SUBMISSION FORM

- ✓ **Submission form provided with initial submission**

MISCELLANEOUS

- The comments provided in this *V3 Observation Report* describe deviations from the statewide schema that require your attention. In order for your county to meet the Searchable Format requirement listed under state statute 59.72(2)(a), you will need to make the corrections noted on this report, and ensure that the datasets submitted in the future exactly match DOA's schema specifications.
- You are welcome to submit feedback on the statewide schema, data submission process, and geoprocessing tools at any time.
- Thank you for the work you did to prepare your data submission. We appreciate your efforts, as will the end-users of the statewide parcel layer!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA **PARCEL FEATURE CLASS**

WITH TAX ROLL DATA

✓ PARCELID	
* TAXPARCELID	• TAXPARCELID: Approximately 532 records with a value in this field that is identical to PARCELID. This field must exist in the submitted dataset, however, it need not be populated. For these 532 records, do not provide values in TAXPARCELID field unless they are "different" from those in PARCELID field. If TAXPARCELID is the same as PARCELID, enter a true SQL <Null> for tax parcel ID.
✓ PARCELDATE	
✓ TAXROLLYEAR	
✓ OWNERNME1	
✓ OWNERNME2	
✓ PSTLADDRESS	
✓ SITEADDRESS	
✓ ADDNUMPREFIX	
✓ ADDNUM	
* ADDNUMSUFFIX	• ADDNUMSUFFIX: Instances of prefix directionals (W,N,E) and secondary address numbers (802, 414, etc.) erroneously present in ADDNUMSEFFIX field. Delete secondary address numbers from ADDNUMSUFFIX. Move directional values into PREFIX field.
✓ PREFIX – with standardized domains	
✓ STREETNAME	
✓ STREETTYPE – with standardized domains	
✓ SUFFIX	
✓ LANDMARKNAME	
* UNITTYPE	• UNITTYPE: 1 instance of 'RD' present. Move value into STREETTYPE field and spell out.
✓ UNITID	
✓ PLACENAME	
✓ ZIPCODE	
✓ ZIP4	
✓ STATE	
✓ SCHOOLDIST – with standardized domains	
✓ SCHOOLDISTNO – with standardized domains	
✓ IMPROVED – with standardized domains	
✓ CNTASSDVALUE	
✓ LNDVALUE	
✓ IMPVALUE	
✓ FORESTVALUE	
✓ ESTFMKVALUE	
✓ NETPRPTA	
✓ GRSRPTA	
✓ PROPCLASS – with standardized domains	
✓ AUXCLASS – with standardized domains	
✓ ASSDACRES	
✓ DEEDACRES	
✓ GISACRES	
✓ CONAME – with standardized domains	
✓ PARCELFIIPS – with standardized domains	
✓ PARCELSRC – with standardized domains	
✓ –Projection met statewide schema	
✓ –County parcel fabric was complete (lacked gaps)	
✓ –Condo modeling met statewide schema	

CO. ZONING DATA

* County general – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
* Farmland preservation – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
* Shoreland – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
* Floodplain – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
* Airport protection – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)

OTHER LAYERS

* Other Layers – with standardized file names	• Failed to include "Other Layers" with initial data submission. For future data submissions, be sure to include the other layers with your submission when you submit your parcel/tax roll data.

MISCELLANEOUS

- The comments provided in this *V3 Observation Report* describe deviations from the statewide schema that require your attention. In order for your county to meet the Searchable Format requirement listed under state statute 59.72(2)(a), you will need to make the corrections noted on this report, and ensure that the datasets submitted in the future exactly match DOA's schema specifications.
- You are welcome to submit feedback on the statewide schema, data submission process, and geoprocessing tools at any time.
- Thank you for the work you did to prepare your data submission. We appreciate your efforts, as will the end-users of the statewide parcel layer!

✓ Other Layers – with standardized file names

SUBMISSION FORM

✓ Submission form provided with initial submission
--

MISCELLANEOUS

- The comments provided in this V3 *Observation Report* describe deviations from the statewide schema that require your attention. In order for your county to meet the Searchable Format requirement listed under state statute 59.72(2)(a), you will need to make the corrections noted on this report, and ensure that the datasets submitted in the future exactly match DOA's schema specifications.
- It is recommended that you run the "Null Fields and Set to Upper-Case Tool" (<http://www.sco.wisc.edu/parcels/tools/#NullFields>) over your parcel dataset prior to submission in order to remove instances of 'NULL' (spelled out as a string of text characters) and blank strings.
- You are welcome to submit feedback on the statewide schema, data submission process, and geoprocessing tools at any time.
- Thank you for the work you did to prepare your data submission. We appreciate your efforts, as will the end-users of the statewide parcel layer!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA **PARCEL FEATURE CLASS**
WITH TAX ROLL DATA

✓ PARCELID	
* TAXPARCELID	• TAXPARCELID: This field must exist in the submitted dataset, however, it need not be populated. Do not provide values in TAXPARCELID field unless they are "different" from those in PARCELID field. If TAXPARCELID is the same as PARCELID, enter a true SQL <Null> for tax parcel ID.
* PARCELDATE	• PARCELDATE: Records contain timestamp attached to the end of values. Remove timestamp from the end of this field for future data submissions.
✓ TAXROLLYEAR	
✓ OWNERNME1	
✓ OWNERNME2	
✓ PSTLADDRESS	
✓ SITEADDRESS	
✓ ADDNUMPREFIX	
✓ ADDNUM	
✓ ADDNUMSUFFIX	
✓ PREFIX – with standardized domains	
* STREETNAME	• STREETNAME: Approximately 4 records with a street name containing 'HWY.' Move PREFIX value into appropriate field and standardize to statewide schema domains.
✓ STREETTYPE – with standardized domains	
✓ SUFFIX	
✓ LANDMARKNAME	
✓ UNITYTYPE	
✓ UNITID	
✓ PLACENAME	
✓ ZIPCODE	
✓ ZIP4	
✓ STATE	
✓ SCHOOLDIST – with standardized domains

✓ LNDVALUE	
✓ IMPVALUE	
✓ FORESTVALUE	
✓ ESTFMKVALUE	
✓ NETPRPTA	
✓ GRSRPTA	
✓ PROPCLASS – with standardized domains	
✓ AUXCLASS – with standardized domains	
✓ ASSDACRES	
✓ DEEDACRES	
✓ GISACRES	
✓ CONAME – with standardized domains	
✓ PARCELFIPS – with standardized domains	
✓ PARCELSRC – with standardized domains	
✓ –Projection met statewide schema	
✓ –County parcel fabric was complete (lacked gaps)	
* –Condo modeling met statewide schema	• Condo model type not specified on Submission Form. For future data submissions, indicate type of condo modeling on Submission Form. Ensure all condos are modeled uniformly according to statewide schema specs for condo modeling in Appendix A of the V3 Submission Documentation. Spot checks found no stacked parcels found but county appears to practice discrete model (Condo Type #1–Discrete).

