SUBMISSION FORM &

- The comments provided in this V5 Observation Report describe deviations from the statewide schema that require your attention. In order for your county to meet the Searchable Format requirement listed under state statue 59.72(2)(a), you will need to make the corrections noted on this report—as well as the V1-V4 Observation Reports—and ensure that the datasets submitted in the future exactly match DOA's schema specifications.
 For the V5 data submission as well as V2, parcels with one single tax roll record were stacked by SITEADRESS (e.g., for dorms, apartments, et cetera).
- Dissolve on PARCELID for future submissions or some other method that will result in *one* parcel polygon per PARCELID.

 Error flag numbers in the Validation Tool were inflated due to the presence of string values of "<Null>", blanks, and string values in lower case letters. In the future, running the Null Fields and Set to UPPERCASE Tool (https://www.sco.wisc.edu/parcels/tools) prior to submitting data can help you correct these instances.
- Thank you for the extra effort to integrate City of Madison tax roll data for V5. For V4, the technical team acquired the 2017 tax roll data for Madison through a request made to the
- City Assessor/DFaust@cityofmadison.com. Ideally, City of Madison data should continue to be requested and integrated by the county.

 Thanks for your work to prepare your data submission. There are many end-users of the statewide parcel layer from businesses, state and federal government, non-profit organizations, and more who will appreciate your efforts to make your data available in a standardized format!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA **FEATURE CLASS** WITH TAX ROLL DATA **PARCELID**: Approximately 103 records with the Validation Tool flag, "Appears to be a duplicate value in PARCELID." These appear to be parcels split by roads or streams, although some seem to be a single main parcel along with a sliver or small parcel abutting. Consider resolving these issues within the native parcel dataset and/or dissolve on PARCELID to remove duplicate PARCELID values for future data submissions. PARCELID * TAXPARCELID: Approximately 11,933 records with same value in PARCELID and TAXPARCELID fields. TAXPARCELID field must exist in the submitted dataset, however, it need not be populated. Do not provide values in TAXPARCELID field unless they are *different* from those in PARCELID field. If TAXPARCELID is the same as PARCELID, enter a true SQL for tax parcel ID. This issue was also noted on a previous year's Observation Report. Please pay particular attention to resolving it prior to the next appeal data submission. TAXPARCELID the next annual data submission. **✓ PARCELDATE TAXROLLYEAR OWNERNME1 ✓ OWNERNME2** PSTLADRESS **SITEADRESS ADDNUMPREFIX ADDNUM**: Approximately 1 record with values containing extra characters: '(5512)'. The extra parentheses characters should not exist in this field. Delete "(" and ")" from these records OR populate ADDNUM with a true SQL <Null> if the correct **ADDNUM** ADDNUM value is unknown. This issue was also noted on a previous year's Observation Report. Please pay particular attention to resolving this prior to the next annual data submission. **ADDNUMSUFFIX PREFIX** – with standardized domains STREETNAME: Approximately 863 records with prefix values of 'CTH,' 'STH,' and 'USH' erroneously attached to the STREETNAME value (e.g., CTH B, STH 70, USH 2, et cetera). Remove prefix value from STREETNAME field and place in PREFIX field. Consult the Submission Documentation for guidance on the use of the PREFIX field for highways. Approximately 21 records with STREETNAME values of 'TOWN ROAD NORTH', 'TOWN ROAD SOUTH', et cetera where the 'WEST', 'NORTH', and 'SOUTH' were mistakenly spelled out (based on the SITEADRESS values). The values should instead be the letters 'W', 'N', and 'S', as in '5113 N TOWN ROAD N.' Check your export routine for county highways named with alpha characters and ensure the accuracy of STREETNAME values for future data submissions. STRFFTNAME **STREETTYPE** – with standardized domains **SUFFIX** – with standardized domains **LANDMARKNAME** UNITTYPE UNITID PLACENAME ZIPCODE: Approximately 1 record with a partial value of '5411_'. Version 5 Statewide Parcel Map Database Project OBSERVATION REPORT La Crosse County

