JIM DOYLE GOVERNOR MARC J. MAROTTA SECRETARY Office of the Secretary Post Office Box 7864 Madison, WI 53707-7864 Voice (608) 266-1741 Fax (608) 267-3842 TTY (608) 267-9629

December 21, 2004

The Honorable Jim Doyle
The Honorable Members of the Legislature
Citizens of the State of Wisconsin

We are pleased to submit the General Purpose External Financial Statements of the State of Wisconsin for the fiscal year ended June 30, 2004.

These General Purpose External Financial Statements are part of the audited Comprehensive Annual Financial Report. They include management's discussion and analysis (MD&A), the basic financial statements, and required supplementary information (RSI). MD&A introduces the basic financial statements and provides an analytical overview of the State's financial activities. The basic financial statements provide a summary overview of the government as a whole (excluding the State's fiduciary activities), as well as detailed information on all governmental, proprietary, fiduciary fund activity, together with notes to the financial statements. RSI includes data on infrastructure and the budgetary comparison schedule with accompanying notes. These statements, which present financial information in conformity with generally accepted accounting principles, will benefit users requiring summary information about our State's finances.

The General Purpose External Financial Statements, as well as the Comprehensive Annual Financial Report, are on file at the office of the State Controller. Additional copies are available upon request. A copy of the Comprehensive Annual Financial Report is also available on the Department of Administration homepage on the World Wide Web: http://www.doa.state.wi.us/debf

Sincerely,

Marc J. Marotta Secretary

Man J. Wardta

William J. Raftery, CPA State Controller

JANICE MUELLER STATE AUDITOR

22 E. MIFFLIN ST., STE. 500 MADISON, WISCONSIN 53703 (608) 266-2818 FAX (608) 267-0410 Leg.Audit.Info@legis.state.wi.us

#### INDEPENDENT AUDITOR'S REPORT

Honorable Members of the Legislature

The Honorable James Doyle, Governor

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Wisconsin as of and for the year ended June 30, 2004, which collectively comprise the State's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the State of Wisconsin's management. Our responsibility is to express opinions on these financial statements based on our audit. We did not audit the following financial statements: the Wisconsin Department of Transportation Revenue Bond Program and Commercial Paper Program, which represent 11 percent of the liabilities of the governmental activities and 3 percent of the liabilities of the aggregate remaining fund information; the Badger Tobacco Asset Securitization Fund, which represents 11 percent of the liabilities of the governmental activities; the Environmental Improvement Fund, which is a major fund and represents 19 percent of the assets and 20 percent of the liabilities of the business-type activities; or the College Savings Program Trust, which represents 2 percent of the assets of the aggregate remaining fund information. Those financial statements were audited by other auditors whose reports thereon have been furnished to us, and our opinions, insofar as they relate to the amounts audited by others, are based solely upon their reports. In addition, we did not audit the financial statements of the discretely presented component units. Those financial statements were audited by other auditors. Our opinion on the aggregate discretely presented component units, insofar as it relates to the amounts audited by others, is based upon the reports of the Wisconsin Housing and Economic Development Authority, the University of Wisconsin Hospitals and Clinics Authority, and the University of Wisconsin Foundation.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. The financial statements of the Wisconsin Housing and Economic Development Authority, which were audited by other auditors, were also audited in accordance with these standards. The financial statements of the other funds and component units that were audited by other auditors upon whose reports we are relying were audited in accordance with auditing standards generally accepted in the United States of America, but not in accordance with *Government Auditing Standards*. Auditing standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit and the reports of other auditors provide a reasonable basis for our opinions.

In our opinion, based on our audit and the reports of other auditors, the financial statements previously referred to present fairly, in all material respects, the respective financial positions of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Wisconsin as of June 30, 2004, and the respective changes in financial position and cash flows, where applicable, for the year then ended in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 1 to the financial statements, the State implemented two accounting changes during fiscal year 2003-04. Governmental Accounting Standards Board (GASB) Statement Number 39, Determining Whether Certain Organizations Are Component Units—an amendment of GASB Statement No. 14—broadened the definition of component units and as a result, required the inclusion of the financial statements of the University of Wisconsin Foundation as a discretely presented component unit in the State's Comprehensive Annual Financial Report. GASB Technical Bulletin Number 2004-1, Tobacco Settlement Recognition and Financial Reporting Entity Issues, required the State to report the Badger Tobacco Asset Securitization Corporation as a blended component unit.

As discussed in Note 18C to the financial statements, the Injured Patients and Families Compensation Fund's projected ultimate loss liability is an estimate based on recommendations of a consulting actuary. The Injured Patients and Families Compensation Fund Board of Governors believes that the estimated loss liability is reasonable and adequate to cover the cost of claims incurred to date. However, uncertainties inherent in projecting the frequency and severity of large medical malpractice claims because of the Injured Patients and Families Compensation Fund's unlimited liability coverage and extended reporting and settlement periods make it likely that amounts paid will ultimately differ from the recorded estimated liabilities. These differences cannot be quantified.

Management's discussion and analysis, the infrastructure narrative, and the budgetary comparison schedule with related notes as listed in the table of contents are not required parts of the basic financial statements of the State of Wisconsin but are supplementary information required by the Governmental Accounting Standards Board. We have applied certain limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit the information and express no opinion on it.

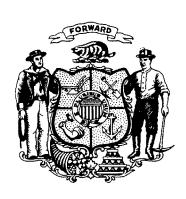

In accordance with *Government Auditing Standards*, we have prepared a report dated December 21, 2004, on our consideration of the State of Wisconsin's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. A more detailed version of that report will be included in the State's single audit report. The report on internal control and compliance is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be considered in assessing the results of our audit.

LEGISLATIVE AUDIT BUREAU

Janice Mueller

December 21, 2004

Janice Mueller State Auditor

#### MANAGEMENT'S DISCUSSION AND ANALYSIS

The *Management's Discussion and Analysis* of the State of Wisconsin's Comprehensive Annual Financial Report (CAFR) presents a discussion and analysis of the State's financial performance during the fiscal year that ended June 30, 2004. It should be read in conjunction with the transmittal letter located at the front of this CAFR, and the State's financial statements, which follow this part of the CAFR.

#### FINANCIAL HIGHLIGHTS -- PRIMARY GOVERNMENT

#### Government-wide (Tables 2 and 3 on Pages 9 and 10)

- Net Assets. The assets of the State of Wisconsin exceeded its liabilities at the close of Fiscal Year 2004 by \$10.9 billion (reported as "net assets"). Of this amount, \$(7.3) billion was reported as "unrestricted net assets". A positive balance in unrestricted net assets would represent the amount available to be used to meet a government's ongoing obligations to citizens and creditors.
- Changes in Net Assets. The State's total net assets decreased by \$0.9 billion in Fiscal Year 2004. Net assets of
  governmental activities decreased by \$956.1 million or 16.9 percent, while net assets of the business-type activities
  showed an increase of \$16.9 million or 0.3 percent.
- Excess of Revenues over (under) Expenses -- Governmental Activities. During Fiscal Year 2004, the State's total revenues for governmental activities of \$19.91 billion were \$29.2 million more than total expenses (excluding transfers) for governmental activities of \$19.88 billion. Of these expenses, \$7.5 billion were covered by program revenues. General revenues, generated primarily from various taxes, totaled \$12.4 billion.

#### **Fund**

- Governmental Funds -- Fund Balances. As of the close of Fiscal Year 2004, the State's governmental funds reported
  combined ending fund balances of \$(741.3) million, an increase of \$316.5 million in comparison with the prior year. Of this
  total amount, \$(2.6) billion represents the "unreserved fund balances".
- General Fund -- Fund Balance. At the end of the current fiscal year, the unreserved fund deficit for the General Fund was \$(2.3) billion, or (13.4) percent of total General Fund expenditures.

#### **Long-term Debt**

• The State's total long-term debt obligations (bonds and notes payable) increased by \$2,534.8 million during the current fiscal year which represents the net difference between new issuances, payments and refundings of outstanding debt. A key factor contributing to the increase is the issuance of \$1,794.9 million of General Fund annual appropriation bonds, which were issued to pay off the State's unfunded accrued prior service (pension) liability and the unfunded accrued liability for sick leave conversion credits. Additionally the issuance during the fiscal year of \$1,305.1 million of general obligation bonds and \$507.3 million of revenue bond obligations, and early redemptions and refundings of general obligation and revenue bonds contributed to this increase. Additional detail regarding these activities begins on Page 17.

#### **OVERVIEW OF THE FINANCIAL STATEMENTS**

The Financial Section of this CAFR consists of four parts: (1) management's discussion and analysis (this section), (2) basic financial statements, (3) additional required supplementary information, and (4) optional other supplementary information. Parts (2), (3), and (4) are briefly described on the following page:

#### **Basic Financial Statements**

The basic financial statements include two sets of statements that present different views of the State -- the **government-wide financial statements** and the **fund financial statements**. These financial statements also include notes that explain some of the information in the financial statements and provide more detail.

#### **Government-wide Financial Statements**

The government-wide financial statements provide a broad view of the State's operations. The statements provide both short-term and long-term information about the State's financial status, which assists in assessing the State's financial condition at the end of the fiscal year. The government-wide financial statements include two statements:

- The statement of net assets presents all of the government's assets and liabilities, with the difference between the two
  reported as "net assets". Over time, increases or decreases in the state's net assets are an indicator of whether its
  financial health is improving or weakening, respectively.
- The *statement of activities* presents a comparison between direct expenses and program revenues for each function of the State's governmental activities and for different identifiable business-type activities of the State.

These government-wide financial statements are divided into three categories:

- Governmental Activities Most services generally associated with State government fall into this category, including commerce, education, transportation, environmental resources, human relations and resources, general executive, judicial and legislative.
- Business-Type Activities Those operations for which a fee is charged to external users for goods and services are
  reported in this category.
- Discretely Presented Component Units These are operations for which the State has financial accountability but that
  have certain independent qualities as well. The State's discretely presented component units (all business-type activities)
  are:
  - Wisconsin Housing and Economic Development Authority,
  - Wisconsin Health Care Liability Insurance Plan,
  - University of Wisconsin Hospitals and Clinics Authority,
  - State Fair Park Exposition Center, Inc., and
  - University of Wisconsin Foundation.

Complete financial statements of the individual component units can be obtained from their respective administrative offices. Addresses and other additional information about the State's component units are presented in Note 1-B to the financial statements.

The government-wide financial statements are prepared using the flow of economic resources measurement focus and the accrual basis of accounting. The accrual basis of accounting, which is similar to the methods used by most businesses, takes into account all revenues and expenses connected with the fiscal year even if cash involved has not been received or paid.

#### **Fund Financial Statements**

The fund financial statements focus on individual parts of the State government, reporting the State's operations in more detail than the government-wide statements. The basic fund financial statements provide more detailed information on the State's most significant funds.

The State has three kinds of fund categories. It is important to note that these fund categories use different accounting approaches and should be interpreted differently.

- Governmental Funds Most of the basic services provided by the State are financed through governmental funds. Governmental funds report information using the flow of current financial resources measurement focus and the modified accrual basis of accounting. These statements provide a detailed short-term view of the State's finances that assists in determining whether there will be adequate financial resources available to meet the current needs of the State. Because this information does not encompass the long-term focus of the government-wide statements, reconciliations are provided on the subsequent page of the governmental fund statements. The State has two major governmental funds -- the General Fund and the Transportation Fund. Examples of non-major governmental funds include the Conservation Fund, the Bond Security and Redemption Fund, and the Capital Improvement Fund.
- Proprietary Funds These funds are used to show activities that operate more like those of commercial enterprises. Fees
  are charged for services provided, both to outside customers and to other units of the State. Proprietary funds, like the
  government-wide statements, use the accrual basis of accounting. The State has five major proprietary funds -- the Injured
  Patients and Families Compensation Fund, the Environmental Improvement Fund, the Veterans Mortgage Loan
  Repayment Fund, the University of Wisconsin System and the Unemployment Reserve Fund. Examples of the State's
  non-major proprietary funds include the Lottery and the Health Insurance Fund.
- Fiduciary Funds These funds are used to show assets held by the State as trustee or agent for others outside the State, such as the Wisconsin Retirement System and the Local Government Pooled Investment Fund. Similar to proprietary funds, these funds use the accrual basis of accounting. Because the State can not use these assets to finance its operations, fiduciary funds are not included in the government-wide financial statements discussed above.

Table 1, below, shows how the required parts of this financial report are arranged and relate to one another.

	Table 1  Major Features of State of Wisconsin's Government-wide and Fund Financial Statements										
	GOVERNMENT-WIDE STATEMENTS		FUND STATEMENTS								
		Governmental Funds	Proprietary Funds	Fiduciary Funds							
Scope	Entire State government (except fiduciary funds) and the State's component units	The activities of the State that are not proprietary or fiduciary. Governmental activities are primarily financed through taxes, intergovernmental revenues, and other nonexchange revenues. Examples of governmental funds include:  • General  • Transportation  • Bond Security and Redemption  • Capital Improvement  • Common School	The activities the State operates similar to private business. Examples of proprietary funds include:  • Enterprise funds:  - Injured Patients and Families Compensation  - Environmental Improvement  - University of Wisconsin System  - Lottery  • Internal service funds:  - Technology Services  - Facilities Operations and Maintenance	Instances in which the State is the trustee or agent for someone else's resources. Examples of fiduciary funds include:  • Wisconsin Retirement System  • Local Government Pooled Investment  • Unclaimed Property  • College Savings Program Trust							
Required financial statements	Statement of net assets     Statement of activities	Balance sheet     Statement of revenues, expenditures, and changes in fund balances	Balance sheet     Statement of revenues, expenses and changes in fund equity     Statement of cash flows	Statement of fiduciary net assets     Statement of changes in fiduciary net assets							
Accounting basis and measurement focus	Accrual accounting and economic resource focus	Modified accrual accounting and current financial resource focus	Accrual accounting and economic resources focus	Accrual accounting and economic resources focus							
Type of asset/liability information	All assets and liabilities, both financial and capital, and short-term and long-term	Only assets expected to be used up and liabilities that come due during the year or soon thereafter; no capital assets included	All assets and liabilities, both financial and capital, and short-term and long-term	All assets and liabilities, both short-term and long-term							
Type of inflow-outflow information	All revenues and expenses during the year, regardless of when cash is received or paid	Revenues for which cash is received during or soon after the end of the year     Expenditures when goods or services have been received and payment is due during the year or soon thereafter	All revenues and expenses during the year, regardless of when cash is received or paid	All revenues and expenses during the year, regardless of when cash is received or paid							

#### **Additional Required Supplementary Information**

In addition to this Management's Discussion and Analysis, which is required supplementary information, the basic financial statements are followed by a section of required supplemental information that further explains and supports the information in the financial statements. The required supplementary information includes (1) condition and maintenance data regarding the State's infrastructure, and (2) a budgetary comparison schedule of the General and the Transportation funds, including reconciliations between the statutory and GAAP fund balances at fiscal year-end.

#### Other Supplementary Information

The Other Supplementary Information includes combining financial statements for nonmajor governmental funds, nonmajor enterprise funds, internal service funds and fiduciary funds, each of which are added together and presented in single columns in the basic financial statements.

#### FINANCIAL ANALYSIS OF THE STATE AS A WHOLE

Tables 2 and 3, below, present summary information of the State's net assets and changes in net assets.

#### **Net Assets**

As presented in Table 2, total assets of the State on June 30, 2004 were \$28.5 billion, while total liabilities were \$17.7 billion, resulting in combined net assets (government and business-type activities) of \$10.9 billion. The largest component of the State's total net assets, \$14.0 billion or approximately 129.1 percent, reflects its investment in capital assets (i.e., land, buildings, equipment, infrastructure, and others), less any related debt outstanding that was needed to acquire or construct the assets. Approximately \$4.2 billion of net assets were restricted by external sources or the State Constitution, and were not available to finance the day-to-day operations of the State.

The unrestricted net assets, which, if positive, could be used at the State's discretion, showed a negative balance of \$(7.3) billion. Therefore, based on this measurement, no funds were available for discretionary purposes. A contributing factor to the negative balance is that governments recognize a liability on the government-wide statement of net assets as soon as an obligation is incurred. While financing focuses on when a liability will be paid, accounting is primarily concerned with when a liability is incurred. Accordingly, the State recognizes long-term liabilities (such as general obligation debt, compensated absences, and future benefits and loss liabilities – listed In Note 10 to the financial statements) on the statement of net assets. In addition to the effect of reporting long-term liabilities when incurred, the General Fund's total deficit fund balance of \$(1.9) billion at year-end, as discussed on Page 13, also contributed to the deficit unrestricted net assets reported in the statement of net assets.

During Fiscal Year 2004, the State issued \$1.8 billion of General Fund annual appropriation bonds to pay the unfunded accrued prior service (pension) liability and the unfunded accrued liability for sick leave conversion credits. Further, the State issued \$1.3 billion of general obligation bonds and global certificates, primarily for the acquisition or improvement of land. General Obligation Bonds outstanding at June 30, 2004 totaled \$4.4 billion. Outstanding revenue bonds, which are not considered general obligation debt of the State, were \$3.8 billion at June 30, 2004.

			Table 2 Net Assets (in millions)				
	Governme Activitie		Business-		Total		Total Percentage Change
	2004	2003	2004	2003	2004	2003	2004-2003

Total Net Assets	\$ 4,691.8 \$	5,647.9	\$ 6,162.2 \$	6,145.3	\$ 10,853.9 \$	11,793.2	(8.0)

#### **Changes in Net Assets**

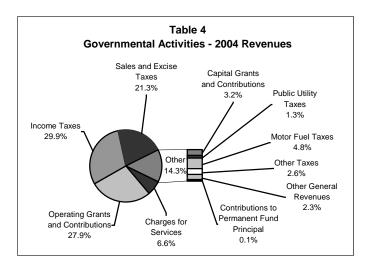

The revenues and expenses information, as shown in Table 3, was derived from the government-wide statement of activities and reflects how the State's net assets changed during the fiscal year. The State earned program revenues of \$12.8 billion and general revenues of \$12.4 billion for total revenues of \$25.2 billion during Fiscal Year 2004. Expenses for the State during Fiscal Year 2004 were \$26.2 billion. These expenses included payment of \$782.4 million for the unfunded liability for sick leave conversion credits, which was funded through the issuance of annual appropriation bonds. As a result of the excess of expenses over revenues, the total net assets of the State decreased \$0.9 billion, net of contributions and transfers.

#### **Governmental Activities**

The net assets of governmental activities decreased \$1.0 billion in Fiscal Year 2004. Revenues for the governmental activities (including Contributions to Permanent Fund Principal) totaled \$19.9 billion, while expenses and net transfers totaled \$20.9 billion in 2004.

As shown in Table 4, below, approximately 59.9 percent of revenues from all sources earned came from taxes (sales and excise, income, public utility, motor fuel, and other taxes). Operating and capital grants and contributions, which represent amounts received from other governments/entities – primarily the federal government – provided 31.1 percent of total revenues. Charges for services contributed 6.6 percent, and various other revenues provided 2.5 percent of the remaining governmental activity revenue sources.

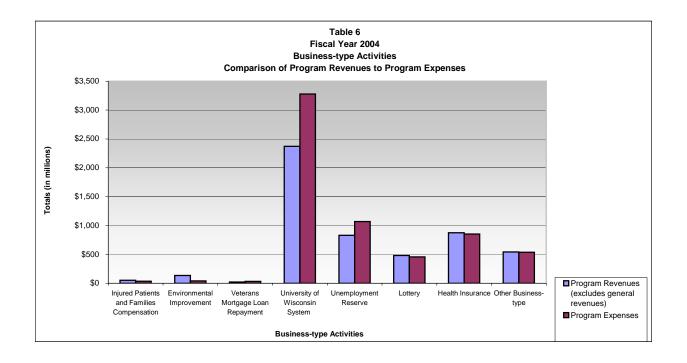

As shown in Table 5, below, expenses for Human Relations and Resources programs make up the largest portion – 38.3 percent – of total governmental expenses and transfers. Included in this function are various programs such as Medical Assistance, the prison system, and the temporary assistance for needy families "TANF" program. Educational expenses, which include various school aids but exclude expenses of the University of Wisconsin System, make up 27.5 percent. Tax Relief and Other General Expenses, which includes the expense related to payment of the employee benefit liability, and the municipal and county shared revenue program represent 7.5 and 5.1 percent of the total, respectively, while Transportation expenses represent 8.6 percent. Net transfers to business-type activities, which include a general purpose revenue "GPR" subsidy to the University of Wisconsin System for various programs, make up 4.8 percent of the total expenses/transfers. The interest on long-term debt and remaining functional expenses total 8.1 percent.

#### **Business-Type Activities**

Revenues of business-type activities totaled \$5.3 billion for Fiscal Year 2004. The program revenues consisted of \$4.8 billion of charges for services, \$0.5 billion of operating grants and contributions, and \$.02 billion of capital grants and contributions. General revenues, contributions to endowments and permanent fund principal, and net transfers in totaled \$(4.8) million, \$5.3 million, and \$1,007.4 million, respectively. The total expenses for business-type activities were \$6.3 billion. Table 6, below, compares the program revenues and program expenses of the various State business-type activities. This table does not include the transfer in (subsidy) from the General Fund to the University of Wisconsin System or other business-type activities.

#### FINANCIAL ANALYSIS OF THE STATE'S INDIVIDUAL FUNDS

#### **Governmental Funds**

At the end of Fiscal Year 2004, the State's governmental funds reported a combined fund balance of \$(741.3) million. Funds with significant changes in fund balance are discussed below:

#### **General Fund**

The General Fund is the chief operating fund of the State. At June 30 2004, the State's General Fund reported a total fund deficit of \$(1,931.1) million. The net change in fund balance during Fiscal Year 2004 was \$307.7 million, in contrast to \$(753.1) million in Fiscal Year 2003. Major revenue, expenditure and other sources/uses contributing to the change in fund balance are as follows:

#### Revenues

Revenues of the General Fund totaled \$16,794.6 million in Fiscal Year 2004, an increase of \$95.2 million from Fiscal Year 2003. Factors contributing to the increase included the following:

- Revenues from taxes increased \$609.3 million from Fiscal Year 2003 to Fiscal Year 2004. The most significant
  increase related to individual income tax withholdings, which increased \$179.8 million or 3.5 percent. This increase
  was due to the growth in employment and wages in the State during that period.
- Intergovernmental revenues (e.g., federal assistance) increased \$105.6 million in Fiscal Year 2004, primarily due to an increase in expenditures that were eligible for Federal reimbursement. These items included an increase in benefits paid related to Medical Assistance and the Waiver Program.
- Intergovernmental transfers in the General Fund decreased \$598.6 million during Fiscal Year 2004. This decrease reflects two changes related to intergovernmental transfers. Starting in Fiscal Year 2004, these transfers are accounted for in the Medical Assistance Trust Fund, a special revenue fund, rather than the General Fund. (This special revenue fund reported a fund deficit of \$(176.3) million at June 30, 2004.) Further, intergovernmental transfers declined significantly between fiscal years 2003 and 2004 due to a decrease in the supplementary nursing home Medical Assistance payments that could have been received from the federal government as a result of intergovernmental transfers between the State and certain counties. These transfers declined from \$598.6 million in Fiscal Year 2004.
- In Fiscal Year 2003, Tobacco Settlement revenues of \$153.9 million were reported in the General Fund. In Fiscal Year 2004, tobacco settlement revenues are directed to the Badger Tobacco Asset Securitization Corporation, to provide debt service for the bonds issued in 2002 to securitize future revenue.
- Other revenues, such as charges for goods and services, and gifts and grants increased \$132.9 million.

#### Expenditures

Expenditures of the General Fund totaled \$17,152.6 million in Fiscal Year 2004, an increase of \$957.0 million from Fiscal Year 2003. The factors contributing to the increase included the following:

- An increase in Tax Relief and Other General expenditures of \$1,487.6 million relating to the payment of employee benefits for the unfunded accrued prior service (pension) liability and the unfunded accrued liability for sick leave conversion credits. This was funded by the issuance of General Fund annual appropriation bonds discussed below.
- A decrease in human relations and resources expenditures of \$546.1 million primarily resulted from the shift of a portion of medical assistance payments to the Medical Assistance Trust fund.
- Other functional expenditures increased \$15.5 million.

#### Other Financing Sources and Uses

Other financing sources/uses and increases/decreases totaled a net \$665.7 million in Fiscal Year 2004, a change of \$1,922.6 million from the prior year. The components of this change included the following:

- In Fiscal Year 2004, the State issued annual appropriation bonds to pay the unfunded accrued prior service (pension)
  liability and the unfunded accrued liability for sick leave conversion credits. Net proceeds of the \$1,506.3 million were
  recorded in the General Fund.
- The State transferred to the General Fund \$230.0 million from the Transportation Fund and \$17.6 million from the
  Utility Public Benefits Fund in this fiscal year. These moneys were used to fund a portion of the Fiscal Year 2004
  shared revenue payments to local governments.
- The transfer of \$287.1 million in Fiscal Year 2003 from the Tobacco Settlement Endowment Fund was the final
  portion of the proceeds from the sale of the State's right to the Attorneys General Master Settlement Agreement of
  1998. Therefore, similar transfers were not reported in Fiscal Year 2004.
- During Fiscal Year 2004, transfers from various funds to the General Fund, relating to the reduction in expenditures experienced from the issuance of the annual appropriation bonds, totaled \$48.0 million. This is in contrast to the \$38.6 million transferred from various funds to the General Fund in Fiscal Year 2003 for contributions initially intended to be paid to the accumulated sick leave program.
- Transfers out of the General Fund totaled \$1,347.6 million, a decrease of \$399.2 million from the prior year. The
  majority of this decrease relates to a reduction in transfers out to the Medical Assistance Trust and Bond Security and
  Redemption Funds of \$146.2 million and \$169.3 million, respectively.
- Other financing sources/uses and other increases/decreases resulted in a net increase of \$47.2 million from the prior fiscal year.

As of June 30, 2004, the General Fund reported a deficit of \$(2,296.8) million in its "Unreserved" Fund Balance. This compares to a General Fund Unreserved Fund Deficit of \$(2,638.2) million as of June 30, 2003. A deficit unreserved fund balance represents the excess of the liabilities of the General Fund over its assets and reserved fund balance accounts. Reservations of fund balances of governmental funds represent amounts that are not available for appropriation. Examples of fund balance reservations reported in the General Fund include reserves for encumbrances, inventories and prepaid items.

#### General Fund Budgetary Highlights

Differences between the original budget and the final amended budget were significant (a \$2.8 billion increase in appropriations). This was due primarily to the fact that several of the State's programs (including annual appropriation bond proceeds for the unfunded prior service (pension) liability and accumulated sick leave program, the transfer to the Medical Assistance Trust Fund, Food Stamps and certain Local Aids - see the items denoted with \*, below) are not included in the original budget. In addition, numerous adjustments to spending estimates were needed as the year progressed because of changing circumstances (spending needs can change dramatically over a one-year period). The largest variances incurred in the following programs (in millions):

Program	 'ariance
Department of Commerce Federal Aid; Local Assistance	\$ 50.0 *
UW-System General Program Operations – Doctoral Universities	67.9
UW-System General Program Operations – System Wide Accounts	(62.1)
UW-System Principal Repayment and Interest	(51.8)
UW-System Federal Aid – Special Projects	103.7
Federal Aid, Medical Assistance	67.5
Food Stamps, Electronic Benefit Transfer	266.0 *
Appropriation Obligation Proceeds (for the Unfunded Prior Service (Pension)	
Liability and Accumulated Sick Leave Program)	1,487.6 *
Homeland Security	79.9
Transfer to Medical Assistance Trust Fund	123.5 *

Actual charges to appropriations (expenditures) were \$1.4 billion below the final budgeted estimates. The most significant positive variance occurred in UW System Federal Aid – Special Projects (\$77.8 million).