CO. ZONING DATA

* County general – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
* Farmland preservation – with attributes	• Ensure that submitted feature class is in statewide zoning schema to enable seamless integration into statewide layer.
* Shoreland – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
* Floodplain – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
♦ Airport protection – with attributes	• (Not administered by county)

OTHER LAYERS

✓ Other Layers – with standardized file names

SUBMISSION FORM

* Submission form provided with initial submission	• No Submission Form with initial data submittal. Submission form was provided upon follow-up request from DOA. Please verify that ALL information is complete before submitting.
--	---

MISCELLANEOUS

- The comments provided in this *V3 Observation Report* describe deviations from the statewide schema that require your attention. In order for your county to meet the Searchable Format requirement listed under state statute 59.72(2)(a), you will need to make the corrections noted on this report, and ensure that the datasets submitted in the future exactly match DOA's schema specifications.
- You are welcome to submit feedback on the statewide schema, data submission process, and geoprocessing tools at any time.
- Thank you for the work you did to prepare your data submission. We appreciate your efforts, as will the end-users of the statewide parcel layer!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA **PARCEL FEATURE CLASS**
WITH TAX ROLL DATA

✓ PARCELID	
* TAXPARCELID	• TAXPARCELID: Do not provide values unless they are *different* from those in PARCELID field. If TAXPARCELID is the same as PARCELID, enter a true SQL <Null> in TAXPARCELID field.
✓ PARCELDATE	
✓ TAXROLLYEAR	
✓ OWNERNME1	
✓ OWNERNME2	
* PSTLADDRESS	• PSTLADDRESS: Approximately 110 records with values like 'BRONSON BLVD FENNIMORE WI 53809,' 'BOSCOBEL WI 53805,' 'HARRY SCHMITZ BEETOWN WI 53802,' 'POTOSI WI 53820,' 'PATCH GROVE WI 53817,' 'CASSVILLE WI 53806,' etc. Clean records by entering a complete mailing address, or enter <Null> for parcels without a *complete* mailing address.
✓ SITEADDRESS	
✓ ADDNUMPREFIX	
✓ ADDNUM	
* ADDNUMSUFFIX	• ADDNUMSUFFIX: Approximately 21 records with values like '990,' '960,' '308,' etc. These appear to be secondary address numbers. Remove these secondary address numbers for future data submissions.
* PREFIX – with standardized domains	• PREFIX: Approximately 4 records with values of 'CTY' and 'COUNTY ROAD.' The majority are records with a value of 'CTH.' Per the V3 Submission Documentation, "Usage should be consistent throughout the countywide dataset. Do not use multiple highway domain spelling conventions to designate the same particular highway type."
* STREETNAME	• STREETNAME: Approximately 245 records with values that still have PREFIX values or STREETTYPE values attached. The easiest way to locate these is to run a summary of the STREETNAME field and create a query after going through the results and locating records with the conditions noted above. Move prefix values into PREFIX field and standardize to statewide schema domains. Also move street type values to STREETTYPE field and spell out for future data submissions.
* STREETTYPE – with standardized domains	• STREETTYPE: Approximately 1 record with a value of 'W,' which appears to be a suffix directional. Move into SUFFIX field.
✓ SUFFIX	
✓ LANDMARKNAME	
✓ UNITTYPE	
* UNITID	• UNITID: Approximately 58 records with values like 'BLDGS,' 'CELL TOWER,' 'HOUSE,' 'BEIGE,' 'SP163644,' '2007054SP,' '465363-05,' etc. These do not appear to be UNITID values. If, upon examination, you feel these values should be maintained, move them to the LANDMARKNAME field. Otherwise, remove/convert them to <Null> for future data submissions.
✓ PLACENAME	
✓ ZIPCODE	
✓ ZIP4	
✓ STATE	
✓ SCHOOLDIST – with standardized domains	
✓ SCHOOLDISTNO – with standardized domains	
✓ IMPROVED – with standardized domains	
✓ CNTASSDVALUE	
✓ LNDVALUE	
✓ IMPVALUE	
✓ FORESTVALUE	
✓ ESTFMKVALUE	
✓ NETPRPTA	
✓ GRSRPTA	
✓ PROPCLASS – with standardized domains	
✓ AUXCLASS – with standardized domains	
✓ ASSDACRES	
✓ DEEDACRES	
✓ GISACRES	
✓ CONAME – with standardized domains

✓ –Projection met statewide schema	
✓ –County parcel fabric was complete (lacked gaps)	
✓ –Condo modeling met statewide schema	

CO. ZONING DATA

✓ County general – with attributes	
* Farmland preservation – with attributes	• Push current feature class into statewide zoning schema to remove excess fields to ensure field name, data types, and field lengths match schema requirements. Also, JURISDICTION field should not include the word 'COUNTY' at the end.
* Shoreland – with attributes	• Same comments as above (for Farmland preservation zoning).
* Floodplain – with attributes	• Follow the "FEMA Floodplain Guide" (www.sco.wisc.edu/parcels/tools/FEMAFloodplain/FEMA-Floodplain_Guide.pdf) for processing layer from the native FEMA dataset. • For future data submissions, re-project parcels from native projection to statewide schema projection *prior to* field mapping or pushing into the provided statewide schema template. Use the "Parcel Schema Field Mapping Guide" to ensure projection issues will not result: www.sco.wisc.edu/parcels/tools/FieldMapping/Parcel_Schema_Field_Mapping_Guide.pdf
♦ Airport protection – with attributes	• (Not administered by county)

OTHER LAYERS

* Other Layers – with standardized file names	• Failed to include "Other Layers" with initial data submission. For future data submissions, be sure to include the other layers.

MISCELLANEOUS

- The comments provided in this V3 *Observation Report* describe deviations from the statewide schema that require your attention. In order for your county to meet the Searchable Format requirement listed under state statute 59.72(2)(a), you will need to make the corrections noted on this report, and ensure that the datasets submitted in the future exactly match DOA's schema specifications.
- You are welcome to submit feedback on the statewide schema, data submission process, and geoprocessing tools at any time.
- Thank you for the work you did to prepare your data submission. We appreciate your efforts, as will the end-users of the statewide parcel layer!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA **PARCEL FEATURE CLASS**

WITH TAX ROLL DATA

✓ PARCELID	
✓ TAXPARCELID	
* PARCELDATE	• PARCELDATE: Approximately 30317 records with a value of '01000101.' If PARCELDATE value is unknown, convert to <Null> for future data submissions.
✓ TAXROLLYEAR	
✓ OWNERNME1	
✓ OWNERNME2	
* PSTLADDRESS	• PSTLADDRESS: Approximately 13 records with values like 'UNKNOWN <CITY> <ST> <ZIP>.' Mailing address values should not be incomplete. Clean these records by entering a complete mailing address in the PSTLADDRESS field, or enter <Null> for parcels without a *complete* mailing address.
✓ SITEADDRESS	
✓ ADDNUMPREFIX	
✓ ADDNUM	
✓ ADDNUMSUFFIX	
✓ PREFIX – with standardized domains	
✓ STREETNAME	
✓ STREETTYPE – with standardized domains	
✓ SUFFIX	
✓ LANDMARKNAME	
✓ UNITYTYPE	
✓ UNITID	
✓ PLACENAME	
✓ ZIPCODE	
✓ ZIP4	
✓ STATE	
✓ SCHOOLDIST – with standardized domains	
✓ SCHOOLDISTNO – with standardized domains	
✓ IMPROVED – with standardized domains	
✓ CNTASSDVALUE	
✓ LNDVALUE	
✓ IMPVALUE	
✓ FORESTVALUE