ACTION REQUIRED TO MEET STATEWIDE SCHEMA

PARCEL FEATURE CLASS WITH TAX ROLL DATA

♦ PARCELID

PARCELID: It appears that the values for PARCELID/TAXPARCELID do not allow the end-user to locate records for a particular parcel in the county's property search tool, as the values submitted for the V5 do not yield results when entered in the search tool on the interactive map (https://lacrossecounty.maps.arcgis.com/apps/webappviewer/index.html). The parcel identification numbers utilized in the county web mapping application differ in that they are missing certain digits from the tax parcel ID (digits 2,3,7, and 8). This is not an error in the data submitted for V5. However, we would like that a user of the parcel data be able to plug the PARCELID or TAXPARCELID in to the county's property search tool and retrieve the most current data available, such as a digital copy of the property tax bill. For future data submissions, please plan to make the submitted PARCELID or TAXPARCELID compatible with the county's property search tool.

ACTION REQUIRED TO MEET STATEWIDE SCHEMA RCEL FEATURE CLASS WITH TAX ROLL DATA **PARCELID** TAXPARCELID **✓** PARCELDATE **✓ TAXROLLYEAR** ✓ OWNERNME1 **OWNERNME2 PSTLADRESS**: Approximately 6 records with partial mailing address values containing only city, state, and zip—such as '(WAYSIDE) WI'; 'ELCHO WI 54428'; et cetera. Mailing address values should not be incomplete. Enter a complete mailing address in the PSTLADRESS field, or enter <Null> for parcels without a *complete* mailing address. A large number of PSTLADRESS records appeared to have some type of OWNERNAME values attached to the front (not including those records with 'C/O' or 'ATTN:'). Clean as appropriate and ensure accuracy of mailing address and owner names. PSTLADRESS SITEADRESS **ADDNUMPREFIX** • **ADDNUM**: ~13 records where some of the parsed address elements do not match SITEADRESS values—mainly ADDNUM (Address Number) values. PARCELID values for the affected records are: 0060297.004; 0120066; 0140450.004; 0160073.002; 0260130.004; 0260220.004; 0300152.002; 0341832.006; 2011153; 2011191.003; 2012682.001; 2012863.004; and 2012929. For future data submissions, ensure accurate parsing of individual address elements into their respective fields. **ADDNUM ADDNUMSUFFIX PREFIX** – with standardized domains **STREETNAME** • STREETNAME: ~8 records with minor issues relating to address element parsing that require attention. These STREETNAME values include: BLUEBIRD ALLEY, STH 45, 455 HWY 64, and BADGER TR. Ensure accuracy of street names. **STREETTYPE**: ~88 records in the submitted dataset with value of 'AVENUE' but based on values in the SITEADRESS, the actual value for STREETTYPE should be 'ROAD.' This appeared to affect primarily records with STREETNAME values of '2ND AVE', '10TH AVE', '1ST AVE', and 'FIFTH AVE.' For future data submissions, ensure the accuracy of values in STREETTYPE field. **STREETTYPE** – with standardized domains **SUFFIX** – with standardized domains **LANDMARKNAME** UNITTYPE UNITID **✓ PLACENAME ✓** ZIPCODE ✓ ZIP4 STATE SCHOOLDIST – with standardized domains **SCHOOLDISTNO** – with standardized domains ♦ **IMPROVED** – no longer required as of V5 **✓ CNTASSDVALUE** LNDVALUE **✓ IMPVALUE ✓** FORESTVALUE **✓ ESTFMKVALUE ✓** NETPRPTA **GRSPRPTA** PROPCLASS – with standardized domains • AUXCLASS: Parcels with AUXCLASS values of "W4" may be incorrectly classified. According to the DNR web map (https://dnrmaps.wi.gov/H5/?Viewer=Public_Access_Lands), the county does have lands that should be classified "W4"—indicating county forest lands. These missing "W4" values for county forest lands should be populated in the AUXCLASS field for future data submissions. *** AUXCLASS** – with standardized domains ***** ASSDACRES ASSDACRES: In initial data submission, values in Assessed Acres field were erroneously equal to the Total Assessed Value. For future data submissions, ensure accuracy of values in ASSDACRES/DEEDACRES fields **✓ DEEDACRES** GISACRES **CONAME** – with standardized domains ✓ PARCELFIPS – with standardized domains ✓ PARCELSRC – with standardized domains -Projection met statewide schema -County parcel fabric was complete (lacked gaps) -Condo modeling met statewide schema ✓ PLSS – PLSS corner data was submitted * Zoning: County general – with DESCRIPTION/LINK Zoning layer was missing the required DESCRIPTION and/or LINK information. Zoning layers must include either: a) a field with a **DESCRIPTION** of the class name for each zoning feature, or b) a field or metadata populated with a **LINK** to a valid webpage or web document that contains authoritative descriptions of the specific zoning class or all zoning classes within the jurisdiction. Ensure either DESCRIPTION or LINK exists and is populated for all records prior to submitting. Zoning: Shoreland – with DESCRIPTION/LINK · (Unchanged from previous year, not submitted 🌞 Zoning: Airport protection – with DESCRIPTION/LINK 🔹 Work toward zoning GIS layer and submit when one becomes available. ✓ Other Layers – with standardized file names SUBMISSION FORM & PACKAGE ✓ Provided .ini submission form + data **MISCELLANEOUS** • The comments provided in this V5 Observation Report describe deviations from the statewide schema that require your attention. SUBMISSION FORM & PACKAGE