During the past fiscal year the budgetary-based fund balance increased by \$342.0 million for the General Fund, primarily due to an increase in tax revenue collections.

#### **Transportation Fund**

In Fiscal Year 2004, the Transportation Fund transferred to the General Fund \$230.0 million to fund a portion of the 2004 shared revenue payments to local governments. This was the primary contributing factor to the increase in transfers out of \$324.2 million from the preceding year. Also, total expenditures of the Transportation Fund decreased by \$179.6 million, from \$1,928.3 million in Fiscal Year 2003 to \$1,748.7 million in Fiscal Year 2004.

#### **Medical Assistance Trust Fund**

The Medical Assistance Trust Fund, which was created to account for revenues received under the intergovernmental transfers program, ended the year with a deficit balance of (\$176.3 million). Revenues in the fund increased by \$125 million, primarily due to the reporting of intergovernmental transfers in this fund (in the prior year these were recorded in the General Fund). Expenditures increased by \$406.2 million, while transfers in from the General Fund decreased by \$146.2 million. Wisconsin, along with other states, continues to struggle with increasing Medical Assistance costs. The deficit in the Medical Assistance Trust Fund may need to be financed by the General Fund.

#### **Annual Appropriation Bonds Fund**

In December 2003, the State issued \$1,794.9 million of General Fund annual appropriation bonds to obtain proceeds to pay the State's unfunded accrued prior service (pension) liability and its unfunded accrued liability for sick leave conversion credits. Of this amount, \$1,509.2 million is reported as long-term debt issued in the General Fund. The remaining portion of proceeds, \$285.7 million, is reported in the Annual Appropriation Bonds Fund, a debt service fund, to pay for future debt service requirements.

#### **Proprietary Funds**

The State's proprietary funds provide the same type of information found in the government-wide financial statements but in more detail. Significant changes to balances of proprietary funds from Fiscal Year 2003 to Fiscal Year 2004 include the following:

In Fiscal Year 2004, the Environmental Improvement Fund issued new revenue bonds of \$116.8 million, which contributed
to the fund's increase in \$67.2 million of total liabilities from Fiscal Year 2003. Correspondingly, loans receivable
increased \$102.1 million or 8.5 percent, while cash and cash equivalents increased \$73.3 million or 37.0 percent over the
prior year.

- Due to a decline in new mortgage loans and an increase in mortgage prepayments, the Veterans Mortgage Loan Repayment Fund's mortgage loans receivable has declined \$87.2 million or 22.2 percent. Its cash balance decreased \$111.4 million or 44.2 percent over the previous fiscal year because some of the outstanding general obligation bonds were paid off early. As a result of the early bond repayment, its outstanding general obligation bonds decreased \$189.1 million or 32.5 percent.
- In Fiscal Year 2004, the University of Wisconsin System's Tuition and Fees revenue increased \$75.8 million or 13.1 percent, due to increased enrollment and an 18.0 percent increase in tuition. Federal grants and contracts revenue increased \$59.8 million or 9.6 percent, substantially due to numerous significant new project grants.
- The Unemployment Reserve Fund experienced a \$117.9 million decrease in expenses or 9.9 percent in Fiscal Year 2004 in comparison to Fiscal Year 2003. The federal government stopped authorizing additional benefits to claimants who had exhausted their benefits, which was a significant factor contributing to this decrease. Due to the continuation of the economic slow down during the year, benefits have exceeded receipts. The operating loss for Fiscal Year 2004 and 2003 were \$236.4 million and \$369.2 million, respectively. The fund equity is reported as \$971.0 million as of June 30, 2004.
- In Fiscal Year 2004, the revenues of the Health Insurance Fund, which accounts for group health insurance provided to State employees and employers of participating governments, increased to \$875.5 million and expenses increased to \$854.0 million, reflecting a \$106.3 million and \$92.0 million increase, respectively, due to increased participation in the program and the rising cost of health insurance premiums paid to health insurance providers.

#### **GOVERNMENT-WIDE CAPITAL ASSET AND DEBT ADMINISTRATION**

#### **Capital Assets**

At the close of Fiscal Year 2004, the State had \$17.1 billion invested in capital assets, net of accumulated depreciation of \$2.8 billion. This represents an increase of \$638.9 million, or 3.9 percent, from Fiscal Year 2003. Depreciation charges totaled \$96.2 million and \$179.0 million for governmental and business-type activities, respectively, in Fiscal Year 2004. The details of these assets are presented in Table 7, below. Additional information about the State's capital assets is presented in Note 7 to the financial statements.

	C	apital	Assets, Net	Table of Dep (in milli	reciation,	as of J	une 30					
	Governmental				Busine	ss Typ	e		Total			
	Acti	vities			Activities				nment			
	2004		2003		2004		2003		2004		2003

Construction in Progress	901		1,098		30		29		931		1,127	
Totals	\$ 13,756	\$	13,314	\$	3,326	\$	3,131	\$	17,082	\$	16,444	

The major capital asset additions completed during Fiscal Year 2004 included the Health Science Learning Center – Madison (\$52.9 million expended) and the Klotsche Center Physical Education Addition – Milwaukee (\$17.6 million expended). In addition to these completed projects, construction in progress as of June 30, 2004 for governmental and business-type activities totaled \$900.8 million and \$260.9 million, respectively. (For business-type activities, \$231.2 million of construction in progress for the University of Wisconsin System is reported within various other categories of capital assets.) A list of

construction in progress projects is provided in Note 7. The State's continuing or proposed major capital projects for Fiscal Year 2005 include the Camp Randall Stadium Renovation – Madison (estimated budget of \$107.4 million, the Microbiological Science Building – Madison (estimated budget of \$108.7 million), and the Interdisciplinary Research Center – Madison (estimated budget of \$133.9 million).

#### **Debt Administration**

The State of Wisconsin Building Commission, an agency of the State, is empowered by law to consider, act upon, authorize, issue and sell all debt obligations of the State. The total general obligation debt outstanding for the State as of June 30, 2004 was \$4.4 billion, as shown in Table 8.

During Fiscal Year 2004, \$1,305.1 million of these general obligation bonds were issued to provide for the acquisition or improvement of land, water, property, highways, buildings, equipment, or facilities for public purposes and refund current outstanding bonds.

In addition, the State issued \$1,794.9 million of annual appropriation bonds to obtain proceeds to pay the State's unfunded accrued prior service (pension) liability under Wis. Stat. Section 40.05(2)(b) and its unfunded accrued liability for sick leave conversion credits under Wis. Stat. Section 40.05 (4)(b), (bc) and (bw).

Chapter 18 of the Wisconsin Statutes authorizes the State to issue revenue obligations. These obligations, which are not general obligation debt of the State, are secured by a pledge of revenues or property derived from the operations of a program funded by the issuance of the obligations. Revenue bonds of the primary government totaled \$3.8 billion outstanding at June 30, 2004, as shown in Table 8. These bonds included \$1,359.8 million of Transportation Revenue Bonds, \$224.7 million of Petroleum Inspection Revenue Bonds, \$692.1 million of Environmental Improvement Revenue Bonds, and \$1,567.0 million of Badger Tobacco Asset Securitization Corporation bonds.

Based on the application of the criteria contained in GASB Statement No. 14, as amended by GASB Statement No. 39 and clarified by GASB Technical Bulletin No. 2004-1, the Badger Tobacco Asset Securitization Corporation (BTASC), previously reported as a discretely presented component unit, is reported as a blended component unit in a debt service fund. The bylaws of BTASC require that the corporation hold itself apart and separate from the State of Wisconsin. Bonds issued by the BTASC are the sole obligation of the BTASC. The State is not legally liable for payment of principal and interest on these bonds nor is the debt dependent upon any dedicated stream of revenue generated by the State.

	Outstand	Tabl ding Debt as of (in mil	June 3	0, 2004 aı	nd 200	)3			
	Govern Activ		Busine Act	ess-Ty ivities	•	Tot	al

Totals	\$ 8,503.8	\$ 5,983.5	\$ 1	,551.4	\$	1,536.9	\$ 10,055.2	\$	7,520.4

Article VIII of the Wisconsin Constitution and Wis. Stat. Sec. 18.05 limits the amount of general obligation bond debt the State can contract in total and in any calendar year. In total, debt cannot exceed five percent of the value of all taxable property in the State. The amount of debt contracted in any calendar year is limited to the lesser of three-quarters of one percent of aggregate value of taxable property or five percent of aggregate value of taxable property less net indebtedness at January 1.

At June 30, 2004, State of Wisconsin fixed bonds had a rating of Aa3 from Moody's Investors Services, AA- from Standard and Poor's Corporation, and AA- from Fitch Investors Service, L.P. Variable bonds had a rating of P-1 from Moody's, A-1+ from Standard and Poor's Corporation, and F-1+ from Fitch Investors Services, L.P.

Detailed information about the State's long-term debt activity is presented in Note 11 to the financial statements.

#### **INFRASTRUCTURE -- MODIFIED APPROACH**

The State reports infrastructure (i.e., roads, bridges, and buildings considered an ancillary part of roads) as capital assets. The State has elected to report its infrastructure assets (11,200 centerline miles of roads and 4,900 bridges with a combined value of \$9.9 billion), using the modified approach. Under this method, infrastructure assets are not required to be depreciated if the State manages its eligible infrastructure assets using an asset management system designed to maintain and preserve these assets at a condition level established and disclosed by the State.

All infrastructure assets constructed prior to July 1, 2000 have been recorded at estimated historical cost. Historical cost was determined by calculating current costs of a similar asset and deflating that cost, using a price-index, to the estimated average construction date. Infrastructure costs, which exclude right of way, are expressed in 2000 dollars and deflated back to the average construction date using the Federal Highway Administration's composite index for federal-aid highway construction.

In order to adequately serve the traveling public and support the State economy, it is the State's policy to ensure at least 85 percent of the state-owned roads and bridges are in good or fair condition. As of June 30, 2004, 93.9 percent of the roads and 94.6 percent of bridges were in good or fair condition, consistent with State policies.

For the fiscal year ended June 30, 2004, actual maintenance and preservation costs for the State's road network were \$341.1 million, or \$109.7 million less than the estimated amount. On that same date, actual maintenance and preservation costs for the State's bridge network were \$52.3 million, or \$4.5 million more than the estimated amount. In developing estimated costs at the beginning of the fiscal year it is difficult to predict the types of projects that will actually incur costs during the year. Actual maintenance and preservation costs for the road network reflect an unanticipated shift from maintenance/preservation projects to capital construction projects during the Fiscal Year 2004. In addition, the State of Wisconsin, Department of Transportation's multi-year budgeting process, allowing encumbrances to carry forward, makes a comparison of actual to estimated amounts difficult since expenditures for the current year may have been budgeted and committed to a project in prior years.

#### **ECONOMIC FACTORS**

In calendar year 2003, the Wisconsin economy stabilized and moved into a sustainable recovery during 2004.

Employment declined slightly in 2003 in Wisconsin, down 0.3 percent. Wisconsin's employment has been expanding since January 2004. Through October 2004, Wisconsin non-farm employment is up 2.1 percent compared to a year ago. Employment losses suffered in the 2000-01 recession have been fully recovered. All private sectors of the economy are adding employment. Unemployment has declined from 5.5 percent in 2003 to 5.0 percent by October 2004.

Personal income growth has improved with the gains in employment. Wisconsin personal income increased 2.8 percent in 2002 and 3.1 percent in 2003. Nationally, income growth was 1.8 percent in 2002 and 3.3 percent in 2003. On a per capita basis, Wisconsin income increased 2.2 percent in 2002 and 2.5 percent in 2003 compared to 0.7 percent and 2.2 percent nationally. Since 2000, Wisconsin's per capita income has moved closer to the national average from 95.7 percent in 2000 to 97.7 percent in 2003. Through the first half of 2004, income growth is averaging 4.0 percent.

Wisconsin's property values reflect an expanding economy. Real property values increased significantly in 2002 and 2003, up 7.5 percent in each year. In 2004, values increased 8.7 percent. Commercial, manufacturing and residential real estate have all increased significantly in these years.

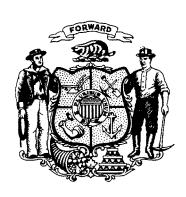

Inflation in Wisconsin has been modest. As measured by the Milwaukee-Racine CSA consumer price index, inflation in 2003 was 2.1 percent. In the first half of 2004, inflation was a moderate 1.1 percent.

#### **CONTACTING THE STATE'S FINANCIAL MANAGEMENT**

This financial report is designed to provide Wisconsin's citizens, taxpayers, customers, investors and creditors with a general overview of the State's finances and to demonstrate the State's accountability for the money it receives. Questions about this report or requests for additional financial information should be addressed to: State of Wisconsin, State Controller's Office, 101 E. Wilson Street, 5th Floor, Madison, WI 53707.

The State's component units issue their own separate audited financial statements. These statements may be obtained by directly contacting the component unit. You may contact the individual component units through their administrative offices identified in Note 1-B.

## Statement of Revenues, Expenditures, and Changes in Fund Balances - Governmental Funds

For the Fiscal Year Ended June 30, 2004

(Continued)

	Total Governmental
Reconciliation to the Statement of Activities:	
Net Change in Fund Balances from previous page \$	318,122
Inventories, which are recorded under the purchases method for government fund reporting, are reported under the consumption approach on the Statement of Activities. As a result of this change, the Increase (Decrease in Reserve for Inventories on the fund statement has been reclassified as functional expenses on the government-wide statement.	
Repayment of bond principal is reported as an expenditure in the governmental funds, but the payment reduces long-term liabilities in the Statement of Net Assets.	126,358
Governmental funds report the acquisition or construction of capital assets as expenditures, while governmental activities report depreciation expense to allocate the cost of these assets over their estimated useful life. Donated assets are set up at fair value with a corresponding amount of revenue recognized. In the current period, these amounts are:  Capital Outlay/Functional Expenditures  Depreciation Expense  Grants and Contributions (Donated Assets)	
Transfers of capital assets between governmental and business-type activities results in the movement of those assets on the Statement of Net Assets and corresponding recognition of the related transfer in/out on the Statement of Activities.	(859)
In the Statement of Activities, only the gain on the sale of capital assets is reported, while in the governmental funds, the proceeds from the sale increases financial resources. Thus, the change in net assets differs from the change in fund balance by the cost of the capital assets sold.	(178,748)
Revenues in the Statement of Activities that do not provide current financial resources are not reported as revenues in the funds.	17,552
Bond proceeds provide current financial resources to governmental funds, but issuing debt increases long-term liabilities in the Statement of Net Assets.  Bonds Issued Payments to Refunding Bond Escrow Agent Bond Premium Bonds Discount Bond Issuance Costs	(3,076,559) 534,937 (97,981) 2,857 27,383
Some expenses reported in the Statement of Activities do not require the use of current financial resources and, therefore, are not reported as expenditures in governmental funds.  Net increase in accrued interest Decrease in Capital Leases Decrease in Installment Contracts Increase in Compensated Absences Decrease in Claims and Judgments Decrease in Employer Pension Related Debt Costs	(10,221) 14,875 345 (5,073) 136 722,248
Internal service funds are used by management to charge the costs of certain activities, such as insurance and telecommunications to individual funds. The net revenue (expense) of the internal service funds is reported with governmental activities.	13,236
Changes in Net Assets of Governmental Activities as reported on the Statement of Activities (See page 23)	(956,149)

The notes to the financial statements are an integral part of this statement.

# **Notes To The Financial Statements**

# NOTE 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

# A. Basis of Presentation

The accompanying basic financial statements have been prepared in conformity with generally accepted accounting principles (GAAP) for governments as prescribed by the Governmental Accounting Standards Board (GASB).

# **B. Financial Reporting Entity**

For GAAP purposes, the State of Wisconsin includes all funds, elected offices, departments and agencies of the State, as well as boards, commissions, authorities and universities. The State has also considered all potential "component units" for which it is financially accountable, and other affiliated organizations for which the nature and significance of their relationship, including their ongoing financial support, with the State are such that exclusion would cause the State's financial statements to be misleading or incomplete.

The decision to include a potential component unit in the State's reporting entity is based on the criteria set forth in GASB Statement No. 14, The Financial Reporting Entity, and GASB Statement No. 39, Determining Whether Certain Organizations Are Component Units, an amendment of GASB Statement No. 14 (effective beginning with Fiscal Year 2004). GASB Statement No. 14 criteria include the ability to appoint a voting majority of an organization's governing body and (1) the ability of the State to impose its will on that organization or (2) the potential for the organization to provide specific financial benefits to, or impose specific financial burdens on, the State. GASB Statement No. 39 provisions relate to separately legal, tax-exempt organizations and include: (1) the economic resources received or held are entirely or almost entirely for the direct benefit of the State, (2) the State is entitled to, or has the ability to otherwise access, a majority of the economic resources received or held by the separate organization, and (3) the economic resources received or held by an individual organization that the State is entitled to, or has the ability to otherwise access, are significant to the State.

In addition, GASB Technical Bulletin No. 2004-1 (TB), *Tobacco Settlement Recognition and Financial Reporting Entity Issues*, became effective beginning with Fiscal Year 2004. The TB clarified guidance on whether a Tobacco Settlement Authority (TSA) that is created to obtain the rights to all or a portion of future tobacco settlement resources is a component unit of the government that created it. This guidance resulted in the Badger Tobacco Asset Securitization Corporation (BATSC), previously

reported as a discretely presented component unit, to be a blended component unit in the primary government and reported as a debt service fund. The State has no legal liability for the obligations of BTASC.

Based upon the application of the criteria contained in GASB Statement No. 14, as amended by GASB Statement No. 39 and clarified by GASB Technical Bulletin No. 2004-1, the Wisconsin Public Broadcasting Foundation, Inc. and the Badger Tobacco Asset Securitization Corporation are reported as blended component units; and the Wisconsin Housing and Economic Development Authority, the Wisconsin Health Care Liability Insurance Plan, the University of Wisconsin Hospitals and Clinics Authority, the University of Wisconsin Foundation and the State Fair Park Exposition Center, Inc., are presented as discrete component units, as discussed below.

Complete financial statements of the individual component units that issue separate statements can be obtained from their respective administrative offices:

Wisconsin Public Broadcasting Foundation Inc. Wisconsin Educational Communications Board 3319 West Beltline Highway Madison, WI 53702

Badger Tobacco Asset Securitization Corporation 10 East Doty Street, Suite 800 Madison, WI 53703

Wisconsin Housing and Economic Development Authority 201 West Washington Avenue, Suite 700 Madison, WI 53702

Wisconsin Health Care Liability Insurance Plan Office of the Commissioner of Insurance 125 South Webster Street Madison, WI 53702

University of Wisconsin Hospitals and Clinics Authority 635 Science Drive, Room 310 Madison, WI 53711 University of Wisconsin Foundation Attn: Finance PO Box 8860 Madison, WI 53708-8860

State Fair Park Exposition Center, Inc. 8200 West Greenfield Avenue West Allis. WI 53214

#### **Blended Component Units**

Blended component units are entities that are legally separate from the State, but are so intertwined with the State that they are, in substance, the same as the State. The blended component unit serves or benefits the primary government. They are reported as part of the State and blended into the appropriate funds.

Wisconsin Public Broadcasting Foundation, Inc. - The Wisconsin Public Broadcasting Foundation, Inc. (Foundation), created in 1983 by the Wisconsin Legislature, is a private, nonstock, nonprofit Wisconsin Corporation, wholly owned by the Wisconsin Educational Communications Board (ECB), a unit of the State. The Foundation solicits funds in the name of, and with the approval of, the ECB. The Foundation's funds are managed by a five-member board of trustees consisting of the executive director of the ECB and four members of the ECB board. In addition to accountability for fiscal matters, the State has the ability to significantly influence operations of the Foundation through legislation. The Foundation is reported as a special revenue fund.

Badger Tobacco Asset Securitization Corporation (BTASC) - A nonstock public corporate entity created under Chapter 181 of the Wisconsin Statutes was created for the purpose of making a onetime purchase of Tobacco Settlement Revenues (TSRs) from the State. In May 2002, BTASC issued bonds to provide sufficient funds for carrying out its purpose. Bonds issued by the BTASC are the sole obligation of the BTASC. The State is not legally liable for payment of principal and interest on these bonds nor is the debt dependent upon any dedicated stream of revenue generated by the State. Directors of the corporation are appointed by the Secretary of Administration for staggered threeyear terms. Once appointed, directors can only be removed for cause. At least one of the directors must be determined to be "independent" for federal bankruptcy law purposes. The State appoints the BTASC board and a financial benefit exists. BTASC reports on a fiscal year ended May 31. BTASC is reported as a debt service fund (Badger Tobacco Asset Securitization).

Pursuant to a Purchase and Sale Agreement with the State, BTASC acquired all of the State's right, title, and interest in the TSRs under the Master Settlement Agreement and the Consent Decree and Final Judgment (MSA). The MSA was entered into on November 23, 1998, among the attorneys general of 46 states, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the U.S. Virgin Islands, American Samoa and the Commonwealth of the Northern Mariana Islands (the "Settling States") and the four largest United States tobacco manufacturers.

On May 23, 2002 the State sold the TSRs to BTASC for \$1.3 billion and a residual certificate. Upon discharge of BTASC's obligations under its May 1, 2002 bond indenture, all subsequent TSRs are owned by the State pursuant to the residual certificate.

#### **Discrete Component Units**

Discrete component units are entities which are legally separate from the State, but are financially accountable to the State, whose relationship with the State is such that exclusion would cause the State's financial statements to be misleading or incomplete. The Wisconsin Housing and Economic Development Authority, the Wisconsin Health Care Liability Insurance Plan, the University of Wisconsin Hospitals and Clinics Authority, the University of Wisconsin Foundation and the State Fair Park Exposition Center, Inc., are reported in a separate column and in separate rows in the government-wide statements to emphasize that they are legally separate.

Wisconsin Housing and Economic Development Authority - The Wisconsin Housing and Economic Development Authority (Authority) was established by the Wisconsin Legislature in 1972 to help meet the housing needs of Wisconsin's low and moderate income citizens. The State has significantly expanded the scope of services of the Authority by adding programs that include financing for farmers and for economic development projects. While the Authority receives no State tax dollars for its bond-supported programs and the State is not liable on bonds the Authority issues, the State has the ability to significantly influence operations of the Authority through legislation. The State appoints the Authority's Board and has the ability to impose its will on the Authority. The Authority reports on a June 30 fiscal year-end.

Wisconsin Health Care Liability Insurance Plan - The Wisconsin Health Care Liability Insurance Plan (Plan) was established by rule of the Commissioner of Insurance of the State of Wisconsin to provide health care liability insurance and liability coverage normally incidental to health care liability insurance to eligible health care providers in the State. Eight out of 13 members of the Board of Directors are appointed by the Governor, and the State has the ability to impose its will upon the Plan. The Plan reports on a fiscal year ended December 31.

University of Wisconsin Hospitals and Clinics Authority – The University of Wisconsin Hospitals and Clinics Authority (Hospital) is a not-for-profit academic medical center. The Hospital operates an acute-care hospital with approximately 480 available beds, numerous specialty clinics, and seven ambulatory facilities providing comprehensive health care to patients, education programs, research and community service to residents of southern Wisconsin. Prior to June 1996, the Hospital was a unit of the University of Wisconsin-Madison. In June 1996, in accordance with legislation enacted by the State Legislature, the Hospital was restructured as a Public Authority, a public body corporate and politic created by State statutes. The State appoints a majority of the Hospital's Board of Directors and a financial benefit/burden relationship exists between the Hospital and the State. The Hospital reports on a June 30 fiscal year-end.

The legislation that created the Hospital Authority also provided, among other things, for the Board of Regents of the University of Wisconsin System to execute various agreements with the Hospital. These agreements include an Affiliation Agreement, a Lease Agreement, a Conveyance Agreement and a Contractual Services Agreement and Operating and Service Agreement.

The Affiliation Agreement requires the Hospital to continue to support the educational, research and clinical activities of the University of Wisconsin-Madison, which are administered by the Hospital. Under the terms of a Lease Agreement, the Hospital leases facilities, which were occupied by the Hospital as of June 29, 1996 (see Note 12A to the financial statements). Under a Conveyance Agreement, certain assets and liabilities related to the Hospital were identified and transferred to the Hospital effective July 1, 1996. Subject to the Contractual Services Agreement and Operating and Service Agreement between the Board of Regents and the Hospital, the two parties have entered into contracts for the continuation of services in support of programs and operations.

University of Wisconsin Foundation - The University of Wisconsin Foundation (the Foundation) is a legally separate, tax-exempt component unit of the State. The Foundation acts primarily as a fund-raising organization to supplement the resources that are available to the University of Wisconsin-Madison and several other units of the University of Wisconsin System (a fund of the State) in support of its programs. These include scientific, literary, athletic and educational program purposes. Although the State does not control the timing or amount of receipts from the Foundation, the majority of resources, or income thereon, that the Foundation holds and invests are restricted to the activities of the University of Wisconsin-Madison and other units of the University of Wisconsin System by the donors. Because these restricted resources held by the Foundation can only be used by, or for the benefit of, the University of Wisconsin-Madison and several other units of the University of Wisconsin System, the Foundation is considered a component unit of the State. The Foundation reports on a fiscal year ended December 31.

State Fair Park Exposition Center, Inc. – In October 2000, the State Fair Park Exposition Center, Inc. (the Center) was organized by the State of Wisconsin State Fair Park as a nonstock, not-for-profit corporation under the Internal Revenue Code 501(c)(3). Authorization for the Center's organization is found under Chapter 42, Wis. Stats. The Center has broad general powers that include approving the sale, lease, or purchase of any real estate and obtaining financing through loans or other methods. The board of the Center includes the chairperson of the State Fair Park Board, and three members appointed by the Center's Board. In addition to the State appointing a voting majority of the Center, the State is able to impose its will on the Center, and a financial benefit relationship exists. The Center reports on a fiscal year ended December 31.

### **Related Organizations**

These related organizations are excluded from the reporting entity because the State's accountability does not extend beyond appointing a voting majority of the organization's board members. Financial statements are available from the respective organizations.

Wisconsin Health and Educational Facilities Authority - a public body politic and corporate that provides financing for capital expenditures and refinancing of indebtedness for Wisconsin health care and educational institutions.

Bradley Center Sports and Entertainment Corporation - a public body politic and corporate that operates the Bradley Center.

World Dairy Center Authority - an authority created to establish a center for the development of dairying in the United States and the world; to analyze worldwide trends in the dairy industry and recommend actions to be taken by the State; promote dairy cattle, technology, products and services; and develop new markets for dairy and dairy-related products.