ACTION REQUIRED TO MEET STATEWIDE SCHEMA **PARCEL FEATURE CLASS**

WITH TAX ROLL DATA

✓ PARCELID	
* TAXPARCELID	• TAXPARCELID: This field must exist in the submitted dataset, however, it need not be populated. Do not provide values in TAXPARCELID field unless they are "different" from those in PARCELID field. If TAXPARCELID is the same as PARCELID, enter a true SQL <Null> for tax parcel ID.
✓ PARCELDATE	
✓ TAXROLLYEAR	
✓ OWNERNME1	
✓ OWNERNME2	
* PSTLADDRESS	• PSTLADDRESS: Approximately 14 records with a value of only 'WI.' Clean these records by entering a complete mailing address in the PSTLADDRESS field, or enter <Null> for parcels without a "complete" mailing address. • PSTLADDRESS for a large number of records appeared to have some type of OWNERNAME value attached to the front. This does not include those records with 'C/O' or 'ATTN:'. Clean these mailing address values as appropriate to ensure your data matches statewide schema requirements.
* SITEADDRESS	• SITEADDRESS: In addition to the SITEADDRESS, this field also contains city, state, and zip. This field should ONLY contain the street portion of the SITEADDRESS. Remove excess information (city, state, zip) for future data submissions. • Approximately 2694 records that contain 'STATE HIGHWAY' or 'COUNTY HIGHWAY' as part of STREETNAME value. Per the V3 Submission Documentation, "HIGHWAY" is typically a prefix. Remove those values from STREETNAME and place in PREFIX.
✓ ADDNUMPREFIX	
✓ ADDNUM	
✓ ADDNUMSUFFIX	
✓ PREFIX – with standardized domains	
✓ STREETNAME	
✓ STREETTYPE – with standardized domains	
✓ SUFFIX	
✓ LANDMARKNAME

✓ DEEDACRES	
✓ GISACRES	
✓ CONAME – with standardized domains	
✓ PARCELFIPS – with standardized domains	
✓ PARCELSRC – with standardized domains	
✓ –Projection met statewide schema	
✓ –County parcel fabric was complete (lacked gaps)	• Congratulations, it looks like you've completed the digitization of the county's parcels since V2!
* –Condo modeling met statewide schema	• Condo model type not specified on Submission Form. For future data submissions, indicate type of condo modeling. Ensure all condos are modeled uniformly according to schema specs in Appendix A of the V3 Submission Documentation. Spot checks found no stacked parcels. County appears to practice "Condo Type #1–Discrete" model.

CO. ZONING DATA

* County general – with attributes	• For records with ZONINGCLASS = 'CITY OF ANTIGO' the DESCRIPTION field has a value of 'General Commercial District.' SCO populated DESCRIPTION with 'CITY OF ANTIGO.' For future data submissions, ensure that the field DESCRIPTION matches up with the corresponding ZONINGCLASS values.
✓ Farmland preservation – with attributes	
* Shoreland – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
✓ Floodplain – with attributes	
* Airport protection – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)

OTHER LAYERS

* Other Layers – with standardized file names	• The Other Layers submitted did not follow the required naming convention from Appendix E of the V3 Submission Documentation. Follow the naming convention for future submissions. Include the year (YYYY) of content in the file name.

SUBMISSION FORM

✓ Submission form provided with initial submission
--

MISCELLANEOUS

- The comments provided in this V3 *Observation Report* describe deviations from the statewide schema that require your attention. In order for your county to meet the Searchable Format requirement listed under state statute 59.72(2)(a), you will need to make the corrections noted on this report, and ensure that the datasets submitted in the future exactly match DOA's schema specifications.
- You are welcome to submit feedback on the statewide schema, data submission process, and geoprocessing tools at any time.
- Thank you for the work you did to prepare your data submission. We appreciate your efforts, as will the end-users of the statewide parcel layer!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA **PARCEL FEATURE CLASS**

WITH TAX ROLL DATA

✓ PARCELID	
* TAXPARCELID	• TAXPARCELID: This field must exist in the submitted dataset, however, it need not be populated. Do not provide values in TAXPARCELID field unless they are "different" from those in PARCELID field. If TAXPARCELID is the same as PARCELID, enter a true SQL <Null> for tax parcel ID.
✓ PARCELDATE	
✓ TAXROLLYEAR	
✓ OWNERNME1	
✓ OWNERNME2	
✓ PSTLADDRESS	
✓ SITEADDRESS	
✓ ADDNUMPREFIX	
✓ ADDNUM	
✓ ADDNUMSUFFIX	
✓ PREFIX – with standardized domains	
✓ STREETNAME	
✓ STREETTYPE – with standardized domains	
✓ SUFFIX	
✓ LANDMARKNAME	
✓ UNITTYPE	
✓ UNITID	
* PLACENAME	• PLACENAME: Approximately 3 tax parcels with a value of <Null>. This value was aquired from neighboring parcels. Ensure this field is fully populated for future data submissions.
✓ ZIPCODE	
✓ ZIP4	
✓ STATE	
✓ SCHOOLDIST – with standardized domains	
✓ SCHOOLDISTNO – with standardized domains	
✓ IMPROVED – with standardized domains	
✓ CNTASSDVALUE	
✓ LNDVALUE	
✓ IMPVALUE	
✓ FORESTVALUE	
* ESTFMKVALUE	• ESTFMKVALUE: Approximately 12,887 records with a value of '0.' As discussed in email correspondence, please populate these values with <Null> as opposed to '0' as appropriate for future data submissions.
✓ NETPRPTA	
✓ GRSPRPTA	
✓ PROPCLASS – with standardized domains	
✓ AUXCLASS – with standardized domains	
✓ ASSDACRES	
✓ DEEDACRES	
✓ GISACRES	
✓ CONAME – with standardized domains	
✓ PARCELFIPS – with standardized domains	
✓ PARCELSRC – with standardized domains	
✓ –Projection met statewide schema	
✓ –County parcel fabric was complete (lacked gaps)	
✓ –Condo modeling met statewide schema	

CO. ZONING DATA

* County general – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
* Farmland preservation – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
* Shoreland – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
* Floodplain – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
* Airport protection – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)

OTHER LAYERS

* Other Layers – with standardized file names	• The Other Layers submitted did not follow the required naming convention from Appendix E of the V3 Submission Documentation. Follow the naming convention for future submissions.

✓ CNTASSDVALUE	
✓ LNDVALUE	
✓ IMPVALUE	
✓ FORESTVALUE	
✓ ESTFMKVALUE	
✓ NETPRPTA	
✓ GRSRPTA	
* PROPCLASS – with standardized domains	• PROPCLASS: Approximately 1 record with a value of 'X2.' Move this value to the AUXCLASS field for future data submissions.
✓ AUXCLASS – with standardized domains	
✓ ASSDACRES	
✓ DEEDACRES	
✓ GISACRES	
✓ CONAME – with standardized domains	
✓ PARCELFIPS – with standardized domains	
✓ PARCELSRC – with standardized domains	
✓ –Projection met statewide schema	
* –County parcel fabric was complete (lacked gaps)	• County parcel fabric contains gaps.
✓ –Condo modeling met statewide schema	

CO. ZONING DATA

* County general – with attributes	• Submission was in NAD_1983_2011_Wisconsin_TM. Re-project to statewide schema specs (NAD_1983 HARN_Wisconsin_TM (Meters)) for future data submissions.
♦ Farmland preservation – with attributes	• (Not administered by county)
♦ Shoreland – with attributes	• (Not administered by county)
♦ Floodplain – with attributes	• (Not administered by county)
♦ Airport protection – with attributes	• (Not administered by county)

OTHER LAYERS

* Other Layers – with standardized file names	• Failed to include "Other Layers" with initial data submission. For future data submissions, be sure to include the other layers with your submission when you submit your parcel/tax roll data. As part of this requirement, include the year (YYYY) of content in the file name.