✓ Provided .ini submission form + data

- The comments provided in this V5 Observation Report describe deviations from the statewide schema that require your attention. In order for your county to meet the Searchable Format requirement listed under state statue 59.72(2)(a), you will need to make the corrections noted on this report—as well as the V1-V4 Observation Reports—and ensure that the datasets submitted in the future exactly match DOA's schema specifications.
- Carryover caution: The submitted V5 data contained old values erroneously leftover (often from a parent parcel) for records notated "new parcels." New records should carry a future year value in TAXROLLYEAR. For future data submissions, ensure accurate future tax roll year for newly created parcels, and ensure that values are not mistakenly carried over. Parcels annotated with future taxroll years should *not* have values in tax roll fields (including but not limited to ESTFMKVALUE/NETPRPTA/GRSPRPTA fields).
- City of Manitowoc data was included with the county's V5 submission. Please continue to work with the City of Manitowoc and City of Two Rivers to contribute current, complete parcel/tax roll data, so that the county can integrate and submit a complete, comprehensive county parcel dataset. Svanderveren@two-rivers.org and ricpow@two-rivers.org at the City of Two Rivers were able to provide partial 2018 tax roll data for V5, but it could not be utilized because it was missing PROPCLASS/AUXCLASS and school district information.
- Manitowoc County's extra efforts to acquire and integrate this independent municipal data into the future are appreciated!

