEOUS

• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA

ATTRIBUTES

✔ **PARCELID**

✔ **TAXPARCELID**

✔ **PARCELDATE**

✔ **TAXROLLYEAR**

✔ **OWNERNME1**

✔ **OWNERNME2**

✱ **PSTLADRESS**
- **PSTLADRESS**: ~486 records with value = " , , ", " , , 00000", " , , CITY, ST ZIP", etc.
- Enter <Null> for parcels without a complete mailing address.

✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**

✱ **SITEADRESS**
- **SITEADRESS**: Some discrepancies were uncovered in this field and the associated address element fields:
- ~4966 records with SITEADRESS field populated, but none of the address elements populated
- ~900 records with STIEADRESS = <Null>, but some address elements are populated
- Some records where address elements did not match up with what was populated in SITEADRESS field.
- Ensure corrections/adjustments are made for future data submissions.

✔   **ADDNUMPREFIX**

✱   **ADDNUM**
- **ADDNUM**: ~3 records where ADDNUMPREFIX is still attached to ADDNUM. Remove these values from ADDNUM field and place in appropriate field for future data submissions.

✔   **ADDNUMSUFFIX**

✔   **PREFIX** – with standardized domains

✔   **STREETNAME**

✱   **STREETTYPE** – with standardized domains
- **STREETTYPE**: Standardize street types to statewide schema requirements (fully spelled out, not abbreviations).

✔   **SUFFIX**

✔   **LANDMARKNAME**

✔   **UNITTYPE**

✔   **UNITID**

✔ **PLACENAME**

✔ **ZIPCODE**

✔ **ZIP4**

• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET **STATEWIDE SCHEMA**

ATTRIBUTES

✔ **PARCELID**	
✔ **TAXPARCELID**	
✳ **PARCELDATE**	• **PARCELDATE**: Remove time stamp from this field for all applicable records
✔ **TAXROLLYEAR**	
✔ **OWNERNME1**	
✔ **OWNERNME2**	
✳ **PSTLADRESS**	• **PSTLADRESS**: Some records with value = " , , ", ", , 00000", ", MADISON, WI 53702" • Enter <Null> for parcels without a complete mailing address.
✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**	
✔ **SITEADRESS**	
✳ **ADDNUMPREFIX**	• **ADDNUMPREFIX**: 'L' value present in this field for SITEADRESS like 'LOT MAIN ST.' Remove values of 'L' from this field for future data submissions.
✳ **ADDNUM**	• **ADDNUM**: 'OT' value present in this field for SITEADRESS like 'LOT MAIN ST.' This field should only contain numeric values. Remove values of 'OT' from this field for future data submissions.
✔ **ADDNUMSUFFIX**	
✔ **PREFIX** – with standardized domains	
✳ **STREETNAME**	• **STREETNAME**: ~11 records with value = 'AIRPORT,' 'PARKING LOT,' 'LANDFILL,' 'TOT PARK,' 'PT OUTLOT 1,' 'EASEMENT BY MC,' 'STORAGE GARAGE,' 'LOT11.' These values are descriptors—not actual street names. Remove these values for future data submissions.
✳ **STREETTYPE** – with standardized domains	• **STREETTYPE**: ~1200 records with values not spelled out ('AVE,' 'BLVD,' 'CT,' 'DR,' 'PL'). Spell out street types to statewide schema domains for future data submissions.
✳ **SUFFIX**	• **SUFFIX**: ~15 records to clean up. • ~15 records with a value of '&' in this field. These are a result of a secondary address number attached to the end of the SITEADRESS. Remove for future data submissions.
✔ **LANDMARKNAME**	
✔ **UNITTYPE**	
✳ **UNITID**	• **UNITID**: ~15 records with a unexpected numeric values in this field (coincide with '&' in SUFFIX field). These are a result of a secondary address number attached to the end of the SITEADRESS. Remove for future data submissions.
✔ **PLACENAME**	
✳ **ZIPCODE**	• **ZIPCODE**: ~12062 records with SITEADRESS, but missing ZIPCODE value. Populate if zip code is available in land information system.
✔ **ZIP4**	
✔ **STATE**	
✔ **SCHOOLDIST** – with standardized domains	
✔ **SCHOOLDISTNO** – with standardized domains	
✔ **IMPROVED** – with standardized domains	
✔ **CNTASSDVALUE**	
✔ **LNDVALUE**	
✔ **IMPVALUE**	
✔ **FORESTVALUE**	
✔ **ESTFMKVALUE**	
✔ **NETPRPTA**	
✔ **GRSPRPTA**	
✔ **PROPCLASS** – with standardized domains	
✔ **AUXCLASS** – with standardized domains	
✔ **ASSDACRES**	
✔ **DEEDACRES**	
✔ **GISACRES**	
✳ **CONAME** – with standardized domains	• **CONAME**: Field should only contain the name of the in which a parcel resides (i.e.,'TREMPEALEAU' not 'TREMPEALEAU COUNTY').
✔ **PARCELFIPS** – with standardized domains	
✔ **PARCELSRC** – with standardized domains	