SUBMISSION FORM

✓ Submission form provided with initial submission

MISCELLANEOUS

- The comments provided in this V3 *Observation Report* describe deviations from the statewide schema that require your attention. In order for your county to meet the Searchable Format requirement listed under state statute 59.72(2)(a), you will need to make the corrections noted on this report, and ensure that the datasets submitted in the future exactly match DOA's schema specifications.
- You are welcome to submit feedback on the statewide schema, data submission process, and geoprocessing tools at any time.
- Thank you for the work you did to prepare your data submission. We appreciate your efforts, as will the end-users of the statewide parcel layer!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA **PARCEL FEATURE CLASS**

WITH TAX ROLL DATA

✓ PARCELID	
* TAXPARCELID	• TAXPARCELID: Do not provide values unless they are *different* from those in PARCELID field. If TAXPARCELID is the same as PARCELID, enter a true SQL <Null> in TAXPARCELID field.
✓ PARCELDATE	
✓ TAXROLLYEAR	
✓ OWNERNAME1	
✓ OWNERNAME2	
✓ PSTLADDRESS	
✓ SITEADDRESS	
✓ ADDNUMPREFIX	
✓ ADDNUM	
✓ ADDNUMSUFFIX	
✓ PREFIX – with standardized domains	
* STREETNAME	• STREETNAME: Approximately 7 records with STREETTYPE still attached, including 'MERCER LN,' 'BOGUS RD,' 'LAKE PORT RD,' 'SILVER BIRCH RD,' 'RUSTAD LN,' 'PEPIN VIEW SOUTH LANE.' Move STREETTYPE value to appropriate field and spell out. • Approximately 37 records with values like 'ALONG AUTH ST BY WATER TOWER,' 'BY BIKE TRAIL & BALL FIELD,' 'N OF USH 10,' 'ON COUNTY LN BY CTH F,' etc. These are not true site addresses. STREETNAME should not contain excess property descriptors. Remove or <Null> out all address elements associated with records such as these.
✓ STREETTYPE – with standardized domains	
✓ SUFFIX	
✓ LANDMARKNAME	
✓ UNITTYPE	
✓ UNITID	
✓ PLACENAME	
✓ ZIPCODE	
✓ ZIP4	
✓ STATE	
✓ SCHOOLDIST – with standardized domains	
✓ SCHOOLDISTNO – with standardized domains	
✓ IMPROVED – with standardized domains	
✓ CNTASSDVALUE	
✓ LNDVALUE	
✓ IMPVALUE	
✓ FORESTVALUE	
✓ ESTFMKVALUE	
✓ NETPRPTA	
✓ GRSRPTA	
✓ PROPCCLASS – with standardized domains	
✓ AUXCLASS – with standardized domains	
✓ ASSDACRES	
✓ DEEDACRES	
✓ GISACRES	
* CONAME – with standardized domains	• CONAME: Approximately 45 records submitted with a value of <Null>. Populate this field for ALL records in the dataset.
* PARCFIPS – with standardized domains	• PARCFIPS: Approximately 45 records submitted with a value of <Null>. Populate this field for ALL records in the dataset.
* PARCSRC – with standardized domains	• PARCSRC: Approximately 45 records submitted with a value of <Null>. Populate this field for ALL records in the dataset.
* –Projection met statewide schema	• Parcel feature class defined as required statewide schema projection, but upon initial inspection, parcels showed up in southeastern Wisconsin. It is suspected data was pushed into statewide schema template without re-projecting. • For future data submissions, re-project parcels from native projection to statewide schema projection *prior to* field mapping or pushing into the provided statewide schema template. Use the "Parcel Schema Field Mapping Guide" to ensure projection issues will not result: www.sco.wisc.edu/parcels/tools/FieldMapping/Parcel_Schema_Field_Mapping_Guide.pdf .
✓ –County parcel fabric was complete (lacked gaps)	
✓ –Condo modeling met statewide schema	

CO. ZONING DATA

* County general – with attributes	• Same comment as above (–Projection met statewide schema).
♦ Farmland preservation – with attributes	• (Not administered by county)
* Shoreland – with attributes	• Same comment as above (–Projection met statewide schema). • Remove any excess fields not included in statewide zoning schema (Id).
* Floodplain – with attributes	• Same comment as above (–Projection met statewide schema).
♦ Airport protection – with attributes	• (Not administered by county)

OTHER LAYERS

* Other Layers – with standardized file names	• The Other Layers submitted did not follow the required naming convention from Appendix E of the V3 Submission Documentation. Follow the naming convention for future submissions. Include the year (YYYY) of content in the file name.

ACTION REQUIRED TO MEET STATEWIDE SCHEMA **PARCEL FEATURE CLASS**

WITH TAX ROLL DATA

✓ PARCELID	
✓ TAXPARCELID	
✓ PARCELDATE	
✓ TAXROLLYEAR	
✓ OWNERNME1	
* OWNERNME2	• OWNERNME2: ~153 records with values in this field, but OWNERNME1 is null. Ensure OWNERNME1 field is populated first.
* PSTLADDRESS	• PSTLADDRESS: Number of records with missing data in this field. Examples include 'C/O ROMAN BLENSKI MILWAUKEE WI 53219,' 'C/O NORMA SCHROEDER RACINE WI 53405,' '%JANICE R UNION GROVE WI 53182,' '% MARK MALEC FRANKSVILLE WI 53126,' etc. Possibly the result of a concatenation error/issue. Seems to be mainly isolated to records that have 'C/O' and '%.' Please note and correct for future data submissions.
✓ SITEADDRESS	
✓ ADDNUMPREFIX	
✓ ADDNUM	
✓ ADDNUMSUFFIX	
* PREFIX – with standardized domains	• PREFIX: ~2 records with a value of 'HIGHWAY.' An acceptable value, but vast majority of records have a value of 'HWY.' Per V3 Submission Documentation, "Usage should be consistent . . . Do not use multiple highway domain spelling conventions"
* STREETNAME	• STREETNAME: Approximately 27 records with a value of 'OLD A' and 'OLD 11' and 'HWY' in the PREFIX field. The 'HWY' value should be part of the STREETNAME value in these instances, since the streets are no longer technically highways. STREETNAME values should read as 'OLD HWY A' and 'OLD HWY 11.' • Approximately 2 records with a value of 'NW 83.' The directional of 'NW' should be part of the PREFIX value and should read as 'NW HWY' as opposed to being part of the STREETNAME field.
✓ STREETTYPE – with standardized domains	
✓ SUFFIX	
✓ LANDMARKNAME	
✓ UNITTYPE	
✓ UNITID	
✓ PLACENAME	
✓ ZIPCODE	
✓ ZIP4	
✓ STATE	
✓ SCHOOLDIST – with standardized domains	
✓ SCHOOLDISTNO – with standardized domains	
✓ IMPROVED – with standardized domains	
✓ CNTASSDVALUE	
✓ LNDVALUE	
✓ IMPVALUE	
✓ FORESTVALUE	
✓ ESTFMKVALUE	
✓ NETPRPTA	
✓ GRSPRPTA	
✓ PROPCLASS – with standardized domains	
✓ AUXCLASS – with standardized domains	
✓ ASSDACRES	
✓ DEEDACRES	
✓ GISACRES	
✓ CONAME – with standardized domains	
✓ PARCFIPS – with standardized domains	
✓ PARCELSRC – with standardized domains	
✓ –Projection met statewide schema	
✓ –County parcel fabric was complete (lacked gaps)	
* –Condo modeling met statewide schema	• Ensure all condos are modeled uniformly according to statewide schema specs for condo modeling. Spot checks found predominantly the Condo Type #2–Stacked Model, despite the fact that the Submission Form indicated differently.