 Thanks for your work to prepare your data submission. There are many end-users of the statewide parcel layer from businesses, state and federal government, non-profit organizations, and more who will appreciate your efforts to make your data available in a standardized format!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA FEATURE CLASS PARCELID: ~271 records with duplicate value in PARCELID (improvement over V4, in which there were 506). The majority appear to be parcels split by roads or streams. Consider resolving these issues within the native parcel dataset and/or dissolve on PARCELID to remove duplicate PARCELID values (creating single multi-part polygons) for future submissions. ***** PARCELID **✓** TAXPARCELID **PARCELDATE** TAXROLLYEAR: Approximately 40 records with a TAXROLLYEAR value of '2019', and had values in tax roll fields. Records with a future tax roll year should *not* have values in tax roll fields (such as CNTASSDVALUE, LNDVALUE, ESTFMKVALUE, etc.). TAXROLLYEAR **✓ OWNERNME1 ✓ OWNERNME2 PSTLADRESS ✓ SITEADRESS ADDNUMPREFIX** ADDNUM: Approximately 1 record with a value of '306 A'. This value mistakenly contains an ADDNUMSUFFIX value still attached to the address number. The 'A' belongs in ADDNUMSUFFIX field. **ADDNUM ADDNUMSUFFIX** STREETNAME: Several records require cleanup in the STREETNAME field. ~9 records that still have the STREETTYPE values attached (BOGUS RD; MADALYN COURT; MERCER LN; RUSTAD LN; BUCKY LANE; INDUSTRIAL PARK DR; LAKE PORT RD; PEPIN VIEW SOUTH LANE; SILVER BIRCH RD). Move street type to STREETTYPE. ~3 records with PREFIX values attached (ST HWY 8', CCOUNTY ROAD Z). Move prefix values of 'STH'/'CTH' to PREFIX field. ~143 records with PREFIX values of 'CTH' and STREETNAME mistakenly spelled out to 'NORTH', 'WEST' or 'EAST'. These are not directionals. Correct these highway street name values to be 'N', 'E', and 'W' in STREETNAME field and check your export routine for county highways named with alpha characters. ~6 records erroneously have values of 'D', 'V', 'V', 'T', N', or 'NN' in UNITTYPE and UNITID fields instead of in the STREETNAME field where they belong, and are also missing a PREFIX value. Highways should have a PREFIX value of 'CTH' with a corresponding name in the STREETNAME field. Applies to SITEADRESS records: N6488 COUNTY RD D; W10384 COUNTY RD I; N1025 COUNTY RD N; W7419 COUNTY RD NN; and W4910 COUNTY RD V. ~50 records w/values that are not true street names. Six of these 50 also have PREFIX values of 'N' or 'S'. Remove PREFIX and STREETNAME values for these records: ALONG AUTH ST BY WATER TOWER; ALONG CHIPPEWA RIVER; ALONG CHIPPEWA RIVER; ALONG CHIPPEWA RIVER; ALONG ST W3RD AVE EAST & CTYRD F; ON THA AVE WEST BY COUNTHOUSE; ON 9TH AVE EAST; ON 2ND AVE WEST & EAST MADISON ST; ON 3RD AVE EAST & CTYRD F; ON THA AVE WEST BY COUNTHOUSE; ON 9TH AVE EAST; ON MONTGOMERY ST; ON ROUNTRY LN BY CTYRD F; ON COUNTRY LN BY MARILYN AVE; ON MAIN ST; ON MARILYN AVE & GRANT ST; ON MONTGOMERY ST; ON RIVER; ST ALONG RIVER; ON LEE ST & MARILYN AVE; ON MAIN ST; ON MEST MADISON ST BY