PARCEL FEATURE CLASS

✔ **Projection met statewide schema**	
✔ **County parcel fabric was complete (lacked gaps)**	
✳ **Condo modeling met statewide schema**	• Condos not modeled. Please model condos according to statewide schema (Appendix A in the V2 Submission Documentation).

CO. ZONING DATA

✔ **County general** – with attributes	
✳ **Farmland preservation** – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
✳ **Shoreland** – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
◆ **Floodplain** – with attributes	• (Not administered by county)
◆ **Airport protection** – with attributes	• (Not administered by county)

SUBMISSION FORM

✔ **Submission form provided with initial submission**	

MISCELLANEOUS

• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA

ATTRIBUTES

MISCELLANEOUS

• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA 🔗

ATTRIBUTES

✳ **PARCELID**	• **PARCELID**: Field only contains values such as 'GAP,' 'COMPLEX.TAX.PARCEL,' 'OVERLAP,' 'ROAD.DEDICATION,' 'SIMPLE.TAX.PARCEL.' The TAXPARCELID field appears to contain individual parcel identifiers. Populate PARCELID with the values currently in TAXPARCELID field for records with PARCELID values = 'COMPLEX.TAX.PARCEL' and 'SIMPLE.TAX.PARCEL'
✓ **TAXPARCELID**	
✳ **PARCELDATE**	• **PARCELDATE**: Field with all the same date (3/24/2016), we assume this is the data cut date. Populate PARCELDATE with the date (MM/DD/YYYY) that best describes when the parcel geometry was last edited. With future data submissions, if date of last geometric edit is unknown, populate PARCELDATE with <Null>. For future updates to individual parcels, maintaining a modification date for the parcel geometry is advised.
✓ **TAXROLLYEAR**	
✓ **OWNERNME1**	
✓ **OWNERNME2**	
✳ **PSTLADRESS**	• **PSTLADRESS**: ~290 records with just city, state, zip code. Enter <Null> for parcels without a complete mailing address.
✓ **SITEADRESS – PARSED ADDRESS COMPONENTS?**	
✳ **SITEADRESS**	• **SITEADRESS**: ~97 records with value = <Null>, but some address elements populated. Resolve discrepancies. • ~130 records containing a value of '1/2' in the address number suffix position, but this value does not exist within the ADDNUMSUFFIX field and in a few cases, the prefix directional does not exist in the PREFIX field either. Resolve discrepancies for future data submissions.
✳ **ADDNUMPREFIX**	• **ADDNUMPREFIX**: ~1 record with SITEADRESS = 'W CTY TK H.' The 'W' ended up in this field, but belongs in the PREFIX field since no address number is present. Make this alteration for future data submissions.
✳ **ADDNUM**	• **ADDNUM**: ~300+ records with ADDNUMSUFFIX still attached (in a few cases, streetname). Move to the appropriate field for future data submissions. • ~41+ records with ADDNUMPREFIX still attached (in a few cases, it looks like maybe a UNITTYPE value (e.g., 'VILLA')). Move to the appropriate field for future data submissions.
✳ **ADDNUMSUFFIX**	• **ADDNUMSUFFIX**: Currently ~94 records with values in this field. Some look to be UNITID values, others potentially address range numbers? Move to the appropriate field for future data submissions.
✓ **PREFIX** – with standardized domains	
✳ **STREETNAME**	• **STREETNAME**: ~268 records with street type still attached to the STREETNAME. Move these values to the appropriate field for future data submissions.
✳ **STREETTYPE** – with standardized domains	• **STREETTYPE**: ~28 records with 'HIGHWAY' in this field. Appears to be for records like 'N3694 OLD HY 89.' These are not considered highways, just streetnames for records such as this. Move 'HIGHWAY' back into STREETNAME field so it reads 'OLD HIGHWAY 89' and remove 'STH' from prefix field for records such as this for future data submissions. • ~3420 records with 'HIGHWAY' in this field. This appears to exist for all records with 'USH,' 'CTH,' 'STH' in the PREFIX field. Remove 'HIGHWAY' from STREETTYPE field for records such as this for future data submissions.
✓ **SUFFIX**	
✓ **LANDMARKNAME**	
✓ **UNITTYPE**	
✓ **UNITID**	
✳ **PLACENAME**	• **PLACENAME**: ~172 records (not 'GAP,' 'OVERLAP,' etc.) with field =<Null>. Populate this field for future data submissions.
✳ **ZIPCODE**	• **ZIPCODE**: ~2 records with SITEADRESS, but missing ZIPCODE value. Populate if zip code is available in land info system.
✓ **ZIP4**	
✓ **STATE**	
✓ **SCHOOLDIST** – with standardized domains	
✳ **SCHOOLDISTNO** – with standardized domains	• **SCHOOLDISTNO**: 1 code (777) are missing the leading '0.' Leading zero needs to be added for this code to conform to domains of the statewide schema.
✓ **IMPROVED** – with standardized domains	
✓ **CNTASSDVALUE**	
✓ **LNDVALUE**	
✓ **IMPVALUE**	
✓ **FORESTVALUE**	
✓ **ESTFMKVALUE**	
✓ **NETPRPTA**	
✓ **GRSPRPTA**	
✓ **PROPCLASS** – with standardized domains	
✳ **AUXCLASS** – with standardized domains	• **AUXCLASS**: Map current field values to statewide schema. Populate AUXCLASS field according to statewide schema specifications for future data submissions.
✓ **ASSDACRES**	
✓ **DEEDACRES**	
✓ **GISACRES**	
✓ **CONAME** – with standardized domains	
✓ **PARCELFIPS** – with standardized domains	
✓ **PARCELSRC** – with standardized domains	