CO. ZONING DATA

* County general – with attributes	• Feature class defined as required statewide schema projection, but upon initial inspection, parcels showed up in the Atlantic ocean. It is suspected data was pushed into statewide schema template without re-projecting. • For future data submissions, re-project to statewide schema projection *prior to* field mapping or pushing into the provided statewide schema template. Use the "Parcel Schema Field Mapping Guide" to ensure projection issues will not result: www.sco.wisc.edu/parcels/tools/FieldMapping/Parcel_Schema_Field_Mapping_Guide.pdf
* Farmland preservation – with attributes	• Same comment as above (for County general zoning).
* Shoreland – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
* Floodplain – with attributes	• Remove any excess fields not included in statewide zoning schema (FLOODZONE, FLOODWAY). • ~1,120 records with a ZONINGCLASS value of an empty string. DESCRIPTION is populated with '0.2 PCT ANNUAL CHANCE FLOOD HAZARD.' Move value from DESCRIPTION to ZONINGCLASS so that all records have a ZONINGCLASS value.
♦ Airport protection – with attributes	• (Not administered by county)

OTHER LAYERS

* Other Layers – with standardized file names	• The Other Layers submitted did not follow the required naming convention from Appendix E of the V3 Submission Documentation. Follow the naming convention for future submissions. Include the year (YYYY) of content in the file name.

Remember that you are welcome to submit feedback on the statewide schema, data submission process, and geoprocessing tools at any time.
- Thank you for the work you did to prepare your data submission. We appreciate your efforts, as will the end-users of the statewide parcel layer!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA **PARCEL FEATURE CLASS**

WITH TAX ROLL DATA

✓ PARCELID	
* TAXPARCELID	• TAXPARCELID: Do not provide values unless they are *different* from those in PARCELID field. If TAXPARCELID is the same as PARCELID, enter a true SQL <Null> in TAXPARCELID field.
✓ PARCELDATE	
✓ TAXROLLYEAR	
✓ OWNERNME1	
✓ OWNERNME2	
✓ PSTLADDRESS	
✓ SITEADDRESS	
✓ ADDNUMPREFIX	
* ADDNUM	• ADDNUM: Approximately 1 record with the value containing '-' at the end. Remove for future data submissions. • Approximately 4 records with value still containing ADDNUMPREFIX attached (e.g., 'S9087,' 'S9085,' 'S2498,' etc.). Move these values into ADDNUMPREFIX field and remove from ADDNUM field for future data submissions.
✓ ADDNUMSUFFIX	
✓ PREFIX – with standardized domains	
* STREETNAME	• STREETNAME: Approximately 8 records with value of 'RICHLAND SQUARE' and 'SUNRISE HEIGHTS' that still have a STREETTYPE attached. Move these values to the STREETTYPE field for future data submissions.
✓ STREETTYPE – with standardized domains	
✓ SUFFIX	
✓ LANDMARKNAME	
✓ UNITYTYPE	
✓ UNITID	
✓ PLACENAME	
✓ ZIPCODE	
✓ ZIP4	
✓ STATE	
* SCHOOLDIST – with standardized domains	• SCHOOLDIST: Few domains in this field needed slight modification to meet statewide schema domains. Those values include 'LAFARGE SCHOOL DISTRICT' ► 'LA FARGE SCHOOL DISTRICT' and 'BOSCOBEL SCHOOL DISTRICT' ► 'BOSCOBEL AREA SCHOOL DISTRICT.' Ensure these values are standardized to statewide schema domains for future data submissions.
✓ SCHOOLDISTNO – with standardized domains	
✓ IMPROVED – with standardized domains	
✓ CNTASSDVALUE	
✓ LNDVALUE	
✓ IMPVALUE	
✓ FORESTVALUE	
✓ ESTFMKVALUE	
✓ NETPRPTA	
✓ GRSRPTA	
✓ PROPCLASS – with standardized domains	
* AUXCLASS – with standardized domains	• AUXCLASS: Approximately 2 records with a value of 'W4A' or 'W4B.' Populate AUXCLASS field according to schema specs.
✓ ASSDACRES	
✓ DEEDACRES	
✓ GISACRES	
✓ CONAME – with standardized domains	
✓ PARCELFIPS – with standardized domains	
✓ PARCELSRC – with standardized domains	
✓ –Projection met statewide schema	
✓ –County parcel fabric was complete (lacked gaps)	
* –Condo modeling met statewide schema	• Condos not modeled. Ensure all condos are modeled uniformly according to statewide schema specs for condo modeling in Appendix A of the V3 Submission Documentation. If the county has NO condos, clearly indicate this on the Submission Form.

CO. ZONING DATA

* County general – with attributes	• Remove any excess fields not included in the statewide zoning schema prior to submitting data, and ensure that all fields match statewide zoning schema specs exactly — *This comment applies to all 5 zoning layers* • JURISDICTION field for all records should be 'RICHLAND' — *This comment applies to all 5 zoning layers* • Values in DESCRIPTION field did not always correspond to ZONINGCLASS values provided. For example, ZONINGCLASS='VILLAGE OF YUBA ZONED' and DESCRIPTION='GENERAL AGRICULTURAL AND FORESTRY DISTRICT (A-F).' Ensure DESCRIPTION value matches associated ZONINGCLASS value, or entirely null out DESCRIPTION, as long as LINK is populated.
* Farmland preservation – with attributes	
* Shoreland – with attributes	• Submission was in NAD_1983_NSRS2007_Wisconsin_TM. Re-project to statewide schema specs (NAD_1983 HARN_Wisconsin_TM (Meters)) for future data submissions.
* Floodplain – with attributes	• Submission was in NAD_1983_Wisconsin_TM. Re-project to NAD_1983 HARN_Wisconsin_TM (Meters) for future submissions.
* Airport protection – with attributes	

OTHER LAYERS

* Other Layers – with standardized file names	• Follow the naming convention for Other Layers for future submissions. Include the year (YYYY) of content in the file name.
---	--

SUBMISSION FORM

* Submission form provided with initial submission	• No Submission Form with initial data submittal. Information to complete the Submission Form was provided upon follow-up request from DOA (e.g., date/year values for Other Layers). Please verify that ALL information is complete before submitting.
--	---

MISCELLANEOUS

- The comments provided in this V3 *Observation Report* describe deviations from the statewide schema that require your attention. In order for your county to meet the Searchable Format requirement listed under state statute 59.72(2)(a), you will need to make the corrections noted on this report, and ensure that the datasets submitted in the future exactly match DOA's schema specifications. Remember that you are welcome to submit feedback on the statewide schema, data submission process, and geoprocessing tools at any time.
- It is recommended that you run the "Null Fields and Set to Upper-Case Tool" (www.sco.wisc.edu/parcels/tools/#NullFields) over your parcel dataset prior to submission in order to remove instances of 'NULL' (spelled out as a string of text characters).
- Thank you for the work you did to prepare your data submission. We appreciate your efforts, as will the end-users of the statewide parcel layer!

CO. ZONING DATA

♦ County general – with attributes	• (Not administered by county)
♦ Farmland preservation – with attributes	• (Not administered by county)
* Shoreland – with attributes	• Remove any excess fields not included in statewide zoning schema (BUFFDISTAN, Shape_STAREA_, Shape_STLENGTH_) to enable seamless integration into the statewide layer.
* Floodplain – with attributes	• Remove any excess fields not included in statewide zoning schema (FLD_ZONE, ZONE_SUBTY) to enable seamless integration into the statewide layer.
* Airport protection – with attributes	• Remove any excess fields not included in statewide zoning schema (ZONE_ID) to enable seamless integration into the statewide layer.