RIVER. STREETTYPE: ~2 records with a value of 'W' or 'RD D' in STREETTYPE field. Remove the STREETTYPE values. For 'RDD', PREFIX **PREFIX** – with standardized domains **STREETNAME** Some of these issues were Some of these issues were also noted on a previous also noted on a previous year's Observation Report. Please pay particular please pay particular attention to resolving them attention to the next data prior to the next data submission. STREETTYPE: ~2 records with a value of 'W' or 'RD D' in STREETTYPE field. Remove the STREETTYPE values. For 'RDD', PREFIX field should have the value of 'CTH' and STREETNAME should be 'D'. For 'W', move the value and spell it out in STREETNAME. **STREETTYPE** – with standardized domains SUFFIX - with standardized domains **LANDMARKNAME** UNITTYPE UNITID: Approximately 8 records with values that are not true UNITID values like '(KRAEMER)', '(TOWER)', 'SCHOOL', UNITID 'MOBILE HOM'; 'TOWER', et cetera or also contain UNITTYPE values. Ensure all values are in the appropriate fields. For all records with values like 'UNIT A', move 'UNIT' out of UNITID and into UNITTYPE field. For values that are not true UNITID values, remove or set value equal to a true SQL <Null>. UNITID should not contain any extraneous information. ✓ PI ACENAME ZIPCODE **✓** ZIP4 STATE **SCHOOLDIST**: Approximately 5,650 records with a value of 'DURAND SCHOOL DISTRICT' that does not match the required standardized domain of 'DURAND-ARKANSAW SCHOOL DISTRICT'. Ensure standardized SCHOOLDIST values are used. SCHOOLDIST – with standardized domains **SCHOOLDISTNO** – with standardized domains ♦ **IMPROVED** – no longer required as of V5 **✓ CNTASSDVALUE ✓ LNDVALUE ✓ IMPVALUE ✓ FORESTVALUE ✓ ESTFMKVALUE** NETPRPTA **✓** GRSPRPTA ✓ PROPCLASS – with standardized domains **AUXCLASS**: ~182 records with PROPCLASS/AUXCLASS < Null>. Several of these records appear to be parcels that were "assessed with" other parcels. For future submissions, where feasible, enter in the AUXCLASS field a value of "AW" or "AWO" for a parcel that has been assessed with another parcel, and continue to make note of missing data in the submission form. ***** AUXCLASS – with standardized domains ASSDACRES **✓ DEEDACRES** GISACRES ✓ CONAME – with standardized domains ✓ PARCELFIPS – with standardized domains ✓ PARCELSRC – with standardized domains -Projection met statewide schema -County parcel fabric was complete (lacked gaps) -Condo modeling met statewide schema OTHER LAYERS – P ✓ PLSS – PLSS corner data was submitted OTHER LAYERS – RML Zoning:County general;Shoreland-w/DESCRIPTION/LINK * (Unchanged from previous year, not submitted; unchanged from previous year, not submitted) ♦ Zoning: Airport protection – with DESCRIPTION/LINK ✓ Other Layers – with standardized file names SUBMISSION FORM & ✓ Provided .ini submission form + data • The comments provided in this V5 Observation Report describe deviations from the statewide schema that require your attention. In order for your county to meet the Searchable Format requirement listed under state statue 59.72(2)(a), you will