Wisconsin Advanced Telecommunications Foundation - organized as a nonstock corporation, administers an endowment fund to support advanced telecommunications technology application projects and efforts to educate telecommunications users about advanced services.

# C. Government-wide and Fund Financial Statements

The *government-wide* financial statements consist of the statement of net assets and the statement of activities.

These statements report information on all activities, except for fiduciary activities, of the primary government and its component units. The statement of net assets and the statement of activities distinguish between the governmental and business-type activities of the State. Governmental activities are generally financed through taxes, intergovernmental revenues and other nonexchange revenues. Business-type activities are generally financed in whole or in part by fees charged to external parties for goods and services. The focus of the government-wide statements is the primary government. A separate column on the statement of net assets and the statement of activities reports activities for all discretely presented component units.

The fund financial statements provide detailed information on all governmental, proprietary and fiduciary funds. Separate columns are presented for all major governmental and enterprise funds. Nonmajor governmental and enterprise funds are aggregated and presented as a single column on the respective governmental or proprietary statements. Internal service funds are exempt from

the major fund reporting requirements and are aggregated and ultimately reported as a single column on the proprietary statement. Fiduciary funds are also exempt from major fund reporting and are aggregated by fund type and ultimately reported as single columns on the fiduciary statements.

# D. Measurement Focus, Basis of Accounting, and Financial Statement Presentation

The government-wide statement of net assets and statement of activities, as well as the proprietary and fiduciary fund statements, are reported using the economic resources measurement focus and the accrual basis of accounting. With this measurement focus, all assets and liabilities associated with the operation of these funds are included on the balance sheet. Under the accrual basis, revenues are recorded when earned and expenses are recorded when the related liability is incurred.

In the University of Wisconsin System's enterprise fund, revenues and expenses of an academic term that spans two fiscal years are recognized in two years based on a proration of summer school days.

In reporting the financial activity of its proprietary funds, except for the State Life Insurance Fund, the State applies all applicable GASB pronouncements as well as the following pronouncements issued on or before November 30, 1989, unless these pronouncements conflict with or contradict GASB pronouncements: Financial Accounting Standards Board (FASB) Statements and Interpretations, Accounting Principles Board Opinions, and Accounting Research Bulletins of the Committee on Accounting Procedure. The State Life Insurance Fund is reported as an insurance enterprise fund and, accordingly, applies the provisions of relevant pronouncements of FASB, including those issued after November 30, 1989.

The Wisconsin Health Care Liability Insurance Plan (Plan) and the State Fair Park Exposition Center, Inc. (the Center) are reported as component units, and in applying GAAP, have elected to apply the provisions of relevant pronouncements of FASB including those issued after November 30, 1989.

The University of Wisconsin Foundation, a discretely presented component unit, prepares its separately issued financial statements on the basis of cash receipts and disbursements. The financial information presented in the State's government-wide financial statements and the accompanying footnote disclosures has been adjusted to an accrual basis in conformity with GAAP. Certain accrual adjustments not reported are not considered material.

Governmental fund financial statements are accounted for using the current financial resources measurement focus. With this measurement focus, only current assets and current liabilities generally are included on the balance sheet. Operating statements of these funds present increases (i.e., revenues and other financing sources) and decreases (i.e., expenditures and other financing uses) in net available financial resources.

Governmental funds are reported on the modified accrual basis of accounting. This basis of accounting recognizes revenues generally when they become measurable and available to pay current reporting period liabilities. For this purpose, the State considers tax revenues to be available if they are collected within 60 days of the end of the current fiscal year end. Other revenues are considered to be available if received within one year after the fiscal year end. Material revenue sources susceptible to accrual include individual and corporate income taxes, sales taxes, public utility taxes, motor fuel taxes and federal revenues.

Expenditures and related liabilities are recognized when obligations are incurred as a result of the receipt of goods and services. However, expenditures related to debt service, compensated absences, and claims and judgments, are recorded only when payment is due.

The State reports the following major funds:

# Major Governmental Funds

- General Fund the primary operating fund of the State, accounts for all financial transactions except those required to be accounted for in another fund.
- Transportation Fund accounts for the proceeds from motor fuel taxes, vehicle registrations, licensing fees, and federal and local governments which are used to supply and support safe, efficient and effective transportation in Wisconsin.

### Major Enterprise Funds

- Injured Patients and Families Compensation Fund accounts
  for the program to provide excess medical malpractice
  insurance for Wisconsin health care providers. The revenues
  to finance this insurance are primarily derived from
  assessments against health care providers.
- Environmental Improvement Fund accounts for financial resources generated and used for clean water projects.
   Federal capitalization grants, interest earnings, revenue bond proceeds, and general obligation bond proceeds are its primary revenue sources.

- Veterans Mortgage Loan Repayment Fund accounts for the issuance and administration of veterans' first mortgage loans. Revenues are primarily derived from bond proceeds, mortgage payments, and investment income.
- University of Wisconsin System Fund accounts for the 13 universities, 13 two-year colleges, the University of Wisconsin Extension and System Administration.
- Unemployment Reserve Fund accounts for unemployment contributions made by employers, federal program receipts, benefit payment recoveries and unemployment benefits paid to laid off workers in the State.

In addition, the State reports the following fund types:

#### Governmental Funds

- Special Revenue Funds account for the proceeds of specific revenue sources (other than for major capital projects) that are legally restricted to expenditure for specified purposes.
   Examples include the Conservation Fund and the Petroleum Inspection Fund.
- Debt Service Funds account for the accumulation of resources for, and the payment of, general long-term debt principal and interest.
- Capital Projects Funds account for financial resources to be used for the acquisition or construction of major capital facilities (other than those financed by proprietary funds).
- Permanent Funds account for resources that are legally restricted to the extent that only earnings and not principal, may be used for purposes that support the State's programs.

#### **Proprietary Funds**

- Enterprise Funds account for the activities for which fees are charged to external users for goods or services. Examples include the Lottery Fund and the Veterans Trust Fund.
- Internal Service Funds account for the operations of State
  agencies which provide goods or services to other State units
  or other governments on a cost-reimbursement basis. These
  services include technology, fleet management, financial,
  facilities management, and risk management. Additional goods
  and services are provided by the inmate work experience
  program, Badger State Industries.

# Fiduciary Funds

- Pension and Other Employee Benefit Trust Funds account for the Wisconsin Retirement System as well as other employee benefit programs including accumulated sick leave, employee reimbursement accounts, life insurance and deferred compensation.
- Investment Trust Funds account for the local government investment pool managed by the State Treasurer and the Milwaukee Retirement System.
- Private-purpose Trust Funds account for escheated property held by the State for private individuals and the Statesponsored college savings programs.
- Agency Funds account for assets held by the State for inmates and residents of state facilities, deposits of bank and insurance companies doing business in the state, assets of liquidated insurance companies to insure payments to claimants, and the collection and disbursement of courtordered support payments.

Amounts reported as program revenues on the government-wide statement of activities include (a) charges for services – amounts received from customers or applicants who purchase, use or directly benefit from the goods, services or privileges provided by the State; or investment and interest earnings from various loan and insurance funds/component units, (b) program-specific operating grants and contributions, and (c) program-specific capital grants and contributions. General revenues consist of taxes and all other revenues that do not meet the definition of program revenues. Special items, if any, are significant transactions or events within the control of management that are either unusual in nature or infrequent in occurrence.

As a general rule, the effect of interfund activity has been eliminated from the government-wide financial statements. This includes all internal service fund activity, as well as, other internal allocations. Exceptions to this general rule are certain charges between various functions of the government, whose elimination would distort the direct costs and program revenues reported for the various functions concerned.

The revenues and expenses shown on the proprietary fund statements are identified as either operating or nonoperating. Operating revenues and expenses generally result from providing goods and services in connection with a proprietary fund's primary mission. The State's enterprise funds are involved in many diverse fields including patient care, insurance programs, loan programs, the University of Wisconsin System, employee benefit plans, and the lottery. The internal service funds provide services and goods to other State agencies and departments.

A significant portion of operating revenues for the proprietary funds are recorded under charges for goods and services. In the case of the State's insurance and loan enterprise funds, investment and interest income is an important component of operating revenue. Operating revenues of the University of Wisconsin include tuition and fees, certain grants and contracts resulting from exchange transactions, and sales and services of educational activities and auxiliary enterprises. In regards to the employee benefit plans, the primary operating revenue source is participant and employer contributions. Operating expenses for the proprietary funds include the costs of sales and services, benefit expenses, administration expenses and depreciation on capital assets. All revenues and expenses not related to a fund's primary purpose are reported as nonoperating.

When both restricted and unrestricted resources are available for use, it is the State's policy to use restricted resources first, then unrestricted resources as they are needed.

# E. Assets, Liabilities, and Net Assets/Fund Balances/Fund Equity

#### 1. Cash and Cash Equivalents

Cash balances of most funds are deposited with the State Treasurer where the available balances beyond immediate needs are pooled in the State Investment Fund for short-term investment purposes. Balances pooled are restricted to legally stipulated investments valued consistent with GASB Statement No. 31, Accounting and Financial Reporting for Certain Investments and for External Investment Pools. Cash balances not controlled by the State Treasurer may be invested where permitted by statute.

Cash and cash equivalents, reported on the balance sheet and statement of cash flows, include bank accounts, petty cash, cash in transit, short-term investments with an original maturity of three months or less such as certificates of deposit, money market certificates and repurchase agreements and individual funds' shares in the State Investment Fund.

#### 2. Investments

#### **Primary Government**

The State may invest in direct obligations of the United States and Canada, securities guaranteed by the United States, certificates of deposit issued by banks in the United States and solvent financial institutions in the State, commercial paper and nonsecured corporate notes and bonds, bankers acceptances, participation agreements, privately placed bonds and mortgages, common and preferred stock and other securities approved by applicable sections of the Wisconsin Statutes, bond resolutions, and various trust indentures (see Note 5 to the financial statements).

Generally, investments of the primary government are reported at fair value consistent with the provisions of GASB Statement No. 31, Accounting and Financial Reporting for Certain Investments and for External Investment Pools. Typically, fair value information is determined using quoted market prices. However, when quoted market prices are not available for certain securities, fair values are estimated through techniques such as discounted future cash flows, matrix pricing and multi-tiers.

There are a certain number of securities carried at cost. Certain non-public or closely held stock are carried at cost since no independent quotation is available to price these securities. Further, certain investment agreements are reported on a cost basis because the State cannot readily determine whether these agreements meet the definition of interest-earning investment contracts as defined by GASB Statement No. 31. However, the impact on the financial statements is immaterial.

Under Wisconsin Statutes, the investment earnings of certain Permanent Funds are assigned to other funds. The following table shows the funds earning the investment income and the ultimate recipients of that income:

Fund Generating Investment Income	Fund Receiving Investment Income
Agricultural College	University of Wisconsin System
Normal School	General
University	University of Wisconsin System
Benevolent	General

# Component Units

Except for forward delivery agreements, investments of the Badger Tobacco Asset Securitization Corporation, a blended component unit, are reported at fair value. Forward delivery agreements are securities with maturities of one year or less and are reported at cost.

Investments of the Wisconsin Housing and Economic Development Authority (the Authority) are reported at fair value based on quoted market prices. Collateralized and uncollateralized investment agreements are not transferable and are considered nonparticipating contracts. As such, both types of investment agreements are reported at contract value.

Investments of the University of Wisconsin Hospitals and Clinics Authority (the Hospital) in equity securities with readily determinable fair values and all investments in debt securities are reported at fair value based on quoted market prices.

Certain investments of the Wisconsin Health Care Liability Insurance Plan are reported on a cost basis; however, the impact on the financial statements is not material.

Investments of the University of Wisconsin Foundation are primarily reported at fair value.

# 3. Mortgage and Other Loans

Mortgage loans of the Wisconsin Housing and Economic Development Authority, a component unit, are carried at their unpaid principal balance, less allowance for possible loan losses. Loan origination fees and associated costs are deferred and recognized as income or expenses over the projected life of the loan.

Mortgage loans of the Veterans Mortgage Loan Repayment Fund and the Veterans Trust Fund programs, business-type activities, are stated at the outstanding loan balance with origination fees and associated costs deferred and recognized over a fifteen year period using the straight-line method.

#### 4. Forestation State Tax

The State levies an annual tax of two-tenths of one mill for each dollar of the assessed valuation of the property in the State, as described in Wis. Stat. Sec. 70.58. This tax is levied for the purpose of acquiring, preserving and developing the forests of the state; for forest crop law and county forest law administration and aid payments; and for the acquisition, purchase and development of forests. The proceeds of the tax are paid to the Conservation Fund.

This tax, the only property tax levied by the State, is levied to each county on or before the fourth Monday in August of each year on assessed valuation as of January 1 of that year. The tax is due and payable January 31 or on the due dates established through an installment option permitted under Wis. Stat. Sec. 74.12.

Consistent with the requirements of GASB Interpretation No. 5, Property Tax Revenue Recognition in Governmental Funds, collections received July 1 through August 31 that were due but unpaid at June 30 are accrued.

### 5. Interfund Assets/Liabilities

During the course of operations, numerous transactions occur between individual funds for goods provided or services rendered. The balance sheet classifies these receivables and payables as "Due from Other Funds" or "Due to Other Funds." Short-term interfund loans are classified as "Interfund Receivables" or "Interfund Payables."

Long-term interfund loans are classified as "Advances to Other Funds" and "Advances from Other Funds." Advances to Other Funds, as reported in the governmental fund financial statements, are offset with a fund balance reserve to indicate that they are neither available for appropriation nor expendable available financial resources.

Balances that exist between the primary government and component units are classified as "Due to/from Primary Government" and, correspondingly, "Due to/from Component Units". Further, cash and investments invested by one component unit with another component unit are reported on the statement of net assets as "Cash and Investments with Other Component Units" and "Amounts Held in Trust by Component Units for Other Component Units".

Amounts reported in the funds as interfund assets/liabilities are eliminated in the governmental and business-type columns of the Statement of Net Assets, except for the net residual amount due between governmental and business-type activities which is shown as internal balances.

### 6. Inventories and Prepaid Items

Inventories of governmental and proprietary funds are valued at cost, which approximates market, using the first-in/first-out, last in/first out, or weighted-average method. The costs of governmental fund-type inventories are recorded as expenditures when purchased rather than when consumed.

Inventories of the University of Wisconsin System held by central stores are valued at average cost, fuels are valued at market, and other inventories held by individual institutional cost centers are valued using a variety of cost flow assumptions that, for each type of inventory, are consistently applied from year to year.

Prepaid items reflect payments for costs applicable to future accounting periods.

The fund balances of governmental funds are reserved for inventories and prepaid items, except in cases where prepaid items are offset by deferred revenues, to indicate that these accounts do not represent expendable available financial resources.

# 7. Capital Assets

Capital assets, which include property, plant, equipment, land and infrastructure assets (roads, bridges, and buildings considered an ancillary part of roads), are reported in the applicable governmental or business-type activities columns in the government-wide financial statements. Assets of the primary government, other than infrastructure and land purchased for the construction of infrastructure assets, are capitalized when they have a unit cost of \$5,000 or more (except for a collection of library resources that must have a cumulative value equal to or greater than \$5.0 million) and a useful life of two or more years. Assets of the discretely presented component units are capitalized when they have a unit cost of \$5,000 or more, except for the University of Wisconsin Foundation, which capitalizes assets greater than \$2,500, and the State Fair Park Exposition Center, Inc., which capitalizes assets greater than \$500.

Purchased or constructed capital assets are valued at cost or estimated historical cost if actual historical cost is not practicably determinable. Donated capital assets are recorded at their fair value at the time received.

The State has elected to report infrastructure assets (roads, bridges and buildings considered an ancillary part of roads) using the modified approach. Under this method infrastructure assets are not required to be depreciated if the State manages its eligible infrastructure assets using an asset management system designed to maintain and preserve its infrastructure assets at a condition level established and disclosed by the State. All infrastructure assets constructed prior to July 1, 2000 have been recorded at estimated historical cost. The estimated historical cost was determined by calculating current cost of a similar asset and deflating that cost through the use of a price-index to the estimated average construction date. Costs, which exclude right of way, are expressed in 2000 dollars and deflated back to the average construction date using the Federal Highway Administration's composite index for federal-aid highway construction. The costs of maintenance and preservation that do not add to the asset's capacity or efficiency are not capitalized. Interest incurred during construction is not capitalized.

Exhaustible capital assets of the primary government and the component units generally are depreciated on the straight-line method over the asset's useful life. Select buildings of the University of Wisconsin System are depreciated using the componentized method over the estimated useful life of the related assets. Depreciation expense is recorded in the government-wide financial statements, as well as the proprietary funds and component units. There is no depreciation recorded for land, construction in process, infrastructure and other capital assets defined as inexhaustible (except for construction in progress reported by the University of Wisconsin System, which is included in the applicable major capital assets categories). Generally, estimated useful lives are as follows:

Buildings and improvements 2 - 40 years Equipment, machinery and furnishings 2 - 27 years

Collections of works of art, historical treasures, and similar assets, which are on public display, used in furtherance of historical education, or involved in advancement of artistic or historical research, are not capitalized unless these collections were already capitalized at June 30, 1999. Collections range from memorabilia on display in the Wisconsin Veterans Museum, the Wisconsin Historical Society Museum and other museums to buildings such as the Villa Louis Mansion and the Fur Trade Museum located at the Villa Louis historical site. In addition, works of art or historical treasures on display in the various State office buildings, as well as statues on display outside the State Capitol, also are not capitalized.

# 8. Restricted and Limited Use Assets

Governmental fund and proprietary fund assets required to be held and/or used as specified in bond indentures, bond resolutions, trustee agreements, board resolutions, and donor specifications have been reported as Restricted and Limited Use Assets. Likewise, assets of the Wisconsin Housing and Economic Development Authority, the University of Wisconsin Hospitals and Clinics Authority, and the University of Wisconsin Foundation (discretely presented component units) that meet similar criteria have been reported as Restricted and Limited Use Assets. These assets are classified into four categories: Cash and Cash Equivalents, Investments, Cash and Investments with Other Component Units, and Other Restricted Assets.

### 9. Local Assistance Aids

# **Municipal and County Shared Revenue Program**

Through the Municipal and County Shared Revenue Program, the State distributes general revenues collected from general State tax sources to municipal and county governments to be used for providing local government services. State statutes require that payment to local governments be made during July and November. Through Wis. Stat. Sec. 20.835(1)(t) and (u), the State transferred moneys from the Transportation Fund and the Utility Public Benefits Fund in the amounts of \$230.0 million and \$17.6 million, respectively, in order to fund the Fiscal Year 2004 payment to the local governments.

At June 30, 2004, the State was liable to various local governments for unpaid shared revenue aid. To measure the amount of the program allocable to the State's fiscal year, the amount is prorated over portions of recipient local governments' calendar fiscal years that are within the State's fiscal year. The result is that a liability of \$474.9 million representing one-half of the total appropriated amount is reported at June 30, 2004 as Due To Other Governments.

# State Property Tax Credit Program

At June 30, 2004, the State was liable to various taxing jurisdictions for property tax credits paid through the State Property Tax Credit Program. Under the program, payments to local taxing jurisdictions provide property tax relief directly to taxpayers in the form of State credits on individual property tax bills. State statutes require that payment to local taxing jurisdictions be made during July. Although the property tax credit is calculated on the property tax levy for school purposes, the State's July payment is paid to an administering municipality who treats the payment the same as other tax collections and distributes the collections to the various tax levying jurisdictions (e.g., cities; towns; villages; school districts; technical colleges).

The school portion of the property tax credit liability represents the amount of the July payment earned over the school districts' previous fiscal year ended June 30. Since the entire school districts' portion of the July payment occurs within the State's fiscal year, 100 percent of the July payment relating to the school taxing jurisdictions' levy is reported as a liability at June 30, 2004.

The general government portion of the property tax credit liability represents the amount of the July payment prorated over the portion of the local governments' calendar year which is within the State's fiscal year. The result is that 50 percent of the July payment based on the general government taxing jurisdictions' levy is reported as a liability at June 30, 2004.

The aggregated State Property Tax Credit Program liability of \$354.7 million is reported in the General Fund as Due to Other Governments.

#### **Lottery Property Tax Credit Program**

The Lottery Property Tax Credit provides direct property tax relief to taxpayers in the form of State Credits on property tax bills. Under the program, owners of property used as a primary residence receive a tax credit equal to the school property tax on a portion of the dwelling's value.

The State pays municipal treasurers for lottery credits who distribute the moneys to the various taxing jurisdictions. For credits reducing the calendar year 2004 property tax bills, the State made this payment in March 2004.

The Lottery Tax Credit Program is accounted for in the Lottery Fund, an enterprise fund, that records revenues and expenses on the accrual basis. A portion of the State's March payment distributed to the general government taxing jurisdictions applies to their fiscal year that ends on December 31. Therefore, part of the March distribution represents an expense of the State in Fiscal Year 2004, while the remaining portion represents a prepaid item. The resulting Prepaid Item reported within the Lottery Fund totals \$29.2 million at June 30, 2004.

## State Aid for Exempt Computers

The Aid for Exempt Computers compensates local governments for tax base lost due to the property tax exemption for computers, software and related equipment. Aid payments are calculated using a procedure that results in an aid amount equal to the amount of taxes that would be paid if the property were taxable. Payments to local governments are made on the first Monday in May.

A portion of the May payment distributed to the general government taxing jurisdictions, Tax Incremental Districts, and special districts applies to their fiscal period ending December 31. Therefore, part of the May distribution represents an expense to the State in Fiscal Year 2004, while the remaining portion represents a prepaid item. The resulting Prepaid Item within the General Fund totals \$21.0 million at June 30, 2004.

# 10. Long-term Debt Obligations

In the government-wide financial statements, and proprietary fund types in the fund financial statements, long-term debt is reported as a liability. Bond premiums and discounts, as well as issuance costs, are deferred and amortized using the effective interest rate method on a prospective basis beginning in Fiscal Year 2002, except for the annual appropriation bonds that are amortized ratably over the life of the obligations to which they relate. Bonds payable are reported net of the applicable bond premium or discount. Bond issuance costs are reported as deferred charges.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums and discounts on debt issuances are reported as other financing sources and other financing uses, respectively.

Debt issuance costs, as well as bond premiums and discounts, relating to revenue obligations of the Environmental Improvement Fund, an enterprise fund, were deferred and are being amortized using the effective interest rate method.

Debt issuance costs relating to general obligation bonds of the Veterans Mortgage Loan Repayment Fund and the University of Wisconsin System Fund, both enterprise funds, are amortized ratably over the life of the obligations to which they relate. On the government-wide financial statements, bond premiums and discounts, as well as issuance costs, related to the Transportation Revenue Bonds and the Petroleum Inspection Fee Obligation Revenue Bonds (which finance programs in a capital projects fund and a special revenue fund, respectively) are also amortized ratably over the life of the obligations to which they relate. Results from the use of this method do not vary materially from those that would be obtained by use of the effective interest rate method.

Debt issuance costs, and bond premiums and discounts, of the Wisconsin Housing and Economic Development Authority and the University of Wisconsin Hospitals and Clinics Authority, both discretely presented component units, are amortized ratably over the life of the obligations to which they relate.

Debt issuance costs, bond premiums and discounts of the Badger Tobacco Asset Securitization Corporation, a blended component unit, are capitalized and amortized over the lives of the related debt using the interest method.

Debt issuance costs of the State Fair Park Exposition Center, Inc., a component unit, are being amortized using the effective-interest method over the life of the related bonds.

### 11. Compensated Absences

Consistent with the compensated absences reporting standards of GASB Statement No. 16, *Accounting for Compensated Absences*, an accrual for certain salary-related payments associated with annual leave and an accrual for sick leave is included in the compensated absences liability at year end.

#### **Annual Leave**

Full-time employees' annual leave days are credited on January 1 of each calendar year at a minimum of 10 days per year. There is no requirement to use annual leave. However, unused leave is lost unless approval to carry over the unused portion is obtained from the employing agency. Compensatory time accumulates for eligible employees for hours worked in excess of forty hours per week. Each full-time employee is eligible for three and one-half personal holidays each calendar year, provided the employee is in pay status for at least one day in the year. If a holiday occurs on a Saturday, employees receive leave time proportional to their working status to use at their discretion.

The State's compensated absence liability at June 30 consists of accumulated unpaid annual leave, compensatory time, personal holiday hours, and Saturday/legal hours earned and vested during January through June. The liability is reported in the government-wide, proprietary fund types and fiduciary funds.

# Sick Leave

Full-time employees earn sick leave at a rate of five hours per pay period. Unused sick leave is accumulated from year to year without limit until termination or retirement. Accumulated sick leave is not paid. However, at employee retirement the accumulated sick leave may be converted to pay for the retiree's health insurance premiums. The State accumulates resources to pay for the expected health insurance premiums of retired employees. That portion of the total health insurance obligation for which the State has already accumulated resources is presented in the Accumulated Sick Leave Fund, a pension and other employee benefit trust fund.

#### 12. Deferred Revenue

In the government-wide statements and proprietary fund financial statements deferred revenue represents amounts for which asset recognition criteria have been met, but for which revenue recognition criteria have not been met. Deferred revenues arise when resources are received by the State before it has a legal claim to them, as when grant moneys are received prior to the incurrence of qualifying expenditures. In subsequent periods, when both revenue recognition criteria are met, or when the State has a legal claim to the resources, the liability for deferred revenue is removed and revenue is recognized. In the governmental fund statements revenues are also deferred for amounts that are unearned or unavailable.

Deferred revenues of the University of Wisconsin System consist of payments received but not earned at June 30, 2004, primarily for summer session tuition, tuition and room deposits for the next fall term, advance ticket sales for upcoming intercollegiate athletic events, and amounts received from grant and contract sponsors that have not yet been earned under the terms of the agreement.

#### 13. Self-Insurance

Consistent with the requirements of GASB Statement No. 10, Accounting and Financial Reporting for Risk Financing and Related Insurance Issues, the State's risk management activities are reported in an internal service fund, and the claims liabilities associated with that fund are reported therein.

The State's policy is generally not to purchase commercial insurance for the risk of losses to which it is exposed. Instead, State management believes it is more economical to manage its own risks internally. The Risk Management Fund, an internal service fund, is used to pay for losses incurred by any State agency and for administrative costs incurred to manage a statewide risk management program. These losses include damage to property owned by the agencies, personal injury or property damage liabilities incurred by a State officer, agent or employee, and worker's compensation costs for State employees. A limited amount of insurance is purchased to limit the exposure to catastrophic losses. Annually, a charge is allocated to each agency for its proportionate share of the estimated cost attributable to the program per Wis. Stat. Sec. 16.865(8).

# 14. Fund Balance Reserves and Restricted Net Assets/Fund Equity

# **Fund Balance Reserves**

Reservations of fund balances of governmental funds represent amounts that are not available for appropriation. Examples of fund balance reservations include reserves for encumbrances, inventories and prepaid items.

# **Restricted Net Assets/Fund Equity**

Restricted Net Assets (presented in the government-wide statement of net assets) and Restricted Fund Equity (presented in the balance sheet of proprietary funds) are reported when constraints placed on net assets or fund equity use are either (1) externally imposed by creditors (such as through debt covenants, grantors, contributors, or laws or regulation of other governments), or (2) imposed by law through constitutional provisions. Unrestricted net assets or fund equity may be used at the State's discretion but often have limitations on use based on State statutes.