OTHER LAYERS

✓ Other Layers – with standardized file names

SUBMISSION FORM

✓ Submission form provided with initial submission

MISCELLANEOUS

- The comments provided in this V3 *Observation Report* describe deviations from the statewide schema that require your attention. In order for your county to meet the Searchable Format requirement listed under state statute 59.72(2)(a), you will need to make the corrections noted on this report, and ensure that the datasets submitted in the future exactly match DOA's schema specifications.
- You are welcome to submit feedback on the statewide schema, data submission process, and geoprocessing tools at any time.
- Your extra efforts to integrate municipal data for V3 are appreciated.
- Thank you for the work you did to prepare your data submission. We appreciate your efforts, as will the end-users of the statewide parcel layer!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA **PARCEL FEATURE CLASS**
WITH TAX ROLL DATA

✓ PARCELID	
* TAXPARCELID	• TAXPARCELID: This field must exist in the submitted dataset, however, it need not be populated. Do not provide values in TAXPARCELID field unless they are "different" from those in PARCELID field. If TAXPARCELID is the same as PARCELID, enter a true SQL <Null> for tax parcel ID.
✓ PARCELDATE	
✓ TAXROLLYEAR	
✓ OWNERNME1	
✓ OWNERNME2	
✓ PSTLADDRESS	
✓ SITEADDRESS	
* ADDNUMPREFIX	• ADDNUMPREFIX: Approximately 7631 records with values like 'N1034,' 'N1002,' 'W4777,' etc. The ADDNUM is still attached to the ADDNUMPREFIX value. Move address number value into ADDNUM field for future data submissions.
✓ ADDNUM	
✓ ADDNUMSUFFIX	
✓ PREFIX – with standardized domains	
✓ STREETNAME	
✓ STREETTYPE – with standardized domains	
✓ SUFFIX	
✓ LANDMARKNAME	
✓ UNITTYPE	
* UNITID	• UNITID: Approximately 7 records with values such as 'CELLSITE,' 'FAIRGROUND,' 'CHURCH', etc. Move these values to LANDMARKNAME field or delete for future data submissions.
✓ PLACENAME	
✓ ZIPCODE	
✓ ZIP4	
✓ STATE	
✓ SCHOOLDIST – with standardized domains	
✓ SCHOOLDISTNO – with standardized domains	
✓ IMPROVED – with standardized domains	
✓ CNTASSDVALUE	
✓ LNDVALUE	
✓ IMPVALUE	
✓ FORESTVALUE	
✓ ESTFMKVALUE	
✓ NETPRPTA	
✓ GRSRPTA	
✓ PROPCLASS – with standardized domains	
✓ AUXCLASS – with standardized domains	
✓ ASSDACRES	
✓ DEEDACRES	
✓ GISACRES	
* CONAME – with standardized domains	• CONAME: Approximately 699 records submitted with a value of <Null>. Populate this field for ALL records in the dataset for future submissions.
* PARCELFIPS – with standardized domains	• PARCELFIPS: Approximately 699 records submitted with a value of <Null>. Populate this field for ALL records in the dataset for future submissions.
* PARCELSRC – with standardized domains	• PARCELSRC: Approximately 699 records submitted with a value of <Null>. Populate this field for ALL records in the dataset for future submissions.
✓ –Projection met statewide schema	
✓ –County parcel fabric was complete (lacked gaps)	
* –Condo modeling met statewide schema	• Condos not modeled. Ensure all condos are modeled uniformly according to statewide schema specs for condo modeling in Appendix A of the V3 Submission Documentation. If the county has NO condos or other collective real property ownerships, clearly indicate this on the Submission Form for future data submissions.

CO. ZONING DATA

* County general – with attributes	• Verify LINK values for future data submissions. The original LINK value provided let to a blank page. The field was repopulated with ' https://www.municode.com/library/wi/rusk_county/codes/code_of_ordinances?nodeId=COOR_CH50ZO '.
♦ Farmland preservation – with attributes	• (Not administered by county)
* Shoreland – with attributes	• Verify LINK values for future data submissions. The original LINK value provided let to a blank page. The field was repopulated with ' https://www.municode.com/library/wi/rusk_county/codes/code_of_ordinances?nodeId=COOR_CH50ZO '.
* Floodplain – with attributes	• Submit zoning data as a GIS layer according to statewide schema (lowest priority)
♦ Airport protection – with attributes	• (Not administered by county)

OTHER LAYERS

* Other Layers – with standardized file names	• Failed to include "Other Layers" with initial data submission. For future data submissions, be sure to include the other layers with your submission when you submit your parcel/tax roll data.
---	---

SUBMISSION FORM

* Submission form provided with initial submission	• Submission Form with initial data submittal was incomplete. Missing information was provided upon follow-up request from DOA. Please verify that ALL information is complete before submitting.
--	---

MISCELLANEOUS

- The comments provided in this V3 *Observation Report* describe deviations from the statewide schema that require your attention. In order for your county to meet the Searchable Format requirement listed under state statute 59.72(2)(a), you will need to make the corrections noted on this report, and ensure that the datasets submitted in the future exactly match DOA's schema specifications.
- It is recommended that you run the "Null Fields and Set to Upper-Case Tool" (www.sco.wisc.edu/parcels/tools/#NullFields) over your parcel dataset prior to submission in order to remove instances of 'NULL' (spelled out as a string of text characters) and blank strings.
- You are welcome to submit feedback on the statewide schema, data submission process, and geoprocessing tools at any time.
- Thank you for the work you did to prepare your data submission. We appreciate your efforts, as will the end-users of the statewide parcel layer!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA **PARCEL FEATURE CLASS**

WITH TAX ROLL DATA

- ✓ PARCELID
- ✓ TAXPARCELID
- * PARCELDATE • **PARCELDATE:** Approximately 352 records contain timestamp attached to the end of these values. Remove timestamp from the end of this field for future data submissions.
- ✓ TAXROLLYEAR

ACTION REQUIRED TO MEET STATEWIDE SCHEMA **PARCEL FEATURE CLASS**

WITH TAX ROLL DATA

✓ PARCELID	
✓ TAXPARCELID	
✓ PARCELDATE	
✓ TAXROLLYEAR	
✓ OWNERNAME1	
✓ OWNERNAME2	
✓ PSTLADDRESS	
✓ SITEADDRESS	
✓ ADDNUMPREFIX	
✓ ADDNUM	
* ADDNUMSUFFIX	• ADDNUMSUFFIX: Approximately 14485 records with a directional value existing in this field. For future data submissions, move this value into PREFIX field and concatenate with existing value (e.g., 'COUNTY HIGHWAY,' 'US HIGHWAY,' etc.) if necessary.
✓ PREFIX – with standardized domains	
* STREETNAME	• STREETNAME: Approximately 143 records with values like '1ST ST SOUTH,' 'CLOVER RD NORTH,' '4TH ST SOUTH,' etc. Move street type value into STREETTYPE field and spell out. Also, move suffix directional value into SUFFIX field and standardize to statewide schema domains for future data submissions.
✓ STREETTYPE – with standardized domains	
✓ SUFFIX	
✓ LANDMARKNAME	
✓ UNITYTYPE	
✓ UNITID	
✓ PLACENAME	
✓ ZIPCODE	
✓ ZIP4	
✓ STATE	
* SCHOOLDIST – with standardized domains	• SCHOOLDIST: Append the words ' SCHOOL DISTRICT' to the end of values to adhere to statewide schema domains for future data submissions.
✓ SCHOOLDISTNO – with standardized domains	
✓ IMPROVED – with standardized domains	
✓ CNTASSDVALUE	
✓ LNDVALUE	
✓ IMPVALUE	
✓ FORESTVALUE	
✓ ESTFMKVALUE	
✓ NETPRPTA