PARCEL FEATURE CLASS

✓ **Projection met statewide schema**	
✓ **County parcel fabric was complete (lacked gaps)**

SUBMISSION FORM

✔ **Submission form provided with initial submission**

MISCELLANEOUS

• Push final processed dataset to statewide schema template schema to remove excess fields, ensure field names are complete, and allow for seamless aggregation at the statewide level.

• Remove excess fields not within the statewide zoning schema to allow for seamless integration at statewide level.

• Your efforts to standardize your data to the statewide schema are appreciated.

• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET **STATEWIDE SCHEMA**

ATTRIBUTES

✔ **PARCELID**

✔ **TAXPARCELID**

✱ **PARCELDATE** | • **PARCELDATE**: Field with all the same date (01/01/2016), we assume this is the data cut date. Populate PARCELDATE with the date (MM/DD/YYYY) that best describes when the parcel geometry was last edited. With future data submissions, if date of last geometric edit is unknown, populate PARCELDATE with <Null>. For future updates to individual parcels, maintaining a modification date for the parcel geometry is advised.

✔ **TAXROLLYEAR**

✔ **OWNERNME1**

✔ **OWNERNME2**

✱ **PSTLADRESS** | • **PSTLADRESS**: ~66 records with just city, state, zip. Enter <Null> for parcels without a complete mailing address.

✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**

✔ **SITEADRESS**

✔ **ADDNUMPREFIX**

✱ **ADDNUM** | • **ADDNUM**: ~10 records with values = '22ND,' '21ST,' '20TH,' '34TH,' and '22ND.' These are actually STREETNAME values, (note that the STREETTYPE values for these records ended up in the STREETNAME field). Move to appropriate field.
• ~15 records containing '-'. These are a result of an address range existing in the SITEADRESS field, (note that the secondary address number ended up in STREETNAME field). Remove '-' from ADDNUM field and secondary address number from STREETNAME field for future data submissions.
• ~3 records containing '/'. These are a result of multiple address numbers existing in the SITEADRESS field. Remove '/' from ADDNUM field and secondary address number for future data submissions.
• ~3 records still contain address number suffix value of 'A.' Move to appropriate field for future data submissions.