need to make the corrections noted on this report—as well as the V1-V4 Observation Reports—and ensure that the datasets submitted in the future exactly match DOA's schema specs.

Thanks for your work to prepare your data submission. There are many end-users who will appreciate your efforts to make your data available in a standardized format!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA PARCEL FEATURE CLASS WITH TAX ROLL DATA **PARCELID TAXPARCELID PARCELDATE** • TAXROLLYEAR: Some records missing tax roll data noted in the submission form were missing data as a result of "being new or split parcels which have not been assessed at this time." For those records which are new parcels/splits, populate the TAXROLLYEAR field with a *future year value* to indicate a new parcel that has not yet received assessment values. ***** TAXROLLYEAR **✓ OWNERNME1 ✓ OWNERNME2** PSTLADRESS **SITEADRESS ADDNUMPREFIX ADDNUM ADDNUMSUFFIX PREFIX** – with standardized domains **STREETNAME STREETTYPE** – with standardized domains **SUFFIX** – with standardized domains **LANDMARKNAME** UNITTYPE **UNITID** PLACENAME ZIPCODE ✓ ZIP4 **✓** STATE ✓ SCHOOLDIST – with standardized domains ✓ SCHOOLDISTNO – with standardized domains ♦ **IMPROVED** – no longer required as of V5 **✓ CNTASSDVALUE** LNDVALUE IMPVALUE **✓ FORESTVALUE ✓ ESTFMKVALUE ✓** NETPRPTA GRSPRPTA • PROPCLASS: There may be a miscategorization issue with tax exempt properties that requires attention. There were approximately 1,063 records with a PROPCLASS value of '7' (Taxable - "Other") and CNTASSDVALUE/ESTFMKVALUE value of '0.' The OWNERNME1 contains values like 'WISCONSIN DEPT OF NATURAL RESOURCES'; 'VILLAGE OF BAY CITY'; 'EZEKIEL LUTHERAN CHURCH', et cetera. Look into whether the current PROPCLASS values might actually belong in the AUXCLASS *** PROPCLASS** – with standardized domains field instead and correct as appropriate for future data submissions. AUXCLASS: 181 records noted in submission form as missing PROPCLASS/AUXCLASS values because they are parcels "assessed with a different parcel number." For future data submissions, if parcels have been assessed together with a different parcel, enter in the AUXCLASS field a value of "AW" or "AWO" where feasible, and continue to make a note of any *** AUXCLASS** – with standardized domains missing data in the submission form. 	OWNERNME1	
	OWNERNME2	DOTADDEC 47 L N. C. L. N. L. L. C. L. N. L. C. L
*	PSTLADRESS	 PSTLADRESS: ~47 records with partial mailing address values containing only city, state, and zip—including values of 'OMAHA NE 68179'. Enter a complete mailing address in the PSTLADRESS, or <null> for parcels without a *complete* mailing address.</null>
/	SITEADRESS	
✓	ADDNUMPREFIX	
<u> </u>	ADDNUM	
*	ADDNUMSUFFIX DREETY with standardized domains	* DREETY: See comment helpw in STDEETNAME
* 0	STREETNAME On these issues were some of these issues were also noted on a previous also noted on a previous year's Observation Report. Year's Please pay particular please pay particular attention to resolving them attention to the next data prior to the next data submission.	 PREFIX: See comment below in STREETNAME. STREETNAME: Approximately 988 records requiring attention or correction. 598 records with values of '67 NORTH', 'A EAST', 'A NORTH', 'A SOUTH' and 'A WEST'. These appear to be directionals (not part of the actual street name). Remove from STREETNAME field, move to SUFFIX field and standardized to 'N', 'E', 'S', 'W'. 50 records with values of '28&144', 'A&J', 'A&P', 'C&J', 'M & J' and 'Q & H'. According to Submission Documentation, a forward slash ("Y") is the preferred route delimiter, or a hyphen ("-") an an acceptable delimiter. Replace '&' with 'f' for records. 65 records with values missing corresponding STREETTYPE and SUFFIX, like 'FOSTER RD SOUTH'; 'GOLF VIEW DR EAST'; 'BRIAR RUN'; 'MILEY RD EAST', 'PARK SQ EAST', 'SMIES RD SOUTH'; et cetera. Move STREETTYPE and SUFFIX values to appropriate fields, following the Submission Documentation guidance for standardized domains. 1 record with a value of 'NORTH 40TH' containing a PREFIX element. Remove prefix value from STREETNAME field to PREFIX field. Consult Submission Documentation on the use of PREFIX field to hold pre directionals (which should be abbreviated). 2 records with an intersection value of 'AUDUBON RD & MILL' and 'BRIDGEWOOD & PLAYBIRD'. An intersection of two roads is not a true STREETNAME values of 'TURBA CT', BAY RD' and '1ST ST' still containing STREETTYPE values attached. The STREETTYPE values appropriately already exist in STREETTYPE field, so remove abbreviations from STREETNAME. 225 records with streetname values erroneously having street type attached and missing a value in the STREETTYPE field. Move STREETTYPE value to appropriate field and ensure all domains are fully spelled out for records containing these values: AVE, BAY, BEACH, COURT, COVE, CROSS, DR, END, HAVEN, HEIGHTS, HGLDS, HOLLOW, LN, LOOP, NOB, PKY, RD, RIDGE, RAPY, BEACH, COURT, COVE, CROSS, DR, END, HAVEN, HEIGHTS, HGLDS, HOLLOW, LN, LOOP, NOB, PKY, RD, RIDGE, R
*	STREETTYPE – with standardized domains	not necessary to change the word "highway" to a standardized prefix value. It should be part of STREETNAME field and spelled out, so that the STREETNAME value is 'OLD COUNTY ROAD PP'. • STREETTYPE: See comment above in STREETNAME. Some records were missing STREETTYPE values that will need to be populated for future data submissions.