# NOTE 2. DETAILED RECONCILIATION OF THE GOVERNMENT-WIDE AND FUND STATEMENTS

# A. Explanation of Differences Between the Balance Sheet – Governmental Funds and the Statement of Net Assets

During the year ended June 30, 2004, the following adjustments and reclassifications were necessary to reconcile the information from the fund-based Balance Sheet – Governmental Funds to the amounts presented in the governmental section of the Statement of Net Assets (in thousands). The differences result primarily from the long-term economic focus of the Statement of Net Assets compared to the current financial focus of the Balance Sheet – Governmental Funds.

		Total Governmental Funds		Long-term Assets and Liabilities (1)		Internal Service Funds (2)		Reclassifications and Eliminations (3)		Total Amount for Statement of Net Assets
Assets:										
Cash and Cash Equivalents	\$	968,571	\$	-	\$	29,791	\$	-	\$	998,363

Long-term Portion		-		8,108,735		251,167		-		8,359,903
Total Liabilities		5,916,050		8,113,691		379,075		(303,404)		14,105,413
Fund Balances/Net Assets		(741,292)		5,420,430		12,615		-		4,691,753
Total Liabilities and Fund Balances/Net Assets	\$	5,174,758	\$	13,534,121	\$	391,690	\$	(303,404)	e	18,797,166
Dalailles/Net Assets	φ	5,174,756	φ	13,004,121	φ	391,090	φ	(303,404)	φ	10,737,100

- (1) Long-term asset and liability differences arise because governmental funds focus only on short-term financing (that is, resources that will be available to pay for current period expenditures). In contrast, the Statement of Net Assets has a long-term economic focus and reports on all capital and financial resources.
- (2) The adjustment for internal service funds reflects the reclassification of these funds for the government-wide statement. The assets and liabilities of these funds are reported as proprietary activities on the fund statements, but are included as governmental activities on the Statement of Net Assets
- (3) Various reclassifications are necessary due to the differing level of detail needed on each of the statements. Eliminations are done on the Statement of Net Assets to minimize the grossing-up effect on assets and liabilities within the governmental and business-type activities columns of the primary government. The net residual amounts due between governmental and business-type activities are shown as internal balances.

# B. Explanation of Differences Between the Statement of Revenues, Expenditures, and Changes in Fund Balances – Governmental Funds and the Statement of Activities

During the year ended June 30, 2004, the following adjustments and reclassifications were necessary to reconcile the information from the fund-based Statement of Revenues, Expenditures, and Changes in Fund Balances – Governmental Funds to the amounts presented in the governmental section of the Statement of Activities (in thousands). The differences result primarily from the long-term economic focus of the Statement of Activities compared to the current financial focus of the Statement of Revenues, Expenditures, Changes in Fund Balance – Governmental Funds.

Uniestricted Grants		Total Governmental Funds	Long-term Revenues and Expenses (1)	Capital-Related Items (2)
Income Taxes   20,365   3,128   9,126   9,126   1,275   1,27	Revenues:

<sup>(1)</sup> Long-term revenue differences arise because governmental funds report revenues only when they are considered "available," while government-wide statements report revenues when earned. Long-term expense differences arise because governmental funds report operating expenses (including interest) using the modified accrual basis of accounting, while government-wide statements report using the accrual basis of accounting.

<sup>(2)</sup> Capital-related adjustments consist of the difference between proceeds for the sales of capital assets and the gain or loss from the sales of capital assets, and from the difference between capital outlay expenditures recorded in the governmental funds and depreciation expense recorded in the government-wide statements.

<sup>(3)</sup> The adjustment for internal service funds reflects the elimination of these funds from the government-wide statement, which is accomplished by charging/refunding additional amounts to participating governmental activities to completely offset the internal service funds' cost for the year.

Long-term debt transaction differences consist of bond proceeds and principal repayments reported as other financing sources and expenditures in governmental funds, but as increases and decreases in liabilities in the government-wide statements.

Intra-entity activity within the same function is eliminated to remove the grossing up of both direct expenses and program revenues within that category. (4)

<sup>(5)</sup> 

Revenue and expense reclassifications are necessary due to the differing level of detail needed on each of the statements. In addition, the Statement of Activities focuses on program revenue, which has been redefined from the traditional revenue source categories.

# **NOTE 3. BUDGETARY CONTROL**

The legal level of budgetary control for Wisconsin is at the function, agency, program, appropriation-level. Supplemental appropriations require the approval of the Joint Finance Committee of the Legislature. Routine adjustments, such as pay plan supplements and rent increases, are distributed by the Division of Executive Budget and Finance from non-agency specific appropriations authorized by the Legislature. Various supplemental appropriations were approved during the year and have been incorporated into the budget figures.

The budgetary comparison schedule and related disclosures for the General and Transportation funds are reported as Required Supplementary Information. This schedule presents the original budget, the final budget and actual data of the current period. The related disclosures describe the budgetary practices of the State, as well as, provide a detailed reconciliation between the General and Transportation funds' equity balance on the budgetary basis compared to the GAAP basis as shown on the governmental fund statements.

# NOTE 4. DEFICIT FUND BALANCE/FUND EQUITY/NET ASSETS

In addition to the General Fund, funds reporting a deficit fund balance, fund equity, or net assets position at June 30, 2004 are (in thousands):

Special Revenue:	
Medical Assistance Trust	\$ 176,310
Petroleum Inspection	182,634
VendorNet	2,964
Capital Projects:	
Capital Improvement	202,258
Transportation Revenue Bonds	9,645
Enterprise:	
Duty Disability	176,121
Internal Service:	
Fleet Services	921
Risk Management	109,313
Pension and Other Employee Benefit Trust:	
Accumulated Sick Leave	12,261

# **NOTE 5. DEPOSITS AND INVESTMENTS**

The State maintains a short-term investment "pool", the State Investment Fund, for the State, its agencies and departments, and certain other public institutions which elect to participate. The investment "pool" is managed by the State of Wisconsin Investment Board (the Board) which is further authorized to carry out investment activities for certain enterprise, trust and agency funds. A small number of State agencies and the University of Wisconsin System also carry out investment activities separate from the Board. Disclosures of the State's investment activities are presented in the following categories: State Investment Fund, Other Funds Managed by the Board, Other State Agencies and Funds, and Component Units.

# A. Deposits

# **Primary Government**

Deposits include cash and cash equivalents on deposit in banks or other financial institutions, and nonnegotiable certificates of deposit. The majority of the State's deposits are under the control of the State Treasurer. The State Treasurer maintains multiple accounts with an agreement with the bank that allows an overdraft in one account if the overdraft is offset by balances in other accounts.

The State's insured deposits are covered by the Federal Deposit Insurance Corporation (FDIC) and an appropriation for losses on public deposits. The State, as required by Wis. Stat. Sec. 34.08, is to make payments to public depositors for proofs of loss up to \$400 thousand per depositor above the amount of federal insurance. Payments are made, until the funds available in the appropriation are exhausted, in the order in which satisfactory proofs of loss are received by the State's Department of Financial Institutions.

At June 30, 2004, the carrying amount of the primary government deposits reported as cash was \$(167.6) million and the bank balance was \$332.9 million. Further, \$525 thousand of deposits of the Bank and Insurance Company agency fund are reported as "Other Assets". Of the bank amount, excluding a bank overdraft of \$38.2 million in two bank accounts that are covered by compensating balances in other accounts,

- \$9.5 million was covered by federal depository insurance, the State Public Deposit Guarantee Fund or collateralized with securities held by the State or its agent in the State's name, and
- \$361.6 million was uncollateralized and uninsured.

The State's Unemployment Reserve Fund had \$832.7 million on deposit with the U.S. Treasury. This amount is presented as Cash and Cash Equivalents and is not included in the carrying amount of deposits nor is it categorized according to risk because it is neither a deposit with a financial institution nor an investment.

Petty cash and contingent accounts authorized under Wis. Stat. Sec 20.920, which are held by agencies and reported as Cash and Cash Equivalents in the amount of \$133.1 thousand, are not included in the carrying amount nor bank balance of deposits in this note because these are neither deposits nor investments.

# **Component Units**

The carrying amount of deposits of the Wisconsin Housing and Economic Development Authority at June 30, 2004, the Wisconsin Health Care Liability Insurance Plan at December 31, 2003, the University of Wisconsin Hospitals and Clinics Authority at June 30, 2004, the University of Wisconsin Foundation at December 31, 2003, and the State Fair Park Exposition Center, Inc. at December 31, 2003 was \$29.3 million and the bank balance was \$29.2 million. Of the bank amount, \$2.1 million was covered by federal depository insurance, the State Public Deposit Guarantee Fund or collateralized with securities held by the State or its agent in the State's name and \$27.1 million was uncollateralized and uninsured.

#### **B.** Investments

# **Primary Government**

#### State Investment Fund

This fund functions as the State's cash management fund by "pooling" the idle cash balances of all State funds and other public institutions. In the State's Comprehensive Annual Financial Report, the State Investment Fund is not reported as a separate fund; rather, each State fund's share in the "pool" is reported on the balance sheet as "Cash and Cash Equivalents." Shares of the fund belonging to other participating public institutions are presented in the Local Government Pooled Investment Fund, an investment trust fund.

Wis. Stat. Secs. 25.17(3)(b), (ba) and (bd) enumerate the various types of securities in which the State Investment Fund can invest, which include direct obligations of the United States and Canada, securities guaranteed by the United States, securities of federally chartered corporations such as the African Development Bank, unsecured notes of financial and industrial issuers, Yankee/Euro issues, certificates of deposit issued by banks in the United States and solvent financial institutions in this State, and bankers acceptances. Other prudent investments may be approved by the State of Wisconsin Investment Board's Board of Trustees. The Board of Trustees has given standing authority to the Board to invest in resale agreements, financial futures contracts, options and interest rate swaps.

### Valuation of Securities

Investments are valued at fair value for financial statement purposes and amortized cost for purposes of calculating income to participants. The custodial bank has compiled fair value information for all securities by utilizing third party pricing services. Government and agency securities and commercial paper are priced using matrix pricing. This method estimates a security's fair value by using quoted market prices for securities with similar interest rates, maturities, and credit ratings. Repurchase agreements and certificates of deposit are valued at cost because they are nonparticipating contracts that do not capture interest rate changes in their value. Swaps are valued at the net present value of estimated expected future cash flows using discount rates commensurate with the risk involved. In addition, a bond issued by other State agencies having a par value of \$0.9 million is valued at par, which management believes approximates fair value. The fair value of investments is determined at the end of each month.

### Pool Earnings and Pool Shares

For purposes of calculating earnings to each participant, all investments are valued at amortized cost. Specifically, income is distributed to pool participants monthly based on their average daily share balance. Distributed income includes realized investment gains and losses calculated on an amortized cost basis, interest income based on stated rates (both paid and accrued), amortization of discounts and premiums on a straight-line basis, and investment and administrative expenses. This method differs from the fair value method used to value investments because the amortized cost method is not designed to distribute to participants all unrealized gains and losses in the fair values of the pool's investments.

#### **Derivative Financial Instruments**

As of June 30, 2004, the only derivative financial instrument held by the State Investment Fund was a restructured interest rate swap. Each swap transaction involves the exchange of interest rate payment obligations without the exchange of underlying principal amounts. The notional amounts used to express the volume of these transactions do not represent the amounts subject to risk, but represent the amount on which both parties calculate interest rate obligations. The settlement of the interest rate exchange occurs at predetermined dates, with the net difference between the interest paid and interest received reflected as an increase in income. Entering into interest rate swap agreements subjects the investor to the possibility of financial loss in the event of adverse changes in market rates or nonperformance by the counterparty to the swap agreement. Selecting creditworthy counterparties mitigates credit risks arising from derivative transactions.

Restructured Investments - During fiscal year 1995, the State of Wisconsin Investment Board became aware of the existence of market exposure in certain swap agreements and structured bonds which could impair the earnings of the fund.

The State of Wisconsin Investment Board entered into agreements with two counterparties which resulted in the counterparties' assumption of all future market risk associated with ten swap agreements and two structured bonds. At the time of the agreement the counterparties assigned a market value to these investments of negative \$95.3 million. Within this restructuring, one swap agreement requires periodic payments over a period of ten years, while the other agreement requires periodic payment of the loss over a period of five years. Interest costs associated with the periodic payment of the loss over time is estimated to be \$24.8 million. Future period earnings will be charged as payments are made.

As of June 30, 2004, the fair value of the restructured investments was negative \$4.4 million while the amortized deferred loss was negative \$3.8 million.

The State of Wisconsin Investment Board has suspended the use of nonrisk reducing derivatives in the fund and investment guidelines prohibiting the use of such instruments were adopted by the Board on November 2, 1995.

### **Deposits**

The State Investment Fund holds certificates of deposit at various Wisconsin banks as part of the Wisconsin Certificate of Deposit Program implemented in July 1987. As of June 30, 2004, the fair value of these certificates of deposit was \$450.0 million.

Approximately \$400.0 million are Category 1 risk level deposits which are insured by the FDIC, the Wisconsin State Deposit Guarantee Fund and Financial Securities Assurance Corporation insurance. The remaining \$50.0 million are considered Category 3 uncollateralized deposits.

#### Investments

GASB Statement No. 3 requires investments to be categorized to indicate the level of risk assumed by the State Investment Fund. These categories are:

- Category 1 are those investments which are insured or registered, or securities which are held by the State Investment Fund in this fund's name or its agent in the name of this Fund.
- Category 2 are those investments which are uninsured and unregistered, with the securities held by the counterparty's trust department or agent in the State Investment Fund's name.
- Category 3 are those investments which are uninsured and unregistered, with the securities held by the counterparty, or by its trust department or agent, but not in the State Investment Fund's name.

The following table presents investments held by the State Investment Fund categorized in accordance with GASB Statement No. 3 requirements to indicate the level of risk assumed by the fund at year-end:

At June 30, 2004, the State Investment Fund's investments are as follows (in millions):

	Category							
	1	2		3		Value		
U.S. government and agency holdings	\$ 3,467.5	\$		\$		\$ 3,467.5		
Repurchase agreements	1,268.0	·		·		1,268.0		
Commercial paper	636.9					636.9		
Mortgage backed securities	.8					.8		
Certificates of deposit	147.0					147.0		
	\$ 5,520.2	\$		\$		5,520.2		
Swaps						(9.1)		
						\$ 5,511.1		

Copies of the separately issued financial report that includes financial statements and other supplementary information for the State Investment Fund may be obtained by writing to:

State of Wisconsin Investment Board PO Box 7842 Madison, WI 53707-7842

### Other Funds Managed by the Board

Other investments under exclusive control of the Board which are not held in the cash management pool include those held by certain permanent, proprietary, and fiduciary funds. A discussion of these investment activities follows:

#### Governmental

Historical Society - At June 30, 2004, investments of \$10.7 million consisted of stock and bond index funds.

### Business-type

Local Government Property Insurance, State Life Insurance, and Injured Patients and Families Compensation Funds - At June 30, 2004, investments were \$8.1 million for the Local Government Property Insurance Fund, \$72.7 million for the State Life Insurance Fund, and \$673.1 million for the Injured Patients and Families Compensation Fund, consisting of stocks and fixed income.

### Fiduciary

Wisconsin Retirement System Fund – This trust is a pooled fund consisting of retirement contributions made by and on behalf of participants in the Wisconsin Retirement System (WRS) (see Note 13 to the financial statements). At June 30, 2004, the Wisconsin Retirement System Fund held \$63,458.4 million of investments consisting of fixed income, stocks, limited partnerships, real estate, mortgages and other investments valued at fair value in accordance with Wis. Stat. Sec. 25.17(14). In addition, \$609.1 million of investments are included in the fund's cash and cash equivalents. Further, \$243.0 million is invested in a time deposit reported as part of the securities lending collateral and not included in the investments.

In addition, \$5,053.0 million of securities lending transactions were held at June 30, 2004. These transactions are categorized consistent with GASB Statement No. 28, Accounting and Financial Reporting for Securities Lending Transactions.

Tuition Trust Fund – At June 30, 2004, investments of \$11.4 million consisted of bonds and principal only strips.

The following table presents investments of these funds at June 30, 2004, categorized in accordance with the requirements of GASB Statement No. 3.

At June 30, 2004, the investments of the Other Funds Managed by the Board consisted of (in millions):

		Fair		
	1	2	3	Value
Fixed Income	\$ 9,120.3	\$ 	\$ 	\$ 9,120.3
Stocks	14,061.3			14,061.3

Pooled Equity Funds				27,911.4
Pooled Fixed Income Funds				6,698.9
Mortgages				593.1
Pooled Multi-asset Fund				336.8
Real Estate				417.1
Custodial Pooled Cash and Equivalents				388.3
nvestments Held by Broker Dealers Under Securities Loans:				
Fixed Income				3,765.0
Equities				1,221.3
Securities Lending Cash Collateral Pooled Investments				833.9
				\$ 69,653.4

Securities Lending Transactions - State statutes and State of Wisconsin Investment Board (SWIB) policies permit the use of investments to enter into securities lending transactions. These transactions involve the lending of securities to broker-dealers and other entities for collateral, in the form of cash or securities, with the simultaneous agreement to return the collateral for the same securities in the future. The securities custodian is an agent in lending the domestic and international securities for collateral of 102 percent and 105 percent, respectively, of the loaned securities' market value. The cash collateral is reinvested by the lending agent in accordance with contractual investment guidelines which are designed to insure the safety of principal and obtain a moderate rate of return. The investment guidelines include very high credit quality standards and also allow for a portion of the collateral investments to be invested with short-term The earnings generated from the collateral investments, less the amount of rebates paid to the dealers, results in the gross earnings from lending activities, which is then split on a percentage basis with the lending agent.

Securities on loan at June 30, 2004 are presented as unclassified in the preceding schedule of custodial risk. At year end, no credit risk exposure to borrowers existed because the amounts owed the borrowers exceeded the amounts the borrowers owed. The contract with the lending agent requires them to indemnify if the borrowers fail to return the loaned securities and the collateral is inadequate to replace the securities lent.

The majority of securities loans can be terminated on demand, although the average term of the loans is approximately one week. The term to maturity of the securities loans is matched with the term to maturity of the investments of the cash collateral by investing in a variety of short term investments with a weighted average maturity of 24 days.

The ability to pledge or sell collateral securities cannot be made without a borrower default. In addition, no restrictions on the amount of the loans exist.

# **Derivative Financial Instruments**

Foreign Currency Forwards and Options - The State of Wisconsin Investment Board's derivative trading activities primarily involve forward contracts and foreign currency options. Generally, foreign currency forwards and options are held to hedge foreign exchange risk. Market risk is generally controlled by holding substantially offsetting purchase and sell positions. At June 30, 2004 the fair value of foreign currency forward contracts assets totaled \$1.7 billion, while the liabilities totaled \$1.7 billion.

Futures Contracts – A financial futures contract is an exchange traded agreement to buy or sell a financial instrument at an agreed upon price and time in the future. Upon entering into a futures contract, collateral is deposited with the broker in accordance with the initial margin requirements of the broker. Futures contracts are marked to market daily by the board of trade or exchange on which they are traded. The resulting gain/loss is received/paid the following day until the contract expires. Futures contracts involve, to varying degrees, risk of loss in excess of the variation margin. Losses may arise from future changes in the value of the underlying instrument, or if the counterparties do not perform under the terms of the contract.

Investment guidelines allow external portfolio managers to manage interest rate exposure only through the use of exchange-traded interest rate instruments. As of June 30, 2004, SWIB was invested in exchange-traded interest rate futures contracts with a net exposure totaling negative \$379.7 million.

Internally managed fixed income portfolios are allowed to invest in financial futures, options, and swaps for the purposes of adjusting duration and to invest anticipated cash flows, subject to review by the SWIB Risk and Investment Committee. During the period presented, these portfolios held no futures, options or swaps.

In addition, investment guidelines allow internally managed active U.S. equity managers to use index futures, index options, and options on index futures up to 20 percent of the aggregate value of all SWIB U.S. equity portfolios, subject to review by the SWIB Risk and Investment Committee when entered into for the purpose of equitizing cash holdings. During the period presented in these financial statements, no index futures, index options, or options on index futures were held.

One outside equity manager is permitted by the investment guidelines to use exchange-traded Standard and Poor's Equity Index futures contracts to manage its exposure to the stock market during the fiscal year presented. This manager is authorized to utilize futures up to 5 percent of the fair value of the portfolio although it held no futures during the fiscal year presented.

Collateralized Mortgage Obligations (CMOs) - Bonds that are collateralized by whole loan mortgages, mortgage pass-through securities or stripped mortgage-backed securities. Income is derived from payments and prepayments of principal and interest generated from collateral mortgages. Cash flows are distributed to different investment classes or traunches in accordance with each CMOs established payment order. Some CMO traunches have more stable cash flows relative to changes in interest rates while others are significantly more sensitive to interest rate fluctuations. In a declining interest rate environment, some CMOs may be subject to a reduction in interest payments as a result of prepayments of mortgages which make up the collateral pool. A reduction in interest payments causes a decline in cash flows and thus a decline in the fair value of the security. Rising interest rates may cause an increase in interest payments, thus an increase in fair value of the security. CMOs are held to maximize yields and in part to hedge against a rise in interest rates. At June 30, 2004, CMOs valued at \$8.2 million were held.

Principal Only Strips – Securities that derive cash flow from the payment of principal on underlying debt securities. SWIB holds several principal only strips for yield enhancing purposes. The underlying securities are United States Treasury obligations, therefore the credit risk is low. On the other hand, principal only strips are more volatile in terms of pricing, and thus the market risk is higher than traditional United States Treasury obligations. As of June 30, 2004, no principal only strips were held.

# Credit-linked Trust Certificates

SWIB has allowed one external manager credit exposure management through the use of credit-linked trust certificates, provided the counter-party is a recognized exchange or is a bank or broker dealer with an actual credit rating of at least: (1) 'B/C' or better from Thomson Bankwatch (Keefe); (2) "A1/P1" or better on

short term debt from Standard and Poor's or Moody's; or (3) "A" or better on long-term debt from Standard and Poor's or Moody's. Credit-linked trust certificates are exchange-traded securities, created through a Special Purpose Company, or trust. Proceeds from the sale of the certificates are invested in AAA rated securities, then lent out under a securities lending agreement. The trust also enters into a credit default swap that references 100 high yield corporate bonds. The trust pays a variable coupon and receives a fixed coupon on the notional value during the life of the note. If the issuer of one of more of the 100 high yield corporate bonds defaults, the trust will receive the current market value of the defaulted asset and the notional value will be reduced, lessening future interest earnings.

By investing in credit-linked trust certificates, SWIB gains immediate, diversified exposure to the high yield fixed income market. For taking on the risk associated with the 100 high yield corporate bonds, SWIB earns a premium rate of return. Investment in these certificates involves risk of loss from credit downgrades, illiquidity and counterparty risk. Valuation of this security is calculated by the party marketing the security. At June 30, 2004, SWIB was invested in credit-linked trust certificates totaling \$20.00 million.

### **Unfunded Capital Commitments**

Partnership agreements generally set a limit on the total dollar amount that limited partners must commit to funding when entering the partnership. Over the life of the partnership, the general partner will request capital contributions totaling the agreed upon limit. As of June 30, 2004, unfunded capital commitments totaled \$1.3 billion.

### Other State Agencies and Funds

The following funds also make investments following pertinent State statutes and policy provisions as set out by the appropriate governing boards or bond resolutions:

#### Governmental

General Fund – At June 30, 2004, investments of 0.9 million of which 0.5 million are considered deposits and included in Note

Transportation Revenue Bond Funds – At June 30, 2004, the Transportation Revenue Bond Capital Projects Fund and the Transportation Revenue Bond Debt Service Fund had investments totaling \$246.6 million, of which \$153.4 million are reported as cash equivalents. Investments of \$93.2 million satisfy risk category No. 1, while the remaining investments are uncategorized.

Annual Appropriation Bonds – At June 30, 2004 investments totaling \$248.6 million were held of which \$240.3 million meet risk Category 1 and the remaining \$8.3 million are uncategorized.

Common School Fund – At June 30, 2004, investments totaling \$130.7 million meet risk Category 1.

Petroleum Inspection Revenue Bonds Fund – At June 30, 2004, investments of \$4.1 million consisting of government and agency investments which meet Category 1 risk criteria.

Wisconsin Public Broadcasting Foundation Fund – The fund's investments at June 30, 2004 were \$6.7 million, which consists of \$4.2 million of various investments and \$2.5 million of money market funds which are reported as cash equivalents. All investments meet Category 1 risk criteria.

Badger Tobacco Asset Securitization Corporation -- Investments of \$274.5 million of which \$137.4 million are reported as cash equivalents. Investments of \$137.1 million meet the Category 1 risk level.

### Business-type

Environmental Improvement Fund – The fund's aggregate investments at June 30, 2004 were \$194.0 million, of which \$35.7 million are reported as cash equivalents consisting of a repurchase agreement which is a Category 2 level of risk. Investments of \$158.3 million consist of government and agency holdings and satisfy Category 1 risk criteria.

Lottery Fund – Investments are all in the form of U.S. Treasury zero coupon bonds. At June 30, 2004, investments of \$128.4 million which meet Category 1 risk criteria were held.

The *University of Wisconsin System* – The fund's aggregate investments at June 30, 2004 were \$344.1 million of which \$21.8 million are reported as cash equivalents. Of the remaining \$322.4 million, \$254.8 million meet Category 1 risk criteria while the remaining investments are uncategorized.

#### **Fiduciary**

Inmate and Resident Fund – At June 30, 2004, investments totaling \$0.7 million of which \$0.5 million are reported as cash equivalents and \$0.2 million meet risk Category 3.

College Savings Program Trust – At June 30, 2004, investments totaling \$1,186.4 million, which consist of \$3.4 million of short-term securities which meet risk Category 1 and the remaining investments are uncategorized.

At June 30, 2004, the State has approximately \$279.3 million of securities which it holds for banks and insurance companies. These assets are held for the period of time specified by statute and then returned to their owner. The assets are presented in the Bank and Insurance Company Deposits Fund as "Other Assets". All investments meet risk Category 1.

Unclaimed property, usually in the form of stocks, bank accounts, insurance proceeds, utility deposits and uncashed checks, are transferred periodically to the *Unclaimed Property Program Fund*. The \$37.3 million securities, presented as "Other Assets" on the financial statements meet risk Category 1.

The State's Section 457 *Deferred Compensation Plan Fund* investments, totaling \$1,430.8 million at June 30, 2004, are in the form of equity, bond and money market mutual funds, insured savings accounts and investment contracts with insurance companies.

The following table presents investments of the Other State Agencies and Funds at June 30, 2004, categorized in accordance with the requirements of GASB Statement No. 3.