✔ **ADDNUMSUFFIX**

✔ **PREFIX** – with standardized domains

✱ **STREETNAME** | • **STREETNAME**: Field contains some elements that should be standardized and placed in PREFIX field (i.e., 'COUNTY RD' - 3 records, 'STATE RD' - 1 records). Move these elements to appropriate field and standardize to statewide schema domains.

✱ **STREETTYPE** – with standardized domains | • **STREETTYPE**: Some records with contain duplication of STREETNAME values, presence of 'HIGHWAY,' etc. (See query in Miscellaneous field below). Make corrections for future data submissions.

✔ **SUFFIX**

✔ **LANDMARKNAME**

✔ **UNITTYPE**

✔ **UNITID**

✔ **PLACENAME**

✱ **ZIPCODE** | • **ZIPCODE**: ~16003 records with SITEADRESS, but missing ZIPCODE value. Populate if zip code is available in land info system.

✔ **ZIP4**

PARCEL FEATURE CLASS

✔ **Projection met statewide schema**

✔ **County parcel fabric was complete (lacked gaps)**

✔ **Condo modeling met statewide schema**

CO. ZONING DATA

✔ **County general** – with attributes

◆ **Farmland preservation** – with attributes | • (Not administered by county)

✱ **Shoreland** – with attributes | • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

✱ **Floodplain** – with attributes | • Populate ZONINGCLASS field with '<FLD_ZONE>' field + "-" + '<FLOODWAY>'
• Populate LINK field. For V2, SCO populated with https://www.municode.com/library/wi/waushara_county/codes/code_of_ordinances?nodeId=COOR_CH18FL
• Push layer into statewide zoning schema template to remove excess fields and allow for seamless statewide integration.

◆ **Airport protection** – with attributes | • (Not administered by county)

SUBMISSION FORM

✔ **Submission form provided with initial submission**

MISCELLANEOUS

• Here is the STREETTYPE query used:
• STREETTYPE = '640' OR STREETTYPE = 'DEER' OR STREETTYPE = 'E' OR STREETTYPE = 'ELM' OR STREETTYPE = 'FORK' OR STREETTYPE = 'HIGHWAY' OR STREETTYPE = 'HURON' OR STREETTYPE = 'HWY' OR STREETTYPE = 'LNE' OR STREETTYPE = 'NORTHWESTERN' OR STREETTYPE = 'OAKHAVEN' OR STREETTYPE = 'RD' OR STREETTYPE = 'SANDCREST' OR STREETTYPE = 'TR' OR STREETTYPE = 'VALLE' OR STREETTYPE = 'WAUSHARA'
• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET **STATEWIDE SCHEMA**

ATTRIBUTES

✔ PARCELID
✔ TAXPARCELID
✔ PARCELDATE
✔ TAXROLLYEAR
✔ OWNERNME1
✔ OWNERNME2
✔ PSTLADRESS
✔ SITEADRESS – PARSED ADDRESS COMPONENTS?
✔ SITEADRESS
   ADDNUMPREFIX

✳ ADDNUM
- **ADDNUM**: ~1207 records with value = '0' (which does not appear to be a true address number). Convert these values to <Null> for future data submissions.
- ~39 records with ADDNUMSUFFIX value still attached. Remove these values from ADDNUM field and place in appropriate field for future data submissions. (Note: It is probably best to do this after steps mentioned in ADDNUMSUFFIX field.)

✳ ADDNUMSUFFIX
- **ADDNUMSUFFIX**: ~821 records with this field populated, but this value is duplicated in UNITID field. These values appear to be UNITIDs. If so, delete from ADDNUMSUFFIX and instead Enter <Null> in this field for future data submissions.

✔   PREFIX – with standardized domains
✔   STREETNAME
✳   STREETTYPE – with standardized domains
- **STREETTYPE**: For ~1207 records mentioned in ADDNUM field, these records did not have STREETTYPE field populated. Populate these values for future data submissions.

✔   SUFFIX
✳   LANDMARKNAME
- **LANDMARKNAME**: See note in UNITTYPE field
✳   UNITTYPE
- **UNITTYPE**: For records with UNITTYPE populated, as well as LANDMARKNAME field populated, convert values in UNITTYPE field to <Null> for future data submissions. This appears to be property descriptors / business types and not true UNITTYPEs.
✳   UNITID
- **UNITID**: ~4 records in this field still contain UNITTYPE value. Move this value to appropriate field for future data submissions.
- ~21 records with values like '1-DEC,' '2-SEP,' '2-OCT,' etc. Not sure what these are from, but SCO stripped off the month value and kept the numeric value as UNITID. Populate UNITID field according to statewide schema specifications for future data submissions.