- ✓ Zoning: County general with DESCRIPTION/LINK
- ✓ Zoning: Shoreland with DESCRIPTION/LINK
- ♦ Zoning: Airport protection with DESCRIPTION/LINK (Not administered by county)
- ✓ Other Layers with standardized file names

SUBMISSION FORM & PACKAGE

✓ Provided .ini submission form + data

- The comments provided in this V5 Observation Report describe deviations from the statewide schema that require your attention. In order for your county to meet the Searchable Format requirement listed under state statue 59.72(2)(a), you will need to make the corrections noted on this report—as well as the V1-V4 Observation Reports—and ensure that the datasets submitted in the future exactly match DOA's schema specifications.
- Note regarding the county's online land records search tools: A test of the county's web mapping application for parcel search revealed that PARCELID could be used to find a parcel, but a link to a copy of the tax bill timed out before displaying anything. This is not an error in the data submitted for V5. However, please make sure that the county's property search tool functions properly, so that a user can access the most current and comprehensive information for parcel records.
- Thanks for your work to prepare your data submission. There are many end-users of the statewide parcel layer from businesses, state and federal government, non-profit organizations, and more who will appreciate your efforts to make your data available in a standardized format!

ACTION REQUIRED TO MEET STATEWIDE SCHEMA PARCEL F WITH TAX ROLL DATA RCEL FEATURE CLASS PARCELID **TAXPARCELID** PARCELDATE **✓ TAXROLLYEAR** OWNERNME1 ✓ OWNERNME2 PSTLADRESS SITEADRESS **ADDNUMPREFIX ADDNUM ADDNUMSUFFIX** ADDNUMSUFFIX: Approximately 14 records missing ADDNUMSUFFIX values, based on values in the SITEADRESS field 'A EMERALD LN'; 'A GOLDENROD CT'; 'B CHRISTIAN'; 'B PARKWAY'; 'N30W23499A GREENFIELD CT'). Ensure accuracy of (e.g., 'A EMERALD LN'; 'A GOLDENKOD CL'; 'B CHKISTIAIN', D FARRYWAL, NOUVEZ-TOR GREET LEED C.', E. E. S. ADDNUMSUFFIX field and that individual address elements are populated appropriately for future data submissions. **PREFIX** – with standardized domains **STREETNAME**: Approximately 11 records with values like 'UNION CHURCH DR' where the street type value is still attached to the street name, and is redundant (because the value of 'DRIVE' already exists in the STREETTYPE field). Remove all street type values from the STREETNAME field and ensure that address attribute fields are populated accurately for future data **STREETNAME** submissions. Approximately 16 records for what should be STREETNAME = 'TOWNSHIP ROAD X' (which was submitted as street name of 'TOWNSHIP' with STREETTYPE of 'ROAD' and UNITID of 'X'). In this case, both 'ROAD' and 'X' should be part of the STREETNAME field, so that the street name value is 'TOWNSHIP ROAD X' **STREETTYPE** – with standardized domains STREETTYPE: See comment above in STREETNAME. **SUFFIX** – with standardized domains **LANDMARKNAME** UNITTYPE UNITID PLACENAME ZIPCODE ZIP4 **✓** STATE ✓ SCHOOLDIST – with standardized domains ✓ SCHOOLDISTNO – with standardized domains ♦ **IMPROVED** – no longer required as of V5 **✓ CNTASSDVALUE ✓ LNDVALUE ✓** IMPVALUE **FORESTVALUE ✓ ESTFMKVALUE** ✓ NETPRPTA ✓ GRSPRPTA ✓ PROPCLASS – with standardized domains ✓ AUXCLASS – with standardized domains **✓** ASSDACRES DEEDACRES **✓** GISACRES **CONAME** – with standardized domains PARCELFIPS – with standardized domains ✓ PARCELSRC – with standardized domains Projection met statewide schema ✓ —County parcel fabric was complete (lacked gaps) ✓ —Condo modeling met statewide schema - PLSS corner data was submitted HER LAYERS – RML ✓ Zoning: County general – with DESCRIPTION/LINK Zoning: Shoreland – with DESCRIPTION/LINK Zoning: Airport protection – with DESCRIPTION/LINK • (Unchanged from previous year, not submitted) ✓ Other Layers – with standardized file names UBMISSION FORM & ✓ Provided .ini submission form + data