At June 30, 2004, the Other State Agencies and Funds' investments consisted of (in millions):

	Category						R	eported	Fair
		1		2		3		Mount	Value
Government and agency holdings	\$	924.9	\$		\$	.2	\$	925.2	\$ 925.2

Repurchase agreements		3.4		35.7				39.1	39.1
Forward delivery agreements		137.1						137.1	140.4
Negotiable certificates of deposit		5.9						5.9	5.9
Mortgaged backed securities		10.4						10.4	10.4
Fixed Income		50.8						50.8	50.8
	\$	1,476.5	\$	35.7	\$	.2		1,512.4	1,515.8
Mutual funds								1,223.9	1,223.9
Money market funds								310.0	310.0
Limited partnerships								2.9	2.9
Deferred compensation investments								1,430.9	1,430.9
Other								32.4	32.4
							\$	4,512.6	\$ 4,515.9

# **Component Units**

Wisconsin Housing and Economic Development Authority (Authority) – The Authority is required by statute to invest at least 50 percent of its General Fund funds in obligations of the State, of the United States, or of agencies or instrumentalities of the United States, or obligations the principal and interest of which are guaranteed by the United States, or agencies or instrumentalities of the United States. Each bond resolution specifies what constitutes a permitted investment and such investments may include obligations of the U.S. Treasury, agencies and instrumentalities; commercial paper; bankers acceptances; and repurchase agreements and investment agreements.

The Authority's aggregate investments at June 30, 2004 were \$677.9 million of which \$132.7 million are reported as cash equivalents consisting of money market funds. The Authority's investments except for uncollateralized investment agreements of \$137.2 million are a Category 1 level of risk. The Authority's investments in uncollateralized investment agreements are a Category 3 level of risk.

The Authority enters into collateralized investment contracts with various financial institutions. The investment contracts are generally collateralized by obligations of the United States government.

The Authority is also authorized to invest its funds in the State Investment Fund. The Authority has established a Master Repurchase Agreement with its banking institutions to govern the purchase of repurchase agreements. This agreement requires the institution to take possession of collateral having a market value of at least 103 percent of the cost of the repurchase agreement. The underlying collateral must be maintained at this level at all times.

The Authority's Finance committee approved the use of a security-lending program with the trust department of a bank acting as an agent. As of June 30, 2004 the Authority had \$69.7 million of securities on loan to broker-dealers for a fee. The transactions are categorized consistently with GASB Statement No. 28, Accounting and Financial Reporting for Securities Lending Transactions.

Security lending transactions involve the lending of securities to broker-dealers and other entities for collateral, in the form of cash or securities, with the simultaneous agreement to return the collateral for the same securities in the future. The securities custodian is an agent in lending the domestic and international securities for collateral of 102 percent and 105 percent,

respectively, of the loaned securities' market value. The lending agent in accordance with contractual investment guidelines, which are designed to insure the safety of principal and obtain a moderate rate of return, reinvests the collateral. The investment guidelines include very high credit quality standards and also allow for a portion of the collateral investments to be invested with short-term securities. The Authority has the following types of securities on loan: U.S. agency securities, U.S. government securities and corporate notes. The Authority has received the following types of collateral for the securities lent: cash, government securities or irrevocable letters of credit. The fair value of the investment securities loaned was \$69.7 million as of June 30, 2004, and the fair value of the collateral received was \$70.8 million. The Authority may request the bank to terminate any loan of securities for any reason at any time.

As of June 30, 2004, no credit risk exposure to borrowers existed because the amounts owed the borrowers exceeded the amounts the borrowers owed. The contract with the lending agent states that in the event that a borrower fails to return the lent security, the bank will indemnify the Authority for the following amounts: a) The difference between the closing market value of security on the date it should have been returned to the account and the cash collateral substituted for the lent securities, or b) In the case of collateral received in kind, the difference between the closing market value of the security on the date it should have been returned to the account and the closing market value of the collateral in kind on the same date.

The Authority assumes all risk of loss arising out of collateral investment loss and any resulting collateral deficiencies. The bank expressly assumes the risk of loss arising from negligent or fraudulent operations of its securities lending program. The bank operates the securities lending program as a business trust investment pool with open and matched components. In the matched portion of the investment pool, the maturities of the securities lent and collateral are the same. The open portions of the pool maintains a weighted average maturity of the portfolio at approximately 15 days, with a range from 1 day to 25 days. The open portions of the pool generally have a 15-day mismatch between the portfolio coverage maturity and the open loans. As of June 30, 2004, approximately 50.0% of the securities lent were in the matched portion and approximately 50.0% in the open portion of the investment pool. No restrictions on the amount of the loans exist or can be made. The earnings generated from the securities lending program is reported as other income. During the year ended June 30, 2004 the Authority received \$94 thousand of income related to security lending transactions.

Wisconsin Health Care Liability Insurance Plan – The investments of the Wisconsin Health Care Liability Insurance Plan at December 31, 2003 were \$88.0 million, of which \$7.1 million are reported as cash equivalents. Investments of \$2.0 million in bonds meet the Category 1 risk level, while all remaining investments meet the Category 2 risk level.

University of Wisconsin Hospital and Clinics Authority – The University of Wisconsin Hospitals and Clinics Authority (the Hospital) aggregate investments of \$226.8 million consist of \$39.0 million of repurchase agreements which meet Category 2 risk criteria and \$0.2 million of money market funds which are uncategorized. In addition, \$187.6 million of investments reported as "Cash and Investments with Other Component Units" are uncategorized as ownership does not depend on control of individual securities.

University of Wisconsin Foundation – Aggregate investments of the University of Wisconsin Foundation are \$1,716.5 million of which \$183.2 million are money market funds reported as cash equivalents. The remaining \$1,533.3 million consist of various investments of which \$720.6 million meet Category 1 risk criteria and the remaining \$812.7 million are uncategorized.

State Fair Park Exposition Center, Inc. – Investments, consisting of \$3.1 million of money market funds reported as cash equivalents, are not categorized.

The following table presents investments of the Wisconsin Housing And Economic Development Authority, the Wisconsin Health Care Liability Insurance Plan, the University of Wisconsin Hospital and Clinics Authority, the University of Wisconsin Foundation, and the State Fair Park Exposition Center, Inc., categorized in accordance with the requirements of GASB Statement No. 3.

The investments of the Wisconsin Housing and Economic Development Authority at June 30, 2004, the Wisconsin Health Care Liability Insurance Plan at December 31, 2003, the University of Wisconsin Hospitals and Clinics Authority at June 30, 2004, the University of Wisconsin Foundation at December 31, 2003, and the State Fair Park Exposition Center, Inc. at December 31, 2003 consisted of (in millions):

# C. Lottery Investments and Related Future Prize Obligations

Investments of the State Lottery Fund totaling \$128.4 million are held to finance grand prizes payable over a 20-year or 25-year period. The investments in prize annuities are debt obligations of the U.S. government and backed by its full faith and credit as to both principal and interest. Liabilities related to the future prize obligations are presented at their present value and included as Accounts Payable and Other Accrued Liabilities. The following is a schedule of future prize obligations (in thousands):

#### **NOTE 8. ENDOWMENTS**

#### **Primary Government**

#### **University of Wisconsin System**

The University of Wisconsin System invests its trust funds, principally gifts and bequests designated as endowments or quasi-endowments, in two of its own investment pools: the Long Term Fund and the Intermediate Term Fund. Benefiting University of Wisconsin System entities receive quarterly distributions from the Long Term Fund, principally endowed assets, based on an annual spending rate of 4.5 percent applied to a 12-quarter moving average market value of the fund. Distributions from the Intermediate Term Fund, principally quasiendowments and unspent income distributions, consist of interest earnings distributed quarterly. Spending rate and interest distributions from both of these funds are transferred to the State Investment Fund, pending near-term expenditures. At June 30, 2004, net appreciation of \$8.3 million was available to be spent.

University of Wisconsin System investment policies and guidelines for the Long Term Fund and Intermediate Term Fund are governed and authorized by the Board of Regents. The approved asset allocation policy for the Long Term Fund sets a general target of 65 percent marketable equities, 15 percent fixed income and 20 percent alternatives. Accordingly, the fund includes investments in domestic and non-U.S. stocks and bonds, and limited partnerships consisting of venture capital and other private equity investments. The approved asset allocation for the Intermediate Term Fund is 100 percent intermediate maturity, investment-grade fixed income.

The fair value of Endowments as of June 30, 2004 was \$336.3 million including unrealized gains of \$17.4 million when fair values as of June 30, 2004 are compared to asset acquisition costs. This compares to a fair value as of June 30, 2003 of \$295.9 million. The net increase in fund balance during 2003-04 was \$40.4 million.

The book value of Endowments under control of the University of Wisconsin System was \$318.9 million as of June 30, 2004 compared to a book value of \$284.9 million as of June 30, 2003. The calculation of realized gains and losses is independent of a calculation of the net change in the fair value of investments since realized gains and losses are based on the difference between the selling price and the acquisition cost of the asset. Therefore, when assets are reported at fair value much of the realized gain or loss may have already been included in prior years as part of the overall change in the fair value of investments.

At June 30, 2004, the book value and fair value of principal funds under control of the University of Wisconsin System was (in millions):

Original Contributions and Distributed Net Gains	\$ 133.3
Realized Gains – Undistributed	185.6
Book Value	318.9
Unrealized Net Gains/Losses - Undistributed	17.4
Fair Value	\$ 336.3

On June 30, 2004, the portfolio at market contained 73.7 percent in stocks, 23.2 percent in fixed income obligations, 1.0 percent in alternative assets, and 2.1 percent in short-term investments. The total return on the principal Long Term Fund including capital appreciation was 17.0 percent. The total return on the principal Intermediate Fund including capital appreciation was 0.9 percent. External investment counsel was furnished for funds representing 97.0 percent of market-value principal.

#### **Component Unit**

#### **University of Wisconsin Foundation**

At December 31, 2003, there were 3,066 funds pooled in an endowment fund for investment purposes. Generally, principal of the funds is to be kept intact with income from investments being distributed according to the wishes of the donor. For certain funds, principal is also available for distribution.

The University of Wisconsin Foundation's investment policies and guidelines are governed and authorized by the University of Wisconsin Foundation's Board of Directors. The Board does not limit the types of investments allowed.

For the fiscal year ended December 31, 2003, the endowment fund accounts reported cash and money market funds of \$68.6 million and investments with a fair value of \$754.3 million. This compares to a fair value for investments as of December 31, 2002 of \$614.2 million. The asset allocation for endowment assets at December 31, 2003 is 49.9 percent in domestic equities, 14.5 percent in international equities, 32.7 percent in alternative investment managers and 2.9 percent in cash.

#### **NOTE 10. CHANGES IN LONG-TERM LIABILITIES**

During the year ended June 30, 2004, the following changes occurred in long-term liabilities (in thousands):

# **Primary Government**

	Balance			Balance	Amounts Due Within
Governmental Activities	July 1, 2003	Additions	Reductions	June 30, 2004	One Year
Bonds and Notes Payable:					
General Obligation Bonds	\$ 3,090,875	\$ 1,073,030	\$ 603,686	\$ 3,560,219	\$ 237,513
Annual Appropriation Bonds	-	1,792,092	-	1,792,092	-
Revenue Bonds	2,892,579	417,548	158,627	3,151,500	74,611
Total Bonds and Notes Payable	5,983,454	3,282,670	762,313	8,503,811	312,124
Other Liabilities:					
Future Benefits and Loss Liability	118,265	14,819	22,228	110,856	25,385
Capital Leases	40,315	3,379	23,368	20,326	5,450
Installment Contracts	3,653	1,124	2,008	2,770	1,470
Compensated Absences	103,945	48,877	43,657	109,164	44,633
Employer Pension Related Debt Costs	722,248	-	722,248	-	-
Claims, Judgments and Commitments	2,174	-	137	2,037	-
Total Governmental Activities					
Long-term Liabilities	\$ 6,974,054	\$ 3,350,869	\$ 1,575,959	\$ 8,748,965	\$ 389,062

Repayment of the general obligation bonds is made from the Bond Security and Redemption Fund. The amount presented in this fund represents the liability to be paid from resources accumulated to provide debt service payments in Fiscal Year 2004. Repayment of the revenue bonds principal and interest is made from the appropriate debt service fund with payments secured by registration and inspection fees collected by the appropriate program. The compensated absences liability will be liquidated by the State's governmental and internal service funds. Long-term liabilities for claims, judgments and commitments are generally liquidated with resources of the governmental activities.

In July 2003, Wisconsin Act 33 was enacted and authorized the issuance of appropriation obligations to obtain proceeds to pay the State's anticipated unfunded accrued prior service (pension) liability under Wis. Stat. Sec. 40.05(2)(b) and its unfunded accrued liability for sick leave conversion credits under Wis. Stat. Sec. 40.05(4)(b), (bc), and (bw) and Subchapter IX of Chapter 40. In December 2003, the State issued \$1.8 billion of these bonds. A portion of the proceeds was used to pay the State's unfunded prior service (pension) liability, which was reported as "Employer Pension Related Debt Costs."

# A. General Obligation Bonds

# **Primary Government**

The State of Wisconsin Building Commission, an agency of the State, is empowered by law to consider, act upon, authorize, issue and sell all debt obligations of the State. To date, the Commission has authorized and issued general obligation bonds primarily to provide funds for the acquisition or improvement of land, water, property, highways, buildings, equipment or facilities for public purposes. Occasionally, general obligation bonds are also issued for the purpose of providing funds for veterans housing loans and to refund general obligation bonds. All general obligation bonds authorized and issued by the State are secured by a pledge of the full faith, credit and taxing power of the State of Wisconsin and are customarily repaid over a period of twenty to thirty years.

Article VIII of the Wisconsin Constitution and Wis. Stat. Sec. 18.05 set limits on the amount of debt that the State can contract in total and in any calendar year. In total, debt outstanding cannot exceed five percent of the value of all taxable property in the State. Annual debt issued cannot exceed the lesser of three-quarters of one percent or five percent of the value of all taxable property in the State less net indebtedness at January 1.

At June 30, 2004, \$2,561.7 million of general obligation bonds were authorized but unissued.

General obligation bonds issued and outstanding as of June 30, 2004 were as follows (in thousands):

Fiscal	
--------	--

#### Zero Coupon Bonds

The general obligation bonds of 1990, Series D (Higher Education Series), are zero coupon bonds recorded in the amount of \$21.1 million which is the accreted value at June 30, 2004. The bonds mature on May 1 through the year 2010.

The general obligation bonds of 1991, Series B, are zero coupon bonds recorded in the amount of \$40.0 million. The bonds mature on May 1 through the year 2011.

# **B.** Annual Appropriation Bonds

Wisconsin Acts 33 and 84 were enacted and authorized the issuance of appropriation obligations to obtain proceeds to pay the State's anticipated unfunded accrued prior service (pension) liability under Wis. Stat. Section 40.05(2)(b) and its unfunded accrued liability for sick leave conversion credits under Wis. Stat. Section 40.05(4)(b), (bc), and (bw) and Subchapter IX of Chapter 40. The bonds are not general obligations of the State, and do not constitute "public debt" of the State as that term is used in the Constitution and in the State Statutes. The payment of the principal of, and premium, if any, and interest on the Bonds is subject to annual appropriation; that is, payments due in any fiscal year of the State will be made only to the extent sufficient amounts are appropriated by the Legislature. The State is not legally obligated to appropriate any amounts for payment of debt service on the Bonds. The Legislature, recognizing its moral obligation to make timely appropriations from the General Fund sufficient to pay debt service on obligations such as the Bonds, expresses in Wis. Stat. Section 16.527(10) its expectation and aspiration that it will do so. The Legislature's recognition of a moral obligation, however, does not create a legally enforceable obligation.

In December 2003, the State issued \$1.8 billion of these General Fund Annual Appropriation Bonds (Bonds) consisting of Series A (Taxable Fixed Rate) and Series B (Taxable Auction Rate Certificates). The Series A Bonds, in the amount of \$850.0 million, are dated the date of their issuance. The Series A Bonds bear interest from that date, payable semiannually on each May 1 and November 1 until their maturity dates. The Series A Bonds bear interest rates from 4.80 percent to 5.70 percent computed on the basis of a 30-day month and a 360-day year.

The Series B Bonds, in the amount of \$944.9 million, are multimodal bonds that are initially being issued, in multiple subseries, as Auction Rate Certificates. Interest on the Series B Bonds is variable and is computed on the basis of a 360-day year and for the number of days actually elapsed.

As of June 30, 2004, the debt service requirements for principal and interest on these bonds are as follows (in thousands):

Fiscal Year Ended June 30	Principal	Interest			
2005	\$ 	\$	84,993

Unamortized Premium/Discount	 (2,758)				
Total, net	\$ 1,792,092	\$	1,646,534		

#### **Interest Rate Swaps**

The State has entered into interest rate exchange agreements, or swap agreements, to modify interest rates on its outstanding annual appropriation bonds. Other than the net interest expenditures resulting from these agreements, no amounts are recorded in the financial statements.

Objective – In December 2003, the State issued annual appropriation bonds in the amount of \$1.8 billion. Of this amount, \$944.9 million was issued as taxable auction rate certificates (ARCs) in nine sub-series and having variable interest rates set every respective 28 days at an auction. The State entered into four interest rate exchange agreements with four different counterparties in order to reduce the interest rate risk in connection with \$595.2 million of ARCs.

Terms – ARCs in the total amount of \$592.2 million are subject to the interest rate exchange agreements, which were effective at the same time as the issuance of the obligations (December 2003). The ARCs mature and a related notional amount of the related interest rate exchange agreements decline from May 1, 2026 through 2032. Based on the interest rate exchange agreements, the State owes interest calculated at a fixed rate of 5.47 percent to the counterparties and the counterparties owe the State interest an amount based on a variable rate, which is the one-month LIBOR. The net amount is paid monthly.

Fair Value – As of June 30, 2004, the aggregate fair value of the interest exchange agreements is \$11.2 million. The fair value was valued by a third party consultant based on information contained in the broker Interest Rate Swap Confirmations supplied by the four counterparties -- JP Morgan, Citigroup, UBS AG, and Bear Stearns. Based on those parameters, and swap market conditions prevailing on the June 30, 2004 valuation date, the third party consultant calculated the estimated market value. The valuations of derivative transactions provided by the third party consultant are indicative values based on mid-market levels

as of the close of business on the date for which they are provided. The fair value may vary throughout the life of the swap agreements due to changes in fixed swap interest rates and swap market conditions.

Associated Debt – Using rates as of June 30, 2004, debt service requirements are presented for the ARCs that are subject to the interest rate exchange agreements and the net swap payments assuming that interest rates remain the same for their term. As rates vary, interest payments on the ARCs and net swap payments will vary.

2030 - 2032	 244,850		6,439		16,616		267,905			
	\$ 595,150	\$	232,719	\$	601,355	\$	1,429,224			

Interest Rate Risk – Although the interest rate is synthetically fixed under the interest rate exchange agreements, interest payments on the ARCs subject to the interest rate exchange agreements and net swap payments will vary as interest rates vary.

Credit Risk - As of June 30, 2004, the State was exposed to credit risk in the amount of the aggregate fair value of the interest rate exchange agreements. The State has entered into four interest rate agreements with four different counterparties. The lowest rating assigned to these counterparties is, as of June 30, 2004, Aa2 by Moody's, AA- by Standard & Poor's, and AA- by Fitch Ratings (which only assigns a rating for three of the four counterparties). Under the interest rate exchange agreements and to mitigate the potential for credit risk, if any of the counterparties' credit quality falls below A3 by Moody's Investors Service or A- by either Standard & Poor's or Fitch Ratings, the fair value of the interest rate exchange agreement for that respective counterparty will be fully collateralized by that counterparty. In addition, an event of termination occurs if any of the counterparties' credit quality falls below Baa2 by Moody's investors service of BBB by either Standard & Poor's or Fitch Ratings.

Basis Risk – The interest rate exchange agreements expose the State to basis risk as the relationship between the one-month LIBOR and the ARCs vary, which changes the synthetic rate on the bonds. As of June 30, 2004, the one-month LIBOR was 1.36% and the interest rate on the ARCs was 1.56%. This variance, in essence, results in an adjustment to the intended synthetic interest rate of 5.47% to an actual synthetic interest rate of 5.67%. The relationship between the one-month LIBOR and ARCs will vary over time.

Termination Risk - The interest rate exchange agreements may be terminated by the State, upon two business days written notice, designating to the counterparty the termination date. The State or the counterparties may terminate the interest rate exchange agreements if the other party fails to perform under the terms of the interest rate exchange agreements or if other various events occur. If any interest rate exchange agreement is terminated, the State would be unhedged and exposed to additional interest rate risk on the related ARCs. In addition, if the interest rate exchange agreement has a negative fair value at the time of termination, the State would incur a loss and would be required to make a settlement payment to the related counterparty. Actual termination payments, if required to be made, can be made, at the State's discretion, from the Stabilization Fund, or delayed until funds are available in the Subordinated Payment Obligations Fund or until the next biennium when appropriations can be made in the biennial budget for the termination payments. To further mitigate the risk of an involuntary termination event, the State has also purchased a swap insurance policy from a financial guaranty insurance company that was rated Aaa by Moody's and AAA by Standard & Poor's and Fitch. The State's regularly scheduled net payment obligations under three of the four interest rate exchange agreements are insured subject to the terms and conditions of the policy.

Market-access Risk and Rollover Risk – The State's swap agreements are for the term (maturity) of the related ARCs and, therefore, there is no market-access risk or rollover risk.

#### C. Revenue Bonds

#### **Primary Government**

Chapter 18, Wisconsin Statutes, authorizes the State to issue revenue obligations secured by a pledge of revenues or property derived from the operation of a program funded by the issuance of these obligations. The resulting bond obligations are not general obligations of the State.

#### **Transportation Revenue Bonds**

Transportation Revenue Bonds are issued to finance part of the costs of certain transportation facilities and major highway projects. Chapter 18, Subchapter II of the Wisconsin Statutes as amended, Wis. Stat. Sec. 84.59 and a general bond resolution and series resolutions authorize the issuance of these bonds.

The Department of Transportation is authorized to issue a total of \$2,095.6 million of revenue bonds. Presently, there are twelve issues of Transportation Revenue Bonds totaling \$1,316.3 million. Debt service payments are secured by driver and vehicle registration fees and also a reserve fund, which will be used in the event that a deficiency exists in the redemption fund.

The Transportation Revenue Bonds issued and outstanding as of June 30, 2004 were as follows (in thousands):

	Issue	Interest	Maturity

#### **Petroleum Inspection Fee Revenue Bonds**

Petroleum Inspection Fee (PIF) Revenue Bonds are issued to finance claims made under the Petroleum Environmental Cleanup Fund Award (PECFA) Program for reimbursement of cleanup costs to soil and groundwater contamination. The program reimburses owners for 75 percent to 99 percent of cleanup costs associated with soil and groundwater contamination.

Presently, there are four issues of PIF Bonds outstanding totaling \$224.7 million. Debt service payments are secured by petroleum inspection fees.

The PIF revenue bonds issued and outstanding as of June 30, 2004 were as follows (in thousands):

	Issue	Interest	Maturi	ty

#### Clean Water Revenue Bonds

The Environmental Improvement Fund (the Fund) provides loans and grants to local municipalities to finance wastewater treatment planning and construction. The Fund is authorized to issue up to \$1,616.0 million in Revenue Bonds. At June 30, 2004, there were eleven issues of Revenue Bonds outstanding totaling \$692.1 million. These bonds are secured by payments on program loans and earnings of investments.

Bonds issued and outstanding for the Fund as of June 30, 2004 were as follows (in thousands):

	Issue	Interest	Maturity				
Issue	Date	Rates	Through	Issued	Outstanding		
2004-1	3/04	4.0 to 5.0	6/24	\$ 116,795	\$ 116,795

#### **Component Units – Blended Presentation**

# **Badger Tobacco Asset Securitization Corporation**

In May 2002, the Badger Tobacco Asset Securitization Corporation (BTASC) (a blended component unit – debt service fund) issued \$1.6 billion of bonds for the purpose of making a one-time purchase of Tobacco Settlement Revenue (TSRs) from the State. Interest on the bonds is on due June 1 and December 1. These bonds are revenue obligations of the BTASC secured by, and payable solely and only out of, the moneys, assets or revenues pledged by the BTASC.

Debt service requirements for principal and interest for the BTASC at May 31, 2004 were as follows (in thousands):

## Authority's Revenue Bonds and Notes

The Authority's revenue bonds and notes are collateralized by the revenues and assets of the Authority, subject to the provisions of resolutions and note agreements which pledge particular revenues or assets to specific bonds or notes. The bonds are subject to mandatory sinking fund requirements and may be redeemed at the Authority's option at various dates and at prices ranging from 100 percent to 103 percent of par value. Any particular series contains both term bonds and serial bonds which mature at various dates.

The Authority's revenue bonds and notes outstanding at June 30, 2004 consisted of the following (in thousands):

Under a Business Development Program and a Beginning Farmer Program, revenue bonds are issued which do not constitute indebtedness of the Authority within the meaning of any provision or limitation of the Constitution or Statutes of the State of Wisconsin. They do not constitute or give rise to a pecuniary liability of the Authority or a charge against its general credit. They are payable solely out of the revenues derived pursuant to the loan agreement, or in the event of default of the loan agreement, out of any revenues derived from the sale, releasing or other disposition of the mortgaged property. Therefore, the bonds are not reflected in the financial statements. As of June 30, 2004, the Authority had issued 142 series of such bonds in an aggregate principal amount of \$82.6 million for economic projects in Wisconsin.

The Authority has entered into various interest rate swap agreements. The agreements provide the Authority with synthetic fixed interest rates on a portion of its debt. During the term of the swap agreements, the Authority expects to effectively pay a fixed rate on the debt. In return, the counterparty pays interest based on a contractually agreed upon variable rate. The Authority will be exposed to variable rates on the outstanding bonds if the counterparty to the swap defaults, the swap is terminated or the effective interest rate, determined by the Remarketing Agent used for Bond Holder payments, increases over the variable rate index used for calculating the interest received from the counterparty. All interest rate swap agreements at June 30, 2004 are classified as effective. The Authority does not intend to terminate these agreements prior to their maturity.

The following table outlines information related to agreements in place as of June 30, 2004 (in thousands):

Program and Bond Issue	Notional Value at 6/30/04	Effective Date	Swap Termination Date	Counterparty Credit Rating	Percent Fixed Rate Paid	Variable Rate/Index Received	Swap Termination Market Value at 6/30/04

The commercial paper obligations are issued for terms of one to 270 days. These obligations bear interest at various rates, which ranged from 1.15 percent to 1.25 percent and 0.95 percent to 1.3 percent at June 30, 2004 and June 30, 2003 respectively. The obligations are backed by a line of credit agreement which is renewable annually and bears interest at variable rates, based on an index defined in the agreement. The line of credit agreements used for temporary mortgage financing, one of which is renewable annually, bear interest based on the 30 day LIBOR rate. The three agreements bear interest at the rates of 1.875 percent, 1.99 percent and 1.59 percent at June 30, 2004.

#### University of Wisconsin Hospitals and Clinics Authority

In April 1997, the University of Wisconsin Hospitals and Clinics Authority (the Hospital) issued \$50.0 million of Variable Rate Demand Hospital Revenue Bonds, Series 1997. The bond proceeds are designated to finance qualified capital projects. Principal payments on the Series 1997 Bonds are due annually commencing in April 2010 through April 2026. Interest is payable monthly. The effective annual estimated interest rate was 1.0 percent in 2004.