ACTION REQUIRED TO MEET STATEWIDE SCHEMA **PARCEL FEATURE CLASS**
WITH TAX ROLL DATA

✓ PARCELID	
* TAXPARCELID	• TAXPARCELID: This field must exist in the submitted dataset, however, it need not be populated. Do not provide values in TAXPARCELID field unless they are "different" from those in PARCELID field. If TAXPARCELID is the same as PARCELID, enter a true SQL <Null> for tax parcel ID.
✓ PARCELDATE	
✓ TAXROLLYEAR	
✓ OWNERNME1	
* OWNERNME2	• OWNERNME2: Approximately 37 records with values in this field, but OWNERNME1 is empty. For future data submissions, ensure OWNERNME1 field is populated first.
* PSTLADDRESS	• PSTLADDRESS: Approximately 5 records with values of ' ', ' '. Clean these records by entering a complete mailing address in the PSTLADDRESS field, or enter <Null> for parcels without a "complete" mailing address. • Approximately 550+ records with values like 'WITTENBERG, WI 544990000,' 'TOWN DUMP, , ', 'PARKING LOT, SHAWANO, WI 541660000,' 'LAKE CREST DRIVE, CECIL, WI 54111,' etc. Clean these records by entering a complete mailing address in the PSTLADDRESS field, or enter <Null> for parcels without a "complete" mailing address. • Approximately 47 records containing '& <name>' on the front of PSTLADDRESS value. For records without a value in the OWNERNME2 field, populate with the <name> and remove from PSTLADDRESS value. • For records with <name> already present in OWNERNME2 field, <name> was removed from PSTLADDRESS field. Please clean PSTLADDRESS field as appropriate for future data submissions.
✓ SITEADDRESS	
✓ ADDNUMPREFIX	
✓ ADDNUM	
✓ ADDNUMSUFFIX	
✓ PREFIX – with standardized domains	
* STREETNAME	• STREETNAME: Approximately 8 records with a value of 'OAK LN'. Move 'LN' into STREETTYPE field and spell out.
✓ STREETTYPE – with standardized domains	
* SUFFIX	• SUFFIX: Approximately 3 records with values of 'W' and 'N' ('W3996 OLD W RD,' 'N9177 OLD N RD', etc.). Per the schema definition of the SITEADDRESS field, these values should be part of the STREETNAME field. Move these elements into the appropriate field for future data submissions.

MISCELLANEOUS

- The comments provided in this V3 *Observation Report* describe deviations from the statewide schema that require your attention. In order for your county to meet the Searchable Format requirement listed under state statute 59.72(2)(a), you will need to make the corrections noted on this report, and ensure that the datasets submitted in the future exactly match DOA's schema specifications.
- You are welcome to submit feedback on the statewide schema, data submission process, and geoprocessing tools at any time.
- Thank you for the work you did to prepare your data submission. We appreciate your efforts, as will the end-users of the statewide parcel layer!

- ✓ OWNERNME1
- * OWNERNME2 - **OWNERNAME2:** Approximately 11 records with values in this field, but OWNERNME1 is empty. Ensure OWNERNME1 field is populated first for future data submissions.
- * PSTLADDRESS - **PSTLADDRESS:** Approximately 147 records with values like 'BISON RD, LARSEN, WI, 5494700000,' 'COUNTY RD I, OSHKOSH, WI 549020000,' 'BRODERICK RD, OMRO, WI 549630000,' 'WI 549710000,' etc. Clean these records by entering a complete mailing address in the PSTLADDRESS field, or enter <Null> for parcels without a *complete* mailing address.
- ✓ SITEADDRESS
- ✓ ADDNUMPREFIX
- ✓ ADDNUM
- ✓ ADDNUMSUFFIX
- ✓ PREFIX – with standardized domains
- ✓ STREETNAME
- ✓ STREETTYPE – with standardized domains
- ✓ SUFFIX
- ✓ LANDMARKNAME
- ✓ UNITTYPE
- ✓ UNITID
- ✓ PLACENAME
- ✓ ZIPCODE
- ✓ ZIP4
- ✓ STATE
- ✓ SCHOOLDIST – with standardized domains
- ✓ SCHOOLDISTNO – with standardized domains
- ✓ IMPROVED – with standardized domains
- ✓ CNTASSDVALUE
- ✓ LNDVALUE
- ✓ IMPVALUE
- ✓ FORESTVALUE
- ✓ ESTFMKVALUE
- ✓ NETPRPTA
- ✓ GRSRPTA
- ✓ PROPCLASS – with standardized domains
- ✓ AUXCLASS – with standardized domains
- ✓ ASSDACRES
- ✓ DEEDACRES
- ✓ GISACRES
- ✓ CONAME – with standardized domains
- ✓ PARCELFIPI – with standardized domains
- ✓ PARCELSRC – with standardized domains
- ✓ –Projection met statewide schema
- ✓ –County parcel fabric was complete (lacked gaps)
- ✓ –Condo modeling met statewide schema

CO. ZONING DATA

- ✓ County general – with attributes
- ✓ Farmland preservation – with attributes
- ✓ Shoreland – with attributes
- ✓ Floodplain – with attributes
- ✓ Airport protection – with attributes

OTHER LAYERS

- ✓ Other Layers – with standardized file names

SUBMISSION FORM

- ✓ Submission form provided with initial submission

MISCELLANEOUS

- The comments provided in this *V3 Observation Report* describe deviations from the statewide schema that require your attention. In order for your county to meet the Searchable Format requirement listed under state statute 59.72(2)(a), you will need to make the corrections noted on this report, and ensure that the datasets submitted in the future exactly match DOA's schema specifications.
- You are welcome to submit feedback on the statewide schema, data submission process, and geoprocessing tools at any time.
- Thank you for the work you did to prepare your data submission. We appreciate your efforts, as will the end-users of the statewide parcel layer!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA **PARCEL FEATURE CLASS**

WITH TAX ROLL DATA

- ✓ PARCELID
- ✓ TAXPARCELID
- * PARCELDATE
 - **PARCELDATE:** Records with a PARCELDATE value contain timestamp attached to the end of these values. Remove timestamp from the end of this field for future data submissions.
- ✓ TAXROLLYEAR
- ✓ OWNERNME1
- ✓ OWNERNME2
- * PSTLADDRESS
 - **PSTLADDRESS:** Approximately 159 records with values like 'MAIL RETURNED UNDELIVERABLE,' 'DOWNTOWN STATION MONTREAL QUEBE C C 3N4,' 'DECEASED,' 'SUITE #9 MARSHFIELD WI 54449,' 'SUITE 700A CHICAGO IL 60654,' etc. Clean these records. Enter a complete mailing address in the PSTLADDRESS field, or enter <Null> for parcels without a *complete* mailing address.

- ✓ PARCELSRC – with standardized domains
- ✓ – Projection met statewide schema
- ✓ – County parcel fabric was complete (lacked gaps)
- ✓ – Condo modeling met statewide schema

CO. ZONING DATA

- ♦ **County general** – with attributes
 - (Not administered by county)
- ♦ **Farmland preservation** – with attributes
 - (Not administered by county)
- * **Shoreland** – with attributes
 - Submit zoning data as a GIS layer according to statewide schema (lowest priority)
- ✓ **Floodplain** – with attributes
- ♦ **Airport protection** – with attributes
 - (Not administered by county)

OTHER LAYERS

- ✓ **Other Layers** – with standardized file names

SUBMISSION FORM

- ✓ **Submission form provided with initial submission**

Walworth County Appendix

This appendix contains **notes related to two different condo modeling scenarios** that are highlighted for reference ahead of future data submissions.