MISCELL ANFOLIS

• The comments provided in this V5 Observation Report describe deviations from the statewide schema that require your attention. In order for your county to meet the Searchable Format requirement listed under state statue 59.72(2)(a), you will need to make the corrections noted on this report—as well as the V1-V4 Observation Reports—and ensure that the datasets submitted in the future exactly match DOA's schema specifications.

• Thanks for your work to prepare your data submission. There are many end-users of the statewide parcel layer from businesses, state and federal government, non-profit organizations, and more who will appreciate your efforts to make your data available in a standardized format!

ACTION REQUIRED TO MEET **STATEWIDE SCHEMA** § PARCEL FEATURE CLASS WITH TAX ROLL DATA **PARCELID TAXPARCELID PARCELDATE** TAXROLLYEAR ✓ OWNERNME1 ✓ OWNERNME2 **✓ PSTLADRESS** SITEADRESS **ADDNUMPREFIX ADDNUM ADDNUMSUFFIX PREFIX**: Approximately 4,232 records missing a prefix directional value in PREFIX, but directional values ('N', 'S', 'E', or 'W') present in the SITEADRESS field. For future data submissions, ensure that PREFIX and all individual address attribute fields are **PREFIX** – with standardized domains populated where appropriate. **STREETNAME** STREETNAME: See comment below in UNITID. **STREETTYPE** – with standardized domains **SUFFIX** – with standardized domains **LANDMARKNAME** UNITTYPE **UNITID** UNITID: Approximately 80 records with values of '5' and '110'. The '5' and '110' should be part of the STREETNAME value (based on the values present in the SITEADRESS field). Ensure these values are placed in the appropriate field for future data submissions. **✓ PLACENAME** ZIPCODE ✓ ZIP4 STATE SCHOOLDIST - with standardized domains SCHOOLDISTNO – with standardized domains ◆ IMPROVED – no longer required as of V5 CNTASSDVALUE **✓ LNDVALUE ✓** IMPVALUE **✓ FORESTVALUE** ✓ ESTFMKVALUE **NETPRPTA GRSPRPTA** • PROPCLASS: In initial data submission, approximately 625 records with PROPCLASS values "1-4," despite indications they were tax exempt parcels with values belonging in the AUXCLASS field instead. Similarly, approximately 862 records for non-parcel features with PARCELID values like "ROW", "WATER", et cetera had PROPCLASS values of "3" and "4." Communication with the LIO indicated that some of these values were actually exempt codes that should have been in the AUXCLASS field as "X3" or "X4." Check your export routine (where tax exempt parcels should have values in AUXCLASS), and ensure accuracy of values in PROPCLASS/AUXCLASS as well as appropriate lack of tax roll data for records representing non-parcel features. *** PROPCLASS** – with standardized domains parcel features * AUXCLASS – with standardized domains AUXCLASS: See comment above in PROPCLASS.