In March 2000, the Hospital issued \$56.5 million of Hospital Revenue Bonds Series 2000. The bond proceeds are designated to finance qualified capital projects. Principal payments are due annually commencing in April 2007 through April 2029. Interest rates range from 5.35 percent to 6.20 percent and interest is payable semiannually on April 1 and October 1 each year beginning October 1, 2000. The effective annual interest rate was 6.1 percent in 2004.

The Series 1997 Bonds, Series 2000 Bonds and Series 2002 Bonds are collateralized by a security interest in substantially all of the Hospital's revenue. The borrowing agreements contain various covenants and restrictions including compliance with the terms and conditions of the lease agreement (Note 1-B) and provisions limiting the amount of additional indebtedness which may be incurred. The borrowing agreements also require the establishment and maintenance of certain funds under the control of a trustee.

In October 2002, the Hospital issued \$68.5 million of Hospital Revenue Bonds, Series 2002 (Series 2002 Bonds) consisting of \$55.6 million Series 2002A Short-term Adjustable Securities and \$12.9 million Series 2002B Fixed Interest Rate Bonds. The bond proceeds are designated to finance qualified capital projects. Principal payments on the Series 2002A Bonds range from \$500 thousand to \$3.9 million due annually commencing in April 2013 through 2032. The interest rates and the interest payment dates for the Series 2002A Bonds vary depending on if the bonds are in auction mode, daily mode, weekly mode, or in flexible mode beginning November 29, 2002. Principal payments on the Series 2002B Bonds range from \$1.4 million to \$1.9 million due annually commencing in April 2006 through April 2013. Interest rates for the Series 2002B Bonds range from 5.25 percent to 5.50 percent and interest is payable semiannually on April 1 and October 1 of each year beginning April 1, 2003. The effective annual interest rate of the Series 2002 A Bonds was 2.2 percent in 2004. The effective annual interest rate of the Series 2002B Bonds was 5.4 percent in 2004.

In October 2002, the Hospital entered into an interest rate swap in order to convert a portion of the Series 2002A Short-term Adjustable Rate Securities to fixed rates. The notional amount of this swap agreement was \$21.4 million at June 30, 2004, which matures on April 1, 2022. The terms of the swap agreement are for the Hospital to pay the counterparty a fixed rate of 3.85 percent per annum, payable semiannually, and the Hospital to receive a floating rate of 70 percent of one-month LIBOR per annum, payable monthly. As of June 30, 2004, the interest rate received by the Hospital was 1.1 percent. The Hospital will be exposed to variable rates if the counterparty to the swap defaults or if the swap is terminated. The swap exposes the Hospital to basis risk should the relationship between LIBOR and auction rate converge. changing the synthetic rate on the bonds. The Hospital does not intend to terminate this agreement. As of June 30, 2004, the Hospital was not exposed to credit risk because the swap had a negative fair value. However, should interest rates change and the fair value of the swap becomes positive, the Hospital would be exposed to credit risk in the amount of the swap's fair value. The fair value of the swap is \$(375,361) at June 30, 2004.

Scheduled principal and interest repayments on all of the Hospital's long-term debt, including the effect of the swap, are as follows (in thousands):

					Interest

#### State Fair Park Exposition Center, Inc.

In August 2001, the State Fair Park Exposition Center, Inc. (the Center) issued \$44.9 million of City of West Allis, Wisconsin, Variable Rate Demand Revenue Bonds, Series 2001, which were issued to finance the construction of the exposition center. The bonds call for monthly interest-only payments for the first two years. The bonds have a final maturity date of August 1, 2028, with no set schedule for principal repayment. However, the bonds require mandatory redemption to the extent of unused bond proceeds. Repayment of the bonds is guaranteed by a ground lease and license agreement, and letter of credit issued by US Bank which expired on October 15, 2003. The letter of credit was renewed effective October 15, 2003 through October 15, 2004. The Center has not been notified of any event of default with respect to the industrial revenue bonds payable restrictive covenants as of December 31, 2003.

Debt service requirements for principal and interest for the Center, at December 31, 2003 are as follows (in thousands):

Fiscal Year
-------------

In addition, the Center had notes payable of \$130 thousand outstanding at June 30, 2004.

#### **University of Wisconsin Foundation**

Long-term debt consists of a note payable to U.S. Bank, N.A. The note was refinanced effective March 1, 2003. The note is payable in accreting monthly principal installments beginning with \$10.6 thousand, with a balloon payment due February 2010. The note is collateralized by certain investments equal to the outstanding loan balance. The outstanding balance as of December 31, 2003 was \$2.8 million.

# D. Refundings, Exchanges and Early Extinguishments

#### Refunding Provisions of GASB Statement No. 23

The State implemented the provisions of GASB Statement No. 23. Accounting and Financial Reporting for Refunding of Debt Reported by Proprietary Activities beginning with Fiscal Year 1996. This Statement requires proprietary activities to adopt certain accounting and reporting changes for both current refunding and advance refunding resulting in defeasance of debt. GASB Statement No. 23 permits, but does not require, retroactive application of its provisions. The State has chosen not to apply the provisions retroactively to previously issued financial statements.

In February 1996, the State participated in a refunding (1996 Series 1) of general obligation debt that fell within the provisions of GASB Statement No. 23. The State is amortizing these deferred amounts over a period of approximately 19 years, using the straight-line method.

#### **Current Year Refundings/General Obligation Bonds**

In October 2003, the State issued \$67.9 million of general obligation refunding bonds (2003 Series 3), the proceeds of which were used to current refund the May 1, 2004 through November 1, 2006 maturities of the 1993 Series 5 bonds. The refunding resulted in an increase in total debt service payments by \$50.7 million with an economic loss of \$9.0 million

In January 2004, the State issued \$147.0 million of general obligation refunding bonds (2004 Series 1), the proceeds of which were deposited in an escrow account to provide for future debt service payments and redemption of \$145.1 million of various general obligation bonds outstanding at the time of the refunding. As a result of the refunding, the bonds are considered defeased and the associated liability removed from the financial statements. The refunding resulted in a decrease in total debt service payments by \$5.8 million and an economic gain of \$5.7 million.

In January 2004, the State issued \$175.8 million of general obligation refunding bonds (2004 Series 2), the proceeds of which were deposited in an escrow account to provide for future debt service payments and redemption of \$177.5 million of various general obligation bonds outstanding at the time of the refunding. As a result of the refunding, the bonds are considered defeased and the associated liability removed from the financial statements. The refunding resulted in a decrease in total debt service payments by \$8.3 million and an economic gain of \$8.1 million.

In March 2004, the State issued \$175.0 million of general obligation refunding notes (2004 Series 1), the proceeds of which were used to current refund on May 1, 2004 principal of various

general obligation bonds in the amount of \$175.0 million. In June 2004, the State issued \$175.0 million of general obligation refunding bonds (2004 Series 3), the proceeds of which were used to fund the notes. The refunding resulted in an increase in total debt service payments by \$66.2 million and an economic loss of \$12.0 million.

#### **Current Year Exchange/General Obligation Bonds**

In April 2004, the Environmental Improvement Fund exchanged \$116.8 million of general obligation bonds (multiple issues), the debt service of which is used to bridge the difference between the payments received in the Leveraged Loan Portfolio and the debt service due on the revenue obligations issued to fund the Leveraged Loan Portfolio, for a global certificate in the amount of \$116.8 million. The exchange resulted in an increase in total debt service payments by \$6.7 million and an economic gain of \$0.8 million.

#### **Current Year Refundings/Revenue Bonds**

In March 2004, the State issued \$116.8 million of clean water revenue bonds (2004 Series 1) of which \$16.8 million was used to current refund the outstanding 2008 maturity of the 1993 Series 2 bonds. The refunding resulted in a decrease of \$1.0 million in total debt service payments and an economic gain of \$1.0 million.

In May 2004, the State issued \$95.5 million of petroleum inspection fee revenue refunding bonds (2004 Series 1), the proceeds of which were deposited in an escrow account to provide for future debt service payments and redemption of \$96.6 million of the 2000 Series A bonds maturing from 2007 through 2012 outstanding at the time of the refunding. As a result of the refunding, the bonds are considered defeased and the associated liability removed from the financial statements. The refunding resulted in a decrease in total debt service payments by \$4.8 million and an economic gain of \$4.0 million.

#### Prior Year Refundings/General Obligation Bonds

Government Accounting Standards Board Statement No. 7 Advance Refundings Resulting in Defeasance of Debt, provides that refunded debt and assets placed in escrow for the payment of related debt service be excluded from the financial statements. At June 30, 2004, approximately \$703.2 million of general obligation bond principal have been defeased.

# Prior Year Refundings/Revenue Bonds

For financial reporting purposes, the following primary government revenue bonds have been defeased, and therefore, removed as a liability from the balance sheet:

- Environmental Improvement Fund revenue bonds At June 30, 2004, revenue bonds outstanding of \$219.7 million have been defeased.
- Transportation revenue bonds At June 30, 2004, revenue bonds outstanding of \$233.3 million have been defeased.
- Petroleum Inspection Fee revenue bonds At June 30, 2004, revenue bonds outstanding of \$96.6 million have been defeased.

In addition, the Wisconsin Housing and Economic Development Authority (the Authority), a proprietary component unit, defeased Insured Mortgage Revenue Bonds payable aggregating \$48.4 million and sold the related Insured Mortgage Loan portfolio on March 1, 1990. As of June 30, 2004, the remaining outstanding defeased debt was \$30.7 million.

#### **Early Extinguishments**

#### **Component Units**

Wisconsin Housing and Economic Development Authority

During 2004, the Wisconsin Housing and Economic Development Authority (the Authority) redeemed early various outstanding bonds according to the redemption provisions in the bond resolutions. None of these redemptions resulted in extraordinary losses due to the write-off of remaining unamortized deferred debt financing costs and, in certain instances, the payment of an early redemption premium. A summary of these early redemptions follows (in thousands):

	Redemptions
Bond Issue	2004
Home Ownership Revenue	
Bond Resolutions:	
1987	\$ 112,655
1988	193,775
All Other	291,835
Housing Revenue Bonds	18,060
General funds	2,755

# E. Short-term Financing

The State of Wisconsin Building Commission, an agency of the State, is empowered by law to consider, authorize, issue, and sell debt obligations of the State. To date, the Commission has authorized the issuance of notes in anticipation of revenue or bond financing. When this short-term debt does not meet long-term financing criteria, it is classified among fund liabilities.

#### **General Obligation Commercial Paper Notes**

The State has authorized General Obligation Commercial Paper Notes for the acquisition, construction, development, extension, enlargement, or improvement of land, waters, property, highway, buildings, equipment or facilities. As of June 30, 2004, the State issued \$166.7 million of general obligation commercial paper notes. Periodically, additional commercial paper notes are issued to pay for maturing commercial paper notes.

The State intends to make annual May 1 payments on the outstanding commercial paper notes that reflect principal amortization of the notes. The State also intends to make regular payments to the issuing and paying agent that will be equal to the interest due on maturing notes. At June 30, 2004, the amount of commercial paper notes outstanding was \$68.6 million which had interest rates ranging from 0.92 percent to 1.11 percent and maturities ranging from July 6, 2004 to August 16, 2004.

Short-term debt activity for the year ended June 30, 2004 for the general obligation commercial paper notes was as follows (in millions):

Ва	alance					Ва	alance
July 1, 2003 Add		lditions	itions Reductions		June 30, 2004		
\$	77.1	\$		\$	8.5	\$	68.6

# General Obligation Extendible Municipal Commercial Paper

The State has authorized general obligation extendible municipal commercial paper for the acquisition, construction, development, extension, enlargement, or improvement of land, waters, property, highway, buildings, equipment or facilities. As of June 30, 2004, the State issued \$440.5 million of general obligation extendible municipal commercial paper. Periodically, additional extendible municipal commercial papers are issued to pay for maturing extendible municipal commercial papers. The State intends to make annual May 1 payments on the outstanding extendible commercial paper that reflect principal amortization of the paper. The State also intends to make regular payments to the issuing and paying agent that will be equal to the upcoming interest due on maturing notes. At June 30, 2004, the amount of extendible municipal commercial paper outstanding was \$313.9 million which

had interest rates ranging from 0.98 percent to 1.14 percent and maturities ranging from July 6, 2004, to September 8, 2004.

Short-term debt activity for the year ended June 30, 2004 for the general obligation extendible municipal commercial paper was as follows (in millions):

В	alance					Ва	alance
Ju	ly 1, 2003	1, 2003 Additions Rec		Reductions		June 30, 2004	
\$	239.9	\$	100.0	\$	26.0	\$	313.9

# Petroleum Inspection Fee Revenue Extendible Municipal Commercial Paper

The State has authorized petroleum inspection fee revenue extendible municipal commercial paper to pay the costs of claims under the Petroleum Environmental Cleanup Fund Award (PECFA) Program. As of June 30, 2004, the State issued \$142.3 million of petroleum inspection fee revenue extendible municipal commercial paper. Periodically, additional extendible municipal commercial paper is issued to pay for maturing paper. The State may periodically deposit money into the Junior Subordinate Principal Account, which represents principal payments to be made on the extendible municipal commercial paper. The State also intends to make regular payments to the issuing and paying agent that will be equal to the upcoming interest due on maturing paper. At June 30, 2004, the amount of extendible commercial paper outstanding was \$142.3 million which had interest rates ranging from 1.06 percent to 1.13 percent and maturities ranging from August 10, 2004 to September 8, 2004.

Short-term debt activity for the year ended June 30, 2004 for the petroleum inspection fee revenue extendible municipal commercial paper was as follows (in millions):

В	alance				Bal	ance
Ju	ly 1, 2003	Additions Reductions		June	30, 2004	
\$	142.3	\$		\$ 	\$	142.3

#### **Transportation Revenue Commercial Paper Notes**

The State authorized transportation revenue commercial paper notes to pay the costs of major highway projects and certain State transportation facilities. As of June 30, 2004, the State issued \$157.8 million of transportation revenue commercial paper notes. Periodically, additional commercial paper notes are issued to pay for maturing commercial paper notes. The State intends to make annual July 1 payments on the commercial paper notes that reflect principal amortization of the notes. The State also intends to make regular payments to the issuing and paying agent that will

be equal to the upcoming interest due on maturing notes. At June 30, 2004, the amount of commercial paper notes outstanding was \$125.8 million which had interest rates ranging from 1.05 percent to 1.20 percent and maturities ranging from July 6, 2004 to January 12, 2005.

Short-term debt activity for the year ended June 30, 2004 for the transportation revenue commercial paper notes was as follows (in millions):

Balance						Balance

Ф.	404.4	¢.		Φ.	<b>5.0</b>	Φ.	405.0	
Ф	131.4	Ф		\$	5.6	\$	125.8	

## F. Certificates of Participation

The State established a facility in 1992 that provides lease purchase financing for property and certain service items acquired by State agencies. This facility is the Third Amended and Restated Master Lease 1992-1. Pursuant to the terms and conditions of this agreement, the trustee for the facility issues parity Master Lease certificates of participation that evidence proportionate interest of the owners thereof in lease payments. A common pool of collateral ratably secures all Master Lease certificates. Title in the property and service items purchased under the facility remains with the State and the State grants to the Trustee, for the benefit of all Master Lease certificate holders, a first security interest in the leased items. At June 30, 2004, the following parity Master Lease certificates were outstanding:

- Master Lease Certificates of Participation of 1999, Series A, in the amount of \$0.6 million. This series of Master Lease certificates have interest rates ranging from 3.8 percent to 3.9 percent and mature semi-annually through March 1, 2005.
- Master Lease Certificates of Participation of 1999, Series B
  (Taxable), in the amount of \$3.5 million. This series of
  Master Lease certificates have interest rates of 5.6 percent
  and mature semi-annually through September 1, 2005.
- Master Lease Certificates of Participation of 2000, Series A, in the amount of \$7.4 million. This series of Master Lease certificates have interest rates ranging from 4.5 percent to 4.75 percent and mature semi-annually through September 1, 2007.
- Master Lease Certificates of Participation of 2000, Series B
  (Taxable), in the amount of \$3.8 million. This series of
  Master Lease certificates have interest rates ranging from 6.9
  percent to 7.0 percent and mature semi-annually through
  September 1, 2005.

- Master Lease Certificates of Participation of 2002, Series A, in the amount of \$26.2 million. This series of Master Lease certificates have interest rates ranging from 3.00 percent to 3.75 percent and mature semi-annually through September 1, 2007.
- Master Lease Certificates of Participation of 2002, Series C and Master Lease Certificates of Participation of 2003, Series B (Revolving Credit Agreement Tax Exempt) in the amount of \$14.3 million. These Master Lease certificates evidence the State's obligation to repay tax-exempt revolving loans under a Revolving Credit Agreement, dated July 1, 2002, as amended, between U.S. Bank National Association (Trustee) and the Bank of America Leasing & Capital LLC. These Master Lease certificates shall bear interest at the rates provided for in the Revolving Credit Agreement and both mature on March 1, 2013. The balance of these certificates of participation may include some accrued interest that will be payable at the next semi-annual interest payment date.
- Master Lease Certificates of Participation of 2002, Series D, in the amount of \$23.1 million. This series of Master Lease Certificates have interest rates ranging from 2.0 percent to 5.0 percent and mature semi-annually through September 1, 2007.
- Master Lease Certificates of Participation of 2003, Series A (Revolving Credit Agreement Taxable). This Master Lease certificate evidences the State's obligation to repay revolving loans under a Revolving Credit Agreement, dated July 1, 2002, as amended, between U.S. Bank National Association (Trustee) and the Bank of America Leasing & Capital LLC. The Commitment date under the Revolving Credit Agreement is June 30, 2005. This Master Lease certificate shall bear interest at the rates provided for in the Revolving Credit Agreement and matures on March 1, 2022. The balance of this certificate of participation may include some accrued interest that will be payable at the next semi-annual interest payment date.

The Third Amended and Restated Master Lease 1992-1 provides that certain lease schedules to the facility can be terminated if the State deposits with the Trustee an amount that is equal to the outstanding amount of the lease schedule, or in amounts that are sufficient to purchase investments that mature on dates and in amounts to make the lease payments when due. At June 30, 2004, the State has deposited with the Trustee amounts, that when invested, will terminate lease schedules having an aggregate outstanding amount of \$8.4 million. As a result of terminating these lease schedules, the associated liability is removed from the financial statements.

#### G. Arbitrage Rebate

The Tax Reform Act of 1986 requires that governmental entities issuing tax-exempt debt subsequent to August 1986, calculate and rebate arbitrage earnings to the federal government. Specifically, the excess of the aggregated amount earned on investments purchased with bond proceeds over the amount that would have been earned if the proceeds were invested at a rate equal to the bond yield, is to be rebated to the federal government. As of June 30, 2004, no material arbitrage rebate liabilities existed.

## H. Moral Obligation Debt

Through legislation enacted in 1994, the State authorized the creation of local exposition districts. These districts (Wisconsin Center District, Southeast Wisconsin Professional Baseball Park District, and the Green Bay/Brown County Professional Football Stadium District) are authorized to issue bonds for costs related to an exposition center, and if the State determines that certain conditions are satisfied, the State may have a moral obligation to appropriate moneys to make up deficiencies in the districts' reserve funds that secure up to \$200 million principal amount of bonds. To date, the Wisconsin Center District has issued \$125.8 million of bonds that are subject to the moral obligation. The two other local exposition districts each have authority to issue \$160.0 million of revenue obligations that, subject to the Secretary of Administration's determination that certain conditions have been met, could carry a moral obligation of the State. Each of these districts have issued revenue obligations that do not carry the moral obligation of the State.

Through legislation enacted in 1999, the State authorized the issuance of up to \$170.0 million principal amount of bonds to finance the development or redevelopment of sites and facilities to be used for public schools. If certain conditions are satisfied, and if a special debt service reserve fund is created for the bonds, the State will provide a moral obligation pledge, which would restore the special debt reserve fund established for the bonds to an amount not to exceed the maximum annual debt service on the bonds. Two bond issues of \$112.0 million have been issued that have a special debt service reserve fund secured by the State's moral obligation.

#### I. Credit Agreements

#### **Primary Government**

The State has, as part of the working bank contract, a letter of credit agreement with the US Bank National Association under which the Bank has agreed to provide to the State an open line of credit in the amount of \$50.0 million. The agreement provides for advances in anticipation of bond issuance proceeds. As of June 30, 2004, \$50.0 million was unused and available.

The State has previously entered into a credit agreement to provide a line of credit for liquidity support for up to \$80.0 million of general obligation commercial paper notes. The line of credit expires in March, 2005, but is subject to annual renewal as provided for in the credit agreement. The cost of this line of credit is 0.125 percent per year.

Also, the State has entered into a credit agreement with two banks to provide a line of credit for liquidity support for its transportation revenue commercial paper program. The amount of the line of credit is \$135.0 million. This line of credit expires in May, 2005, but is subject to renewal as provided for in the credit agreement. The cost of this line of credit is 0.170 percent per year.

# NOTE 12. LEASE COMMITMENTS AND INSTALLMENT PURCHASES

The State leases office buildings, space, and equipment under a variety of agreements that vary in lease term, many of which are subject to appropriation from the State Legislature to continue the lease commitment. If such funding, i.e., through legislative appropriation, is judged to be assured, and the likelihood of cancellation through exercise of the fiscal funding clause is remote, leases are considered noncancelable and reported as either a capital lease or an operating lease.

#### A. Capital Leases

#### **Primary Government**

Capital lease commitments in the government-wide and proprietary funds statements are reported as liabilities at lease inception. The related assets along with the depreciation are also reported at that time. Lease payments are reported as a reduction of the liability.

For capital leases in governmental funds, "Other Financing Sources - Capital Lease Acquisitions" and expenditures are recorded at lease inception. Lease payments are recorded as expenditures.

The following is an analysis of the gross minimum lease payments along with the present value of the minimum lease payments as of June 30, 2004 for capital leases (in thousands):

	G	overnmental	Bus	iness-type	
Fiscal Year		Activities		Activities	
2005	\$	6,440	\$	7,122	
2006		5,512		6,454

Less: Accumulated				
Depreciation		(13,428)		(11,732)
Carrying Amount	\$	44,186	\$	58,182

#### Master Lease Program

The State established a facility in 1992 that provides lease purchase financing for property and certain service items acquired by state agencies. This facility is the Third Amended and Restated Master Lease between the State acting by and through the Department of Administration and U.S. Bank National Association. Lease purchase obligations under the Master Lease are not general obligations of the State, but are payable from appropriations of State agencies participating in the Master Lease Program, subject to annual appropriation. The interest component of each lease/purchase payment is subject to a separate determination. Pursuant to terms of the Master Lease, the Trustee for the facility issues parity Master Lease Certificates of Participation that evidence proportionate interest of the owners thereof in lease payments. The outstanding balance as of June 30, 2004 was as follows:

	Average Life
Balance Due	(Weighted Term)
\$85,014,923	3.5793 Years

#### **Component Unit**

Under the terms of a lease agreement, the University of Wisconsin Hospitals and Clinics Authority (the Hospital) leases facilities which were occupied by the Hospital as of June, 1996 (see Note 1B to the financial statements). The initial term of the lease is 30 years to be renewed annually with automatic extensions of one additional year on each July 1 until action is taken to stop the extensions. Included in the consideration for the lease is an amount equal to the debt service during the term of the lease agreement on all outstanding bonds issued by the State for the purpose of financing the acquisition, construction or improvement of the leased facilities. Interest rates on the related bonds range from 4.0 percent to 6.26 percent, with final maturities due beginning in April 2000 through April 2022. Scheduled principal and interest payments through April 2022 are \$20.2 million.

#### **B.** Operating Leases

Operating leases, those leases not recorded as capital leases as required by FASB Statement No. 13, are not recorded in the statement of net assets. These leases contain various renewal options, the effect of which are reflected in the minimum lease payments only if it is considered that the option will be exercised. Certain other operating leases contain escalation clauses and contingent rentals which are not included in the calculation of the future minimum lease payments. The State has adopted the operating lease scheduled rent increase provisions of FASB Statement No. 13. Operating lease expenditures/expenses are recognized as incurred or paid over the lease term.

Governmental and business-type activities and fiduciary funds rental expenses under operating leases for Fiscal Year 2004 were \$66.2 million. Of this amount, \$65.4 million relates to minimum rental payments stipulated in lease agreements, \$303 thousand relates to contingent rentals, and \$510 thousand relates to sublease rental payments.

The following is an analysis of the future minimum rental payments due under operating leases (in thousands):

			Bu	siness-				
Fiscal	Gove	ernmental		type	Fidu	ciary		
Year	Ac	tivities	Ac	tivities	Fu	nds	ι	Jnits
2005	\$	39,622	\$	11,757	\$	97	\$	6,518

2007	402			
2008	 39			
Total minimum future payments	2,907			
Less: Interest	 (138)			
Present value of net minimum				
installment payments	\$ 2,770			

#### **NOTE 13. RETIREMENT PLAN**

The Wisconsin Retirement System (WRS) was established and is administered by the State of Wisconsin to provide pension benefits for State and local government public employees. The WRS consists of the fixed retirement investment trust, the variable retirement investment trust, and the police and firefighters trust. Although separated for accounting purposes, the assets of these trust funds can be used to pay benefits for any member of the WRS, and are reported as one pension plan.

The WRS is considered part of the State of Wisconsin's financial reporting entity. Copies of the separately issued financial report that includes financial statements and required supplementary information for the year ending December 31, 2002, may be obtained by writing to:

Department of Employee Trust Funds 801 West Badger Road P.O. Box 7931 Madison, WI 53707-7931.

The separately issued financial reports for the year ended December 31, 2003 will be available in early Calendar Year 2005.

### **Plan Description**

The WRS, governed by Chapter 40 of the Wisconsin Statutes, is a cost-sharing multiple-employer defined benefit pension plan. It provides coverage to all eligible State of Wisconsin, local government and other public employees. Any employee of a participating employer who is expected to work at least 600 hours per year for at least one year must be covered by the WRS. As of December 31, 2003, the number of participating employers was:

State Agencies	61
Cities	153
Counties	71
4 <sup>th</sup> Class Cities	34
Villages	227
Towns	203
School Districts	426
Wisconsin Technical College System Board Districts	16
Cooperative Educational Service Agencies	12
Other	177
Total Employers	1,380

For employees beginning participation on or after January 1, 1990 and no longer actively employed on or after April 24, 1998, creditable service in each of five years is required for eligibility for a retirement annuity. Participants employed prior to 1990 and on or after April 24, 1998 are immediately vested. Employees who

retire at or after age 65 (55 for protective occupation employees, 62 for elected officials and State executive participants) are entitled to receive an unreduced retirement benefit. The factors influencing the benefit are: (1) final average earnings, (2) years of creditable service, and (3) a formula factor.

Final average earnings is the average of the participant's three highest years' earnings. Creditable service is the creditable current and prior service expressed in years or decimal equivalents of partial years for which a participant receives earnings and makes contributions as required. The formula factor is a standard percentage based on employment category.

Employees may retire at age 55 (50 for protective occupation employees) and receive reduced benefits. Employees terminating covered employment before becoming eligible for a retirement benefit may withdraw their contributions and forfeit all rights to any subsequent benefits. The WRS also provides death and disability benefits for employees.