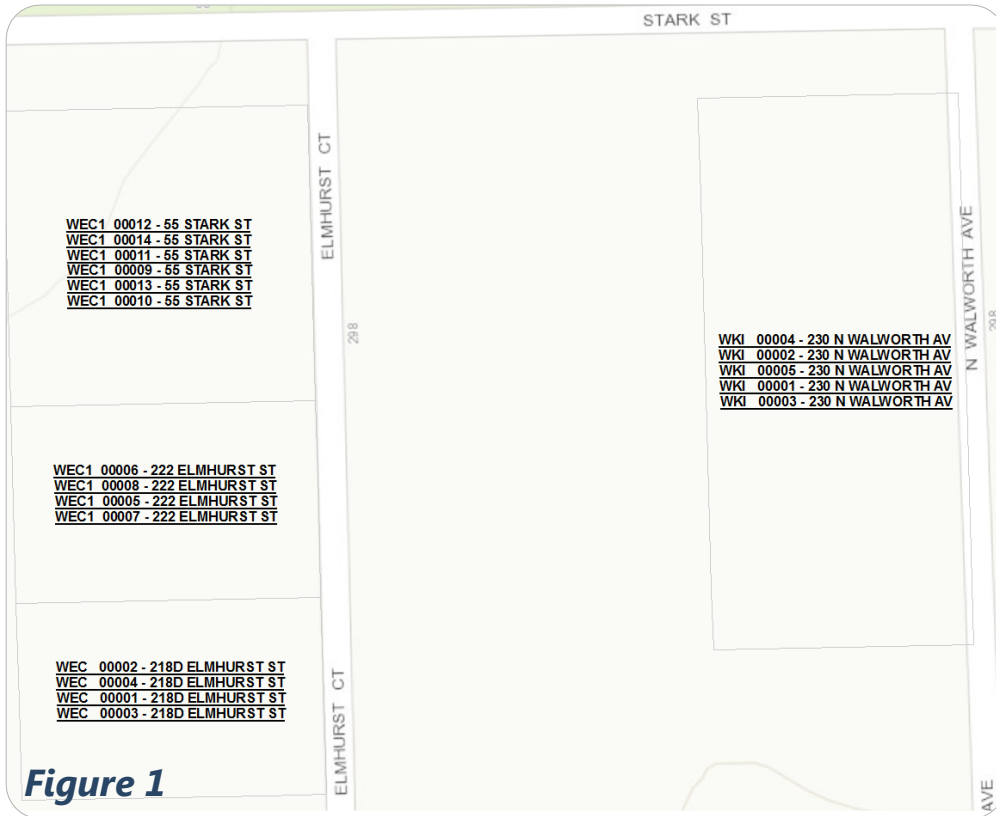

Figure 1

1) Condos with distinct PARCELID values and same SITEADDRESS values, but no unit distinguishing values (e.g., missing UNITID values)

- This scenario, the most prevalent of the two issues, appeared across the entire county and is illustrated in Figure 1.
- The label on the parcels displays a concatenation of the PARCELID value and the associated SITEADDRESS value for each of the stacked parcels (<PARCELID> - <SITEADDRESS>).
- The technical team was able to determine that UNITID values should exist for these records when, using the PSTLADDRESS field, it was clear that the owner used this as their primary residence. Possibly the UNITID value was missing or got lost during the data preparation process.
 - Please include distinct SITEADDRESS values including UNITID values (which would be the distinguishing element for condo parcels) and the associated parsed site address elements for future data submissions.

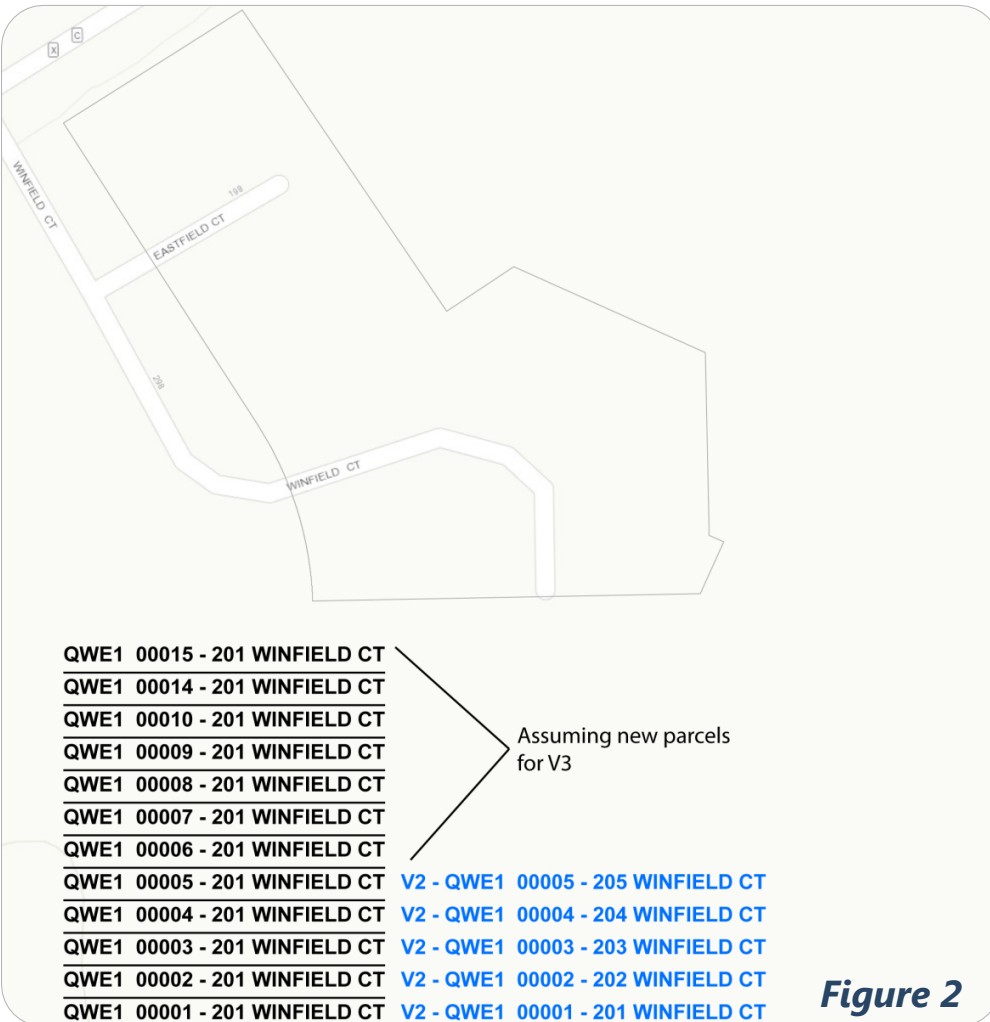

Figure 2

2) Condos with distinct PARCELID values and expected differing SITEADDRESS values (per V2, SITEADDRESS should be distinct)

- This scenario appears across the entire county and is illustrated in Figure 2.
- Black text** illustrates values from the V3 data and **blue text** illustrates values from the V2 data.
- You can see that in the V2 data, the SITEADDRESS values are distinct for each PARCELID and in the V3 data, the SITEADDRESS values are all the same.
- It appears that the SITEADDRESS field somehow got duplicated when the parcels were stacked, as opposed to the distinct SITEADDRESS values being populated.
 - Please include distinct SITEADDRESS values for records such as these and the associated site address elements for future data submissions.