✔ PLACENAME
✳ ZIPCODE
- **ZIPCODE**: ~15185 records with SITEADRESS, but missing ZIPCODE value. Populate if zip code is available in land information system.

✔ ZIP4
✔ STATE
✔ SCHOOLDIST – with standardized domains
✔ SCHOOLDISTNO – with standardized domains
✔ IMPROVED – with standardized domains
- **IMPROVED**: ~6855 records with a value of <Null>, but IMPVALUE field is populated. Resolve discrepancy for future data submissions.

✔ CNTASSDVALUE
✔ LNDVALUE
✔ IMPVALUE
✔ FORESTVALUE
✔ ESTFMKVALUE
✔ NETPRPTA
✔ GRSPRPTA
✔ PROPCLASS – with standardized domains
✔ AUXCLASS – with standardized domains
✔ ASSDACRES
✔ DEEDACRES
✔ GISACRES
✔ CONAME – with standardized domains
✳ PARCELFIPS – with standardized domains
- **PARCELFIPS**: ~1272 records with value = '015.' We know this is for the parcels the county submitted for City of Menasha. CONAME was populated correctly (the county in which the parcels reside). The FIPS code in this field should match the name in the PARCELSRC field. Populate PARCELFIPS field according to statewide schema specifications for future data submissions.

✔ PARCELSRC – with standardized domains

PARCEL FEATURE CLASS

✔ Projection met statewide schema
✔ County parcel fabric was complete (lacked gaps)
✔ Condo modeling met statewide schema

✔ Submission form provided with initial submission

MISCELLANEOUS

- Your efforts to standardize your data to the statewide schema are appreciated.
- Thank you for sharing your data to help make the V2 Project a success!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA

ATTRIBUTES

✔ **PARCELID**

✔ **TAXPARCELID**

✱ **PARCELDATE** — • **PARCELDATE**: Field with all the same date (only year—'2015'). This field only needs to be populated if a parcel edit/creation date is available. Populate PARCELDATE with the date (MM/DD/YYYY) that best describes when the parcel geometry was last edited. With future data submissions, if date of last geometric edit is unknown, populate PARCELDATE with <Null>. For future updates to individual parcels, maintaining a modification date for the parcel geometry is advised.

✔ **TAXROLLYEAR**

✔ **OWNERNME1**

✔ **OWNERNME2**

✱ **PSTLADRESS** —
• **PSTLADRESS**: Some problems/issues present within this field.
• Some instances of field only containing 'CITY,' 'ST,' 'ZIP' values. Enter <Null> for parcels without a complete mailing address.
• Some instances of this field containing all or a portion of owner name, none of the street address and then the city, state, zip code (e.g., 'LAURA L MARSHFIELD WI 54449'). We suspect this is the result of a mistake in concatenation. Correct this issue to ensure full PSTLADDRESS is available for future data submissions.

✔ **SITEADRESS – PARSED ADDRESS COMPONENTS?**

✔ **SITEADRESS**

PARCEL FEATURE CLASS

✱ **Projection met statewide schema** — • Submission was in NAD 1983 HARN ADJ WI WOOD Feet (Feet). Re-project from native projection to statewide schema projection (NAD 1983 HARN Wisconsin TM (Meters)) before submitting.

✔ **County parcel fabric was complete (lacked gaps)**

✔ **Condo modeling met statewide schema**

CO. ZONING DATA

◆ **County general** – with attributes — • (Not administered by county)

◆ **Farmland preservation** – with attributes — • (Not administered by county)

✱ **Shoreland** – with attributes — • Submit zoning data as a GIS layer according to statewide schema (lowest priority)

✱ **Floodplain** – with attributes — • Push layer into statewide zoning schema template to remove excess fields and allow for seamless integration at statewide level.

◆ **Airport protection** – with attributes — • (Not administered by county)

SUBMISSION FORM

✔ **Submission form provided with initial submission**

MISCELLANEOUS

• Your efforts to standardize your data to the statewide schema are appreciated.
• Thank you for sharing your data to help make the V2 Project a success!