#### **Accounting Policies and Plan Asset Matters**

The financial statements of the WRS have been prepared in accordance with generally accepted accounting principles, using the flow of economic resources measurement focus and a full accrual basis of accounting. Under the accrual basis of accounting, revenues are recorded when earned and expenses are recorded at the time the liabilities are incurred. Plan member contributions are recognized in the period in which contributions are due. Employer contributions to the plan are recognized when due and the employer has made a formal commitment to provide contributions. Benefits and refunds are recognized when due and payable in accordance with the terms of the plan.

All assets of the WRS are invested by the State of Wisconsin Investment Board. The retirement fund assets consist of shares in the variable retirement investment trust and the fixed retirement investment trust. The variable retirement investment trust consists primarily of equity securities. The fixed retirement investment trust is a balanced investment fund made up of fixed income securities and equity securities. Shares in the fixed retirement investment trust are purchased as funds are made available from retirement contributions and investment income, and sold when funds for benefit payments and other expenses are needed.

The assets of the fixed and variable retirement investment trusts are carried at fair value with all market value adjustments recognized in current operations. Investments are revalued monthly to current market value. The resulting valuation gains or losses are recognized as income, although revenue has not been realized through a market-place transaction.

The WRS does not have any investments (other than those issued or guaranteed by the U.S. Government) in any one organization that represent 5.0 percent or more of plan net assets.

#### State Contributions Required and Contributions Made

Covered State employees in the General/Teacher category are required by statute to contribute 5.0 percent of their salary (2.6 percent for Executives and Elected Officials, 4.5 percent for Protective Occupations with Social Security, and 3.2 percent for Protective Occupations without Social Security) to the plan as of June 30, 2004. Employers may make these contributions to the plan on behalf of employees.

Employers are required to contribute an actuarially determined amount necessary to fund the remaining projected cost of future benefits; however, State legislation in 1999 prescribed a \$200 million contribution holiday for employers for the first time in the plan's history. State contributions made for the years ended December 31, 2003, 2002 and 2001 were as follows (in millions):

	2003	2002	2001
Employer current service	\$ 140.4	\$ 127.2	\$ 122.9
Percent of payroll	4.5%	4.3%	4.2%
Employer prior service	\$ 706.8	\$ 38.3	\$ 15.5
Percent of payroll	22.4%	1.3%	0.5%
Employee required	\$ 154.1	\$ 145.7	\$ 140.9
Percent of payroll	4.9%	4.9%	4.9%
Benefit adjustment contrib.	\$ 11.1	\$ 5.3	\$ 5.1
Percent of payroll	0.4%	0.2%	0.2%
Percent of Required			
Contributions	100%	100%	100%

The WRS uses the "Entry Age Normal with Frozen Initial Liability" actuarial method in establishing employer contribution rates. Under this method, the unfunded actuarial accrued liability (UAAL) is generally affected only by the monthly amortization payments, compound interest, the added liability created by new employer units, and any liabilities caused by changes in benefit provisions. The UAAL is being amortized over a 40 year period beginning January 1, 1990. However, periodically, the Employee Trust Funds Board has reviewed and, when appropriate, adjusted the actuarial assumptions used to determine this liability. Changes in the assumptions may affect the UAAL, and the resulting actuarial gains or losses are credited or charged to employers' unfunded liability accounts.

All actuarial gains or losses arising from the difference between actual and assumed experience are reflected in the determination of the normal cost.

As of June 30, 2004 and 2003, the WRS's unfunded actuarial accrued liability was \$0.5 billion and \$1.7 billion, respectively. These amounts are presented as Prior Service Contributions Receivable on the financial statements. New prior service liabilities resulting from employers entering the WRS or increasing their prior service coverage are recognized as contributions in the year service is granted and are added to the Prior Service Contributions Receivable. Employer contributions for prior service reduce the receivable. The receivable is increased as of calendar year end with interest at the assumed interest rate of 7.8 percent.

#### **NOTE 14. MILWAUKEE RETIREMENT SYSTEM**

The Milwaukee Retirement System (MRS), with participation by the City of Milwaukee Retirement System and the Milwaukee Public Schools Retirement System, is reported as an Investment Trust Fund. MRS participants provide assets to the State of Wisconsin, Department of Employee Trust Funds (DETF) for investing in its Fixed Retirement Investment Trust (FRIT) and the Variable Retirement Investment Trust (VRIT), funds of the Wisconsin Retirement System (WRS). Participation of the MRS in the FRIT and VRIT is described in the DETF Administrative Code, Chapter 10.12. The State of Wisconsin Investment Board (SWIB) manages the FRIT and VRIT with oversight by a Board of Trustees as authorized in Wis. Stat. 25.14 and 25.17. SWIB is not registered with the Securities and Exchange Commission as an investment company.

The investments of the FRIT and VRIT consist of a highly diversified portfolio of securities. Wis. Stat. 25.17(3)(a) allow investments in loans, securities and any other investments as authorized by Wis. Stat. 620.22. Permitted classes of investments include bonds of governmental units or of private corporations, loans secured by mortgages, preferred or common stock, real property and other investments not specifically prohibited by statute.

Investments are revalued monthly to fair value, with unrealized gains and losses reflected in income.

Monthly, the DETF distributes a pro-rata share of the total FRIT and VRIT earnings less administrative expenses to the MRS accounts. The MRS accounts are adjusted to fair value and gains/losses are recorded directly in the accounts per DETF Administrative Code, Chapter 10.12(2).

Neither State statute, a legal provision nor a legally binding guarantee exists to support the value of shares.

At June 30, 2004, the FRIT and VRIT held \$68,877.7 million of investments of which includes \$5,053.0 million of securities lending collateral and \$388.3 million of pooled cash and cash

equivalents. The following tables present investments of the FRIT and VRIT at June 30, 2004, categorized in accordance with the level of risk requirements of GASB Statement No. 3 (in millions):

# NOTE 15. OTHER EMPLOYMENT BENEFITS

In addition to providing pension benefits, the State participates in the Department of Employee Trust Funds administered post retirement life insurance and health insurance benefit programs. The State provides life and health insurance benefits for retired employees in accordance with Chapter 40 of the Wisconsin Statutes.

Post retirement life insurance is provided to employees retiring before age 65 if they (1) have 20 years of creditable service, and (2) are eligible for a retirement annuity. This coverage is at the employee's expense (employee must pay the full premium) until age 65 when reduced coverage is provided at no cost. Employees retiring at or after age 65 are immediately eligible for reduced coverage at no cost. Beginning in the month in which an insured annuitant reaches age 65, premiums are no longer collected and coverage is continued for life. Approximately 13,112 State annuitants currently qualify for coverage without premium. Post retirement life insurance is fully insured by an independent insurance carrier. Premiums are prefunded with employer paid premiums during the employee's active career. The amount of premiums is determined by the insurer. The accrued liability and assets specifically related to post employment benefits could not be determined.

In accordance with Chapter 40, Wisconsin Statutes, the State also provides that employees retiring and beginning an immediate annuity are eligible for conversion of unused sick leave to post retirement health insurance. At the time of eligibility for an immediate annuity or employee's death, that employee's accumulated unused sick leave balance may be converted at the employee's current rate of pay to credits for the payment of health insurance premiums for the employee or the employee's surviving dependents. The program also provides partial matching of sick leave accumulation depending on years of service and employment category. Health insurance premiums are paid on the employee, or employee's dependents behalf, until the sick leave conversion credits are exhausted. At that time, the employee has the option to continue coverage by paying the total cost of the premiums. Approximately 9,044 annuitants are currently receiving health insurance coverage through sick leave conversion credits. Accumulated sick leave conversion is prefunded based on an actuarially determined percentage of payroll. The actuarial valuation is based on the frozen initial liability cost method.

Significant actuarial assumptions include an 7.8 percent assumed interest rate, 4.1 percent assumed annual salary growth, and an average sick leave accumulation of 6.4 days per year for non-University employees and 7.4 days per year for University employees. The assets and reserves of the sick leave conversion program are accounted for in a fiduciary fund. The accrued liability for the post retirement health insurance benefits at December 31, 2003, determined through an actuarial valuation

performed on that date, was \$1,625.0 million. The program's assets on that date were \$1,605.0 million. The unfunded liability was \$20.0 million.

Assets of the life insurance and health insurance benefit programs are valued at fair value.

The State's postemployment life insurance required and actual contributions totaled \$4.6 million during the calendar year ended December 31, 2003.

For that same time period, the State paid required and excess contributions totaling \$813.1 million to fund health insurance and to pay the State's unfunded actuarially accrued liability for health benefits to be paid in the future.

# NOTE 16. PUBLIC ENTITY RISK POOLS ADMINISTERED BY THE DEPARTMENT OF EMPLOYEE TRUST FUNDS

The Department of Employee Trust Funds operates four public entity risk pools: group health insurance, group income continuation insurance, protective occupation duty disability insurance and long-term disability insurance. The information provided in this note applies to the period ending December 31, 2003.

# A. Description of Funds

The Health Insurance Fund offers group health insurance for current and retired employees of the State government and of participating local public employers. All public employers in the State are eligible to participate. Approximately 305 local employers plus the State currently participate. The State and local government portions of the fund are accounted for separately and have separate contribution rates, benefits, and actuarial valuations. The fund includes both a self-insured, fee-for-service plan as well as various prepaid plans, primarily Health Maintenance Organizations (HMO's). Also, starting January 1, 2004, a self-insured plan began that provides for pharmacy benefits of covered members.

The Income Continuation Insurance Fund offers disability wage continuation insurance for current employees of the State government and of participating local public employers. All public employers in the State are eligible to participate. Approximately 147 local employers plus the State currently participate. The State and local government portions of the fund are accounted for separately and have separate contribution rates, benefits, and actuarial valuations. The plan is self-insured.

The Duty Disability Fund offers special disability insurance for State and local Wisconsin Retirement System participants in protective occupations. Participation in the program is mandatory for all Wisconsin Retirement System employers with protective occupation employees. Approximately 476 local employers plus the State currently participate. The plan is self-insured and risk is shared between the State and local portions of the plan.

The Long-term Disability Insurance Fund offers long-term disability benefits to participants in the Wisconsin Retirement System (WRS). The long-term disability benefits provided by this program are an alternative coverage to that currently provided by the WRS. All new WRS participants on or after October 15, 1992, are eligible only for the long-term disability insurance coverage, while participating employees active prior to October 15, 1992, may elect coverage through WRS or the long-term disability insurance program.

# **B.** Accounting Policies for Risk Pools

Basis of Accounting - All Public Entity Risk Pools are accounted for in enterprise funds using the full accrual basis of accounting and the flow of economic resources measurement focus.

Valuation of Investments - Assets of the Health Insurance Fund are invested in the State Investment Fund. Assets of the Income Continuation Insurance, Duty Disability and Long-term Disability Insurance funds are invested in the fixed retirement investment trust. Investments are valued at fair value.

Unpaid Claims Liabilities - Claims liabilities are based on estimates of the ultimate cost of claims that have been reported but not settled, and of claims that have been incurred but not reported. The estimate includes the effects of inflation and other societal and economic factors. Adjustments to claims liabilities are charged or credited to expense in the periods in which they are made. Unpaid claims liability is presented at face value and is not discounted for health insurance. It is discounted using an interest rate of 8 percent for income continuation, long-term disability, and duty disability insurance. The liabilities for income continuation, long-term disability, health insurance and duty disability insurance were determined by actuarial methods. The Duty Disability Fund's accounting deficit is being amortized over a twenty-three year period beginning January 1, 2000. Face values are not available.

Administrative Expenses - All maintenance expenses are expensed in the period in which they are incurred. Acquisition costs are immaterial and are treated as maintenance expenses. Premium deficiencies are not calculated because acquisition costs are immaterial. Claim adjustment expenses are also immaterial.

Reinsurance - Health insurance plans provided by HMO's and health insurance for local government annuitants are fully insured by outside insurers. All remaining risk is self-insured with no reinsurance coverage.

Risk Transfer - Participating employers are not subject to supplemental assessments in the event of deficiencies. If the assets of the fund were exhausted, participating employers would not be responsible for the fund's liabilities.

Premium Setting - Premiums are established by the Group Insurance Board (Health, Income Continuation Insurance and Long-term Disability Insurance) and the Employee Trust Funds Board (Duty Disability) in consultation with actuaries.

# C. Unpaid Claims Liabilities

As discussed in Section B of this Note, each fund establishes a liability for both reported and unreported insured events, which is an estimate of future payments of losses. The following represents changes in those aggregate liabilities for the nonreinsured portion of each fund during Calendar Year 2003 (in millions):

	Health Insurance		Income Continuation Insurance			Duty Disability		-term bility rance
	2003	2002	2003	2002	2003	2002	2003	2002
Unpaid claims at beginning of the calendar year	\$ 8.1	\$ 12.8	\$58.2	\$57.0	\$320.8	\$318.3	\$43.8	\$34.3
Incurred claims: Provision for insured events of the current calendar year	73.2	70.5	23.4	17.1	41.0	30.7	15.9	11.7
Changes in provision for insured events of prior calendar years	(1.1)	(5.4)	(13.2)	(2.8)	0.4	(6.6)	1.3	3.0
Total incurred claims	72.1	65.1	10.2	14.3	41.4	24.1	17.2	14.7
Payments: Claims and claim adjustment expenses attributable to insured events of the current calendar year	65.1	62.5	4.5	3.5	0.3	0.2	0.3	0.0
Claims and claim adjustment expenses attributable to insured events of prior calendar years	6.8	7.3	7.0	9.6	22.7	21.4	6.7	5.2
Total payments	71.9	69.8	11.5	13.1	23.0	21.6	7.0	5.2
Total unpaid claims expenses at end of the calendar year	\$ 8.3	\$ 8.1	\$56.9	\$58.2	\$339.2	\$320.8	\$54.0	\$43.8

# D. Trend Information

Historical trend information showing revenue and claims development information is presented in the Department of Employee Trust Funds audited financial statements. The separately issued financial report for the year ended December 31, 2003 will be available in early Calendar Year 2005. Copies of these and prior years statements may be requested from:

The Department of Employee Trust Funds 801 West Badger Road P.O. Box 7931 Madison, Wisconsin 53707-7931

#### NOTE 17. SELF-INSURANCE

It is the general policy of the State not to purchase commercial insurance for the risks of losses to which it is exposed. Instead, the State believes it is more economical to manage its risks internally and set aside assets for claim settlement in its internal service fund, the Risk Management Fund. The fund services most claims for risk of loss to which the State is exposed, including damage to State owned property, liability for property damages and injuries to third parties, and worker's compensation. All funds and agencies of the State participate in the Risk Management Fund.

### **State Property Damage**

Property damages to State-owned properties are covered by the State's self-funded property program up to \$2.5 million per occurrence and \$2.7 million annual aggregate. When claims, which exceed \$25,000 per occurrence, total \$2.7 million, the State's private insurance becomes available. Losses to property occurring after the threshold are first subject to a \$25,000 deductible. The amount of loss in excess of \$25,000 is covered by the State's private insurance company. During Fiscal Year 2004, the excess insurance limits were written to \$300 million.

The liabilities for State property damage are reported when it is probable that a loss has occurred and the amount of that loss can be reasonably estimated. The estimate for future benefits and loss liabilities is based on the reserves on open claims and paid claims. Losses incurred but not reported are expected to be immaterial. Claims incurred but not paid as of June 30, 2004 are estimated to total \$3.5 million.

## **Property Damages and Bodily Injuries to Third Parties**

The State is self-funded for third party liability to a level of \$3 million per occurrence and purchases insurance in excess of this self-funded retention. The policy limit during Fiscal Year 2004 was \$50 million.

The liabilities for property damages and injuries to third parties are reported when it is probable that a loss has occurred and the amount of that loss can be reasonably estimated. The estimate for future benefits and loss liabilities for the prior fiscal year was the reserves on open claims. The estimate for future benefits and loss liabilities is calculated by an actuary based on the reserves on open claims and prior experience. No liability is reported for environmental impairment liability claims either incurred or incurred but not reported because existing case law makes it unlikely the State would be held liable for material amounts. Because actual claims liabilities depend upon complex factors such as inflation, changes in legal doctrines, and damage awards, the process used in computing claims liability does not

necessarily result in an exact amount. Claims incurred but not paid as of June 30, 2004 are estimated to total \$44.7 million.

#### **Worker's Compensation**

The Worker's Compensation Program was created by Wisconsin Statutes Chapter 102 to provide benefits to workers injured on the job. All employees of the State are included in the program. An injury is covered under worker's compensation if it is caused by an accident that arose out of and in the course of employment.

The responsibility for claiming compensation is on the employee. A claim must be filed with the program within two years from the date of injury, otherwise the claim is not allowable.

The worker's compensation liability has been determined by an actuary using paid claims and current claims reserves. Liabilities include an amount for claims that have been incurred but not reported. Because actual claims liabilities are affected by external factors, the process used in computing claims liabilities does not necessarily result in an exact amount. Claims incurred but not paid as of June 30, 2004 are estimated to total \$62.7 million.

Changes in the balances of claims liability for the Risk Management Fund during the current and prior fiscal years are as follows (in thousands):

	2	004	2003
Beginning of fiscal year liability	\$ 11	8,265	\$ 111,821
Current year claims and changes			
in estimates	1	4,819	30,509
Claim payments	(2	22,228)	(24,065)
Balance at fiscal year-end	\$ 11	0,856	\$ 118,265

#### **Annuity Contracts**

The Risk Management Fund purchased annuity contracts in various claimants' names to satisfy claim liabilities. The likelihood that the fund will be required to make future payments on those claims is remote and, therefore, the fund is considered to have satisfied its primary liability to the claimants. Accordingly, the annuity contracts are not reported in, and the related liabilities are removed from, the fund's balance sheet. The aggregate outstanding amount of liabilities removed from the financial statements at June 30, 2004 is \$4.9 million.

#### **NOTE 18. INSURANCE FUNDS**

# **Primary Government**

## A. Local Government Property Insurance Fund

Created by the Legislature in 1911, the purpose of the Local Government Property Insurance Fund is to provide property insurance coverage to tax-supported local government units such as counties, towns, villages, cities, school districts and library boards. Property insured includes government buildings, schools, libraries and motor vehicles. Coverage is available on an optional basis. As of June 30, 2004, the Local Government Property Insurance Fund insured 1,203 local governmental units. The total amount of insurance in force as of June 30, 2004 was \$35.9 billion.

Valuation of Cash Equivalents and Investments - All investments of the Local Government Property Insurance Fund are managed by the State of Wisconsin Investment Board, as discussed in Note 5-B to the financial statements. At June 30, 2004, the fund had \$24.1 million of shares in the State Investment Fund which are considered cash equivalents and \$8.1 million of high grade, long-term, fixed income obligations.

*Premium* - Unearned premium reported as deferred revenue represents the daily pro rata portion of premium written which is applicable to the unexpired terms of the insurance policies in force. Policies are generally written for annual terms.

Unpaid Claims Liabilities - The Local Government Property Insurance Fund establishes future benefits and loss liabilities based on estimates of the ultimate cost of claims (including future claim adjustment expenses) that have been reported but not settled, and of claims that have been incurred but not reported. Estimated amounts of reinsurance recoverable on unpaid claims are deducted from the liability for unpaid claims. Claims liabilities are recomputed periodically to produce current estimates that reflect recent settlements, claim frequency, and other economic factors. Adjustments to future benefits and loss liabilities are charged or credited to expense in the periods in which they are made.

Policy Acquisition Costs - Since the Local Government Property Insurance Fund has no marketing staff and incurs no sales commissions, acquisition costs are minimal and charged to operations as incurred.

Premium Deficiency – Investment income is considered in determining whether a premium deficiency exists. No premium deficiency existed at June 30, 2004.

Reinsurance - The Local Government Property Insurance Fund uses reinsurance agreements to reduce its exposure to large losses on all types of insured events. Reinsurance permits

recovery of a portion of losses from reinsurers, although it does not discharge the primary liability of the fund as direct insurer of the risks reinsured. The fund does not report reinsured risks as liabilities unless it is probable that those risks will not be covered by reinsurers. As of June 30, 2004 the fund had \$240 million of per occurrence excess of loss reinsurance in force with a \$2.0 million combined single limit retention for each occurrence, and an annual aggregate reinsurance contract with a \$18.0 million annual aggregate retention plus a per claim retention of \$5 thousand once the aggregate is met, as respects occurrences for the term of the agreement. Premium ceded to reinsurers during the fiscal year amounted to \$5.7 million. Reinsurance loss and adjusting expense recoveries earned for the year amounted to \$87 thousand.

#### **Unpaid Claims Liabilities**

As discussed above, the Local Government Property Insurance Fund establishes a liability for both reported and unreported insured events, which includes estimates of both future payments of losses and related claim adjustment expenses. The following represents changes in those aggregate liabilities for the fund during the past two fiscal years (in thousands):

	2004	2003
Unpaid claims and claim adjustment	¢40.470	¢44.770
expenses at beginning of the year  Less: Reinsurance recoverable	\$12,178 (6,468)	\$11,773 (4,706)
Net unpaid loss liability at beginning	(0,400)	(4,700)
of year	5,710	7,067
oi yeai	3,710	7,007

Total unpaid claims and claim		
adjustment expenses	\$8,006	\$12,178

#### **Trend Information**

Historical trend information showing revenue and claims development information is presented in the Office of the Commissioner of Insurance June 30, 2004 financial statements. Copies of these statements may be requested from:

Office of the Commissioner of Insurance 125 South Webster Street Madison, Wisconsin 53702

#### B. State Life Insurance Fund

The State Life Insurance Fund was created under Chapter 607, Wisconsin Statutes, to offer life insurance to residents of Wisconsin in a manner similar to private insurers. This fund functions much like a mutual life insurance company and is subject to the same regulatory requirements as any life insurance company licensed to operate in Wisconsin.

Premiums are reported as earned when due. Benefits and expenses are associated with earned premiums so as to result in recognition of profits over the life of the contracts. This association is accomplished by means of the provision for liabilities for future benefits and the amortization of acquisition costs.

The costs of policy issuance and underwriting, all of which vary with, and are primarily related to, the production of new business, have been deferred. These deferred acquisition costs are amortized over a forty year period, considered representative of the life of the contract. The amortization is in proportion to the ratio of annual in-force business to the amount of business issued. Such anticipated in-force business was estimated using similar assumptions to those used for computing liabilities for future policy benefits.

#### **Deferred Acquisition Cost Assumptions**

Issue	Interest	Lapse	
Years	Rate	Rate	Mortality
1913-1966	3.0%	2.0%	None
1967-1976	3.0	2.0	None
1977-1985	4.0	2.0	None
1986-1994	5.0	2.0	None
1995+	4.0	2.0	None

The State Life Insurance Fund does not pay commissions nor does it incur agent expenses.

Future benefits and loss liabilities have been computed by the net level premium method based upon estimated future investment yield and mortality. The composition of liabilities and the more material assumptions pertinent thereto are presented below (in thousands):

Issue Year	Ir	dinary Life Isurance n Force	Amount of Policy Liability	
	•		•	
1913-1966	\$	13,011	\$	8,706
1967-1976		38,058		15,811
1977-1985		83,857		20,816
1986-1994		55,063		6,504
1995+		33,952		2,849
	\$	223,941	\$	54,686

# **Bases of Assumptions**

Year	Rate	Mortality
1913-1966	3.0%	American Experience, ANB*
1967-1976	3.0	1958 CSO, ALB, Unisex
1977-1985	4.0	1958 CSO, ALB, Female Setback
		3 years
1986-1994	5.0	1980 CSO, ALB, Aggregate
1995+	4.0	1980 CSO, ALB, Aggregate

<sup>\*</sup> Age Last Birthday

All of the State Life Insurance Fund's ordinary life insurance in force is participating. This fund is required by statute to maintain surplus at a level between 7 percent and 10 percent of statutory admitted assets as far as practicably possible. All excess surplus is to be returned to the policyholders in the form of policyholder dividends. Policyholder dividends are declared each year in order to achieve the required level of surplus.

The statutory assets at December 31, 2003 were \$79.9 million and the statutory capital and surplus were \$4.7 million, and the capital and surplus at June 30, 2004 was \$5.6 million.

# C. Injured Patients and Families Compensation Fund

The Injured Patients and Families Compensation Fund was created in 1975 for the purpose of providing excess medical malpractice insurance for health care providers in the state. The Injured Patients and Families Compensation Fund pays that portion of a medical malpractice claim which is in excess of the legal primary insurance limit prescribed under law, or the maximum liability limit for which the health provider is insured, whichever limit is greater. Most health care providers permanently practicing or operating in the State of Wisconsin are required to pay Injured Patients and Families Compensation Fund operating fees. Risk of loss is retained by the fund.

The Future Benefits and Loss Liability account includes individual case estimates for reported losses and estimates for incurred but not reported losses based upon the projected ultimate losses. Individual case estimates of the liability for reported losses and net losses paid from inception of the Injured Patients and Families Compensation Fund are deducted from the projected ultimate loss liabilities to determine the liability for incurred but not reported losses as of June 30, 2004 as follows (in thousands):

Projected ultimate loss liability	\$	1,394,692
Less: Net loss paid from inception	*	(559,648)
Less: Liability for reported losses		(33,071)
Liability for incurred but not reported losses	\$	801,973
		<u> </u>

The Future Benefits and Loss Liability account also includes a provision for the estimated future payment of the costs to settle claims. These ultimate loss adjustment expenses as of June 30, 2004 are estimated at 6.25 percent of the projected ultimate loss liabilities. The loss reserves are actuarially determined. The loss adjustment expenses paid from the inception of the Injured Patients and Families Compensation Fund are deducted from the projected ultimate loss adjustment expenses provision to determine the liability for loss adjustment expenses as of June 30, 2004 as follows (in thousands):

Projected ultimate loss adjustment expense liability	\$ 87,168
Less: Loss adjustment expense paid from	
inception	(41,768)
Liability for loss adjustment expense	\$ 45,400

The uncertainties inherent in projecting the frequency and severity of large claims because of the Injured Patients and Families Compensation Fund's unlimited liability coverage, and extended reporting and settlement periods, makes it likely that the amounts

ultimately paid will differ from the recorded estimated liabilities. These differences cannot be quantified.

The liability for reported losses, liability for incurred but not reported losses, and liability for loss adjustment expense are maintained on a present value basis with the difference from full value being reported as a contra account to the loss reserve liabilities. The loss reserve liabilities are discounted only to the extent that they are matched by cash and invested assets. If all loss liabilities are discounted, the discounted loss liability would be as follows as of June 30, 2004 (in thousands):

Estimated unpaid loss liabilities Estimated unpaid loss adjustment expense	\$ 801,973
Total estimated loss liabilities	 45,401 847,374
Less: Amount representing interest	(213,948)
Discounted loss liabilities	\$ 633,426

The future benefits and loss liabilities are continually reviewed as adjustments to these liabilities become necessary. Such adjustments are reflected in current operations. Because of the changes in these estimates, the benefit expense for the fiscal year is not necessarily indicative of the loss experience for the year.

On behalf of the Fund's Board, the Office of the Commissioner of Insurance is in the process of contracting for an actuarial audit of the Injured Patients and Families Compensation Fund, which includes a review by another actuary of the reasonableness of the actuarial methodology and assumptions used in developing estimates of the Fund's loss liabilities. The Board believes the current estimate of the Funds' loss liabilities is a reasonable estimate.

### D. Health Insurance Risk Sharing Plan

The Health Insurance Risk Sharing Plan Fund was established in 1980 to provide major medical and Medicare supplemental insurance for persons unable to obtain this insurance in the private market or who otherwise qualify for eligibility under Section 149.12, Wis. Stats. The Health Insurance Risk Sharing Plan is funded primarily by premiums paid by insureds of the plan, assessments made to participating insurers and reduction of provider payments rates.

The financial statements of the Health Insurance Risk Sharing Plan fund are prepared in conformity with generally accepted accounting principles for governments as prescribed by the Governmental Accounting Standards Board. Premiums are recognized as revenues over the terms of the insurance policies, and a liability for unearned premiums is established to reflect premiums received applicable to subsequent accounting periods.

Participating insurers are assessed every six months, and revenue is recognized in the period covered by the assessments.

The future benefits and loss liabilities include loss reserves reflecting the accumulation of losses reported but not paid prior to the close of the accounting period and estimates of incurred but unreported losses. Loss reserves are actuarially determined and are based on historical patterns of claim payments and represent the estimated ultimate cost of settling claims incurred prior to June 30. Due to the inherent uncertainties in the reserving process, loss reserves as computed may not reflect the actual payments ultimately to be made. The methods for making such estimates and for establishing the resulting reserves are continually reviewed, and any adjustments are reflected in earnings currently.

The following represents changes in the Future Benefits and Loss Liabilities account balances for the prior two fiscal years (in thousands):

	2004	2003
Balance, beginning of year	\$ 15,547	\$ 15,296
Incurred related to:		
Current year	106,787	90,904
Prior years	(2,746)	(3,815)
Total Incurred	104,041	87,089
Paid related to:		
Current year	90,088	76,344
Prior years	11,901	10,494
Total Paid	101,989	86,838
Balance, end of year	\$ 17,599	\$ 15,547
•		

The Future Benefits and Loss Liabilities account also includes a reserve for loss adjustment costs to be incurred in settlement of the claims provided for in the loss reserves.

## **Component Units**

# E. Wisconsin Health Care Liability Insurance Plan

The Wisconsin Health Care Liability Insurance Plan (the Plan) is a statutory unincorporated association established by rule of the Commissioner of Insurance of the State of Wisconsin as mandated by the State of Wisconsin legislature. The Plan provides health care liability insurance and liability coverages normally incidental to health care liability insurance to eligible health care providers in the State of Wisconsin calling for payment of premium prior to the effective date of the policy. All insurers authorized to write personal injury liability insurance in the State of Wisconsin, with certain minor exceptions, are required to be members of the Plan.

The Plan generates its premium written revenue by selling medical malpractice insurance. Rates are calculated in accordance with generally accepted actuarial principles. The rates are set so that the Plan will be self-supporting. Profit is not the intent of the Plan.

Since the inception of the Plan in 1975, the health care liability coverage limits have increased from \$200 thousand per occurrence and \$600 thousand annual aggregate to the current limits of \$1.0 million per occurrence and \$3.0 million annual aggregate. A general liability coverage is also available to participating health care providers with limits of \$1.0 million per occurrence and \$3.0 million annual aggregate. The Plan is not covered under any reinsurance contracts.

In the event that sufficient funds are not available for the sound financial operation of the Plan, all members shall, on a temporary basis, contribute to the financial needs of the Plan. Members shall participate in the contributions in the proportion of their respective premiums to the aggregate premiums written by all members of the Plan. Such assessments shall be recouped by rate increases applied prospectively. There were no assessments for the year ended December 31, 2003.

The future benefits and loss liability includes amounts determined from individual reported losses (case reserves) and an amount, based on past experience, for losses incurred but not reported. Such liabilities are necessarily based on estimates and, while management believes that the amounts are adequate, the ultimate liability will differ from the amounts provided. The methods for making such estimates and for establishing the resulting liability are annually reviewed, and any adjustments are reflected in income currently. Specific account balances as of December 31, 2002 and December 31, 2003, are as follows (in thousands):

	2003	2002
Balance at January 1	\$ 51,680	\$ 67,212
Incurred related to:		
Current year	6,739	4,044
Prior years	(12,895)	(18,892)
Total Incurred	(6,156)	(14,848)
Paid related to:		
Current year	40	62
Prior years	1,724	622
Total paid	1,764	684
Balance at December 31	\$ 43,760	\$ 51,680

There is inherent uncertainty in medical malpractice claims when establishing the estimates of unpaid losses and unpaid loss adjustment expenses. In 2003 and 2002, the Plan decreased its estimates of unpaid losses and unpaid loss adjustment expenses related to insured events of prior years. These decreases were greater than the estimated losses incurred for the current year, causing negative incurred losses and loss adjustment expenses.

# NOTE 19. SEGMENT INFORMATION AND CONDENSED FINANCIAL DATA

# **Primary Government**

The State issues revenue bonds to finance the Leveraged Loan Program, which is accounted for as part of the Environmental Improvement Fund. Investors in those bonds rely solely on the revenue generated within the Leveraged Loan Program. Assets of this program are used primarily for loans for Wisconsin municipal waste water projects. Condensed financial statement information of the Leveraged Loan Program as of and for the year ended June 30, 2004 is presented below (in thousands):

# NOTE 22. LITIGATION, CONTINGENCIES AND COMMITMENTS

## A. Litigation and Contingencies

The State is a defendant in various legal proceedings pertaining to matters incidental to the performance of routine governmental operations.

#### Claims and Judgments Reported in Governmental Activities

The State accrues liabilities related to legal proceedings, if a loss is probable and reasonably estimable. Such losses, totaling \$2.1 million on June 30, 2004 reported in the governmental activities, are discussed below:

Litigation - The Department of Health and Family Services is involved in various legal proceedings where the ultimate disposition is estimated at \$0.5 million.

Other Claims - Work Injury Supplemental Benefits - The Work Injury Supplemental Benefit Fund, administered by the Department of Workforce Development, provides compensatory payments to survivors of fatally injured employees or disabled employees with work-related injuries. The liability for annuities to be paid to the above individuals totaled \$1.6 million at June 30, 2004.

#### Other Claims, Judgments, and Contingencies

The State is also named as a party in other legal proceedings where the ultimate disposition and consequence are not presently determinable. The potential liability amount relating to an unfavorable outcome for certain of these proceedings could impact the State by approximately \$9.6 million. However, the ultimate dispositions and consequences of any single legal proceeding or all legal proceedings collectively should not have a material adverse effect on the State's financial position, except as noted below.

Corporate Tax Measured by Interest from U.S. Securities - In this corporate franchise tax case, American Family Mutual Insurance Company and American Standard Insurance Company sought refunds of taxes paid that were measured by U.S. interest.

Federal law prohibits an income tax on U.S. interest, but allows a non-discriminatory franchise tax measured on U.S. interest. The insurance companies argued that because bonds authorized by the State for housing and development were exempt from State taxes, that the franchise tax was discriminatory. The State had heretofore held that the exemption applied only to direct State taxes and had uniformly included interest on the State authorized bonds in the franchise tax measure. The Wisconsin Tax Appeals Commission and the County Circuit Court upheld the State.

The Court of Appeals, District IV, reversed the decisions. The Supreme Court reversed the Court of Appeals. The taxpayers maintain that the decision is not applicable to 1993 and 1994. The State maintains the principles of the decision are applicable to the subsequent years.

Due to the uncertainty in predicting the outcome, a liability has not been recorded as of June 30, 2004.

Federal Pension Income – The 1984-1988 period settlements with approximately 3,200 military retirees and 14,000 civilian retirees, triggered by the United States Supreme Court ruling in Davis v. Michigan Department of the Treasury are essentially completed. The Davis case had held that a state government violates the intergovernmental tax immunity clause when it provided for taxation of federal pension benefits. Subsequent litigation with other retirees on a variety of issues has occurred, with the Department prevailing in all instances. Litigation is still in progress on a limited number of issues. The Department of Revenue is confident that it will continue to prevail on this issue. Because a fiscal impact cannot be readily determined if the State were not to prevail, and due to the uncertainty in predicting the outcome, a liability has not been recorded.

Environmental Clean-up Actions - The State is involved in environmental clean-up of property owned by the State that has the potential to cause soil and groundwater contamination. Fourteen sites have soil and/or groundwater contamination associated with underground storage tank releases with an estimated remediation cost of \$2.4 million.

The State is also involved in environmental remediations on five properties that do not involve releases from underground storage tanks, with an estimated cost of \$2.5 million.

#### **B.** Commitments

# **Primary Government**

In addition to legal proceedings, the State is party to commitments which normally occur in governmental operations.

In addition to the amount of encumbrances outstanding at June 30, 2004 reported as Fund Balance - Reserved for Encumbrances, additional obligations at June 30, 2004 representing multi-year, long-term commitments included (in thousands):

Transportation Fund	\$ 291,527
Transportation Revenue Bonds Capital	
Projects Fund	41,252
General Fund – Department of Commerce	
programs, including economic and community	
development programs	30

The Environmental Improvement Fund (the Fund) was established to administer the Clean Water Fund Loan Program. Loans are made to local units of government for wastewater treatment projects for terms of up to 20 years. These loans are made at a number of prescribed interest rates based on environmental priority. The loans contractually are revenue obligations or general obligations of the local governmental unit. Additionally, various statutory provisions exist which provide further security for payment. The fund has made financial assistance commitments of \$133.3 million as of June 30, 2004. These loan commitments are expected to be met through additional federal grants and proceeds from issuance of revenue obligations.

In addition, the revenue obligation bonds of the Leveraged Loan Program in the Fund are collateralized by a security interest in all the assets of the Leveraged Loan Program. Neither the full faith and credit nor the taxing power of the State is pledged for the payment of the Fund's revenue obligation bonds. However, as the loans granted to local units of government are at an interest rate less than the revenue bond rate, the State is obligated by the Fund's General Resolution to fund, at the time each loan is made, a reserve which subsidizes the Leveraged Loan Program in an amount which offsets this interest disparity.

The *Injured Patients and Families Compensation Fund* may be required to purchase an annuity as a result of a claim settlement. Under specific annuity arrangements, the fund may have ultimate responsibility for annuity payments if the annuity company and the reassignment company default on annuity payments. One of the fund's annuity providers has defaulted on \$600 thousand in annuity payments. The total estimated replacement value of the fund's annuities as of June 30, 2004 was \$140.1 million. The fund

reserves the right to pursue collection from State guarantee funds.

State Public Deposit Guarantee - As required by Wis. Stat. Sec. 34.08, the State is to make payments to public depositors for proofs of loss (e.g., loss resulting from a bank failure) up to \$400 thousand per depositor above the amount of federal insurance. This statutory requirement guarantees that the State will make payments in favor of the public depositor that has submitted a proof of loss. Payments would be made in the order in which satisfactory proofs of loss are received by the State's Department of Financial Institutions, until the designated appropriation is exhausted. At June 30, 2004, the appropriation available totaled \$31.8 million. Losses become fixed as of the date of the loss. A public depositor experiencing a loss must assign its interest in the deposit, to the extent of the amount paid, to the Department of Financial Institutions. Any recovery made by the Department of Financial Institutions under the assignment is to be repaid to the appropriation. The possibility of a material loss resulting from payments to and recovery from public depositors is remote.

The Veterans Mortgage Loan Repayment Fund accounts for the issuance and administration of veterans' first mortgage loans. The loans are made to veterans for the purchase of homes to terms up to 30 years. The loan interest rates are set by the Board of Veterans Affairs. The loans are secured by real estate mortgages. The fund has commitments for loans of \$15.0 million as of June 30, 2004. The loan commitments are expected to be met from current fund assets.

## **Component Units**

The Wisconsin Housing and Economic Development Authority's mission was expanded since its creation to include administration of the Agricultural and Business Programs. These programs administer funds that are legislatively appropriated to subsidize interest and provide guarantees of principal balances of qualifying loans. At June 30, 2004, outstanding loan guarantees totaled \$38.2 million.

#### **NOTE 23. SUBSEQUENT EVENTS**

# **Primary Government**

#### Long-term Debt

State of Wisconsin General Obligation Bonds – In July 2004, the State issued a \$1.0 million general obligation term bond 2004, Series B to be used to fund veterans home improvement loans. Interest is payable May 1 and November 1, beginning May 1, 2005 with mandatory sinking fund payments beginning November 1, 2005 to the stated maturity date November 1, 2014.

In July 2004, the State issued \$117.2 million of general obligation bonds Series 4 to be used to refund various outstanding general obligation bonds. Interest is payable May 1 and November 1, beginning November 1, 2004, with bonds maturing May 1 of the years 2006 though 2020.

In July 2004, the State issued a \$1.0 million general obligation term bond 2004, Series C to be used to fund veterans home improvement loans. Interest is payable May 1 and November 1, beginning May 1, 2005 with mandatory sinking fund payments beginning November 1, 2005 to the stated maturity date November 1, 2019.

In August 2004, the State issued a \$20.0 million general obligation term bond 2004, Series D to be used to fund veterans primary mortgage home loans. Interest is payable May 1 and November 1, beginning May 1, 2005 with mandatory sinking fund payments beginning November 1, 2005 to the stated maturity date November 1, 2034.

In October 2004, the State issued \$225.0 million of 2004 Series E general obligation bonds to be used for the acquisition, construction, development, extension, enlargement, or improvement of land, water, property, highways, buildings, equipment, or facilities for public purposes. Interest is payable on May 1 and November 1, beginning May 1, 2005, with bonds maturing May 1, of the years 2006 through 2025.

In October 2004, the Environmental Improvement Fund exchanged \$116.8 million global certificate 1 for \$116.8 global certificate 2. Interest is payable May 1 and November 1, beginning November 1, 2005 with principal installments beginning November 1, 2009 through May 1, 2024.

In November 2004, the State redeemed early \$42.0 million of various outstanding veterans loan general obligation bonds pursuant to the redemption provisions of those bonds. The bonds were redeemed from mortgage prepayments and undisbursed bond proceeds.

Revenue Bonds – In September 2004, the Department of Transportation issued \$95.9 million of 2004 Series 1 transportation revenue refunding bonds. The proceeds were deposited in an escrow account to provide for future debt service and redemption of \$97.5 million of various outstanding revenue bonds.

On June 1, 2004, Badger Tobacco Asset Securitization Corporation (BTASC) redeemed \$40.3 million of the 6.125 percent term bonds due June 1, 2027. Pursuant to the indenture, the bonds were redeemed with collections that had been deposited into the Turbo Redemption Account. Subject to conditions outlined in the indenture, turbo term bonds shall be redeemed in whole or in part prior to their stated maturity and on any distribution date from amounts on deposit in the Redemption Account.

# **Component Units**

Wisconsin Housing and Economic Development Authority – In July 2004, the Authority issued \$150.0 million of the Variable Rate Demand Home Ownership Revenue Bonds, 2004 Series C and D. These bonds were issued under the 1988 Home Ownership Revenue Bond Resolution.

In July 2004, the Authority redeemed the following bonds (in thousands):

Program/Bond Resolution	-	Amount edeemed
Housing Revenue Bonds, 1991 Series		
F, G, H & I	\$	1,485
Home Ownership Revenue Bonds,		
1994 Series C & D		2,150
General Obligation Bonds, 1995 Series 4		120
Home Ownership Revenue Bonds,		
1998 Series F & G		2,975
Home Ownership Revenue Bonds, 1994 Series C & D General Obligation Bonds, 1995 Series 4 Home Ownership Revenue Bonds,	\$	2,150 120

In August 2004, the Authority redeemed the following bonds (in thousands):

	Amount
Program/Bond Resolution	Redeemed
Housing Revenue Bonds, 1993 Series C Housing Revenue Bonds, 2002 Series A, B & C	\$ 1,710 2,730

# **Required Supplementary Information**

# **Required Supplementary Information**

# Infrastructure Assets Reported Using the Modified Approach

The State has adopted the modified approach for reporting infrastructure assets. Under the modified approach, infrastructure assets are not depreciated as long as the State can demonstrate that these assets are properly managed and are being preserved at or above an established condition level. Instead of depreciation, the costs to maintain and preserve infrastructure assets are expensed, while additions and improvements are capitalized. The State owns approximately 11,200 centerline miles of roads and 4,900 bridges.

#### **Road Network**

Condition assessments are completed on a two-year cycle with the most current results reported for each State road. Numerous measures are used to assess the condition of the State's road network. The State has adopted the International Roughness Index (IRI), as defined by the Federal Highway Administration, as its primary condition measure. IRI is measured on a scale of 0 to 5, with an IRI of 2.69 or greater being defined as a "poor" ride. Roads with a "poor" IRI assessment cause negative impacts for the traveling public by decreasing driver comfort and increasing the damage to vehicles and goods. It is the State's policy to ensure no more than 15 percent of its roads receive a "poor" IRI assessment.

Recent condition assessment results are as follows:

Year	Miles	Percent		Variance
Ended	of	Rated	Established	Favorable/
June 30	Road	"Poor"	Percent	(Unfavorable)
2004	11.200	6.1	15.0	8.9
2003	11,200	4.3	15.0	10.7
2002	11,200	4.6	15.0	10.4

Each year the State estimates the costs to maintain and preserve the road network at, or above, the established condition level. Actual maintenance/preservation costs compare to estimates as follows:

Year Ended June 30	Estimated Costs (In millions)	Actual Costs (In millions)	Variance (In millions) Favorable/ (Unfavorable)
2004	\$ 450.8	\$ 341.1	\$ 109.7
2003	420.9	336.7	84.2
2002	470.7	437.6	33.1

Estimated costs are developed at the beginning of the fiscal year based on projects planned for the current and future years. The types of projects ultimately contracted and incurring costs during the year are often very different. Actual costs for the year ended June 30, 2004 reflect a shift from maintenance and preservation projects to capital road construction projects that was not anticipated in the cost estimates. In addition, the State of Wisconsin, Department of Transportation's multi-year budgeting process, allowing encumbrances to carry forward, makes a comparison of actual to estimated amounts difficult since expenditures for the current year may have been budgeted and committed to a project in prior years.

### **Bridge Network**

Condition assessments are completed on a two-year cycle, with more frequent inspections completed if warranted. The most current assessment results are reported for each State bridge, making the overall assessment a blend of measures completed in the current fiscal year and those completed in the prior year. The State has adopted the National Bridge Inventory (NBI) 10-point rating scale as its primary condition measure. Using the Federal Highway Administration's definition, a bridge is considered "structurally deficient" if it has an NBI score of 4 or less on its deck, superstructure, or substructure. "Structurally deficient" bridges cause negative impacts for the public by increasing the likelihood that heavy loads will need to be rerouted to less efficient routes, thus increasing logistic costs for State businesses. It is the State's policy to ensure no more than 15 percent of its bridges are "structurally deficient".

Recent condition assessment results are as follows:

Year Ended June 30	Number of Bridges	Percent Structurally Deficient	Established Percent	Variance Favorable/ (Unfavorable)
2004	4.900	5.4	15.0	9.6
2003	4,900	6.2	15.0	8.8
2002	4,900	7.6	15.0	7.4

Each year the State estimates the costs to maintain and preserve the bridge network at, or above, the established condition level. Actual maintenance/preservation costs compare to estimates as follows:

Year Ended June 30	Estimated Costs (In millions)	Actual Costs (In millions)	Variance (In millions) Favorable/ (Unfavorable)
2004	\$ 47.8	\$ 52.3	\$ (4.5)
2003	46.4	45.7	0.7
2002	33.6	38.4	(4.8)

Additional bridge maintenance and preservation projects were planned and completed during the year ended June 30, 2004. The State of Wisconsin, Department of Transportation's multi-year budgeting process, allowing encumbrances to carry forward, makes a comparison of actual to estimated amounts difficult since expenditures for the current year may have been budgeted and committed to a project in prior years.

Total Appropriations (Outflows)	\$ 20,451,321	\$ 23,203,046	21,785,274
Fund Balances, End of Year			726,398
Less Encumbrances Outstanding at June 30, 2004			(547,835)
Fund Balances, End of Year			<u>-</u>
Budgetary Basis			\$ 178,564

During Fiscal Year 2004, \$59.3 million in expenditures that were incurred in the first year of the biennium (Fiscal Year 2004) were moved to the second year of the biennium (Fiscal Year 2005). This accounting treatment of biennial expenditures was reflected in the State's Fiscal Year 2004 Annual Fiscal Report (budgetary report). The Budgetary Comparison Schedule, above, mirrors the annual budgetary report and, therefore, it displays data on the budgetary basis and not on a basis consistent with generally accepted accounting principles.

# State of Wisconsin Budgetary Comparison Schedule Transportation Fund For the Fiscal Year Ended June 30, 2004

(In Thousands)

	Original Budget	Final Budget	Actual Amounts
Unexpended Budgetary Fund Balances, Beginning of Year			\$ 402,071
Revenues (Inflows):			
Taxes	\$ 959,594	\$ 959,594	959,594
Departmental	 1,336,400	1,336,400	1,336,400
Total Revenues (Inflows)	 2,295,994	2,295,994	2,295,994
Amounts Available for Appropriation			2,698,065
Appropriations and Transfers (Outflows):			
Commerce	91	97	97

Fund Balances, End of Year			373,591
Less Encumbrances Outstanding at June 30, 2004			(1,103,793)
Fund Balances, End of Year			
Budgetary Basis			\$ (730,203)

# **Notes To Required Supplementary Information**

# **NOTE 1. BUDGETARY INFORMATION**

# A. Budgetary - GAAP Reporting Reconciliation

The accompanying Budgetary Comparison Schedule compares the legally adopted budget (more fully described in RSI Note 1-B) with actual data on a budgetary basis. Because accounting principles applied for purposes of developing data on the budgetary basis differ significantly from those used to present financial statements in conformity with generally accepted accounting principles (GAAP), a reconciliation of basis and perspective differences as of June 30, 2004 is presented below (in thousands):

	General Fund	Transportation Fund
Fund balance June 30, 2004 (budgetary basis – budgetary fund structure)		
As reported on the budgetary comparison schedule	\$ 178,564	\$ (730,203)
Reclassifications:		
To eliminate the effect of encumbrances that were reported as expenditures		
under budgetary reporting (basis difference)	547,835	1,103,793
To reclassify activities reported in another GAAP fund type (perspective differences):		
Enterprise funds (except for the University of Wisconsin System)	14,752	
University of Wisconsin System	(236,013)	
Internal service funds	(10,650)	
Fiduciary funds	(45,894)	
Transportation Revenue Bonds debt service fund		1,965
Fund balance June 30, 2004 (GAAP fund structure – budgetary basis, excluding		
encumbrances treated as expenditures at year end)	448,593	375,556
Adjustments (basis differences):		
To adjust expenditures for the municipal and county shared revenue program	(453,881)	
To adjust expenditures for State property tax credit program	(354,704)	
To accrue receivables and establish payables for individual income taxes (net)	(742,362)	
To defer revenues for gross receipts public utility taxes	(170,157)	
To adjust revenues and expenditures for tax-related items and	, ,	
other tax credit/aid programs (net)	(294,597)	(9,614)
To accrue unpaid Medicaid claims to providers (net of receivable from	, ,	,
federal government)	(121,119)	
To adjust expenditures/revenues for certain major Health and Family Services	, , ,	
and Workforce Development human services payments to local governments	(169,151)	
To accrue State educational aids payments deferred until the subsequent year	(75,000)	
To adjust revenues and expenditures for other items (net)	1,271	(17,936)
Fund balance June 30, 2004 (GAAP fund structure – GAAP basis) as reported on		
the governmental fund statements	\$(1,931,108)	\$ 348,006

# **B.** Budgetary Basis of Accounting

The State's biennial budget is prepared using a modified cash basis of accounting. The final budget is primarily a general purpose revenue and expenditure budget. General purpose revenues consist of general taxes and miscellaneous receipts which are paid into the General Fund, lose their identity, and are then available for appropriation by the Legislature. The remaining revenues consist of program revenues, which are credited by law to an appropriation to finance a specified program or State agency, and segregated revenues which are paid into separate identifiable funds.

While State departments and agencies are required to submit estimates of expected revenues for program revenue and segregated revenue categories, these estimates are not formally incorporated into the adopted budget except for revenue estimates of the Lottery Fund. As a result, legally budgeted revenues for these categories are not available and, consequently, actual amounts are reported in the budget column of the Budgetary Comparison Schedules.

Expenditure budgeting differs for the various types of appropriations. For most appropriations, budgeted expenditures equal the amount from the adopted budget plus any subsequent legislative or administrative revisions. Various supplemental appropriations were approved during the year and have been incorporated into the budget figures.

While State statutes prohibit spending beyond budgetary authority, a provision is made to include the value of accounts receivable, inventories and work in process in identifying available revenues. The State also utilizes nonbudget accounts for which no budget is established but expenditures may be incurred. As a result, actual expenditures may exceed budgeted amounts in certain categories.

The budgetary basis of accounting required by State law differs materially from the basis used to report revenues and expenditures in accordance with GAAP. Other variances arise because the State's biennial budget is developed according to the statutory required fund structure which differs extensively from the fund structure used in the GAAP basis financial statements. This difference is primarily caused by the elimination of the University of Wisconsin System, and various fiduciary, proprietary and other governmental fund activity from the statutory General and Transportation funds. Consequently, a reconciliation between budgetary basis and GAAP basis is provided in Note 1-A of the notes to the required supplementary information.

The Budgetary Comparison Schedules for the General and the Transportation Fund present both the original and final appropriated budgets, as well as the actual inflows, outflows, and fund balance on the budgetary basis. The supplementary budget comparison schedule provides this same information (with the

exception of the original budget data) for the nonmajor governmental funds with annual budgets. The capital project and debt service funds are excluded from this schedule because no comprehensive budget is approved for these funds. A special revenue fund, the Wisconsin Public Broadcasting Foundation, has also been excluded from reporting because it is a blended component unit that is neither budgeted nor included under statutory reporting. Of the permanent funds, only the Historical Society Fund and a portion of the Common School Fund are budgeted.

The State's biennial budget was passed in July 2003. This legislation is recognized by State officials as the original budget and is treated as such on the Budgetary Comparison Schedules.

While the legal level of budgetary control for the reported funds is maintained at the appropriation line as specified by the Legislature in Chapter 20 of the Wisconsin Statutes, this level of detail is impractical for inclusion in the Comprehensive Annual Financial Report. Accordingly, a supplementary report is available upon request which provides budgetary comparisons at the legal level of control.

Appropriation unexpended balances lapse at year-end or forward to the subsequent fiscal year depending on the type of appropriation involved:

- Continuing unexpended balances automatically forward to ensuing years until fully depleted or repealed by subsequent action of the Legislature.
- Annual:
  - General Purpose Revenue unencumbered balances lapse at year end
  - Program Revenue unexpended cash balances may be forwarded to the next fiscal year.
- Biennial unexpended balances or deficits automatically forward to the second year. At the end of the second year all unencumbered general purpose revenue balances lapse.
- Sum sufficient moneys are appropriated and expended in the amounts necessary to accomplish the purpose specified.

Encumbrances may be carried over to the next fiscal year as a revision to the budgetary appropriation with Department of Administration approval. Under budgetary reporting, encumbrances are treated like expenditures and are shown as a reduction of fund balance. Under GAAP reporting, encumbrances outstanding at year end for purchase orders and contracts expected to be honored in the following year are reported as reservations of fund balance since they do not constitute expenditures or liabilities.
